

## **Flotec Industrial Limited Environmental Policy**

Flotec Industrial Limited is committed to achieving a performance in environmental practice that will not only fulfil its moral obligations but will endeavor to exceed the legal requirements.

Flotec industrial Ltd recognises however, that in its day to day operations we inevitably impact on the environment in a number of ways, and it is committed to minimising the potentially harmful effects of such activities whenever possible, on its own and in partnership with others.

As part of our continuing drive for quality in all things we do, we have therefore developed a policy which will enable us to set and publish the effects towards a sustainable environmental improvement.

In this way we aim to protect the health and safety of our own people and visitors to our site as well as the local community.

We will undertake to help every person at Flotec Industrial Limited to understand and implement the relevant aspects of the policy in their day to day work through the communication of objectives

Flotec Industrial Limited environmental management is based on the principal of achieving and continuously improving environmental performance.

To achieve this Flotec Industrial limited will:-

- Meet and where appropriate exceed the requirements of all relevant legislation, where no legislation exists we shall endeavour to set our own standards. Moreover, investigate and apply methods where practical to reduce harmful emissions.
- Seek to reduce consumption of materials in our own operations, reuse rather than dispose whenever possible and promote recycling and the use of recycled materials.
- Work with our suppliers and other to minimise the impact of their operations on the environment through a quality purchasing policy.
- Keep under review the environmental developments in its business area to identify best practice, and introduce improvements to its operating process where appropriate.
- To provide and encourage co-operation of all employees through consultation, awareness and training. Monitor and continually seek to improve performance and publish the results on an annual basis.

We will strive to meet our objects and put into place the constituents of our environmental policy.
