

FLUID POWER CATALOGUE

01509 230100

www.floteconline.com

Leading supplier of hydraulic, pneumatic and pipeline components

- Next Day Dispatch
- Trade Counter Available Monday - Friday
- Hose & Connector Solutions - Supplied Individually or as Bespoke Assembly Packages
- Power & Hand Tools, Engineering Consumables, PPE, and Safety Products
- Discount Structures & Online Ordering Available
- Internal Technical & On-site Engineering Support

Flotec has over 25 years' experience supplying a wide variety of products and services to many industries, including: Rail, Plant Hire, Food Manufacturing, Recycling, Agriculture & Automotive.

From its purpose built 12,000 square foot unit in Loughborough, Flotec is ideally situated to support the UK with over 10,000 product items.

We also provide:

- Fail safe hose assemblies, tested well above standard working pressures and temperatures
- Complete bespoke kit packages
- Route optimisation assistance
- On-site hose management surveys/reports
- Stock profile maintenance
- Full Safe hydraulics training and certification

Our products always meet and exceed the latest EN and ISO regulations standards

HYDRAULIC HOSE RANGE

EN853-1, DIN20022 (Exceeds SAE 100R1AT)

Application:

Medium pressure hydraulic applications

Specification:

DIN 20022, EN853 – 1 Exceeds 100 R1AT

Construction:

Inner tube: oil resistant synthetic rubber (NBR)

Reinforcement: 1 single steel wire braid

Outer cover: oil and weather resistant synthetic rubber

Recommended Fluids:

Hose suitable for petroleum based hydraulic oil and water-glycol based fluids, air and water

NB: For air above 17 bar, the hose cover must be pin-pricked

Available per 1 metre

Smooth cover available on request

Working Temperature:
-40°C to +100°C

EN853-1 DIN 20022 - 2" - 51MM

HYDRAULIC HOSE RANGE

Compact Hydraulic Hose, EN857-1SC

1 Wire Compact Hose

Application:

Medium pressure hydraulic applications with space constraints and greater flexibility is required

Specification:

EN857 - 1SC

Construction:

Inner tube: oil resistant synthetic rubber (NBR)

Reinforcement: 1 single steel wire braid

Outer cover: oil and weather resistant synthetic rubber

Recommended Fluids:

Hose suitable for petroleum based hydraulic oil and water-glycol based fluids, air and water

NB: For air above 17 bar, the hose cover must be pin-pricked

Available per 1 metre

Smooth cover available on request

Working Temperature:
-40°C to +100°C

HYDRAULIC HOSE RANGE

MSHA Approved, EN853, DIN20022 (Exceeds SAE 100R2AT)

2 Wire Compact Hose

Application:

Medium pressure hydraulic applications were MSHA approval and certification is required

Specification:

MSHA Approved, DIN 20022, EN853 – 2SN, exceeds SAE100 R2AT

Construction:

Inner tube: oil resistant synthetic rubber (NBR)
Reinforcement: 2 single steel wire braids
Outer cover: MSHA approved oil and weather resistant synthetic rubber

Recommended Fluids:

Hose suitable for petroleum based hydraulic oil and water-glycol based fluids, air and water

NB: For air above 17 bar, the hose cover must be pin-pricked

Available per 1 metre
Smooth cover available on request

Working Temperature:
-40°C to +100°C

Multi Spiral, EN856-4SP

Standard hydraulic adaptors do not adhere to the working pressure of multi spiral hose. Please use KR500 Hydraulic Adaptors for high pressure and multi spiral applications.

Application:

High pressure hydraulic applications

Specification:

EN856-4SP

Construction:

Inner tube: oil resistant synthetic rubber (NBR)

Reinforcement: 4 high tensile steel spirals

Outer cover: oil and weather resistant synthetic rubber

NB: External skive required

Recommended Fluids:

Hose suitable for petroleum based hydraulic oil and water-glycol based fluids, air and water

Available per 1 metre

Smooth cover available on request

Working Temperature:
-40°C to +100°C

For full range of Hydraulic QRC's see pages 289-320

Thermoplastic, SAE 100R7

100R7 Hose

Application:

Thermoplastic hose with perforated cover for use on medium pressure hydraulic applications.

Specification: SAE100 R7

Construction:

Inner tube: thermoplastic elastomer

Reinforcement: 2 single textile yarn braids

Outer cover: high abrasion resistant polyurethane

Recommended Fluids:

Hose suitable for petroleum based hydraulic oil and water-glycol based fluids, lubricating oils, solvent and gas transfer

Available per 1 metre

Working Temperature:

-40°C to +100°C.

HYDRAULIC HOSE RANGE

Oil Suction & Delivery Hose

Application:

General low pressure suction and delivery applications

Construction:

Inner tube: oil resistant synthetic rubber (NBR)

Reinforcement: woven textile yarn braids with a suitable spiral of steel to prevent collapse under vacuum

Outer cover: oil and weather resistant synthetic rubber

Recommended Fluids:

Hose suitable for petroleum based hydraulic oil and water-glycol based fluids, lubricating oils, air and water

Available per 1 metre

**Working Temperature:**

-40°C to +100°C

**Maximum Working Pressure:**

Go/No Go Gauge

Hydraulic hose collapse mandrels are used to check if the ferrules have collapsed enough after swaging. By placing this mandrel inside the fittings orifice after swaging, if it is not possible to push all the way through, the ferrule has been swagged enough. If it is still possible to push the mandrel all the way through, the ferrule needs swaging more.

Sold as halves, two halves required for each flange insert.

Sold as halves, two halves required for each flange insert.

Bolts, washers and O-rings are not included and must be purchased separately

PUSH STYLE HOSE SYSTEM

This range of quality hose and fittings has been designed and tested to fully comply to the specification of our SAE 100R6 hose.

The self grip style tail eliminates the requirement for swaged ferrules.

Hoses are available in a range of four colours, with standard end configurations of Metric DIN 2523, BSPP and JIC with A3C plated steel (other thread types and materials available upon request).

BENEFITS OF PUSH STYLE SYSTEM:

- High quality, complete low pressure hose system
- Fittings fully reusable
- No tooling required for assembly
- Fittings available in steel (stainless steel and brass available upon request)
- Static conducting hose available upon request
- System suitable for use with hydraulic oil, water, compressed air and water glycol based fluids at low pressure

FOUR COLOURS AS STANDARD FOR:

- Easy identification
- Identification of a particular medium by colour selected
- Colour-coded maintenance intervals

100R6-04-50 - EN854 - SAE 100R6 - 1/4" - 06MM -

 **Working Temperature:**
-40°C to +100°C.

 **Maximum Working Pressure:**
28 bar

HYDRAULIC HOSE RANGE

Oil Return/Fuel Hose SAE 100R6

100R6 Hose

Application:

Low pressure hydraulic applications, for use with push style fittings. See page 40

Specification:

SAE100 R6, exceeds EN854

Construction:

Inner tube: oil resistant synthetic rubber (Nbr)

Reinforcement: 1 single textile yarn braid

Outer cover: oil and weather resistant synthetic rubber

Recommended Fluids:

Hose suitable for petroleum based hydraulic oil and water-glycol based fluids, air and water

Available per 1 metre

Working Temperature:
-40°C to +100°C.

RETENTION SYSTEM FOR PRESSURE HOSES

Prevent whipping of a pressurised hose in the event of the hose separating from its fitting

Suitable for various applications, including:

- DIN and BSP Fittings
- JIC Fittings
- SAE Flanges

- Protects both the operator and components
- Recommended by the International Hydraulic Safety Authority - the world leader in hydraulic safety training
- Suitable for all kinds of flexible hose
- Tested protection: compliant with EN 853, EN 854, EN 855, EN 856, EN 857, SAE J517

How it works...

1: Disengagement:

A hose disengages from its ferrule.

2: Release/venting of pressure

The pressurised oil exits from the hose and the release of energy results in the hose gaining considerable velocity, triggering a hazardous "whip effect" which is very dangerous to anyone or anything in its vicinity.

Step 3: Restraint

This is where the Stopflex system gets into operation: the stainless steel cable is tensioned and restrains the hose, preventing it from 'whipping'. The plate cuts into the rubber of the hose, to ensure that the clamp remains firmly attached. The hose clamp and plate absorb the force released from the travel of the flexible hose. This critical step occurs within just a few seconds.

Retention System for Pressure Hoses

FIRE SLEEVE FT PRO[®]

Shield your hoses from extreme temperatures

The tried and tested red oxide silicone coated glass protective sleeving is popular requirement for application in mining, petrochemical process, aerospace and steel works settings.

The protective sleeve is easily installed whilst assembling a hose or can also be retro-fitted during maintenance and repair activities.

In addition to defending critical equipment in harsh environmental conditions, the sleeve also mitigates health and safety risks by eliminating temperature extreme hazards so that scorching and burning injuries are avoided.

- Continuous protection at 260°C ambient temperatures
- Withstands molten metal splash at 1200°C
- UL94 flammability V-0
- Worker safety protection against lines that carry hot or volatile fluids
- Resistant to tears and abrasion
- Highly flexible and easily fitted
- MSHA approved
- RoHS 3 compliant

Fire Sleeve MSHA UL 94 V-0

Galvanised Steel Spring Hose Guard

Open coil spring guard is a very effective and economic means of protecting hoses from expensive abrasive and crush damage.

Manufactured from high tensile spring steel wire. Available in other sizes on request.

These products cannot be ordered online, please contact our sales office.

PROTECTIVE HOSE SLEEVES

Hose Protection Sleeve

The most economical option for managing, containing and protecting your hose, cables and other equipment.

Applications include protection for hose assemblies, ropes and wire harnesses.

- MSHA approved for underground mines, IC 171/1
- ISO 6945 abrasion standard, minimum 50,000 cycles
- Melting point: +220°C
- Resists mildew and bacterial growth
- Non-toxic
- Excellent resistance to UV ageing
- Very good chemical compatibility

Tech Sheet 20377

Nylon Hose Protection Sleeve

This textile sleeve consists of nylon multifilament. Complying with European standards, it has excellent abrasion resistance, and is ideal for protecting people, environment and machinery against any possible hydraulic hose oil leakage or spill.

- Material: nylon (polyamide)
- Thickness: 0.8mm (European standard)
- Melting point: +230°C
- MSHA approved: IC 293-1
- ISO 6945 abrasion standard, minimum 50,000 cycles
- UV solar protected: BS EN 13758-1
- Burst and leakage protected: SAE J343/ISO 3457
- Conductivity requirement: ISO 8031 approved
- Pin hole test approved

° Working Temperature:
-40°C to +125°C
(the sleeve loses 10% of its resistance at +125°C)

Tech Sheet 68268

Hose Burst Guard

Our highest performance sleeve, designed to control and dissipate fluids from dangerous hose bursts.

For use in line-of-sight applications, to help protect personnel and equipment from the effects of a hose failure.

- MSHA approved IC171/1
- Outer layer withstands a minimum 350,000 cycles, abrasion tested using ISO 6945 test method
- Controls bursts up to 13,000 psi
- Two-layer structure with inner yellow layer acting as an abrasion indicator
- Meets ISO 3457, 4413, 6945, 6805, EN 414, MDG 41 and MSHA IC171/2
- Excellent resistance to UV ageing
- 40 metre lengths available on request
- Melting point: +215°C

° **Maximum Burst Control Pressure:**
890 bar

Hose Wrap Sleeve

Ideal for hose bundling, adding abrasion protection post assembly or replacing damaged existing sleeves.

- Quick assembly
- Lightweight
- Proprietary bonding process allows cutting without fraying
- Meets ISO 6945 abrasion standard
- Excellent UV resistance
- Velcro fastening with shear strength of 22 psi
- Maximum temperature without degradation: +225°C

Spiral Hose Guard Features

- Provides high strength abrasion resistance for most types of hydraulic, pneumatic and industrial hose assemblies across a wide range of industries including: mining, forestry, drill rigs, plant and agricultural machinery, automotive, marine and offshore
- Exceptional anti-crushing performance
- High abrasion resistance
- Good UV resistance
- Easy installation and routing
- Proven in arduous conditions
- Conveniently coiled and packed in cartons for easy storage
- Suitable for wrapping single hoses or multiple hose looms

Tech Sheet 10265

Larger sizes are available; speak to your account manager for further information.

The pellet launcher uses compressed air to fire a foam pellet through tube, pipe and hose, clearing soft deposits and loose debris as it travels through.

The pellet launcher is designed to operate at 80-110 psi and should be connected, by a 3/8" (10mm) ID air line, to an air source NOT exceeding 150 psi.

Maximum Working Pressure:
0 bar

Pellet Launcher Kits

The mobile kit is specifically for use with hose, tube and pipe from 5mm to 50mm. The hose nozzle fits over the tube, hose or pipe to be cleaned.

The specially designed and extremely robust pellet launcher controls the air flow. It attaches to a 50mm crimp head through a patented interlocking system. The nozzles are inserted into the head. These are designed to reduce the pellet in size for insertion into the pipe.

All nozzles fit into the 50mm crimp head. All kits come in a case with instruction manuals and a pellet usage chart for identifying the correct pellets to use with your application.

This kit consist of the following:

- AM-1™ hand piece
- 50mm crimp head
- Adapter ring
- White hose nozzles: 6, 8, 10, 13, 16, 19, 25, 32, 38 and 50mm

Mobile Kit

0489	Thread	Nozzle Quantity	Nozzle Hole Size
MOBI-KIT	1/4"	10 x Hose Nozzles	6mm to 50mm
Tech Sheet 60438			

Pellets used in the system will travel through 90° angles, tee joints, coils, U tubes, bore and straight-through valves.

The specially designed and extremely robust pellet launcher controls the air flow. It attaches to the 32mm and 50mm heads through a patented interlocking system. The nozzles are inserted into the head. These are designed to reduce the pellet in size for insertion into the pipe.

All nozzles fit into either the 32mm or 50mm heads. All kits come in a case with instruction manuals and a pellet usage chart for identifying the correct pellets to use with your application.

This kit consist of the following:

- AM-1™ hand piece
- 32mm and 50mm heads
- White hose nozzles: 6, 8, 10, 13, 16, 19, 25, 32, 38 and 50mm
- Green tube and JIC nozzles: 5, 6, 8, 10, 13, 16, 19, 22, 25, 32, 38 and 50mm
- Blue BSP nozzles: 6, 10, 13, 16, 19, 25 and 32mm

Foam Pellets

Standard pellets are designed for removal of debris from all hose, tube or pipe, without fittings. Pellets are manufactured from foam and should be approximately 15-20% larger than the ID of the hose, tube or pipe being cleaned. Please select the pellet closest to the size required from the list.

Plugtite Industrial

Designed and used to prevent the leakage and contamination of various fluids, including hydraulics and chemicals, during the service, maintenance and storage of machinery and equipment. Used in industrial areas such as hydraulic, chemical, processing, MRO, HVAC, mining and heavy equipment.

Made from a special compound in our own factory

The **Plugtite** aperture has been designed and engineered to give the plug greater compression than standard solid plugs, ensuring a perfect seal whilst still being able to be cut to size if needed.

- Greater resistance to most oils within the temperature range of -25°C to +90°C
- Does not shrink, leak or discolour
- Resistant to sunlight for greater shelf life; does not split/crack or deteriorate
- Easy to use; insert, squeeze, press home and release
- The compressed rubber ensures a tight fit

Other Members of the Plugtite Family

Plugtite - Hygiene FDA Approved

This plug is specifically produced for use in the food and beverage processing industry.

The use of the plugs helps to ensure that sensitive working areas are kept free of contamination from oils and other fluids by preventing leakage when cleaning and servicing machinery and equipment.

Plugtite - Heat Resistant

For use in operations such as electrostatic lines, die casting, etc, where high heat resistance is a requirement.

3 Standard Apertures

- Plugtite Small 2mm to 14mm
- Plugtite Medium 6mm to 24mm
- Plugtite Large 15mm to 45mm

The new generation of service and maintenance plugs

SERVICE PLUGS

Spill Prevention

- Stop contamination
- Plugtite products are used to prevent contamination of all sorts of chemical compounds into the surrounding environment

 **Working Temperature:**
-25°C to +90°C

Our extensive range of adaptors includes stock of more than 3000 different variations of JIC, SAE, Metric, BSP, BSPT, NPTF and NPSM made from mild steel (BS EN 10277:3:199 – 230M07Pb).

We specialise in not just one type of product – we have the flexibility to produce special requirements alongside our standard product ranges. This diversity of ranges and sizes, combines with our unparalleled customer service and technical assistance.

The market for hydraulic adaptors is a truly diverse one. Hydraulics are used in almost every facet of industry: Agriculture, Transport, Waste, Defence, Manufacturing, Marine, Construction, Mining, Engineering, etc. Hydraulic power plays a crucial global role in keeping these and other industries moving.

THREADS AND DIMENSIONS

- BSP adaptor dimensions are compatible with ISO 8434-6 and BS 5200.
- BSP DIN spec adaptors are to DIN 3852 Form A.
- BSPP and NCB threads are to BS EN ISO 228-1.
- BSPT threads are to BS EN 10226-1.
- JIC adaptors are to SAE J514.
- JIC and SAE threads are to BS 1580.
- JIS are to JIS B 8363
- Metric threads are to BS 3643-2.
- NPTF threads are to ANSI B1 20.3

PLATING

- Acid zinc plating is to ISO 2081, Fe/Zn8/A/T2.
- Fe = Ferrous substrate.
- Zn8 = Zinc coating 8 microns thick.
- A = Clear passivate.
- T2 = Application of organic or inorganic sealants.

MATERIAL

- Steel used for stock parts is 230M07Pb/11SMnPb37 as to BE EN 10277-3.
- Stainless is grade 316 to BS EN 10277-1.

10,000 PSI RATED, 316 STAINLESS STEEL ADAPTORS

stainless steel

These fittings within the industry are known as 10K fittings which have a 10,000 psi working pressure rating. All BSPP fittings are 60° coned for connection to hoses.

Maximum Working Pressure:
10,000 psi (690 bar)

Male x Female Elbows

Flaretite

The Flaretite Seal is a metal stamping, designed with multiple, concentric sealing rings.

The entire seal is coated with a **dry-to-the-touch**, baked-on Loctite™ sealant. When inserted into a fitting, the concentric rings form multiple seals on the face of the flare, while the Loctite™ coating fills minor imperfections and abrasively increases the integrity of the fitting. New ISO and NFP standards strongly recommend seals for all fittings.

- Fits all standard JIC/SAE/JIS flare fittings, hydraulic and pneumatic
- Has a user-friendly tab to clip the seal onto the fitting
- Protects against weeping on new and old fittings
- Creates a perfect leak-free clip-on seal, guaranteed
- Complies with latest international standards

Other seals available on request.

Working Temperature:
-40°C to +150°C

HYDRAULIC SEALS

SAE Flange Seals

Designed to fit the SAE J518 location grooves. Made from high performance grade of polyurethane, the material provides excellent resistance-to-gap extrusion. Covers a wide temperature range from -40°C to +110°C at pressures up to 400 bar.

Contents:

10 x 1/2"
10 x 3/4"
10 x 1"
10 x 1.1/4"
10 x 1.1/2"
10 x 2"

Splicing Kit

Ideal for repairing or replacing damaged O-Ring seals.

Material: Nitrile

Contents:

14 x standard sizes of O-Ring cord
1 x tape measure
1 x cutting block
(for butt or scarf joins)
1 x cutting knife
1 x tube glue

Rubber Cord:

2 metres of each size:
1.78, 2, 2.4, 2.62, 3, 3.53, 4, 4.5, 5,
5.33, 5.7, 6, 7 and 8mm.

Walform Machine Hire

Hire available with an order for Danfoss Waltech compression fittings, tube and clamp

Hassle free hire includes:

- **Walform machine**
- **Tooling**
- **Shipping and Collection**

Hire available now with order for Danfoss Waltech compression fittings

MALE STUD COUPLINGS

CUTTING RING COUPLINGS DIN 2353/ISO 8434-1

Waltech Hydraulic BITE TYPE Fittings

Waltech offer a complete product range and highest quality:

Based on this principle Waltech offers one of the most comprehensive product ranges for tube coupling systems.

The Waltech programme includes cutting ring, soft seal, flared coupling and flange couplings, plus a wide range of accessories

The Waltech range of hydraulic compression fittings cover sizes from 6mm od to 42mm od in light-duty and from 6mm od to 38mm od in heavy-duty.

Manufactured to DIN 2353 standard, mild steel with C6F free surface coating, each compression fitting is supplied complete with cutting ring and nut

Pressure Range Guide: **Heavy-duty**

Light-duty 6mm OD-16mm OD = 630 bar

6mm OD-18mm OD = 400 bar 20mm OD-25mm OD = 400 bar

22mm OD-42mm OD = 250 bar 30mm OD-38mm = 250 bar

These pressures are for guide purposes only and please consult our technical department for specific applications

Tech Sheet 1686

Swivel banjos are connecting components between pipe work and equipment to allow swivel movement and slow speed rotation. These connections have a low starting torque and are leak-free and require no maintenance.

Tech Sheet 1712		

VALVES

Compression Ball Valves

Tube connection both ends. The ball seal is pre-loaded, which ensures tight sealing even at lower pressures.

Owing to the ball's floating position, any rise in pressure will progressively push the ball closer to the seal.

Ball valves can be fitted in any position at 45° angles.

HIGH PRESSURE METRIC TUBE COUPLINGS

Benefits:

- Leak free O-Ring seal
- Safe joint every time
- Low tightening torque and clamping force rises with the internal pressure
- Low installed cost, no welding (so inert gas purging and T an excessive flushing are not required), minimal tube preparation and no special assembly equipment required
- Demountable and reusable, can be used with most tube materials

Working Temperature:

Nitrile: -40°C to +100°C

Viton: -20°C to +150°C

Features:

- Body – mild steel, stainless steel or cupro-nickel. Compatible with most fluids and environments. Locates O-Ring and tube.
- O-Ring – nitrile, FPM (Viton), EP or FEP encapsulated FPM. Compatible with most fluids. Highly resistant to leakage even under severe vibration, pressure pulsation and temperature cycling. Provides diametric seal between tube OD and body cavity.
- Nut – mild steel, stainless steel or cupro-nickel. Compatible with most environments. Closes split collet and retains sealing mechanism.
- Back-up washer – mild steel, stainless steel, or cupro-nickel. Provides additional support from the tube and locates the O-Ring.
- Split collet – mild steel, stainless steel or cupro-nickel. Clamping force rises with pressure. Large clamping area ensures minimal deformation of the tube. Retains tube in position.

Maximum Working Pressure:

6mm to 22mm: 680 bar

25mm to 50mm: 500 bar

Technical:

- 3:1 safety factor
- Derate by 50% for high pressure gas systems
- Pressure ratings based on the tube OD tolerance to BS3602 and DIN2391C

All fittings also available in the following materials upon request:

- Stainless steel
- Cupro-nickel

Seals available on request:

- EP (ethylene propylene)
- FEP encapsulated FPM
- All fittings supplied with Nitrile seals as standard.

For Stainless Steel 304 & 316 see section 10 page 1225

Many of our products are produced in stainless steel (304 or 316) so if that is your focus and to simplify product selection, we have all our products regardless of type or application grouped in **section 10** (coded yellow) of our catalogue.

Food safety starts with rigorous hygiene and nickel-containing stainless steels are the superior, reliable standard at every link of the food and industry supply chain. Though it may not be inherently antimicrobial, stainless steel, particularly 304 or 316 stainless steels, are one of the best materials to use in a food and beverage processing environment.

Industries

- Food
- Brewing
- Transport
- Pharmaceuticals
- Chemicals

Stainless steel is commonly used in the food industry because of its non-toxicity and ease of cleaning. This material does not react chemically with other substances and can be cleaned with high temperatures. In the process of disinfection, we can also use most of the available detergents. Stainless steel is not absorbent and after rinsing its surface with water, you can freely use it for food processing. This material is extremely durable and does not require regular and expensive maintenance. Although stainless steel can be slightly more expensive than other raw materials, it is an excellent compromise between the interests of the consumer and manufacturer.

Technical details of ISO 8434-1 24° Fittings
Cone sealing couplings with 24° Cone and O-ring - FPM

There are several advantages to using DKO couplings:

- They are simple to assemble with low torque requirements.
- There is a wide variety of couplings to choose from.
- They are also easy to combine with each other.
- Additionally, DKO couplings have a super low leakage rate thanks to the O-ring sealing.

STAINLESS STEEL COMPONENT PARTS

stainless
steel

Silver Plated Stainless Steel Nuts (AGP)

There is a high risk for cold welding (gripping) at the threads without silver-coating.

Together with ABF-grease easy assembly due to reduction in tightening torque by up to 70%.

Reduced torsion load to the coupling body.

Applications: Marine industry.

Light-duty

0294	Thread	OD mm
M18L-1.4571AGP	M26 x 1.5	18

M38S-1.4571AGP	M52 x 2	38

ABF Anti Bloc Grease

Special grease for the installation of stainless couplings, material 1.4571.

Applications: Marine industry.

To avoid gripping and reduce the coefficient of friction.

INTRODUCING TWIN FERRULE TUBE COMPRESSION FITTINGS

stainless steel

Panam Instrumentation tube fittings provide a zero leak proof seal which will withstand high pressure, impulse, vibration and temperature. These features offer high safety and maintenance free smooth working. Each component is precision machined to the most accurate tolerance; maintain TQM practices throughout manufacturing process.

The fittings are manufactured in accordance with ISO9001 quality standards and CE marking requirements with complete traceability records available upon request.

Available in 316 SS, Brass, CS, Monel materials in a variety of end connections. Straight fittings are machined from bar stock and shaped bodies are machined from forgings.

The fittings are used on instrumentation process control systems, analysers and environmental equipment in oil and gas, Petro-chemical, Power generation, Pulp and Paper industry and many more.

Assembly Instructions

SIZE M6 thru M25 (6mm-25mm) SIZE M3 thru M4 (3mm-4mm)

1-1/4 Turns from Finger Tight

Only 3/4 Turn from Finger Tight is necessary to seal and will result in additional remakes of the fitting

- 1 Insert the tubing in to the Tube Fitting until it comes up to the tube stop.
- 2 Ensure that the nut is finger tight and tighten the nut 1-1/4 turns as shown in figure.
- 3 For 1/8" and 3/16 Fittings only 3/4 turns as shown in Fig-3.

Functions

- Compression nut Threads are silver plated which prevents galling.
- Back Ferrule locks together the fittings and tube forms a primary Seal which absorbs the pressure pulses and vibration.
- Front Ferrule Forms a secondary seal which connects tube and fitting and guarantees a bubble tight Zero Leak Sealing.
- Rugged body construction, high precision machined surface and standardised tolerances provides maximum trouble free service life in severe working conditions.

The above illustrates sealing action of a Tube Fitting assembly which takes place after the assembly is fully tightened

Identification of Twin Ferrule Fittings

Metric Tube End with Stepped Shoulder on Nut and Fitting

Imperial Tube End

The Metric size of the Fittings have extra stepped shoulder on the body and nut to distinguish them from imperial size.

All Dimensions are in mm unless otherwise stated. Dimensions are for reference only, subject to change.

Material Standards

Material	Bar Stock a	Forging b	Tubing
316 Stainless Steel	ASTM A276 ASME SA479	ASTM A182 ASME SA182	ASME-SA-213 / ASTM-A-213/ ASTM-A-249 / ASTM-A-269 / MIL T-88504 / MIL T-8506

Hydraulic Tubing

Maximum working pressure has been determined according to DIN 2413 scope of application 1, for primarily static load at temperatures up to 120°C.

3 metre lengths next day.

6 metre lengths may take up to 3 working days to be delivered, dependant on weight and delivery address location. Additional carriage charges may apply.

For full details please contact our Business Development Team.

Minimum of 10 Lengths is advised up to 8mm to prevent damage in transit.

Hydraulic Tube Clamps

Our quality range of Hydraulic Tube Clamps have been manufactured to the highest specifications using quality materials and conforms to DIN 3015 and DIN 3570 Standards.

The vast range includes:

Light, heavy and double units in sizes ranging from 6mm to 168.3mm. Body materials of polypropylene, polyamide, rubber and aluminium, also with plates and bolts in steel (zinc plated) and stainless steel offering anti-corrosion and fire retardant options. U bolts, pipe saddles, steel clamps and O clamps are available.

The range is tried, tested and used extensively throughout the world's manufacturing facilities and in the mobile plant industry.

Applications:

- Hydraulics
- Construction
- Agriculture
- Mining
- OEM Machine Building
- Offshore
- Marine
- Automotive Technology
- Machine Tool
- Lubrication Systems

If you have any requirements for sizes or types of clamps not shown in the catalogue, please contact a member of our sales team.

HYDRAULIC TUBE CLAMPS

We have simplified the selection of this clamp range by making it self selection.

Select in the following order.

1. Clamp body by material, series, group and tube size.
2. Weld plate by series and group.
3. Top plate by series and group (not required with slotted head and socket head bolts as they countersink into body).
4. Bolts by series and group.

As a regular feature of Series A and B clamps, screws, rail nuts and cover plates are zinc coated, welding plates phosphatized and support rails uncoated.

As a regular feature of Series C clamps, all steel parts are uncoated.

Please order the **same series** to make complete clamp, i.e. **Series A** clamp, **Series A** top plate and **Series A** bottom plate and **Series A** screws or bolts.

**High Pressure
Tube Couplings**
see pages 138-140

Visitec Clamping Nuts, Light Series

The rail nut with loss protection.

The larger flange area prevents the rail nut falling into the rail during installation which is a problem inherent to the traditional design. The new design has a vibration and sound installation function.

The rubber cap has an integrated screw locking device. Fast and easy to install, easy to adjust, especially for vertical installations.

Advantages:

- Vibration and sound insulating function
- Designed especially for vertical installations
- Fast and easy to install
- 40% time savings for installers

MULTICLAMP

Multiclamp is a system of components, each one engineered to a high standard, that together build to provide effective, all purpose pipe work clamping. Available in a single, double and multiple hole clamps across 3 sizes, each with a range of split bushes allowing the clamping of hose or pipe with diameters from 6mm up to 50mm.

Features

- High quality pipe clamping system in 3 ranges Series 10, 16, 32
- Covers a range from 6mm up to 50mm
- 26 different diameter, high quality split rubber bushes
- Plated steel construction with anti-corrosive, full passivate
- Stainless steel option available upon request

Cetop 3 Valves

Solenoid Operated Directional Valve DG4V-3-60 Design

General Description

Solenoid operated directional control valves are for directing and stopping flow at any point in a hydraulic system.

- Efficient control of greater hydraulic powers without increasing solenoid power consumption.
- Installed cost and space savings from higher power/weight-and-size ratios.
- Installation flexibility resulting from choice of numerous combinations of solenoid connectors and locations.
- Viton seals as standard for multi-fluid capability. Nitrile seals available as a model code option.

- Higher sustained machine productivity and higher uptime because of proven fatigue life and endurance, tested over 20 million cycles.
- Solenoid coils can be changed quickly and easily without leakage from hydraulic system.
- Compact, cost effective system design when used with Vickers SystemStak™ valves and subplates.

DG4V-3 High Performance Valves

- Available with manual overrides for industrial or water-resistant overrides for mobile applications.
- Minimum pressure drop 2.5 Bar at 30 lpm.
- Range of coil voltages.
- Up to 80 lpm at 350 Bar.
- Offers designers the opportunity to select the optimum value package for each application.
- International standard interface. The valve mounting face conforms to ISO 4401, size 03 and is compatible with related international standards.
- Alternative coil voltages and connectors such as Deutsch, Amp and terminal box are available, contact sales office for a quotation.

Cetop 5 Valves

Solenoid Operated Directional Valve DG4V-5-20/22 Design

General Description

A range of four-port solenoid operated directional control valves with four-land spool design to facilitate provision of smooth, variable valve response speeds.

The range includes:

- AC and DC wet-armature solenoid options with ISO 4400 (DIN 43650) electrical connections and manual overrides and manual overrides for industrial or water-resistant overrides for mobile applications.
- Variable speed changeover potential in all DC models; see "Response Times" section.
- Many spool types; in spring-offset, spring centred and detented arrangements.
- Compact, cost effective system design when used with Vickers® SystemStak™ valves and subplates.

HYDRAULIC DIRECTIONAL CONTROL VALVES

CETOP 5 Single Solenoid Directional Control Valves

Max flow rates up to 120 L/min.
 Mounting interface.
 ISO 4401 Size 5.
 NFPA D02
 DIN 24340 (NG10).

Temperature Limits:
 Min -20°C (-4°F)
 Max +70°C (+150°F)

Working Temperature:
 -20°C (-4°F) to +70°C (+150°F)

Maximum Working Pressure:
 350 bar (5075 psi)

Vane & Piston Pumps

Vickers Vane Pumps – V10 and V20

- V10 and V20 balanced vane type construction.
- High performance.
- Enhanced bearing life.
- Low cost.
- High flow, pressure and speed capabilities enable these pumps to meet the hydraulic circuit needs of many types of modern machinery.

Vickers PVQ inline variable displacement pumps.

- Available in five displacements from 10.55cc/rev to 41.00cc/rev.
- Low noise characteristics.
- Choice of pump compensators, high and low-pressure compensator, remote compensator, and load sense compensator.
- Pump stroke adjustment kits available for all sizes.

Vickers Intravane pumps – 25V, 35V and 45V.

- High performance.
- Low noise characteristics.
- The cartridge design offers fast and efficient field serviceability.
- Eleven flow displacements and high operating pressure capabilities provide optimum selection and single source capabilities.

Vickers PVM variable displacement axial piston pumps.

- Available in six displacements from 18cc/rev to 131cc/rev.
- 315 Bar continuous working pressure across all displacements.
- Low noise characteristics.
- Compact size envelope.
- Available as pressure compensated or load sensing.

HYDRAULIC ACCUMULATORS & ACCESSORIES

Diaphragm Accumulators

- Low cost non-repairable accumulators
- High reliability gas sealing system, ensures no leakage
- Electron beam welded steel shell
- Parallel threads with bonded seal recess ensures easy connection with no leaks
- **Material:** steel shell electron beam welded. Non repairable
- Nitrile membrane for mineral oil or non aggressive fluid

HYDRAULIC HAND PUMPS

Pumps

Double acting pump for double acting cylinder.

Features:

- Cast iron body
- Piston treated with Niploy
- White zinc-plated support lever
- Lever connection OD: 27mm
- White zinc-plated external parts
- Oil tank mounting kit included
- Hydraulic brake to operate under 50 bar
- Pressure relief valve (standard setting): 100 bar

 **Maximum Working Pressure:**
350 bar

Double Acting Pump with 4/3 Diverter Valve, PRV & Dual PO Check Valve

0462	Displacement cm ³	Thread	Max Pressure Bar	Model	To Suit
HHP-05	25	3/8"	350	Tank Mount	Double Acting Cylinder

Tech Sheet 60149

Single acting pump for single acting cylinder.

Features:

- White zinc-plated steel body
- Piston treated with Niploy
- White zinc-plated external parts
- Release lever

 **Maximum Working Pressure:**
220 bar

Single Acting Foot Pump with 1.5 Litre Reservoir

0462	Displacement cm ³	Thread	Max Pressure Bar	To Suit
HFP-01	15	1/4"	220	Single Acting Cylinder

Gear Pumps

Roquet is a premium manufacturer of gear pumps and motors ranging from 0.33-150 cm³/rev. As standard, all Roquet gear pumps are manufactured with cast iron front and rear covers; reducing noise and increasing the product's life cycle. This design also enables the unit to accommodate in-built valves for speed control, etc.

Roquet pumps have an anechoic chamber, where the pump is housed to reduce noise levels.

Gear Pumps

A gear pump is a positive displacement pump. It contains two identical interlocking gears, supported by separate shafts.

Generally, one gear is driven by a motor, and this in turn drives the other gear (idler gear).

Fixed volumes of fluid are enclosed between the outer gear teeth mechanically using a cyclic pumping action. This delivers a smooth and pulse-free flow, which is proportional to the rotational speed of the gears.

Close tolerances between the gears prevent fluid from transferring back through the centre. Also, close tolerances between the gears and the casing allow the pump to create suction at the inlet, and prevents fluid leaking back from the outlet. (Leakage is more likely with low viscosity liquids)

Hydraulics

Gear Motors

Roquet is a premium manufacturer of gear pumps and motors ranging from 0.33-150 cm³/rev. As standard, all Roquet gear motors are manufactured with cast iron front and rear covers; reducing noise and increasing the product's life cycle. This design also enables the unit to accommodate in-built valves for speed control, etc.

Roquet gear motors have an anechoic chamber where the motor is tested to reduce noise levels.

Gear Motors

A gear motor is a mechanical actuator converting hydraulic pressure and flow into shaft rotation and torque. It is the rotary counterpart of the hydraulic cylinder.

Similarly to a gear pump, a gear motor consists of two identical interlocking gears, the driven gear and the idler gear. High-pressure oil enters the inlet side of the motor and flows around the outer periphery of the gear teeth - the gears mesh, which prevents the oil from coming back to the inlet from the outlet side.

For lubrication, a small amount of oil from the pressurised side bleeds through the bearings, and vents to the low pressure side, or through the drain port.

ALUMINIUM GEAR MOTORS

Roquet
making moves

Group 1

Series: L0

Body: Aluminium

Displacement: from 1cm³/rev to 6,63cm³/rev

- Motors with back cover in built valves available.

1:8 Taper Shaft, 4 Bolt European Flange, BSPP Ports, Clockwise Rotation

3014	Displacement (cc/rev)	Continuous Max Pressure (bar)	Intermittent Max Pressure (bar)
1ML01.5DE10R	1	275	300

Tech Sheet 71711

Group 2

Series: G

Body: Aluminium

Displacement: from 4cm³/rev to 26,67cm³/rev

- Motors with back cover in built valves available.

'G' series improvements over previous 'L' series:

- More drive shaft designs are available.
- Shorter multiple pumps.
- Higher torque admissible.
- Higher torque from rear pumps in multiple pumps.

1:8 Taper Shaft, 4 Bolt European Flange, BSPP Ports, Clockwise Rotation

High Pressure In-line Filters

Features:

- Filter element remains in filter bow
- Environmentally-friendly design
- Bypass valve integral part of filter bow

Benefits

- Avoid use of non-genuine parts
- Less space needed to change/service filter
- Reduces environmental waste by over 50%
- No handling of loose reusable parts
- Easy to integrate in manifold systems
- Lower pressure lost across filter

Typical Applications:

- Mobile working hydraulics
- Mobile drive system
- Pilot line filtration
- Servo controls
- Reverse flow valve application
- Industrial working hydraulics
- Control systems

Also available with various connections:

- SAE flanged
- SAE threaded
- ISO metric
- Manifold mounted

iprotect® glass fibre element as standard

Working Temperature:
-40°C to +100°C

Maximum Working Pressure:
450 bar

HYDRAULIC FILTRATION

Medium Pressure Filters

Features:

- More compact solutions are possible
- Filter element remains in filter bowl during filter servi
- Reduces waste over 50% thanks to reusable element core
- No risk of installation mistake due to a 'foolproof' design
- Easy to integrate into hydraulic manifold solutions

Benefits

- Avoid use of non-genuine parts
- Less space needed to change/service filte
- No handling of loose reusable parts
- Lower pressure lost across filte

Typical Applications:

- Compressor lube oil
- Off-line filter loops
- Machine tools (automotive standard)
- Hydrostatic drive charge pumps
- Mobile equipment
- Pilot lines for servo controls
- Oil patch drilling equipment

 **Working Temperature:**
-20°C to +100°C

Gauge Isolator Valves

Designed to prevent pressure gauge damage and extend gauge life. The gauge isolator valve when installed between gauge and pressure line protects the pressure gauge from continuous hydraulic pressure, surges or shock loads.

Single Station:

Cast iron and steel. Knurled aluminium knob twist to lock or push to read type.

Maximum W/P:
350 bar

Port Size:
Single station = G1/4

Weight:
Single station = 0.90kg

Single Station

0045	Description	Port Size
G11414	Push to Read	1/4"

Modular Filler Breathers

Construction:

Moulded in non-corrodible glass-filled nylon combining strength with lightweight design.

Options:

- Single 63mm diameter hole filler breather installation that eliminates drilled and tapped holes using self-locking clamps
- 6 hole filler breather installation that uses 6 x No. 10 thread forming screws
- 3 hole filler breather installation that uses 3 x No. 10 thread forming screws

Filtration: Expanded polyurethane foam, 10 micron.

Seals: Nitrile.

Un-pressurised, 10 Micron

Mini Pressure Filter

- Compact, robust and easy to install
- Manufactured in high quality brass
- 10µ, 25µ, and 125µ elements
- No indicator filter
- G1/4 ports
- For use in lubrication, high pressure water and oil burner systems
- Reliable protection of low flow pilot valve
- Suitable for use with mineral and petroleum based fluid
- Nitrile seal

Filtration Media:

10 micron (nominal) Nitrile phenolic resin impregnated cellulose.

25µ, 40µ and 125µ (nominal) stainless steel.

Please note: HPR1719 and HPR1819 elements are not stainless steel, they are paper with tin end caps.

Working Temperature:
-30°C to +90°C

Maximum Working Pressure:
280 bar

In-line Spin-on Filters

- Paper and glass fibre element medi
- Spin-on disposable canisters
- Suitable for suction and return line applications
- Flow rates to 350 L/min.
- Bypass
- Visual indicator

Seals: Buna Nitrile.

Filter Head Material: Aluminium alloy.

Fluids: Compatible with hydraulic oils, coolant fluids and petroleum based fluids

Filter Bowl Material: Steel.

Element Media:

10CT = 10 micrometer nominal filtration (resin impregnated cellulose).

10BT = 10 micrometer absolute filtration (glass fibre composite material).

Indication:

42mm dia gauge: (0-12 bar. Return line). 0-76cm. Hg Suction line.

Working Temperature:
-30°C to +100°C

Dataflow In-line Flow Indicator

Working Temperature:
+5°C to +80°C Oil
+5°C to +60°C Water

Maximum Working Pressure:
10 bar Oil/water

- Indicator gives flow visibility
- Works in any plane
- Accepts reverse flow
- Indicates flow from 2-150 L/min

Indicator

0045	Description
DFI900	Dataflow Indicator

Tech Sheet 1341

Hydraulic Test Unit

Hydraulic test units are designed specifically for the speedy diagnosis of hydraulic circuit faults in mobile, marine and industrial systems using normal range of mineral oils, their rugged construction based mainly on mild steel, manganese bronze and acrylic materials makes them ideally suited for arduous use in the field. Each unit is supplied in a convenient carrying case providing full protection and additional storage space for fittings. Because they need no power source such as batteries etc, they are always ready for instant use.

The scale on the flow meter can be rotated to ensure visibility in any situation and the installed attitude is not critical, though whenever possible the unit should be monitored with pressure gauge vertical and gauge case relief valve uppermost. **The unit is designed for flow to be in the direction of the arrow on the flow meter scale and must not be installed with the flow reversed**

Safety

An axial flow restrictor valve is fitted which can be adjusted under full load from open to fully closed, and to complete the specification, a safety blow out disc, set to operate at 455 bar is fitted to the manifold in a position facing away from the operator when reading the gauges normally. Two spare blow out discs are supplied which are easily replaced by removing the hexagonal plug on the gauge manifold.

- Speedy diagnosis of hydraulic circuit faults
- Flows ranging from 2-360 L/min
- Measuring flow, pressure and temperature
- Portable. No power source required
- Hydrotrac unit for flows from 2-110 L/min available

Working Temperature:
0°C to +100°C

Flow Range:
10-110 L/min

Maximum Working Pressure:
350 bar

BSP

HYDRAULIC FLOW METERING

Dataflow 4-20mA & Pulse Output Flow Transmitters

- Pulse output available for totalising/batching
- Works in any plane
- Accepts reverse flow
- Maximum flow 150 L/min
- Negligible pressure drop
- Pressures up to 10 bar
- Low cost. Simple to install
- For use with most liquids
- DIN connection

Construction:

Borosilicate glass tube, Nitrile seals.

Body: Glass filled nylon
Rotor and Locator: Acetal.
Washers and shaft: Stainless steel.
Rotor Tips: Stainless steel.

Minimum Flow:

2 L/min (Max 150 L/min). Accepts reverse flow.

Accuracy: ±2%.

Connection: 1" BSP.

Weight: 0.7kg.

Calibration 4-20mA:

4-20mA = 0-100 L/min on water.
 4mA = 0 L/min, 20mA = 100 L/min.

Pulse Output: K factors CE.

Oil: 51.14 pulses per litre.
 Water: 44.25 pulses per litre.

Electrical Details:

4-20mA:

Supply = 24V DC. Output = 4-20mA.

Pulse Output:

Supply = 24V DC-pulse output.
 (open collector transistor).

Working Temperature: +5°C to +80°C Oil
 +5°C to +60°C Water
Maximum Working Pressure: 10 bar oil/water

Dataflow Transmitters

0045	Description
DFT980	Dataflow Pulse Output Transmitter

Loflow Oil, Water & Air Flowmeters

- Flow measurement from 7.0 ml/min to 22 L/min
- Easy to read, permanent printed scales
- Large scale definition for precise measurement
- Easy panel mounting assembly
- Negligible pressure drop characteristics
- 10 bar pressure rating

Construction:

Body: Grillon TR55.
Back Body: ABS7020.
Ball Retainer: ABS7020.
Back Panel: PVC.

Accuracy: ±2% FSD.

Repeatability: ±1%.

Connections:

Inlet 1/4" or 3/4" tapered threads.
 Outlet 3/4" tapered threads.

Typical Applications:

- Monitoring inert gases for the welding industry
- Pollution monitoring
- Pharmaceutical industry
- Filtration systems
- Hospital equipment for water applications
- Water treatment
- Swimming pools

Flowline Oil & Water Calibrated Flowmeters, Stainless Steel

- For flow measurement of corrosive or chemical media
- Works in any position
- Pressure up to 350 bar (5000psi)
- Flows up to 360 L/min
- Direct reading

Construction:

Stainless steel to BS970 316S

Calibration:

Oil = Specific gravity 0.856 at 20°
 Water = Specific gravity 1.0 at 20°

Viscosity Range: 10-200 centistokes

Accuracy: ±5% FSD

Repeatability: ±1% FSD

Minimum Scale: ±1% FSD 10% FSD.

Connections: BSPP

Seal: Viton

HIGH PRESSURE HYDRAULIC FILTRATION

Pressure line filters are an essential part in most hydraulic systems. When the hydraulic components are sophisticated, with close tolerances and a regulation function (not simply that of control), the use of filters in the pressure lines is a must.

The UFI Hydraulic Division pressure filters are named 'COMPO CARE' because they take care of system components, ensuring the recommended cleanliness levels. Filter elements are manufactured from glass fibre and cellulose media

Materials:

- Cast iron head
- Steel bowl
- Steel bypass valve
- NBR nitrile seals (FKM fluoroelastomer on request)
- Brass indicator housing

Pressures: (ISO 10771-1:2002)

- Maximum working: 42 MPa (420 bar)
- Test: 62 MPa (620 bar)
- Bursting: 126 MPa (1.260 bar)
- Collapse differential for the filter element (ISO 2941):
 - Series standard 2 MPa (20 bar)
 - Series H+ 21 MPa (210 bar)

PB Series Filters, 420 bar

Working Temperature:
-25°C to +110°C

Maximum Working Pressure: 420 bar

HIGH PRESSURE HYDRAULIC FILTRATION

The UFI Hydraulic Division pressure filters are named 'COMPO CARE' because they take care of system components, ensuring the recommended cleanliness levels.

Filter elements are manufactured from glass fibre and cellulose media

Materials:

- Anodized aluminium alloy housing
- Steel bypass valve
- NBR nitrile seals (FKM fluoroelastomer on request)
- Brass indicator housing

Pressures: (ISO 10771-1:2002)

- Maximum working: 21 MPa (210 bar)
- Test: 33 MPa (330 bar)
- Bursting: 66 MPa (660 bar)
- Collapse differential for the filter element (ISO 2941): 2,1 MPa (21 bar)

HYDRAULIC FILTRATION

The UFI Hydraulic Division return filters are named 'ANK CARE' because they take care of the oil returning into the tank, ensuring the fluid cleanliness level to be within the required values. Nominal flow rates up to 2.400 L/mi (635 GPM). Degree of filtration is from 5µm(c) to 90µm. Filter elements are glass fibre, cellulose and metal wire mesh media.

Materials:

- Aluminium alloy head and cover
- Polyamide bowl for FRA21-31-32-33-41
- Zinc-plated steel bowl for FRA41-42-51-52-53-5D
- Polyamide bypass valve
- NBR nitrile seals (FKM fluoroelastomer on request)
- Brass indicator housing

Compatibility: (ISO 2943:1999)

- Full with fluids: HH-HL-HM-H -HTG (according to ISO 6743/4)

Hydraulic Pressure Gauges

This quality range of hydraulic glycerine-filled pressure gauges have been manufactured to the highest specification using quality materials.

The range includes stainless steel cased to complete stainless steel units with 40mm, 63mm and 100mm dials. Pressures range from 0-1 bar to 0-600 bar, with rear and bottom connections of 1/4" and 1/2" in BSPP and BSPT.

FT Pro gauges are tried, tested and used extensively throughout the world's manufacturing facilities and in the mobile plant industry.

For your peace of mind all gauges can be supplied with a calibration certificate at a nominal charge.

Applications:

- Hydraulics
- Construction
- Agriculture
- Mining
- OEM machine building
- Offshore
- Marine
- High pressure water applications
- Service kits

Gauge Snubbers

Working Pressure:
20 to 300 bar

High Pressure

0234	Male Thread	Female Thread
130.4	1/4"	1/4"
130.3	3/8"	3/8"
130.2	1/2"	1/2"

Tech Sheet 28

Gauge snubbers are a great way of protecting gauges from damage, with sudden impact pressure i.e. when full line pressure is introduced to the gauge damage can occur. With the use of the snubber the gauge will be protected.

Working Pressure:
0 to 20 bar

Low Pressure

0234	Male Thread	Female Thread
131.8	1/8"	1/8"
131.4	1/4"	1/4"
131.3	3/8"	3/8"
131.2	1/2"	1/2"

TEST POINT COUPLINGS

Spradow - Innovative Measuring Systems

The **Spradow** test coupling enables you to connect a pressure gauge or other measuring instruments in seconds - even if the system is still under pressure. The connection can be applied without any further tools. The non-return valve inside the test coupling opens only after being connected with the measuring instrument to allow a secure and clean pressure measurement.

Pressure is an important parameter for a successful preventing service and maintenance or, if necessary, trouble-shooting.

With **Spradow** test couplings you can reduce your service and maintenance costs considerably.

The **Spradow** test box is the perfect tool for hydraulic systems offering service and maintenance engineers an

easy mobile pressure test solution.

The complete **Spradow** test equipment is of course compatible with all other manufactures and fulfils all current important industrial standards.

Furthermore **Spradow** offers a comprehensive range of measuring systems for pneumatic braking systems.

HYDRAULIC OIL COOLERS

AC Range Air Blast Oil Coolers

The LAC air oil cooler, with single-phase or three-phase AC motor, is optimised for use in the industrial sector. The maximum cooling capacity is 300kW at ETD +40°C. See Tech Sheet for full specification on this model.

- Maximum Working Temperature:** +120°C
- Maximum Static Working Pressure:** 21 bar
- Maximum Dynamic Working Pressure:** 14 bar

Tech Sheet 60442

DC Range Air Blast Oil Coolers

The LDC air oil cooler with 24V DC motor is optimised for use in the mobile industry.

Together with a wide range of accessories, the LDC cooler is suitable for installation in most applications and environments.

The maximum cooling capacity is 30kW at +ETD 40°C. Also available with a 12V DC motor.

See Tech Sheet for full specification on this model.

Tech Sheet 60443

Offline Air Blast Oil Cooler

The LOC cooling system with three-phase AC motor is optimised for use in the industrial sector. The system is supplied ready for installation. An integrated circulation pump makes it possible to cool and treat the oil in a separate circuit (offline cooling)

See Tech Sheet for full specification on this model.

- Maximum Working Temperature:** +100°C
- Maximum Static Working Pressure:** 21 bar
- Maximum Dynamic Working Pressure:** 14 bar

Compact Water/Oil Coolers

The Parker PWO is a compact and lightweight water/oil cooler with a high cooling capacity for its size.

Features:

- Light and compact
- Suitable for many applications
- Easy installation
- Cost-efficient and environmentally friendly

Material:

- Plates: EN 10028/7-1.4401 (AISI 316)
- Brazing: pure copper
- Connections: EN 10272-1.4401 (AISI 316)

For full specification on this item see Tech Sheet.

- Working Temperature:** -196°C to +225°C

- Maximum Working Pressure:** 31 bar at 155°C

Perforated for High Absorbency

The unique perforated design of the dimple roll allows the material to be used in the most efficient way.

FT Pro spill absorbents are a superior range of spill solutions designed for ultimate versatility and economical usage.

Unfold for larger spills.

Fold to use as a boom for increased absorbency.

Tear off pieces to use only what you need.

Spill Kits available in reusable carry bags with barrier tape, gloves and safety goggles.

Large range of spill absorbents for many applications and spill types.

SPILL ABSORBENTS & SPILL PREVENTION

Oil Only Heavy-duty Spill Pads

Oil only absorbents are best used outdoors to recover oil-based spills such as petroleum, diesel and solvents.

100 Pads Per Pack

0365	Size cm	Absorbency Per Pack
HDOP-100	40 x 50	108 Litres

Oil Only Spill Dimple Pads

Oil only absorbents are best used outdoors to recover oil-based spills such as petroleum, diesel and solvents.

200 Pads Per Pack

0365	Size cm	Absorbency Per Pack
SOP-200	40 x 50	128 Litres

Oil Spill Perforated Dimple Rolls

Oil only absorbents are best used outdoors to recover oil-based spills such as petroleum, diesel and solvents.

0365	Size	Absorbency Per Pack
SGR-2-40	40cm x 40m	153 Litres

General Purpose Spill Folded Perforated Dimple Rolls

As a general rule of thumb, if the spill happens indoors use a general purpose product to absorb both oil and water-based substances.

18 Metre Rolls Per Pack

0365	Size	Absorbency Per Pack	Contents
FGR-3-18	11cm x 18m	105 Litres	3
FGR-1-18	11cm x 18m	35 Litres	1

General Purpose Spill Socks

As a general rule of thumb, if the spill happens indoors use a general purpose product to absorb both oil and water-based substances.

20 Socks Per Pack

0365	Size cm	Absorbency Per Pack
SGS-20	7.6 x 120	70 Litres

Loose Absorbents

16kg Bag

0751
CG16

Chemical Spill Pads

- Suitable for toxic, flammable, corrosive and aggressive liquids
- Fire retardant as per ASTM 726
- Low slip base layer, great for foot traffic

100 Pads Per Pack

0365	Size cm	Absorbency Per Pack
COP-100	40 x 50	78 Litres
Tech Sheet 67960		

Chemical Spill Perforated Dimple Rolls

- Suitable for toxic, flammable, corrosive and aggressive liquids
- Fire retardant as per ASTM 726
- Low slip base layer, great for foot traffic

2 x 40 Metre Rolls Per Pack

0365	Size	Absorbency Per Pack
CSR-2-40	40cm x 40m	114 Litres

Chemical Spill Socks

- Suitable for small hazardous, toxic or unknown based spills
- Absorbs both oil and water based fluids
- Once saturated, will not become slippery

20 Socks Per Pack

0365	Size cm	Absorbency Per Pack
CSS-20	8 x 120	80 Litres
Tech Sheet 67961		

Bags of Rags

ISO 32 Hydraulic Oil

Quality mineral hydraulic oil with good anti-wear performance, oxidation resistance, corrosion protection, low pour, air release and anti-foam properties.

Conforms to DIN 51524 11.

20 Litre Drum

0026	Volume Litres
2020-0333	20
Tech Sheet 544	

ISO 46 Hydraulic Oil

Hydraulic oil 46 is blended to ISO 46 viscosity grade requirements and is suitable for use in a wide range of mobile and static hydraulic equipment.

Benefits include: Excellent anti-wear, anti-corrosion, anti-rust performance, low air retention/air entrainment, low foaming and good thermal stability and resistance to oxidation.

Conforms to DIN 51524, Part 2 (HLP).

20 Litre Drum

0026	Volume Litres
ISO 46	20
Tech Sheet 10318	

10W Hydraulic Oil

Hydraulic Oil 10W is a high performance hydraulic oil formulated from solvent refined paraffinic base oils and high performance additives designed to meet a wide range of heavy-duty hydraulic equipment requirements.

Benefits include: Good deposit control, good anti-sludge and varnish resistance, excellent anti-wear and corrosion protection.

Oxidation stability, dispersant/detergent properties and wide temperature range.

High viscosity index promotes high oil pressure.

Conforms to API: SF/CD and MIL-L-2104C.

20 Litre Drum

0026	Volume Litres
10W OIL	20
Tech Sheet 3147	

ATF Dexron II

ATF Dexron II is a high performance multi-application fluid. The high viscosity index and low pour point makes this product ideal for use in hydraulic systems and power steering.

Conforms to GM Dexron II D and GM 6137-M.

20 Litre Drum

0026	Volume Litres
ATF II	20
Tech Sheet 3148

SPILL ABSORBENTS & SPILL PREVENTION

Trays

Made from 100% polyethylene, these spill trays come with a removable grid and are ideal for ensuring drips and spills are contained correctly.

Applications: Truck and machinery leaks, machine part cleaning, ink solvent storage, battery storage and chemical dosing points.

Banded Spill Trays

0480	Capacity Litres	Weight Kg	Height mm	Length mm	Width mm	Max Working Load Kg
ST20	22	3.5	175	595	395	55

ST100	104	14	185	1195	795	205

Tech Sheet 67968

Drain Cover

An integral part of any spill response plan, drain covers go hand in hand with spill response kits. They can also be used proactively, to seal off drains prior to deliveries or refuelling taking place, to ensure leaks and spills are kept out of the drainage system.

Magnetic Drain Cover

0480	Height mm	Length mm	Thickness mm
MDC03	600	600	0.9

Tech Sheet 67970

Drum Spill Containment

Manufactured from medium density polyethylene, these pallets comply with the guidelines issued by environment agencies. They are robust, resistant to most chemicals and come with a removable grid.

Banded Drum Pallets

Absorbent Dispensing Stations

Ideal for day-to-day housekeeping or responding to minor spills, these polyethylene cabinets are specifically designed for dispensing absorbents. Accepts rolls up to 550mm diameter x 520mm wide.

Weight: 20kg.

Absorbents not included.

Open Front Absorbent Centre, Polyethylene

0480	Size
POLY-STATION	64cm x 58cm x 118cm

Floor standing with single roll holder and workstation cabinet. Welded together to provide a safe and secure fixing.

Weight: 29kg.

Absorbents not included.

Combined Absorbent Centre, Steel

0480	Size
WSHOP-STATION	66cm x 42cm x 150.5cm

Twin wall mounted absorbent roll holders.

Weight: 10.5kg.

Absorbents not included.

Wall Mountable Twin Roll Holder, Steel

Note: Due to the change in finished used by our suppliers. the product you receive may differ from that illustrated

FT PRO has a quality range of **hydraulic quick release couplings** which have been manufactured to the highest specification using quality materials.

The range consists of interchange couplings designed to meet or exceed ISO A, ISO B, Flat Faced ISO 16028, Trailer Brake ISO 5676, Spin on High Pressure 88, 97 and 98 Series, in a variation of coated steel, stainless steel and brass.

FT Pro quick release couplings are tried, tested and used extensively throughout the world's manufacturing facilities and in the mobile plant industry.

Applications:

- Hydraulics
- Offshore
- Construction
- Marine
- Agriculture
- High pressure water applications
- Mining
- OEM machine building

Working Temperature:
-25°C to +120°C Nitrile

Designed to meet or exceed the requirements of ISO 16028. Flush face and dry break design facilitates easy cleaning prior to connection. Manufactured from high strength steel construction.

ISO 16028, High Pressure Series

° Working Temperature:
-25°C to +120°C Nitrile

HP Series offers higher pressure ratings, superior flow ratings and lower pressure drops compared to our standard series. The change in the design increases the male bearing points and decreases the brinelling effect. The couplings are ideal for applications involving high pressure impulses on agriculture, mobile construction and plant equipment.

Other seals available on request.

T SERIES HYDRAULIC QUICK RELEASE COUPLING

Manual Locking Coupling with Pressure Eliminator

° Working Temperature:
-25°C to +120°C Nitrile
-25°C to +175°C Viton

The T Series coupling is designed for high pressure systems. A manually operated locking ring provides extra security against unintentional disconnection. All come complete with poppet valves and pressure eliminator.

Other seals available on request.

The leader in coupling innovation

- DNP combine sophisticated complex technology, highly skilled and experienced operators, tight production and assembly controls, and systematic vigorous testing in order to produce a vast range of superior couplings.
- Quality assurance ISO 9002.
- Interchangeable couplings with other major manufacturers.
- The range consists of over 60 varieties of couplings, including ISO A, ISO B, flat face, screw/ISO 14541 and push-pull, with working pressures up to 1500 bar.
- The range also includes multi-coupling plates which allow simultaneous coupling and uncoupling of a certain number of hydraulic and or electrical lines.

- Selected ranges (flat face – PVT4 BOP, PVTX BOP, PST4 BOP and ISO B – PBV1 BOP) come with Lloyds registered approval. The range is specially designed for blow-out preventer accumulator systems in the oil and gas market.

HYDRAULIC QUICK RELEASE COUPLINGS

PPV3 Series, ISO A Push/Pull Breakaway Steel Couplings

Working Temperature:
-25°C to +100°C

Maximum Working Pressure:
350 bar

Push/pull design, ideal for mobile applications using hydraulic attachments, PPV series is designed to break away in case of accidental pulls, one hand to connect and disconnect.

Standard: ISO 7241-1 A
Sleeve: Double acting
Occlusion: Poppet
Locking: Radial balls

Material: steel
Finishing: Zn-Fe (Cr III)
Available Threads: BSP, NPT, SAE, metric
Standard Seals: Nitrile

Tech Sheet 20475

The DNP range also includes multi-coupling plates which allow simultaneous coupling and uncoupling of a certain number of hydraulic and/or electrical lines.

HYDRAULIC QUICK RELEASE COUPLINGS

stainless steel

PLTX Series, ISO 16028 Flat Face Couplings, Stainless Steel

Standard: ISO 16028
Occlusion: Flat face
Locking: Radial balls
Material: Stainless steel AISI 316

Available Threads: BSP, NPT, SAE
Standard Seals: Viton
Optional Seals: EPDM, FFKM
Connection Under Pressure: Not allowed

Working Temperature:
 -25°C to +100°C

Maximum Working Pressure: 350 bar

Coupling, BSPP

PLK4 Series, ISO 16028 Flat Face Plug, Connect Under Pressure

Interchanges with any ISO16028 quick disconnect, connect under pressure to 3,675 psi/250 bar, high pressure up to 5,800 psi/400 bar, flat face, non-spill design, high resistance steel. PLK4 series is ideal for systems that need to be connected under residual pressure, high pressure applications, attachments that may have trapped pressure in the system.

Standard: ISO16028
Occlusion: Flat face
Locking: Radial balls
Material: High resistance steel
Finishing: Zn-Fe (Cr III) and Zn-Ni
Available Threads: BSP, NPT, SAE, metric
Standard Seals: Nitrile and PU
Optional Seals: Viton, EPDM
Connection Under Pressure: Allowed (male side only)
Maximum Residual Pressure: 250 bar

Working Temperature: -25°C to +100°C
Maximum Working Pressure: 400 bar

HYDRAULIC QUICK RELEASE COUPLINGS

PST4 Series, Screw to Connect Flat Face Couplings

Interchanges with Stucchi VEP, high-tech anti-corrosion plating salt spray tested for 700 hours before any appearance of surface red rust, high working pressures, connects and disconnects by hand up to 4,400 psi/300 bar, seal is blowout resistant to 4,400 psi/300 bar when connecting or disconnecting with residual pressure. Exceeds 1,000,000 impulse cycles, flat face design eliminates spillage upon disconnection, thread to connect style coupling eliminates brinelling issues, heavy-duty hex nut.

Interchangeability: Stucchi VEP
Occlusion: Flat face
Locking: Screw
Material: Steel
Finishing: Zn-Fe (Cr III) and Zn-Ni

Available Threads: BSP, NPT, SAE
Standard Seals: Nitrile and PU
Optional Seals: Viton, EPDM
Connection Under Pressure: Allowed (both male or female side)

Maximum Residual Pressure: 300 bar

HYDRAULIC QUICK RELEASE COUPLINGS

PCJ5 Series, Ultra High Pressure Couplings

DNP standard, 15,000 psi/1,000 bar working pressure, high resistance steel, locking radial balls. Tested 100% with helium at low and high pressure. PCJ5 series is ideal for high pressure tools and torque equipment.

Occlusion: Poppet

Locking: Radial balls

Material: High resistance steel

Finishing: Zn-Fe (Cr III)

Available Threads: BSP, NPT

Standard Seals: Special compound

Safety Factor: 1:2.5

Test: with helium, 100% at low and high pressure

Connection Under Pressure: Not allowed

Working Temperature:
-35°C to +130°C

Maximum Working Pressure:
1000 bar

Coupling, BSPP

VFH1 Series, Wing Nut Screw Couplings

Wing style screw to connect, 5,000 psi/350 bar working pressure, heavy-duty design, high flow rate, heavy-duty acme threads. VFH1 series has a universal design that can be used in any industry, used frequently in oil field applications, applications needing high working pressures and high flow rates, oil field services such as coiled tubing units, snubbing units, power swivels and much more.

Interchangeability: Snap-Tite 75
Occlusion: Poppet
Locking: Screw
Material: Steel
Steel Finishing: Zn-Fe (Cr III)
Available Threads: NPT
Standard Seals: Nitrile

Optional Seals: Viton, EPDM
Connection Under Pressure: Allowed (both male or female side)

HYDRAULIC COUPLINGS

TDG Swivel Joints

Description: TDG swivel joints can be used in hydraulic systems where a rotating connection is required, for example in add-on units with rotational movements of up to 360°. TDG Swivel joints minimise the extreme wear occurring in the hoses of the hydraulic system.

A patented Pressure Relief Unit guarantees a long service life and smooth running even in the event of pressure hammers.

DN6 Female Thread, BSPP

TE-500	1/2"	3/4"	32	250
Tech Sheet 10009				

Standard Version: Body: Brass, Nitrile Seal.

Advantages: The housing is made of brass the rotating shaft is made so surface-treated steel or stainless steel. Sturdy construction with two needle roller bearings and an axis sliding bearing, adapted for combination with standardised hydraulic components. Has a maximum rotating speed 60 RPM.

Applications: Elevating mechanism, building machinery, materials handling technology and industrial plants.

TEMA Coupling Letter Key

NO Letter = Standard, Nitrile seals with valve
H = No valve and no locking sleeve, Nitrile seals
UV = Standard Nitrile seals, unvalved
HV = No valve and no locking sleeve, viton seals
V = With valve and viton seals

RV = Stainless steel body with valve and viton seals
RUV = Stainless steel body, unvalved with viton seals
VUV = Unvalved with viton seals
S = Super nipple, special steel alloy construction, high durability

High Pressure Series

The TEMA High Pressure 1000 couplings were specially developed for use in industrial machinery, salvage devices and testing equipment. The Series is galvanised and produced in steel. They are provided with safety locking and dust caps inclusive.

The TEMA High Pressure 1500 couplings were specially developed for use in bolt tensioning equipment. This series is produced in steel with the coupling body QPQ treated and black galvanised. They are provided with safety locking and dust caps inclusive.

SERIES 70KB

ULTRA-FLO »

Description: The quick-connect-couplings series 71-76 are robust and simple models having best proven their quality for many years in many applications. Only couplings and plugs with the same size internal threads will match. These couplings are designed for manual operation, i.e. to couple the sleeve must be first pushed back

Advantages: The simple and robust design guarantees a maximum of safety.

Ideal for Applications: With liquids and in laboratory and food areas.

Technical Data: Only couplings and plugs of the same series will match.

 **Interchangeability:**
Industrial interchange ISO 7241-1 Series B,
BS 7198. Hansen 'HK'.

For **Pneumatic Valves & Accessories**
see page **564**

SERIES 75

Series 75 is designed and constructed for high pressure hydraulic service. Although these couplings are used in a broad variety of heavy-duty applications.

A primary usage is in oil fields and offshore drilling, cranes, power tongs and swivels, diving etc.

SERIES 70KB

ULTRA-FLO »»»

Description: The quick-connect-couplings Series 71-76 are robust and simple models having best proven their quality for many years in many applications. Only couplings and plugs with the same size internal threads will match. These couplings are designed for manual operation, i.e. to couple the sleeve must be first pushed back.

Advantages: The simple and robust design guarantees a maximum of safety.

Ideal for Applications: With liquids and in laboratory and food areas.

Technical Data: Only couplings and plugs of the same series will match.

Interchangeability:

Industrial interchange ISO 7241-1 Series B, BS 7198. Hansen 'HK'.

TWIST-AIR COUPLINGS

Working Temperature:
-15°C to +80°C
Standard seal NBR

Maximum Static Working Pressure
Static and random rotation:
PB 17 bar (250 psi)

Triple Outlet Connector

3 x Coupling Outlets, 1 x 1/4" BSPP Inlet

9000
M3-TA

Under continuous rotation:
PB 10 bar (145 psi)
Interchangeability:
Twist air PCL series
Flow rate: 900 L/min
Material: Mild steel zinc plated
Application:
General purpose pneumatic twist coupling.

Leader Hoses

A 'Leader Hose' is a length of flexible hose which should be fitted between an air tool and the connecting coupling. By absorbing the impact of a pneumatic impact tool, a leader hose will significantly increase the life expectancy of the coupling.

SERIES 20 QUICK COUPLING INTERNATIONAL PROFILE

Working Temperature:
-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
PB 35 bar (500 psi)

Couple Shut Off

Profile

Material:
Brass, NBR seal
(standard series coupling).

Application:
General purpose pneumatic coupling, medical, dental, robotics, instrumentation.

SERIES 21 CODED QUICK COUPLINGS

Working Temperature:
-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
PB 35 bar (500 PSI)

Interchangeability:
Rectus design

Material:
Brass nickel plated, NBR seal (standard series coupling).
Application:
Non-interchangeable, each coupling and plug has an individual shape so they can only be connected to each other, colour coded, one hand operation.

SERIES 21 QUICK COUPLING WORLDWIDE PROFILE THERMOPLASTIC

Working Temperature:
Rectupom -20°C to +80°C
RectuChem -20°C to +120°C

Working Pressure:
Rectupom 10 bar @ 20°C
RectuChem 8 bar @ 20°C

Interchangeability:
Rectus design

Material:
RectuPom – thermoplastic POM Black
RectuChem – thermoplastic PVDF White

Application:
Suitable for liquids, gases, drinking water, laboratories,
medical technology and food areas.

SERIES 22 QUICK COUPLING ARO PROFILE

Working Temperature:
-20°C to +100°C

Maximum Working Pressure:
35 bar

Single Hand Out

Interchangeability:

Rectus 14, Aro 210, Parker 50,
Orion 44510, JWL 522 & JWL 532

Material:

Brass nickel plated, NBR seal (standard series coupling).

Application:

Coupling system with single-hand operation. High Flow valve for optimum flow and low pressure drop. Specially suited to use with gaseous media in industry. The steel sleeve counters oscillating forces

SERIES 24 QUICK COUPLING ISO 6150 B PROFILE

Working Temperature:
-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
PB 35 bar (500 PSI)

Interchangeability:
Series 23, Norgren DC3,
Hanson 3000.

Material:
Brass
Application:
General purpose pneumatic coupling

SERIES 25 QUICK COUPLING EUROPEAN PROFILE

Free Angle Rotating Joint

Male Thread, BSPT, Steel Nickel Plated

2510	Thread
25FAAK13SPN	1/4"

Male Thread x Female Thread, BSPP, Steel Nickel Plated

2510	Thread
FA13A13ISPN	1/4"
FA17A17ISPN	3/8"

Leader Hoses

A 'Leader Hose' is a length of flexible hose which should be fitted between a air tool and the connecting coupling. By absorbing the impact of a pneumatic impact tool, a leader hose will significantly increase the life expectancy of the coupling.

3/8" Bore Rubber-Tech Hose, Series 25 Plug x Male Thread, BSPT

2510	Thread	Length mm
LH25/13K	1/4"	381
LH25/17K	3/8"	381

WARNING – Leader Hoses

The Health and Safety Executive guide states - "the plug should not be screwed directly into the inlet port, but should be fitted onto a short isolation hose, thus isolating the plug and coupling from the tool vibration".

Flexible Connectors

This rotating joint, when installed between the airline and hand tool, reduces operator wrist and elbow strain. It also acts as a universal joint and prevents kinks appearing in the airline.

SERIES 1600 SAFETY QUICK COUPLING SELF VENTING

Working Temperature:
-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
PB 12 bar (174 PSI)

Interchangeability:
Rectus design

Material:
Steel nickel plated

Application:
General purpose pneumatic coupling self-venting safety
feature EN 983, ISO 4414, ISO 6150.

New updated version of the 25KE self venting couplings. Still interchangeable with original 25 Series couplings.

SERIES 25 SAFETY QUICK COUPLING PARKER PROFILE SAFETY LOCK

Working Temperature:
-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
PB 35 bar (500 PSI)

Interchangeability:
Rectus design

Material:
Coupling: Steel nickel plated. NBR seal (standard series coupling).
Plug: Steel zinc plated.

Application:
Two-handed disconnection prevents accidental disconnection.
The coupling and plug must firstly be pushed together before the sleeve is pulled back.

SERIES 26 SAFETY PUSH BUTTON QUICK COUPLING ISO 6150 B ISO 6150 C & EUROPEAN SELF VENTING

Working Temperature:
-20°C up to +100°C

Maximum Working Pressure:
12 bar

Profile:

Euro Profile

Interchangeability:

Rectus 25, 1600/1625, JWL 520 and 530.

Material:

Anodised aluminium, brass nickel plated.

Application:

Parker's Safety Quick Coupling Series KP is a safety coupling with pushing button integrating self-venting system according to ISO 6150 B, ISO 6150 and EURO. The self-venting takes place during disconnection in 2 steps - no risk of pressurised hoses being tossed around. When the pushing button is pressed one time, the plug is released yet remains locked in. The coupling valve closes and the air is vented from the air line at the same time. Only then, by pressing the button again, can uncoupling take place safely. The system fulfils the requirements of ISO 4414 - increased safety standards in the work place and make the use easy.

The right plug for self-venting series KP can be found as follows:

- ISO 6150 B; DN 5,5: Plug series 23
- ISO 6150 B; DN 8: Plug series 30
- ISO 6150 C; DN 5,5: Plug series 18
- ISO 6150 B; DN 8: Plug series 84
- EURO; DN 7,4: Plug series 25

Nominal Diameter:

7.4mm

Flow Rate:

1225 L/min (6 bar, dP 0.5 bar)

SERIES 1700 SAFETY QUICK COUPLING SELF VENTING

 **Working Temperature:**
-20°C to +100°C
Standard seal NBR

 **Maximum Static Working Pressure:**
PB 12 bar (174 PSI)

Material:
Brass, nickel plated, NBR seal
(standard series) coupling.

Application:
General purpose pneumatic coupling self venting
safety feature.
Machinery construction, trade and automotive.

New updated version of the 27KE self venting couplings.
Still interchangeable with original 27 Series couplings.

SERIES 45 QUICK COUPLING PARKER PROFILE ISO BAR

Working Temperature:
-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
PB 15 bar

Interchangeability:
Hanson, Parker

Material:
Steel nickel plated

Application:
Straight through coupling, maximum flow, high pressure
water and steam washers.

SERIES 86 QUICK COUPLINGS INTERNATIONAL PROFILE MOULD COUPLING (MOLD)

Working Temperature:
-15°C to +200°C
Standard seal FKM

Maximum Static Working Pressure:
PB 15 bar (217 PSI)

Interchangeability:
D-M-E, Foster FJT,
Parker Mold Mate.

Material:
Brass, seals FKM standard, silicone available.

Application:
Brass coupling for connection of coolant lines to moulds and dies.

Product Description:
Parker's Quick Coupling Series 86/87/88 were especially developed for connecting coolant lines and injection molds. The countersunk plugs can easily be connected and disconnected because of the extended sleeve. The angular connections prevent kinks from forming in the hose.

This coupling series is available in single shut-off, double shut-off, straight-through versions and is also available with SAFE-LOCK™ technology. The shut-off couplings (with valve) are equipped with nickel plated sleeves for quick and accurate visual differentiation.

Markets: Industrial

Features and Benefits:

- SAFE-LOCK™ technology reliably prevents accidental uncoupling of the system under pressure.
- Shut off couplings are equipped with nickel plated sleeve for quick and accurate visual differentiation.

SCHRADER COUPLINGS & PLUGS

Features:

- Twist-lock action
- Wide choice of adaptors
- Non-whip
- Rugged design

Application:

Twist-lock units are designed for single-handed connection and disconnection. A twist on the cap will release the adaptor and the air line will automatically reseal. When coupled, the check unit allows the adaptors to swivel, to eliminate kinking of the hose.

SERIES 1100 SCANDINAVIAN PROFILE

Working Temperature:
-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
30 bar

Single Shut Off

Material:

Coupling: Brass nickel plated

Plug: Steel zinc plated

Seals: NBR

Interchangeability:

Tema design

Application:

Robust design with small dimensions. Series 1100 is used mainly for applications in the area of compressed air and liquids. Optimally suited to smaller pneumatic systems and to compressed air tools with a consumption of up to 900 litres per minute. Coupling systems with two hand operation i.e. both hands are required when connect/disconnect.

-20°C to +100°C
Standard seal NBR

Maximum Static Working Pressure:
35 bar

Profile

Features:

- Single hand operation

Material:

Coupling: Brass nickel plated

Plug: Brass nickel plated

Seals: NBR

Rectus Series 31.

Application:

Series 1300 is used mainly for applications in the area of compressed air and liquids. Optimally suited to smaller to medium-sized pneumatic systems and to compressed air tools. The coupling series stands out for its compact design and high flow rates with the UltraFlo valve. Coupling body made of nitrocarburized steel.

SERIES 1800 SCANDINAVIAN PROFILE

 **Working Temperature:**
-20°C to +100°C
Standard seal NBR

 **Maximum Static Working Pressure:**
35 bar

Features:

- Single hand operation
- Particularly suited to medium-sized to large pneumatic systems and compressed air tools

Material:

Coupling: Brass nickel plated

Plug: Steel zinc plated

Seals: NBR

Interchangeability:

Rectus 32

Application:

Series 1800 is used mainly for applications in the area of compressed air and liquids. The coupling system stands out for its robust, compact design, high flow and high corrosion resistance due to the ultra high flow valve

QUICK COUPLINGS FOR PLASTIC INJECTION MOULDING

° Working Temperature: -15°C to +110°C
(when using identification collets 513 and 523)
Working Temperature: 0°C to +200°C (when using
without identification collets 513 and 523)

Maximum Working Pressure:
15 bar (1.5Mpa).

These Couplings are designed to be connected with cooling systems of plastic injection mouldings. They have a particular structure that assures reduced Size and allows coupling using a single hand.

Temperature and Pressures:

The working pressures and working temperatures depend on the type of tube used; therefore the values must be determined in accordance with the tubes features. The following values apply only to Aignep products.

- Parallel gas in conformity with ISO 228.
- Water, cooling water, oil.
- Flexible tubes in plastic and rubber.

ACETAL RESIN QUICK RELEASE COUPLINGS

The special quick connector offers a fast and reliable push-to-connect mechanism. The outer sleeve locks the plug into the socket. When the plug is disconnected, the socket acts as a shut-off valve. Various plugs can be connected and used, suitable for hydraulic or pneumatic systems.

Temperature:
4 to 90°C

Working Pressure:
Up to 14 bar (200 psi) at 20°C

AIR LINE COUPLINGS

Airflow Air Line Couplings (Fixed Application)

- Suitable for fixed applications where the coupling is used over a workbench and a single action is preferred
- Compatible with the Standard Air Line plugs

- Steel Construction – robust and hard wearing, ideal for use in the engineering/workshop environment
- Benchmark in the UK for quality and reliability

Interchangeability: Rectus 19
Nominal Bore: 4.8mm

Working Temperature: -40°C to +100°C

Maximum Working Pressure: 14 bar

HAND PROTECTION

A newly expanded range of hand protection products caters for all work and safety needs. Only the best materials and manufacturing methods are used in the production of this extensive and highly specialised range.

For **Portwest Hand Protection**
see page **1756**

AIR LINE COUPLINGS

"A" Style Couplings

- Commonly used in American and most African markets where this specific profile of adaptor is required
- Steel Construction with corrosive resistant finish for longer life

Nominal Bore: 5.5mm
Flow rate @ 6 bar (0.5 bar P.D.)
650 L/min

Interchangeability:
ARO 210, JWL 522/532, Rectus 14/22
and Schrader Euro

Working Temperature:
-40°C to +100°C

Maximum Working Pressure:
14 bar

AIR LINE COUPLINGS

KF Couplings

- Ideal for portable air tool and industrial applications
- Excellent flow characteristic
- Commonly used in Asian and Oceania markets where this adaptor profile is required
- Steel Construction with corrosive resistant finish for longer life

Nominal Bore: 7.6mm

Flow rate @ 6 bar (0.5 bar P.D.)
2100 L/min

Interchangeability

Nitto Kohki 200 and Rectus 13

Working Temperature:
-40°C to +100°C

Maximum Working Pressure:
35 bar (508 psi)

Multi-Fit Couplings

- Has the additional flexibility of accepting 3 key adaptor profiles; XF-Euro, "A" Style and ISO B12
- Steel Construction with corrosive resistant finish for longer life
- Offers enhanced tool efficiency

Nominal Bore: 5.0mm

Flow rate @ 6 bar (0.5 bar P.D.)
1800 L/min

Coupling can be used in conjunction with any of the following plugs ISO B12, XF, and Euro

Interchangeability:

Rectus 23/25/26, Hanson 3000 and Dynaquip DC 3

Working Temperature:
-20°C to +100°C

Maximum Working Pressure:
35 bar (508 psi)

Dry Pressure Gauges

FT Pro dry gauges are a market leading range offering a reliable solution for pressure monitoring within pneumatic systems.

Used extensively throughout the world's manufacturing facilities, all units have been 100% pressure tested and inspected, so quality can be guaranteed.

Applications:

- Construction
- Chemical
- Agriculture
- Offshore
- Mining
- Automotive
- OEM machine
- Rail building
- Industrial

DRY GAUGES

Gauge Snubbers

Working Pressure:
20 to 300 bar

High Pressure

0234	Male Thread	Female Thread
130.4	1/4"	1/4"
130.3	3/8"	3/8"
130.2	1/2"	1/2"

Tech Sheet 28

Gauge snubbers are a great way of protecting gauges from damage, with sudden impact pressure i.e. when full line pressure is introduced to the gauge damage can occur. With the use of the snubber the gauge will be protected.

Working Pressure:
0 to 20 bar

Low Pressure

0234	Male Thread	Female Thread
131.8	1/8"	1/8"
131.4	1/4"	1/4"
131.3	3/8"	3/8"
131.2	1/2"	1/2"

DIGITAL FLOW & PRESSURE SENSOR PR03

Pressure Switches

The sensor is available in three sizes for 1/4", 1/2" and 3/4", to suit the different flow rates required in the various industrial applications in which it can be used. The largest size allows measurements up to a maximum of 2000 l/min.

The new digital flowmeter offers the following advantage

• It is the most accurate flow rate

• It shows flow in real time

- Detect any changes in fluid status

Series PR03

New:
cylinder sensor SDBT-SMX

The first self-learning sensor

FESTO

The cylinder sensor detects the piston and automatically learns the switching point during commissioning.

Automatically set without any hassle

Just one type for all switching outputs

Large and adjustable detection range

Programming the switching window 2 to 15 mm in increments of 1 mm

The benefits of SDBT-MSX:

Auto teach-in

The switching point is taught in automatically, so there no longer is a need for precision adjustment.

- Fit, connect - ready!
- Several cylinders at the same time

Touch button

Programming button for the switching functions NPN/PNP, NO/NC and the switching window.

- Just one type for all switching functions

Programmable switching window

Setting the switching signal between 2 and 15 mm, for example for early detection of high speeds.

- Flexible position detection

For Stainless Steel Tube Fittings
see pages 165-178

Installation: always in combination with a full receiver kit, water drain and safety relief valve. Ensure the compressor never takes in air/solvent mix. This could cause the tank to explode.

The air receiver or tank allows the storage and control of compressed air. A device on most compressors maintains pressure at a predetermined pressure range, allowing the compressor to operate automatically as the air is used, switching on and off accordingly. The air receiver must also be fitted with a safety device to prevent over pressurisation, a means of draining condensate and various outlet sockets. The size of air receiver (usually measured in litres) will normally be proportional to the size or capacity of air compressor fitted.

Material: carbon steel

Finishing: external RAL 5015 blue paint

Fluid content: compressed air and nitrogen (group 2)

All air receivers for the European market are supplied with a declaration of conformity

In compliance with the applicable EU Directives or according to the major international standards:

SPVD 2014/29/UE Directive (ex 2009/105/EC)

PED 2014/68/UE Directive (ex 97/23/EC)

ABS American Bureau of Shipping

DNV Det Norske Veritas

B.V. Bureau Veritas

LRS Lloyd's Register of Naval Ship

GL Germanischer Lloyd

Available upon request:

- Internal and external hot dip galvanization
- 16 bar rated
- Alternative port sizes

Vessel options include:

- Stainless steel vessels
- Pressurised water vessels
- High pressure vessels
- Vacuum vessels
- Oxygen vessels
- Oversized vessels

Working Temperature:

11 bar versions: 10°C to +100°C

12 bar versions: 10°C to +50°C

Maximum Working Pressure:

11 bar SPVD 2014/29/UE

12 bar PED 2014/68/UE

Additional carriage charges will apply to this product and will vary dependant on location. This overrides any other carriage agreements. For further details please contact us.

Ensure the compressor never takes in air/solvent mix. This could cause the tank to explode.

Receiver Kits

For illustration purposes only, each kit contains different components based on the specific connections of each air receiver

Each kit to suit vertical air receivers contains a mechanical float condensate drain (50 litre onwards), safety relief valve, ball valve, gauge and connection materials

To suit Vertical Air Receivers, RAL 5015

Tech Sheet 20570

*Direct delivery, to Mainland UK only, on any air receiver above 500 litres. Please contact your Account Manager.

AIR RECEIVERS & ACCESSORIES

Vertical with Fixing Bracket

Installation: always in combination with a full receiver kit, water drain and safety relief valve. Ensure the compressor never takes in air/solvent mix. This could cause the tank to explode.

Additional carriage charges will apply to this product and will vary dependant on location. This overrides any other carriage agreements. For further details please contact us.

Working Temperature:
11 bar versions: 10°C to +100°C
12 bar versions: 10°C to +50°C

Maximum Working Pressure:
11 bar SPVD 2014/29/UE
12 bar PED 2014/68/UE

Ensure the compressor never takes in air/solvent mix. This could cause the tank to explode.

Receiver Kits

For illustration purposes only, each kit contains different components based on the specific connections of each air receiver

Each kit to suit vertical air receivers contains a mechanical float condensate drain (50 litre onwards), safety relief valve, ball valve, gauge and connection materials

To suit Vertical Air Receivers, Galvanised

LIQUID LEVEL GAUGES

EcoFit Gauges

EcoFit liquid level gauges are available up to 1 metre, each gauge above 400mm is supplied with an upper tank bracket. Thread sizes available in G1/4", G3/8", G1/2" BSPP Male

- Suitable for many industrial and domestic usages, subject to pressure and material compatibility

Maximum Working Temperature: +60°C

The QuickMount valve assemblies are G3/4" BSPP which are manual screwdown with Auto Safety Shut-off (ASV) as the standard configuration, G1/2" BSPP does not come with the safety shut-off valve.

Valves Assemblies: Brass or stainless steel

Collar: Brass

Seals: Viton

Sight Tube: Polycarbonate

Guard Tube: 'C' section aluminium

Tank Seals: Walkertite washer

Tank Seals: Walkertite washer

Maximum Working Temperature: +100°C

Maximum Pressure: 14 bar

VISUAL INDICATORS

High Pressure Visual Indicators

- Indicate the presence or absence of a pneumatic signal
- Wide angle of visibility
- Contrasting colours combinations for positive identification

Medium:

Compressed air, filtered dry or lubricate
Operation: Visual indicator, diaphragm operated

Materials:

Molded plastic body and internal components, brass connector, steel spring, synthetic rubber diaphragm

Operating Temperature:
+2°C to +66°C*
*Consult our technical service for use below +2°C

Operating Pressure:
0.7 to 8.6 bar full actuation
0-0.14 bar full de-actuation

COLD WATER FLOW METER

Single-jet Water Meter

Compact design for most metering applications

Meter Type: Single-jet impeller design

Meter Body Material: Brass, epoxy coated

Drinking Water Approved: (75/33/EEC)

Accuracy: Class B

Installation: Horizontal or vertical

Connection: BSP (nuts, tails and washers supplied)

Maximum Working Temperature:
+30°C

Maximum Working Pressure:
16 bar

THERMOMETERS FOR INDUSTRY

Handheld Thermometers, Type K

- Free traceable Certificate of Calibration included
- Robust waterproof case offering IP66/67 protection
- Backlight, max/min and hold functions
- Integrated rubber seal for durability and complete watertightness
- Designed for reliability and ease of use
- Ideal for industry applications
- Excludes probe

Working Temperature:
-100°C to +1372°C

PNEUMATIC CYLINDERS

ISO 6432 Mini Cylinders

Medium:

Clean compressed air. Filtered (40µm) and lubricated cushioning-bumper.

Please note: Bore sizes 8mm-12mm and 32mm-40mm are available on a lead time of 2 weeks. Please contact your local distributor for details.

Working Temperature:
-20°C to +70°C

Working Pressure:
2 to 10 bar

Stainless Steel Piston Rod and Barrel as Standard

Magnetic Single Acting

Tech Sheet 3001

ISO 6432 Mini Cylinders

Medium:

Clean compressed air. Filtered (40µm) and lubricated cushioning
KA-Bumper, KB-Adjustable.

Please note: Bore sizes 32mm-40mm are available on a lead time.
For more information see details.

Working Temperature:
-20°C to +70°C

Working Pressure:
1 to 10 bar

Further sizes in this range continued on next page

PNEUMATIC CYLINDERS

ISO 6432 Mini Cylinders

Medium:

Clean compressed air. Filtered (40µm) and lubricated cushioning KA-Bumper, KB-Adjustable.

Please note: Bore sizes 32mm-40mm are available on a lead time.

For more information, please refer to the technical drawing for details.

Working Temperature:
-20°C to +70°C

Working Pressure:
1 to 10 bar

Stainless Steel Piston Rod and Barrel as Standard

Magnetic Double Acting

PNEUMATIC CYLINDERS

ISO 6432 Mini Cylinder Guides

The guide unit allows for standard ISO 6432 cylinder to move loads with high positioning accuracy.

Key Features

- Protection against rotation at high torques.
- High guide precision for cylinder guiding.
- Supplied plain or recirculating ball bearing guides.

Stainless Steel ISO 6432 Mini Cylinders

Full stainless steel double acting, magnetic, bumper cushioned cylinders.

Available in:

Bore sizes: 16, 20 and 25mm

Stroke lengths: 10, 25, 50, 80, 100, 125, 160, 200, 250 and 320mm

Intermediate strokes are available upon request, please contact our Business Development Team.

Available in **304 or 316L stainless steel**, but particularly suitable for use in corrosive environments.

Working Temperature:
0°C to +80°C

Operating Pressure:
2-10 bar

ISO 6432 MINI AIR CYLINDERS, ALL STAINLESS STEEL

ISO 6432 Mini Cylinders, Double Acting

Technical Specification

- ISO 6432 stainless steel micro-cylinders are available in various versions with a wide range of accessories
- With or without magnet execution
- Double-acting, single or through-rod
- Gaskets: polyurethane or FKM/FPM (for high temperatures)
- Fixing accessories

Fluid

Lubricated or non-lubricated air

 **Temperature Range:**
10°C to +80°C

 **Maximum Operating Pressure:**
10 bar

1. Piston rod: AISI 316 steel
2. Head: AISI 304 steel
3. Piston rod gasket: polyurethane or FKM/FPM
4. Guide bushing: sintered bronze
5. Barrel: AISI 304 steel
6. Piston: brass
7. Piston gasket: polyurethane or FKM/FPM
8. Magnet: plastoferrite
9. Static O-rings: NBR or FKM/FPM

We have access to **over 10,000 product lines available** via Norgren's European Distribution Centre. Contact our business development team with your Norgren requirements.

Norgren's extensive product range comprises of other leading brands including: **Veht, Herion, Buschjost, Martonair, Festo, SMC, Rexroth, Eaton.**

VACUUM

Vacuum is most commonly used for picking and placing components in assembly automation systems. Generated from a compressed air supply, this can be controlled very simply in order to

perform most common tasks. The range includes a range of pumps, cups, switches and accessories; easily selected and applied.

PRESSURE SWITCHES

Pressure switches can be used to automatically monitor pressure levels in a compressed air system. They can however also be used for more complex monitoring functions in air, water or hydraulic applications.

ACTUATORS

Pneumatic actuators (sometimes called cylinders) are the product used to provide motion and force to industrial automation applications. Linear and rotary output, they are available in all manner of sizes and styles to suit most requirements.

Norgren has a long history of production of this kind of device – an early example of a pneumatic actuator was the original Martonair air hoist. They now include rodded, rodless, compact, roundline, guided and other ranges.

AIR PREPARATION

Correct air preparation is essential for best performance. Norgren has a great reputation in this area, and its ranges have been at the forefront of industry for many years.

VALVES

In industrial automation, valves can be as simple or complex as required. Norgren has many brand names associated with its valve ranges – Herion,

Buschjost, Walter, FAS, Webber, Watson Smith, Maxseal, Enots and Martonair.

ISO 6432 CYLINDERS & MOUNTINGS

ISO 6432 Cylinders

- Magnetic piston as standard
- Generally conforms to ISO 6432
- High strength, double crimped end cap design
- Corrosion resistant

Working Temperature:
-10°C to +80°C

Working Pressure:
2 to 10 bar

Standard:
ISO 6432

Buffer:
Polyurethane

Operation:
Single acting (sprung in),
magnetic piston, buffer cushioning

- Nose mounting nut and piston rod locknut as standard
 - Optional port arrangement for compact installation
- Medium:**
Compressed air, filtered, lubricated or non-lubricated

Barrel:
Stainless steel
(austenitic)

Piston Rod:
Stainless steel
(austenitic)

Seals:
Nitrile rubber

End Covers:
Clear anodised
aluminium alloy

Single Acting RM/28000/M

0036	Bore mm	Stroke mm	Thread
RM/28010/M/10	10	10	M5

Tech Sheet 10316

Working Temperature:
-10°C to +80°C

Working Pressure:
1 to 10 bar

Medium:
Compressed air, filtered,
lubricated or non-lubricated

Standard:
ISO 6432

Buffer:
Polyurethane

Operation:
Double acting, magnetic
piston with buffer or
adjustable cushioning

Barrel:
Stainless steel
(austenitic)

Piston Rod:
Stainless steel
(austenitic)

Wiper:
Polyurethane

Seals:
Nitrile rubber

End Covers:
Clear anodised
aluminium alloy

Series 24, Double Acting Cylinders

Single and double-acting
Standard CETOP RP52P DIN/ISO 6432
Stainless steel rod and tube
Anodized AL end-blocks

Type of construction: flanged

Operation: single-acting or double-acting

Materials: end-blocks = anodized AL, tube and rod = stainless steel, piston = AL, seals = NBR - PU, other parts = see coding

Brackets: screw, flange, feet, trunnion

Stroke min – max: Ø 16: 10 - 600 mm; Ø 20 - Ø 25: 10 - 1000 mm

Bores: Ø 16, 20, 25

Fluid: Filtered air, without lubrication. If lubricated air is used, it is recommended to use oil ISO VG32. Once applied the lubrication should never be interrupted.

Speed: 10 to 1000 mm/sec (without load)

Operating temperature:
0°C to 80°C (with dry air -20°C)

Operating pressure:
1 to 10 bar (double-acting);
2 to 10 bar (single-acting)

PNEUMATIC CYLINDERS

Gen 1 ISO 15552 Cylinders

Medium:

Clean compressed air. Filtered (40µm) and lubricated adjustable cushioning.

Piston Rod Material: Chrome plated carbon steel.

Please note: Bore sizes 125mm are available on a lead time.

For more information, please refer to the technical data sheet for details.

Working Temperature:
-20°C to +80°C

Working Pressure:
1 to 10 bar

Chrome Plated Carbon Steel Piston Rod as Standard

Tech Sheet 10657

Further sizes in this range continued on next page

Gen 1 ISO 15552 Cylinders

Medium:

Clean compressed air. Filtered (40µm) and lubricated adjustable cushioning.

Piston Rod Material: Chrome plated carbon steel.

Please note: Bore sizes 125mm are available on a lead time.

For more information, please refer to the technical data sheet for details.

° Working Temperature:

-20°C to +80°C

Working Pressure:

1 to 10 bar

Chrome Plated Carbon Steel Piston Rod as Standard

Magnetic Double Acting, Adjustable Cushioning, BSPP

PNEUMATIC CYLINDERS

ISO 15552 Standard Cylinder Guides

The guide unit allows for standard ISO 15552 cylinder to move loads with high positioning accuracy.

Benefits

- Protection against rotation at high torques.
- High guide precision for cylinder guiding.
- Supplied plain or recirculating ball bearing guides.

DSBC STANDARD CYLINDER

Features

Product Description

ISO 15552 STANDARD CYLINDERS, DSBC

FESTO

Double Acting, Adjustable Pneumatic Cushioning

- Strokes of up to 2800mm
- Excellent flexibility thanks to wide range of variants
- Extensive range of accessories makes it possible to install the cylinder virtually anywhere
- T-Slot

Magnetic

ISO 15552 CYLINDERS

Double Acting Cylinders

Technical Data for ISO 15552 Cylinders

- Fluid: unlubricated air (lubrication, if used, must be continuous)
- Sensor magnet: all versions come complete with magnet
- Piston rod material: C40 chromed steel Ø32-63
- Piston seal: NBR

🌡️ **Temperature Range:**
10°C to +70°C

🔧 **Maximum Operating Pressure:**
10 bar

ISO 15552 CYLINDERS

Double Acting Cylinders

Technical Data for ISO 15552 Cylinders Ø 160-320

- Design: round barrel with tie rods
- Sensor magnet: all versions come complete with magnet
- Piston rod material: C45 steel, chromed
- Piston seal: NBR
- Options: available with mounted intermediate hinge

 **Temperature Range:**
10°C to +80°C

 **Maximum Operating Pressure:**
10 bar

Sensor Tester with M8 & M12 Connections

This sensor tester features the following:

- A green light and acoustic signal indicating correct operation
- Sensors can be checked without having to be disassembled
- M8 and M12 connections and terminal board for direct connection to the wires
- PNP or NPN switching button

Technical Data

- Container material: PA 6.6 blue
- Degree of protection: IP00
- Connections: M8 and M12 plug-socket type with 40cm cable
- Additional connections: three terminals for wire connection
- Power supply: 9V DC (battery type 6LR61)
- Internal voltage: 15V DC
- Green light: tester switched on
- Yellow light: sensor in operation
- Red light: battery fla

ISO 15552 CYLINDERS, SERIES HCR (HIGH CORROSION RESISTANCE)

Uses stainless steel fixing

In some applications, cylinders are exposed to aggressive environments (e.g. the dairy, fruit and vegetable, and food industry) or to substances and washings with aggressive detergents (e.g. caustic soda, hydrochloric acid and lactic acid). Under these conditions, the HCR series cylinders ensure better corrosion resistance.

Cylinders made to ISO 15552, designed and built with materials and/or surface treatments that are highly resistant to corrosion

They come in various versions and with specific range of accessories

- with or without magnet
- with single or through piston rod

Also available with liner in the STD series or series 3

1.	Piston rod: AISI 316, thickness chromed
2.	Head: anodised pressure die-cast aluminium, epoxy-vinyl ester and epoxy-resin powder coating
3.	Piston rod gasket: special polyurethane
4.	Guide bushing: steel strip with bronze and PTFE insert
5.	Barrel: drawn anodised calibrated aluminium
6.	Semi-piston: made of self-lubricating technopolymer with built-in cushioning olives (aluminium with technopolymer shoe for Ø 80, 10 and 125)
7.	Piston gasket: NBR
8.	Magnet: plastoferrite
9.	Buffer + static O-rings: NBR
10.	Cushioning gasket: NBR
11.	Needle: AISI 316, screws: AISI 316
12.	Screws: AISI 316

ISO 15552 AIR CYLINDERS, ALL STAINLESS STEEL

Technical Specifications

Fluid: lubricated or non-lubricated air

° Temperature Range:
10°C to +80°C

Maximum Operating Pressure:
10 bar

1. Piston rod: AISI 316 steel
2. Head: AISI 304 steel
3. Piston rod gasket: polyurethane or FKM/FPM
4. Guide bushing: sintered bronze
5. Barrel: AISI 304 steel
6. Enbloc gasket: NBR or FKM/FPM
7. Magnet: plastoferrite
8. Static O-rings: NBR or FKM/FPM
9. Cushioning gasket: polyurethane or FKM/FPM
10. Cushioning needle: AISI 304 steel
11. Tie rod: AISI 316 steel
12. Needle-retaining ring: technopolymer

ISO 15552 CYLINDERS & MOUNTINGS

ISO 15552 Cylinders

- Cylinder conforms to ISO 15552
- High performance adaptive cushioning system "ACS"
- Polyurethane seals ensure efficient low friction operation and long life
- Switches can be mounted flush with the profile barrel
- Comprehensive range of standard mountings

Medium: Compressed air, filtered,

lubricated or non-lubricated

Operation: Double acting, adjustable cushioning.

Profile: Anodised aluminium

Piston Rod: Stainless steel (martensitic)

Piston Rod Seals: Polyurethane

Piston Seals: Polyurethane

O-Rings: Nitrile Rubber

End Covers: Pressure diecast aluminium

Working Temperature:
-20°C to +80°C

Working Pressure:
1 to 16 bar

IMPERIAL CYLINDERS

Imperial Cylinders

- Large range of bore sizes – ideal for a wide variety of industrial applications
- Extensive choice of mountings
- Long established design – proven ruggedness and reliability
- Adjustable cushioning

Working Temperature:
-5°C to +80°C

Working Pressure:
2 to 10 bar

Medium: Compressed air, filtered, lubricated or non-lubricated

Operation: Double acting, adjustable cushioning

Piston Rod and Tie Rods: Stainless steel (martensitic)

Barrel: Anodised aluminium

Piston and End Covers:

Aluminium

Seals: Nitrile

In-line Positioner Cylinders

Medium: Compressed air, filtered, non-lubricated.

Response time: 10 secs max. for 200mm stroke.

Working Temperature:
-20°C to +80°C

Working Pressure:
2 to 10 bar

Materials:

Piston Rod and Valve Spool: Stainless steel. Piston rod end and zero.

Adjuster: Zinc plated steel

Valve Bush: Brass cylinder barrel and piston.

Valve Body: Aluminium alloy

ISO 1552 CYLINDERS

Series 61, Double Acting Cylinders Aluminium Profile ISO 1555

- In compliance with ISO 15552 standards and with the previous DIN/ISO 6431 – VDMA 24562 standards.
- Rolled stainless steel rod
- Clean design with adjustable pneumatic cushioning
- Special designs available

Type of construction: with tie-rods (inside the profile)

Operation: double-acting, single-acting, tandem.

Low friction version: double-acting only.

Materials: standard = aluminium end-blocks and piston, rolled stainless steel AISI 420B rod, anodised aluminium tube, zinc-plated steel tie-rods and tie-rod nuts, PU seals. Low friction = standard materials with NBR piston seal and NBR rod seal (FKM rod seal on request).

Type of mounting: with front rear flange, foot mounting, with front/rear/centre/ swivel trunnion.

Strokes, min – max: 10 to 2500mm.

Speed: 10 to 1000mm/sec, no load (standard versions). 5 to 1000mm/sec, no load (low friction version).

Fluid: filtered air, without lubrication. For standard versions only: if lubricated air is used, it is recommended to use oil ISOVG32. Once applied the lubrication should never be interrupted.

Full range of ISO cylinders available including large bore (160, 200 and 250mm) and stainless steel options.

Non-stock strokes available on request.

Operating temperature:
0°C to +80°C (with dry air: +20°C).

Operating pressure:
1 to 10 bar (standard versions).
0.1 to 10 bar (low friction version).

ISO 1552 CYLINDERS

Series 63, Double Acting Cylinders ISO 1552

Series 63 pneumatic cylinders comply with the ISO 1552 standard. They have been developed to guarantee high performance whilst also offering significant reduction in weight.

The new adjustable pneumatic and mechanical cushioning system ensures Series 63 also reduces the noise caused by the impact of the piston on the end block.

Type of construction: profile (with screws)

Operation: double-acting.

Materials: aluminium end blocks, technopolymer (nominal bore 32mm) or aluminium (nominal bore 40 to 125mm) piston, rolled stainless steel AISI 420B piston rod, zinc-plated steel piston rod nut, anodised aluminium tube, NBR-PU rod, piston and cushion seals.

Type of Mounting: with front/rear flange, foot mounting, with centre/front/rear/swivel trunnion.

Strokes, min – max: 10 to 2500mm.

Non-stock strokes available on request.

Speed: 10 to 500mm/sec, no load.

Fluid: filtered air, in class 7.8.4, according to ISO 8573-1, without lubrication. If lubricated air is used, it is recommended to use oil ISOVG32. Once applied, the lubrication should never be interrupted.

Non-stock strokes available on request.

 **Operating temperature:**
°C to +80°C (with dry air: -20°C).

 **Operating pressure:**
1 to 10 bar.

ISO 15552 CYLINDERS

Series 40, Double Acting Cylinders ISO 15552

Series 40 cylinders have been designed in compliance with ISO 15552 standards and with previous DIN/ISO 6431-VDMA 24562 standards.

A permanent magnet on the piston of these cylinders is able to send, through proximity switches mounted on the cylinder sliding axis, electrical signals to indicate its position.

Type of construction: with tie-rods.

Operation: double-acting.

Materials: aluminium end blocks and piston, rolled stainless steel AISI 420B (nominal bore 160-200mm) piston rod, zinc-plated piston rod nut, anodised aluminium tube, zinc-plated steel tie-rods and tie-rod nuts, NBR-PU rod, piston and cushion seals, brass rod scraper.

Operating temperature:
0°C to +80°C (with dry air: -20°C).

Operating pressure:
1 to 10 bar.

Type of Mounting: with tie-rods, with front/rear flange, foot mounting, with centre/front rear/swivel trunnion.

Strokes, min – max: 10 to 2500mm.

Speed: 10 to 500mm/sec, no load.

Fluid: filtered air without lubrication. If lubricated air is used, it is recommended to use oil ISOVG32. Once applied, the lubrication should never be interrupted.

250 and 320mm bore cylinders are available upon request.

ISO 15552 CYLINDERS

ISO 15552 Cylinders ISO 15552

The P1F, in bore sizes Ø32 to 125mm, is a standard profile linear pneumatic cylinder conforming to the ISO 15552 standard. It utilises internal composite technology (piston) to save weight, while assuring the high performance and functionality expected of an ISO cylinder. With aluminium sandblasted front and rear end covers, multi-layer PTFE-coated steel bearing with stainless steel piston rod, pneumatic cushioning and magnetic piston with polyurethane (PUR) seals as standard, this is our industrial profile ISO cylinder.

Challenges encountered within rigorous environments require leading engineered solutions and products. Meeting these exacting needs, the P1F provides the answer for high and low temperature applications. It is engineered to provide superior performance in harsh conditions, using proven class-leading seal technology for reliable operation, and long service life in temperatures down to -40°C and up to +150°C. With robust corrosion-resistant body and optional metal scraper, the P1F leads the way in today's changing climate.

Applications:

- Factory automation
- Machine tools
- Packaging machinery
- Vehicle assembly facilities
- Material handling
- Outdoor
- Transport

Working Temperature:
-20 to +80 (Standard)

Maximum Working Pressure:
10 bar

ISO 15552

PNEUMATIC CYLINDERS

Compact Magnetic Cylinders

Medium:

Clean compressed air. Filtered (40µm) and lubricated cushioning-buffer.

Body: Aluminium

Seals: Nitrile

 **Working Temperature:**
-20°C to +80°C

 **Working Pressure:**
1 to 10 bar

See page 520 for Compact Cylinder Standard and Viton Seal Kits

Save space, increase productivity

FESTO

Pneumatic components are often the preferred option for machines since they have a high power density. Smaller components are ever more popular because they are easy to use, save energy and help to boost productivity too.

Benefits of compact products

- Lower energy consumption
- Less material used
 - smaller CO₂ footprint
- More space for other movements
 - increased productivity
- Less mass means higher speed
 - increased productivity
- Less expensive m² per machine

CYLINDERS

For the full range and more information, please contact one of our sales team.

ADN COMPACT CYLINDER ISO 21287 (Male & Female Piston Rod)

Features

Up to 50% less fitting space compared to standard cylinders

Comprehensive range of mounting accessories

High speeds and machine cycles due to excellent running and cushioning characteristics

Patented 3 component piston

Product Description

Double Acting, Elastic Cushioning Rings

- Compact cylinders with standard dimensions
- Comply with the standard ISO 21287
- Innovative technology for maximum speeds
- Flexible in use thanks to easy-to-configure variant
- T-Slot

Ambient Temperature:
-20°C to +80°C

Elastic Cushioning

ISO 21287 COMPACT CYLINDERS, ADN

FESTO

Double Acting, Elastic Cushioning Rings

- Compact cylinders with standard dimensions
- Comply with the standard ISO 21287
- Innovative technology for maximum speeds
- Flexible in use thanks to easy-to-configure variant
- T-Slot

Ambient Temperature:
 -20°C to +80°C

Elastic Cushioning

PROXIMITY SENSORS

For T-Slot For DSBC/ADN/DSNU Cylinders

- Switching output via reed contact or non-contacting
- Insertable in the slot from above, does not protrude beyond the cylinder profil
- Variant suitable for use with energy chains and robots
- Cable clip and inscription labels included in the scope of delivery
- With switching status indication
- Selected types in accordance with ATEX directive for potentially explosive atmospheres

Ambient Temperature:
-40°C to +70°C

With Reed Contacts

0010	Function	Connection	Cable Length Metres	Manufacturer's Code

Tech Sheet 70212

For C-Slot For ADN/ADVC/DFM

- Magneto-resistive cylinder sensor for round slot, can be inserted from above.
- Measuring principle: magneto-resistive
- For universal use
- Individually configurable or pre-assemble
- Inserted in the slot from above, flush with the cylinder profil
- LED switching status indication
- Cable length 0.3, 2.5m

Tech Sheet 70213

- Modular cable system with unlimited combination options for sockets, cable lengths and cable qualities. Matches all devices with M8 and M12 plugs such as proximity switches, pressure switches, sensors, transmitters, flow sensors and others
- For thread M8 x 1 A-coded according to EN 61076-2-104
- For thread M12 x 1 A-coded according to EN 61076-2-101
- Pre-assembled at one or both ends
- Designs for static, standard, energy chain and robot applications
- Cable length 0.1 - 30m
- With PVC or PUR cable
- Ambient temperature -25 to +80 °C

DFM GUIDED DRIVES

Features

Compact and powerful, can reliably move high loads even in tight spaces

Plain or recirculating ball bearing guide

Choice of assembly and air port options for every application

Reliable and sturdy due to superior guide characteristics

Product Description

DFM GUIDED DRIVES

Sliding Guided Drives with Plain Bearing, Double Acting

- Drive and guide unit in a single housing
- Sturdy and precise
- Plain bearing guide
- High resistance to torques and lateral forces
- Wide range of applications
- Selected types in accordance with ATEX directive for potentially explosive atmospheres
- Sensor C Slot SMT 10G
- C Slot 6 to 10 bore
- T Slot 12 to 63 bore

Ambient Temperature:
-20°C to +80°C

Working Pressure:
2 to 8 bar (Piston: 6mm)
1.5 to 8 bar (Piston: 10mm)
2 to 10 bar (Piston: 12, 16, 20mm)
1.5 to 10 bar (Piston: 25, 32, 40mm)
1 to 10 bar (Piston: 50, 63mm)

DRRD SEMI-ROTARY DRIVE

Features

Product Description

Rack & Pinion

- Modern and compact design
- Lighter than other semi-rotary drives
- Housing protected against splash water and dust
- Selected types in accordance with ATEX directive for potentially explosive atmospheres
- T-Slot 8M

Ambient Temperature:
-10°C to +60°C

Working Pressure:
3 to 8 bar

ISO 21287 CYLINDERS

Compact Series Liner

Compact cylinder to ISO 21287, LINER series, available in different versions to meet all possible requirements. Below sizes listed are most popular, if you require an alternative size please contact the sales office

The heads have been eliminated for ease of installation, improved sturdiness and precision. The metal lining is designed to withstand heavy-duty work, tensile stress and impact. Technopolymer parts can withstand dynamic and pneumatic thrust. The lining virtually acts as a "bearing" to which most of user accessories are attached. The wide range of anchors provide numerous fixing points. Retractable magnetic limit switches can be mounted to identify the position in the cylinder grooves.

ISO 21287 CYLINDERS

Compact Series Liner

Compact cylinder to ISO 21287, LINER series, available in different versions to meet all possible requirements. Below sizes listed are most popular, if you require an alternative size please contact the sales office

The heads have been eliminated for ease of installation, improved sturdiness and precision. The metal lining is designed to withstand heavy-duty work, tensile stress and impact. Technopolymer parts can withstand dynamic and pneumatic thrust. The lining virtually acts as a "bearing" to which most of user accessories are attached. The wide range of anchors provide numerous fixing points. Retractable magnetic limit switches can be mounted to identify the position in the cylinder grooves.

COMPACT CYLINDERS & MOUNTINGS

Compact Cylinders

- One third the basic length of a corresponding VDMA/ISO model
- Low friction, long life seal design
- Fully non-corrodible specification
- Non-lube operation
- Optional non-rotating piston rod (non-rotating or guided piston rod on RM/92000/M)
- Standard magnetic piston for full control system versatility

Medium:
Compressed air, filtered, lubricated or non-lubricated

Operation:
RM/91000/M Single acting, non-cushioned, magnetic sprung in RM/92000/M
Double acting, buffer cushioning

Barrel and End Caps:
Anodised aluminium alloy

Piston Rod:
RM/91000/M Stainless steel
(Ø 12 to 40mm austenitic)
RM/92000/M Stainless steel
(Ø 12 to 40mm austenitic,
Ø 50 to 100mm martensitic)
Seals:
PUR and/or NBR

° Working Temperature:
-5°C to +80°C

Working Pressure:
2 to 10 bar

Single Acting RM/91000/M

ISO COMPACT CYLINDERS & MOUNTINGS

ISO Compact Cylinders & Mountings

- Conforms to ISO 21287
- Up to 30% shorter than full
- ISO/VDMA actuators
- Uses standard ISO/VDMA mountings

Working Temperature:
-5°C to +80°C

Working Pressure:
0 to 10 bar

Medium:
Compressed air, filtered, lubricated or non-lubricated

Operation: RA/192000/MX, Double acting, magnetic piston, female piston rod thread, buffer cushioning

Materials:
Profile barrel: Anodized aluminium
End covers: Pressure diecast aluminium
Piston rod: Stainless steel
Piston rod seals: PUR
Piston seals: NBR
O-rings: NBR

PNEUMATIC CYLINDER & TRANSMITTERS

Pencil Cylinder

The miniature cylinder with a piston diameter of 3mm is for general-purpose use in testing and other operations in very restricted spaces. Even with its small dimensions the cylinder offers the technical features of the proven series of larger miniature cylinders.

Single Acting

0047	Bore mm	Stroke mm
KU-40.100	3	6
Tech Sheet 10289		

Position Transmitter & Clamp

This unit acts as a 3/2 valve, it can be actuated either by a magnetic cylinder piston or by iron (FE). Use the clamp 33.006 to mount the transmitter onto the cylinder.

Suitable for sizes 8mm to 100mm. For other applications, the 4mm thread on the other side of the housing can be used.
Medium: Compressed air oil free

Transmitter not included

Working Temperature:
10° to + 60°C

Working Pressure:
2 to 6 bar

Transmitter
not included

ROUND RNDC CYLINDERS

Double Acting Cylinders

Clean profile cylinders available in different versions

- Configuration with or without magnet
- Single and double acting
- Single or through-rod
- Pneumatic cushioning on request
- Range of gaskets available in NBR, polyurethane and FKM/FPM (for high temperatures)

Technical Specification

- Fluid: unlubricated air (lubrication, if used, must be continuous)
- Sensor magnet: all versions come complete with magnet
- Piston rod material: C45 chrome rod, technopolymers piston rod
- Piston seal: NBR

° Temperature Range:
10°C to +80°C

Maximum Operating Pressure:
10 bar

Components

1. Piston rod: C45 steel or stainless steel, thick chromed
2. Piston rod gasket: polyurethane, NBR or FKM/FPM
3. Guide bushing: steel strip with bronze and PTFE insert
4. Barrel: drawn anodised aluminium alloy
5. Half-piston: self-lubricating technopolymer with integrated cushioning olives
6. Magnet: plastoferrite
7. Piston gasket: polyurethane, NBR or FKM/FPM
8. Head: anodised aluminium alloy

ROUNDLINE CYLINDERS & MOUNTINGS

Roundline Cylinders

- One fifth shorter than the basic length of a corresponding VDMA/ISO cylinder
- Low friction, long life seals
- High strength, double crimped end cap design
- Standard magnetic piston for full control system versatility
- Non-lube operation
- Choice of porting option for compact installation

Medium:

Compressed air, filtered, lubricated or non-lubricated

Operation (Double Acting):

Double acting, buffer cushioning

Piston Rod (Single Acting):

Stainless steel (16 mm bore martensitic, 20 to 40 mm bore austenitic)

Piston Rod (Double Acting):

Stainless steel (16 mm bore martensitic, 20 to 63 mm bore austenitic)

Barrel: Stainless steel (austenitic)

Seals and O-Rings: Nitrile

Wiper: Polyurethane

End Covers: Aluminium

Single Acting:

Double Acting:

° Working Temperature:
-5°C to +80°C

° Working Temperature:
-5°C to +80°C

Working Pressure:
2 to 10 bar

Working Pressure:
1 to 10 bar

Pneumatic Grippers

- Uses a single piston structure to generate a large gripping force
- Integrated variable flow valve to conveniently adjust the speed of opening and closing of the fingers
- Precise positioning accuracy when gripping components
- Body profile adapted with grooves for mounting sensor switches
- Integrated magnet for added control
- Gripping jaw opening and closing angle 30° to -10°
- Single acting N/O available on request
- Interchangeability: SMC

KHFY: Double Acting

KHFY25	M5 x 0.8	25	70
KHFY32	M5 x 0.8	32	85

Tech Sheet 20470

- Integrated linear guide rail for high precision and rigidity
- Positioning pin at the base of the unit to prevent deviation of the rail and body
- Deeper hole on the body to improve precision and consistency when dismounting and positioning
- Variable positioning jaws
- Body profile adapted with grooves for mounting sensor switches
- Other finger types available on request
- Single acting N/O and N/C available on request
- Interchangeability: SMC

KHFZ25	M5 x 0.8	25	5-100	33.5	19.5

Tech Sheet 20471

How to select product:

→ **Information of the gripping force** → **Information of the gripping point** → **Information of the external force put on the gripping jaw.**

The selection of the gripping force:
The gripping work-pieces shown, on the impact condition of ordinary handling state, taking safety coefficient $a=4$, have a gripping force that is more than 10-20 times of the mass of the gripped objects

$\mu = 0.2$ $\mu = 0.1$

$$F = \frac{mg}{2 \times 0.2} \times 4 = 10 \times mg$$

$$F = \frac{mg}{2 \times 0.1} \times 4 = 20 \times mg$$

10 times of the mass of the gripped objects	20 times of the mass of the gripped objects
---	---

F: gripping force (N)

μ : friction coefficient between fittings and work-pieces

m: mass of work-pieces

g: acceleration of gravity ($=9.8\text{m/s}^2$)

The condition that the work-pieces won't drop is $2 \times \mu F > mg$, so:

$$F > \frac{mg}{2 \times \mu}$$

Safety coefficient is a, so F is:

$$F = \frac{mg}{2 \times \mu} \times a$$

Note: if the friction coefficient $\mu > 0.2$, for safety, please also select clamping force according to the principle of 10-20 times of the mass of the clamped objects. As for large acceleration and shock, it requires for greater safety coefficient.

Slim profile for discreet safe mounting to grippers.

DRVS SEMI-ROTARY VANE DRIVE

Features

Product Description

SEMI-ROTARY DRIVES, DRVS

FESTO

Rotary Vane, Double Acting

- Modern and compact design
- Lighter than other semi-rotary drives
- Housing protected against splash water and dust
- Selected types in accordance with ATEX directive for potentially explosive atmospheres

Ambient Temperature:
-10°C to +60°C

Working Pressure:
3.5 to 8 bar (Size: 6, 8mm)
2.5 to 8 bar (Size: 12, 16mm)
2 to 8 bar (Size: 25, 32, 40mm)

MECHANICAL VALVES, MINIATURE

Technical Data

- Valve fitting port: push-in fitting for pip diameter, 4mm tube or M5 thread
- Fluid: filtered air without lubrication. Lubrication, if used, must be continuous
- Type: with poppet
- Nominal diameter: 2.5mm
- Conductance C: 16.5 NI/min – bar
- Critical ratio b: 0.003 bar/bar
- Flow rate at 6 bar P 0.5 bar: 35 NI/min
- Flow rate at 6 bar P 1 bar: 60 NI/min
- Actuation force, plunger at 6 bar: 8N

- Recommended lubricant: ISO and UNI FD22
- Installation: in any position

Operating Temperature Range:
10°C to +60°C

Operating Pressure:
0.5-10 bar

M/1553 In-line

- Extremely compact
- Extensive range of electrical style operating heads
- Very light operating forces
- Particularly suitable for control panels

° Working Temperature:
-20°C to +80°C

Working Pressure:
-0,9 to 10 bar

Medium:
Compressed air, filtered, lubricated and non-lubricate

Panel Mounting:
Hole size Ø 22 mm thickness 5 mm

Flow: 59 L/min

Body: Plastic

Roller Operator: Plastic

Plunger: Brass

Seals: Nitrile

Mechanical

0036	Thread	Function	Actuation

VALVES

For the full range and more information,
please contact one of our sales team.

VUVS UNIVERSAL DIRECTIONAL CONTROL VALVES

Features

Robust design,
perfect for harsh
environments

Can be manifold mounted to create
variable pressure zones

Extensive range of
mounting accessories

Excellent flow
performance

Solenoid or Air pilot options
In-line valves can be used as
individual valves or manifold valves

Product Description

IN-LINE PISTON SPOOL VALVES WITH SEALING RING, VUVS

FESTO

Ambient Temperature:
-5°C to +50°C

- Flow rate up to 2300 l/min
- In-line valves can be used as individual valves or manifold valves
- Variable pressure zones

- Universal valve, sturdy and durable
- Low-cost, no limitations with regard to performance
- Can be used as individual valves or manifold valves VTUS

In-line Electrical Connection Pattern Type B

Working Pressure:
1.5 to 8 bar

3/2 Way Solenoid/Pneumatic Spring with Internal Pilot Supply, Normally Closed

EXCEL 32 V03, V04 & V05 SERIES

- Extensive range of power and orifice size option
- G1/8, G1/4 and 7mm interface
- Compact installation
- Removable coil
- Standard exhaust diffuser
- Choice of manual override

Medium:

Compressed air, filtered, lubricated and non-lubricate

Materials:

Coil: Glass reinforced nylon

Armature: Stainless steel

Base:

Zinc alloy (G1/8), brass (G1/4), polyester (interface)

Seals: Nitrile (viton top seat)

Working Temperature:

-20°C to +50°C

Note: the below valves are only available in 24V DC.

see page 1553

Solenoid 5/2 Way Valve

The **Viking Lite** valve range is robust, versatile and combines high performance with compact installation dimensions. The choice of G1/8, G1/4 or G3/8 port sizes provide large flow capacity and short change-over times. Low change-over pressure is also an important characteristic of this valve range.

Under pressure, radial expansion of the seal occurs to maintain sealing contact with the valve bore.

This sealing method reduces friction and gives lower pilot pressures, providing fast response and less wear. Valves do not require lubrication in operation but they can also be installed in systems that are lubricated.

Working Temperature:
-10°C to +50°C

Maximum Working Pressure:
10 bar

PNEUMATIC LOGIC VALVES

Introduction

Logic elements are available with five different functions:
OR, AND, NOT, YES, MEMORY.

Main features common to all elements:

- Adaptor for DIN rail bar (DIN EN 50022) integral with the body
- Built-in pressure indicator
- Pipe locking system using $\varnothing 4$ built-in fitting

Technical Specification

- Nominal diameter: 2.7mm
- Flow rate at 6 bar P 1 bar: 100 NI/min
- Reset:
 - AND, OR via compressed air
 - YES, NOT via mechanical spring

 **Operating Temperature Range:**
-10°C to 60°C

 **Pressure Range:**
YES, MEMORY, OR, AND from 0 to 8 bar pilot pressure from 1.5 to 8 bar
NOT from 0.4 to 6 bar

Timers

- 2.7mm Orifice, 170 L/min
- Accuracy +/- 5%.
- Positive output gives a time delay then an output.
- Greater than 107 operations.
- Minimum Reset <0.1 sec.
- Negative output gives an immediate output that switches off after a delay.

Working Temperature:
-5 to +50°C

CZT-81 545 001	Vacuum	4	-

Tech Sheet 1511

2.7mm orifice, 170 L/min. Greater than 107 operations

Function:

OR Element:

The output signal "S" is present when a signal at "a" OR "b" is present. S = a OR b.

AND Element:

The output signal "S" is present only when signals "a" AND "b" are present simultaneously. S = a AND b.

YES Element:

The output signal "S" is only present when the pilot is present. S = a YES b.

Working Temperature:
-5 to +50°C

Working Pressure:
2 to 8 bar

NOT Element:

The output signal "S" is present only if the input signal "a" is NOT present. The output signal is therefore the inverse of the pilot signal. S = NOT a. If the supply port is connected to a 2nd input "b" the function obtained is called Inhibition. S=NOT a AND b.

Note: Switching time = <4ms exception OR and AND.

Sub-base Mounted

SPECIAL PURPOSE VALVES

In-line Progressive Starter

The in-line progressive starter is a valve that regulates the flow of air until the outlet pressure reaches a certain value, at which the valve opens and allows air to flow at full rate.

This valve can be used to control a group of valves or a single valve, it can also be mounted between another valve and an actuator.

The air that enters inlet 1 passes through a choke that has a knob adjustment to control the flow. The valve opens completely when the outlet pressure reaches about 60% of the inlet pressure. If the air supply is switched off, the valve discharges air from outlet 2 to inlet 1.

Working Temperature:

PRESSURE & VACUUM SWITCHES

Adjustable Pressure Switch

This type of pressure switch features a high degree of miniaturisation and a modern attractive design.

It can be installed in any position and also mounted onto a wall by means of two transversal holes.

In order to reduce wiring times, it is supplied ready assembled with a 2-metre electric cable or an M8 connector with a 300-mm cable.

The contact is the switching type, which means it can be normally open or normally closed

A knurled push-lock handle is provided for regulation

Working Temperature:
+50°C

Maximum Working Pressure:
15 bar

With 2 Metre Cable

Adjustable Pressure Switch

With M8 Connector & 300mm Cable

9149	Thread
9000402	1/8"

Digital Pressure Switch

The digital pressure switch can be used to transmit electric pressure signals and also display the pressure instantly. The signal is transmitted for two settable pressure values and with an analogue voltage signal. The values are clearly displayed on a LED video and different parameters can be entered from the keypad. Hysteresis can be adjusted and the unit's pressure can be modified. Two compressed air ports are provided, one at the back and one on the bottom. The pressure switch comes with a threaded plug in the bottom port. If you wish to connect to this port, merely unscrew the plug and screw it into the back port. Accessories are provided for fixing to the top or wall, or to a panel.

Maximum Working Pressure:
10 bar

With Digital Display Showing Pressure Reading

9149
9000600

Security Knob

NOTE: Pull outwards to remove the knob from the pressure switch on the unit. Insert the security knob and regulate the pressure switch. Then press the handle firmly to lock it in position. If the pressure switch needs to be reset, remove the security knob by forcing it laterally with a screwdriver.

To suit 9000401 & 9000402

9149
9200703

SPECIAL PURPOSE VALVES

Two Hand Safety Valve

Applications

- Compressed air couplings: push-in fittings for Ø4mm pipe
- Unfiltered, non-lubricated compressed air
- Standard: EN574 type IIIA, TÜV approved certified M6020244919001
- Synchronisation, maximum time between two signals: 0.4 sec
- De-activation time, with 1000mm maximum pipe length: <0.05 sec
- Actuation: pneumatic
- Reset: spring operated
- Nominal diameter: 2.7mm
- Mounting position: any direction

Materials

- Body: anodised aluminium
- Internal parts: brass and technopolymer
- Gaskets: NBR
- Spring: alloy steel

Working Temperature:
-10°C to +60°C

Working Pressure:
2.5 to 8 bar

Tech Sheet 1012

- The JM range of ball vibrators produces a rotative vibration with infinitely variable amplitude and frequency. The frequency is controlled by air pressure. The vibrator is designed to perform the following activities: moving, feeding, compacting and/or separating of all kinds of materials such as chemical powders, corn, sand, gravel and cement, etc.
- It is designed for indoor and outdoor applications but not to be submerged in any kind of liquid.

Tech Sheet 1013

- The JMT range of turbine vibrators produces a rotative vibration with infinitely variable amplitude and frequency. The frequency is controlled by air pressure. The vibrator is designed to perform the following activities: moving, feeding, compacting and/or separating of all kinds of materials such as chemical powders, corn, sand, gravel and cement, etc.

° Maximum Working Temperature: +100°C (220°F)

Maximum Working Pressure: 6 bar

BALL & CHECK VALVES

stainless
steel

Flow Control Regulators

Stainless steel flow control regulators control the speed of a pneumatic cylinder (models LE-7820 7822) or the speed of a chemical of food fluid carried (model 7822: for fluids compatible with FKM and PTFE seals) in aggressive environments or submitted to high mechanical or chemical constraints.

Designed without retention zones, these models are perfectly suitable for food applications or requiring frequent washing of installations.

Working Temperature:
-15°C to +120°C

Working Pressure:
1 to 16 bar

In-line, 1 Way Adjustment, BSPP

Tech Sheet 10660

Non-return Valves

Legris stainless steel non-return valves allow fluids to pass in one direction whilst blocking flow in the other direction. Robust and extremely compact, they are suitable for use as a safety item in all fluids circuits.

They are ideal for use in severe conditions and in aggressive environments.

Operation: A stainless steel valve blocks the fluid passage, when the pressure differential is lower than 0.25 bar.

Working Temperature:
-20°C to +180°C

Working Pressure:
0.5 to 40 bar

ALWITCO MUFFLERS

Air Exhaust Muffler

- "The Original" ... provides up to 85% noise reduction and 94% flow factor.
- Thoroughly proven on thousands of installations, the world-class Atomuffer® Air Exhaust Muffler expertly reduces Exponentially Perceived Noise (EPNdB) without impeding equipment performance. Its design takes explosive air exhaust noise discharged from valve exhaust ports and muffles it with optimized Constant Velocity (CV) flow factor. Exhaust air flows softly to atmosphere free of noise, oil fog, and contaminants, providing a clean, comfortable and productive work environment.
- The Air Exhaust Muffler features a unique obstruction-free expansion chamber. Standard Air Exhaust Muffler construction includes aluminium end covers, zinc-plated steel components and a cellulose fibre element.
- This design is recommended for general purpose air exhaust application for pressures up to 125 psi.

Air Ejector Mufflers

- Featuring collimator inserts for concentrated air flow.
- Quickly and easily connected to any compressed air source. Concentrates the air stream in a narrow beam over a longer distance, delivering maximum force at a required point.
- Supplied as a complete unit with a cylindrical housing which can be directly attached to compressed air lines properly positioned for parts ejection or packaging requirements. Can be supplied with a standard plastic collimator insert or a special heat-resistant metal collimator insert (for use in locations with extremely high ambient temperatures).
- Separate collimator inserts also are available as a low-cost solution for applications where it is necessary to bore holes directly into a die and insert the collimator to provide exact air thrust.

Working Temperature:
+10°C to +48°C

Maximum Working Pressure:
8.6 bar

End Flow Mufflers

- Directional flow in a compact design.
- Specifically designed for directing the flow of exhaust air in a single direction.
- Discharges exhaust air axially through a unique honey-combed end cap that disperses the air blast and dampens exhaust noise.
- Lightweight and small, standard model is constructed of zinc-plated steel. All stainless steel construction available for very corrosive or sensitive situations. Ideal for use in most locations facing any direction.

Working Temperature:
+10°C to +48°C

Maximum Working Pressure:
8.6 bar

Bantam™ Muffler

- Ideal for use where space is limited.
- Tough and compact, the Bantam™ Muffler is durably constructed of corrosion-resistant metals to withstand shock and continuous heavy duty use under all types of conditions.
- The Bantam™ Muffler is designed with a precise distribution of peripheral openings in a zinc-plated steel and brass acoustical element, which softly disperses exhaust air uniformly over a 360° pattern. All stainless steel construction is also available for very corrosive or sensitive situations.
- Supplied with a standard pipe thread fitting, the Bantam™ Muffler can be attached directly to the exhaust ports of air-operated equipment.

Working Temperature:
+10°C to +48°C

Maximum Working Pressure:
12 bar

EXHAUST FLOW REGULATOR/ SILENCERS & AIR FUSES

Exhaust Flow Regulator/ Silencers

- Compact, integral flow regulator and silencer units
- Captive regulating needle will not blow out when unscrewed
- Reduced dimensions

Medium:

Compressed air, filtered, lubricated or non-lubricated, inert gases

(T20)

Body and Washer: Nylon

Adjusting Screw:

High tensile zinc electroplated steel

Silencer: Porous polyethylene

Mounting:

Directly in the exhaust port, hexagon key adjustment for flow regulation (T20)

(0405)

Body and Nut: Brass

Needle: Plastic

Silencer: Sintered bronze

Working Temperature:
-20°C to +80°C

Maximum Working Pressure:
10 bar

Air Fuses

- Assists in complying with safety regulations
- Tamper proof
- Compact and safe design
- Low pressure drop
- Automatically resets after failure correction
- High corrosion resistance
- High air pressure rating

Medium:

Compressed air, filtered, lubricated and non-lubricated, inert gases

Mounting:

In-line two way valve. To be inserted between fixed air supply and flexible hose air line. See guidelines for typical installation

Type: Fixed uni-directional excess flow automatic shut off valve

Body: Aluminium

Spring: Stainless steel

Internal Parts: Brass

Working Temperature:
-20°C to +80°C

At low temperature ensure fuse is not subjected to icy conditions which may prevent function

Working Pressure:
Maximum 16 bar, minimum according to hose length
Drop pressure at shut-off flow
0,14 or 0,3 bar

BLOCK FORM FLOW REGULATORS & QUICK EXHAUST VALVES

Block Form Flow Regulators

- Compact size/low weight/ in-line units
- High flow performance
- Suitable for panel and wall mounting
- Adjustment can be locked
- Captive regulator needle will not blow out when unscrewed
- Adjusting knob position line

Medium: compressed air, filtered, lubricated or non-lubricated, inert gases

(M5) Body: Aluminium

Seals: Nitrile

Needle: Brass

(1/8", 1/4", 3/8", 1/2")

Body: Aluminium alloy

Needle and Internal Parts: Brass

External Parts: Aluminium alloy

Working Temperature:
-20°C to +80°C

PROPORTIONAL VALVES

Valves

- Closed loop air pilot operated proportional pressure control valve
- Adjustable for a wide range of applications
- Fast response
- Low power consumption

Working Temperature: -20°C to +50°C

Supply Pressure: 14 bar max.

- High flow
- **Medium:** Compressed air filtered to 50µm, non-lubricated
- **Flow:** Up to 1200 L/min at 11 bar supply pressure

FT Pro Air Service Units come complete with:
Filter/regulator, lubricator, 3/2 shut-off valve, mounting bracket and 10 bar pressure gauge.

Available in both auto drain and semi-auto drain. The units are also available on a floor stand for use with mobile compressors for use on site. All FT Pro Regulators can now be adapted to use either a 40mm or 50mm round face gauge with the new FT Pro Gauge Adaptor. See page 646

AIR PREPARATION

Working Temperature:
-20°C to +70°C

Maximum Working Pressure: 9 bar

Soft Start Valves are increasingly being used where safety is key in the start up of systems and machines in helping protect the operators and the equipment.

The valves allow the pressure to gradually increase to the full flow required on start up of the system.

OSHA approved.

These units can be used in conjunction with FT Pro Air Preparation with the addition of brackets style 'U' or 'L', or as a stand alone in-line unit.

All FT Pro Regulators can now be adapted to use either a 40mm or 50mm round face gauge with the new FT Pro Gauge Adaptor. See page 646

Can be fitted to any combination units, fitted before the lubricator it can be used to port off a non-lubricated air supply that might be required for your system.

These units are to be used in conjunction with FT Pro Air Preparation, or as a stand alone BSPP manifold block. When using with existing FT Pro Air Preparation, you will also require additional fixing brackets.

The manufacturers strive to maintain quality and are continually improving products to suit the industry.

Due to the success of the Professional FRL's, The Professional Range has been revamped with improved structure and sensitivity. 200 and 300 series now come with larger, stronger drip cups, extending the products in use life cycle.

Advancements to the construction of the regulators mechanism, has given extra sensitivity on the control this helps to ensure the system is working to the optimum pressure.

- Heavy-duty
- 20 micron filtration as standard
- Metal construction
- Modular compact design
- Semi-auto drain as standard
- Guard bowl protection only on FM3000, FM4000 and FM5000 units
- Micro gauge also available

AIR PREPARATION MS SERIES

Features

Robust design, perfect for harsh environments

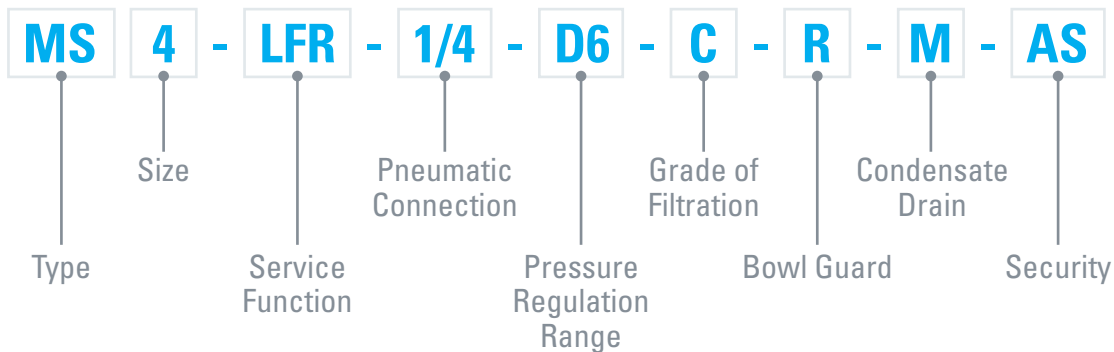

Good regulation characteristics with minimal pressure

High flow rate and highly efficient in removing contaminants

Available in both manual and auto-drain options

Product Description

AIR PREPARATION MS SERIES

FESTO

Filter Regulator, Manual Shut-off Valve & Pressure Gauge

 **Ambient Temperature:**
-10°C to +60°C

- For filtered and unlubricated compressed air
- Supply pressure can be opened and closed

- Output pressure is indefinitely adjustable within the pressure regulation range
- Manual rotary condensate drain

 **Working Pressure:**
0.8 to 14 bar

Manual Drain Filter Regulator with Manual Shut-Off Valve

0009	Thread	LPM	Micron	Pressure Regulation Range Bar	Manufacturer's Code

Tech Sheet 71014

AIR PREPARATION MS SERIES

FESTO

Pressure Regulators

- Maintains a constant working pressure independent of pressure fluctuations and air consumption
- High flow rate with minimal pressure drop
- Connection G1/4, G1/2
- Selected types in accordance with ATEX directive for potentially explosive atmospheres
- Lockable via accessories

Ambient Temperature:
-10°C to +60°C

Working Pressure:
1/4 BSPP 0.8 to 14 bar
1/2 BSPP 0.8 to 20 bar

Integrated Pressure Gauge, BSPP

0009	Thread	LPM	Pressure Regulation Range Bar	Manufacturer's Code

Tech Sheet 71440

Air Preparation Units MS-LFR-B Series

- Grid dimension 25, 40, 62mm
- Competitively priced basic component focused on the most important technical functions
- Lightweight and sturdy thanks to modern polymer materials
- Compatible with the MS series for the ideal combination of low-cost basic functionality and high-end functional requirements
- Stable control response
- With or without pressure gauge
- Rotary knob with latch
- MS2: Directly operated diaphragm regulator
- MS4, MS6: directly actuated piston regulator
- With integrated secondary exhausting and primary return flow function

Integrated Pressure Gauge, BSPP

0009	Thread	LPM	Micron	Bowl Type	Pressure Regulation Range Bar	Type

More variants available online

Filter Regulators

- Filter and pressure regulator in a single unit
- Good regulation characteristics with minimal hysteresis and primary pressure compensation
- Good particle and condensate separation

Ambient Temperature:
-10°C to +60°C

Working Pressure:
1/4 BSPP 0.8 to 14 bar
1/2 BSPP 0.8 to 20 bar

Manual Drain, BSPP

0009	Thread	LPM	Micron	Bowl Type	Pressure Regulation Range Bar	Manufacturer's Code

AIR PREPARATION MS SERIES

FESTO

Energy Efficiency Module MSE6-E2M

- MSE6-E2M constantly monitors the compressed air consumption, blocks the compressed air at a specific period once production has stopped and reduces the system pressure to 0 bar. It can be integrated directly into PROFIBUS, PROFINET, EtherCAT or EtherNet/IP via fieldbus.
- Grid dimension 62mm
- Intelligent service unit component for optimising the use of compressed air as an energy medium in industrial automation technology
- Combination of stop valve, flow sensor, pressure sensor and fieldbus node
- Identification of production downtime and leakages
- User-controlled shut-off and pressurisation
- Equipped with measurement, control and diagnostic functions
- Fieldbus connection (PROFIBUS DP, PROFINET IO, EtherNet/IP or EtherCAT) via integrated fieldbus nodes enables connection to a higher-level controller
- Sustainable operation with active air shut-off and pressure reduction

Service Unit Combination MSE6-E2M

0009	Thread	Electrical Actuation	Type
2465321	1/2"	Fieldbus node for PROFIBUS DP	MSE6-E2M-5000-FB13-AGD
3990296	1/2"	Fieldbus node for Ethernet/IP	MSE6-E2M-5000-FB36-AGD
3992150	1/2"	Fieldbus node for EtherCAT®	MSE6-E2M-5000-FB37-AGD
8157910	1/2"	Bus node for PROFINET IO with M12 connection	MSE6-E2M-5000-FB43-AGD
8157911	1/2"	Bus node for PROFINET IO with RJ45 connection	MSE6-E2M-5000-FB44-AGD

Air Preparation Units MS-LFR-B Series

Filter MS2-LF-B

- Very compact and extremely lightweight series for use close to the process directly in the machine
- Lightweight and sturdy thanks to modern polymer materials
- Compatible with the MS series for the ideal combination of low-cost basic functionality and high-end functional requirements
- With manual condensate drain, rotating
- Grid dimension 25mm
- Variants recommended for production systems for manufacturing lithium-ion batteries

Filter Regulator MS-LFR-B

0009	Thread	LPM	Micron	Bowl Type	Pressure Regulation Range Bar	Type

MINIATURE FRLS, 'BIT'

Miniature Filter

- Flow rate at 6 bar ΔP 0.5 bar: 860 NI/min
- Fluid: compressed air
- Weight: 40g
- Mounting position: vertical
- Condensate drain: manual/semi-auto
- Bowl capacity: 16cm³

° Maximum Temperature at 10 bar: +50°C

Maximum Inlet Pressure: 13 bar

BSPP

9154	Thread BSPP	Micron μm
5101002	1/8"	20
5101001	1/8"	5
5201002	1/4"	20
5201001	1/4"	5

Miniature Lubricator

- Type of lubrication: oil mist
- Bowl capacity: 26.5cm³
- Flow rate at 6 bar ΔP 0.5 bar: 400 NI/min
- Fluid: compressed air
- Weight: 40g

° Maximum Temperature at 1MPa, 10 bar (145 psi): +50°C

BSPP

9154	Thread BSPP
5103001	1/8"
5203001	1/4"

Miniature Pressure Regulator

- Flow rate at 6 bar ΔP 0.5 bar: 340 NI/min
- Fluid: filtered, lubricated or non-lubricated compressed air
- Weight: 80g
- Mounting position: any
- Gauge port: G1/8"

° Maximum Temperature at 10 bar: +50°C

Maximum Inlet Pressure: 13 bar

BSPP

9154	Thread BSPP	Pressure Range bar
5107003	1/8"	0 to 8

5204008	1/4"	20	0 to 8

MINIATURE FRLS, 'BIT'

Miniature Oil Removal Filter

Free filtration: 99.97% 0.01µm

- Flow rate at 6 bar ΔP 0.5 bar: 700 NI/min
- Fluid: compressed air
- Weight: 65g
- Mounting position: vertical
- Condensate drain: manual/semi-auto
- Bowl capacity: 16cm³

Maximum Temperature at 10 bar:
+50°C

Maximum Inlet Pressure:
13 bar

NB: it is advisable to mount a 5µm filter upstream acting as a rough filter.

FILTER REGULATOR FOR WATER, 'BIT' SERIES F

- Filtering and/or water pressure regulation units, characterised by the use of materials certified to specific standards on products for use in contact with foodstuff or drinking water.
- Declarations of conformity and release test reports are available on request for those who need them to certify our product incorporated in their own systems.
- The high colour surface finish of the body was chosen to enhance the highly hygienic properties of the product.
- The pressure regulator works on incompressible fluids (water) and there is a valve leak, the downstream pressure could rise up to reach the inlet pressure and then it re-stabilises with water consumption.
- If necessary, consider the possibility of installing a safety valve that relieves any excess pressure.
- Fluid: water/air and fluids compatible with materials used

- Flow rate at 6.3 bar ΔP 1 bar: 6 up to 14.5 l/min dependant on model (refer to sales department)
- Gauge port: regulator/filter regulator, 1/8" BSPP
- Mounting: fixing plates 9170301, regulator bracket 9200701

Certifications

- European Regulation (EU) 10/2011, KTW, W270, WRAS, ACS, NSF61
- Approved for compliance with the UBA list, NSF/ANSI 372
- European Regulation (EU) 10/2011, KTW, W270, WRAS, NSF61, DM174/04, KTW, W270, WRAS, ACS, NSF61

STANDARD SERIES FRLS, 'SYNTESI'

SYNTESI

Syntesi® is an important milestone achieved by Metal Work, the result of thirty years' experience producing air treatment units. Syntesi® obtains the best possible performance in a reduced space and with limited weight. The capacity is much higher than that of other units of the same size. These modular units feature a very simple yet effective system that requires no brackets, stay bolts or yoke for assembling the elements.

The basic version of Syntesi® incorporates numerous functions that are not provided or are only optional with traditional units:

- Padlockable knobs
- Additional pneumatic ports on the front and back
- Flow options from left to right or vice versa
- Regulators with compensation system which are accurate even when the upstream pressure changes, with rapid downstream pressure relief
- Full indelible marking
- Automatic condensate drain even in size 1
- 360° visual inspection of oil and condensate levels

The basic materials – technopolymer and nickel-plated brass – have excellent corrosion resistance. An anti-corrosion version is available with stainless steel components (screws and plates) or Geomet® related ones (regulator springs).

Technical Specifications

- Padlockable knob: the knobs of the regulators, filter regulators and standard sectioning valves can all be padlocked
- Fluid: compressed air or other inert gases

In-series Regulator

The in-series regulator is used to take air at a set pressure from the ports on the front and back of the body, while the pneumatic inlet and outlet ports are connected directly. It is possible to assemble several regulators side by side, all supplied at the same pressure, and obtain different regulated pressures, regardless of the pressure of the previous module.

The in-series regulator uses the same construction principles as the standard regulator, so the advantages are the same, such as compensation for upstream pressure changes, relief valve, rapid relief of the downstream pressure and a padlockable push-lock knob.

Square Dial Pressure Gauge

- A compact pressure gauge with a square dial suitable for air treatment units.
- Suitable for use with Metal Work Bit, Syntesi, New Deal and Skillair ranges.
- The Teflon seal on the outer thread of the fitting ensures a perfect pneumatic seal.
- To mount it, screw the gauge in as far as it will go, then loosen enough to align the dial. A sealant is not required.
- The pressure gauge has a neck to dampen pressure vibration and absorb water hammer. This improves overall reliability and guarantees longer life.

Security Knob

NOTE: pull outwards to remove the knob from the pressure switch on the unit. Insert the security knob and regulate the pressure switch. Then press the handle firmly to lock it in position. If the pressure switch needs to be reset, remove the security knob by forcing it laterally with a screwdriver.

Lubricator

Technical Specification

- Fluid: filtered compressed air
- Mounting position: vertical

Maximum Temperature at 10 bar: +50°C

Maximum Inlet Pressure: 18 bar

Notes

- Use the screw provided to set the drip rate to drop every 300-600ml.
- Fit the lubricator as close as possible to the point of use
- Fill the bowl with oil before pressurising the system
- Do not use cleaning oil, brake fluid or solvents in general
- Recommended lubricants: ISO and UNI FD22, e.g. Energol HLP 22(BP), Spinesso 22 (Esso), Mobil, Tellus Oil 22 (Shell)
- Automatic filling lubricator and minimum level lubricator

Filter + Regulator + Lubricator Set

Technical Specification
 • Fluid: compressed air

Maximum Temperature at 10 bar: +50°C

Maximum Inlet Pressure: 18 bar

Notes

- Highly reliable, heavy duty, piston operated
- FRL unit
- Stability of the set pressure as the upstream pressure varies
- Metal bowl with external sight glass
- Semi-automatic and automatic condensate drain
- Lubrication proportional to flow rate
- Micrometric lubrication regulation
- Activation guaranteed with low flow rate

STANDARD SERIES FRLS, 'NEW DEAL' BREATHE AIR SET

Breathe Air Set

Breathe provides high quality, clean air, essential for paint spraying and breathing air applications. Designed for self-contained operations, it will filter compressed air directly from most types of compressor and ring main systems.

Breathe will supply sufficient breathable air for up to two men on constant demand and will provide breathing quality air to a higher standard than specified in BS4275: 1974

Technical Specification

- Element grade: XA and AC
- Threaded port: 1/2" BSP
- Particle removal: 0.01 microns
- Maximum oil carry over @ +20°C: 0.005 mg/cu m
- Pressure loss, clean and dry: 150 mbar
- Pressure loss, saturated: 350 mbar
- Pressure loss, change element: 400 mbar

FRLS, 'ONE' AIR TREATMENT UNIT

'ONE' Integrated Compressed Air Treatment Unit

In the world of pneumatics, which is considered mature, it is rare to encounter completely new and different products.

ONE is a compressed air treatment unit with a high degree of integration, that encompassed numerous pneumatic functions.

In fact, it contains so many innovations that a single patent is not enough to safeguard it against imitation – three separate patent applications have been registered with a total of 39 claims.

This unit is so innovative that it won the international novelty award at Fluidtrons Compomac.

ONE has a single high-performance valve on the main row that handles all the functions from regulation to relief. It is controlled by a high-precision pilot regulator with controlled relief, in series with the manual on-off valve, the electric valve and the progressive actuator.

Modification of the valve has led to a significant reduction in overall dimensions, enhanced capacity, precision and response speed.

The **ONE** single unit houses the threaded port filter, condensate drain, pressure regulator, shut-off valve, soft start valve, pressure switch and three supplementary air intakes.

The single unit houses the threaded port filter, condensate drain, pressure regulator, shut-off valve, soft start valve, pressure switch and three supplementary air intakes.

Other versions and further technical information available on request

1. Air intake, with swivel threaded port
2. Fixing hole
3. Access filter cartridge
4. Pressure regulation
5. Shut-off Valve (manual)
6. Manual override (shut-off valve, electrical)
7. Soft start valve regulation
8. Switching pressure regulation
9. Air outlet with swivel threaded port
10. LED signalling unit, ON
11. LED signalling pressure below the value set on pressure switch
12. LED signalling pressure over the value set on pressure switch
13. 5-pin M12x1 electrical connector
14. Pressure gauge
15. 1/4" air intake; another regulated air intake and a filtered non-regulated air intake are situated on the top
16. Air exhaust with a G1/4" silencer
17. Condensate tank
18. Condensate drain
19. Access filter signal

OLYMPIAN PLUS PLUG-IN SYSTEM

Olympian Plus is the new generation FRL system from Norgren, world leaders in air line equipment. The unique Olympian plug-in design has been updated to set new standards for ease of use and system flexibility.

1. QUICK CONNECT YOKE SYSTEM

Simple, speedy assembly of accessories and combination units.

2. PLUG IN UNITS

Rapid installation and maintenance. Quarter turn clamp ring graphite impregnated for easy operation. Detent action prevents removal under pressure.

3. BAYONET BOWLS

Easy removal for routine maintenance. Detent action to prevent removal under pressure.

4. UNIQUE PRISMATIC SIGHT GLASS

High visibility of liquid level. Colour change service indication on filters and filter regulators

- Complete air processing units pre-assembled, ready to install
- Filter-regulator and micro-fog lubricator combinations

5. CAPTIVE O-RINGS

Easy to assemble with no loose parts.

6. TAMPER RESISTANT COVER

Simple accessory to prevent unauthorised adjustment of regulated pressure.

7. PORTING BLOCK MOUNTED PRESSURE SWITCH

Adjustable pressure switch for feedback to monitoring systems.

8. SOFT START/DUMP VALVE

Provides controlled increase in pressure on system start-up. High exhaust flow capacity.

9. 3/2 SHUT OFF VALVE

- Slide valve with lockable blade. Threaded exhaust port.
- Filter and micro-fog lubricator combinations

OLYMPIAN PLUS PLUG-IN SYSTEM

Relief & Soft Start Valves

Olympian relief valves protect compressed air systems from over-pressurisation. High relief capacity, sensitive and accurate. Yoke must be ordered separately.

Medium: Compressed air only
Gauge port: G1/8

Relief Port:
V64 Series - G1/2
V68 Series - G1

Materials 64 Series:
Body, bonnet: zinc alloy
Bottom Plug: Aluminium
Adjusting Screw: Steel
Elastomers: Synthetic rubber

Materials 68 Series:
Intermediate body, bonnet and bottom plug: aluminium
Adjusting Screw: Steel
Elastomers: Synthetic rubber

Working Temperature:
-20°C to +80°C

This unit is to be used in conjunction with a ported yoke

Assists machine designers in complying with the European Machinery Directive. Can help existing machinery to comply with PUWER (Provision and Use of Work Equipment Regulations). Controlled increase of downstream pressure on start up. Solenoid, air pilot or manual operator. High forward flow capacity. High flow dump facility.

Medium: Compressed air
Material:
Body and yoke: Zinc alloy (yoke sold separately)
Intermediate Body and Top Plate: Aluminium
Elastomers: Synthetic materials
Filter Discs: Sintered plastic
Internal Components: Brass and steel

Working Temperature:
+5°C to +50°C

EXCELON® PLUS MODULAR AIR PREPARATION

Filters/Regulators & Lubricators - Box Sets

- Unique Quikclamp connection system offers full modularity
- 40µm particle and high efficiency water removal
- Double safety lock on bowl
- Integrated gauge
- Shut off valve, regulator and filter regulator with tamper resistance feature
- Light weight polycarbonate bowl
- Easy to read flush mounted integrated pressure gauge as standard
- All round (360°) visibility of sightdome for ease of drip rate setting
- High corrosion resistance: Body and metal bowl with electrophoretic paint finish

Working Temperature:
-10°C to +60°C

Maximum Working Pressure:
10 bar

Materials:

Body: Die cast aluminum

Body covers: ABS

Transparent Bowl: Polycarbonate with polypropylene guard

Filter element: Sintered PP

Bowl 'O'-ring: Chloroprene

Elastomers: NBR

Port: BSPP

Element: (µm) 40

Lubricator: Micro-fog®

Bowl: Guarded/Polycarbonate

Medium: Compressed air only
Operation: Relieving

Boxed sets including shut-off valve, gauge and mounting bracket

PORTED FILTERS & REGULATORS

Filter Regulator & Lubricator Box Set

- Miniature boxed sets offer rapid set up and installation.
- Boxed sets are pre-assembled and ready to install.

- Set consists of a filter/regulator, lubricator, shut-off valve, mounting bracket and pressure gauge.

Medium: Compressed air only
Body: Zinc alloy
Bowls: Polycarbonate
Filter Element: Polypropylene
Elastomers: Nitrile

Working Temperature:
 -20°C to +50°C
 Consult our Technical Service for use below +2°C

Inlet Pressure:
 0 to 10 bar

Precision Regulators

Series PR precision pressure regulators work on a three diaphragm force-balance principle which allows them to react even to the smallest changes in pressure that can occur during operation.

- High precision
- Triple diaphragm construction
- Compact dimensions
- Adjustable lock
- Removable adjustment knob
- Three ranges of pressure

AIR PREPARATION

Series MD air preparation product line has been designed to meet the numerous demands of a market requiring light and compact modular products which are characterized by high performance, flexible connection and orientation.

The different functions are connected to each other by means of intermediate joining cartridges.

Thanks to the solution adopted for the pneumatic connection, it is possible to equip the same element with interchangeable cartridges that are available in different sizes and can either be threaded or integrated with a super rapid push-in fitting.

Working Temperature:
-5°C to +50°C

Maximum Working Pressure:
16 bar

AIR PREPARATION EQUIPMENT

Filter Regulator + Lubricator

Parker's P3L Lite combination kit is a configure two-piece unit consisting of a filter regulator and mist-style lubricator. The P3L combination kit provides accurate pressure regulation, high moisture removal efficiency, and proportional oil delivery over a wide range of air flows.

Working Temperature:
0°C to +50°C

Maximum Working Pressure: 10 bar

P3L Lite Particulate Filter Regulator

0677	Thread	Drain Type
P3LEA12EPSBNNP	1/4"	Semi-auto
Tech Sheet 68749		

Regulator

Parker's P3LR is a lightweight pressure regulator with an unbalanced poppet design, offering good response and accurate pressure regulation. For low flow and space-restricted applications, this product can provide a solution that does not sacrifice performance. The P3LR can also be mounted using a modular connector, limited to two other P3L air preparation product units. The various options available, such as pressure gauge, relieving and non-relieving, pressure range, preset pressures and tamper-proof options, make this series easy to design to your application. Flow rates up to 12.8dm³/s.

P3L Lite Regulator

0677	Thread	Material
P3LRA12BNNP	1/4"	Polymer
P3LRX12BNNP	1/4"	Brass
Tech Sheet 68748		

Filter

Parker's P3LF is a lightweight particulate filter that delivers high moisture removal in a compact package. The P3LF is used for the removal of solid particle contaminants down to 5 micron and the separation of bulk liquids.

This type of filter is generally used in industrial applications where liquid water, oil, and harmful dirt particles must be removed from the compressed air system.

For specific flow and space restricted applications, this product can provide a solution that does not sacrifice performance.

Maximum Working Pressure: 150 bar

P3L Lite Particulate Filter

0677	Thread	Drain Type
P3LFA12EPSN	1/4"	Pulse
Tech Sheet 68750		

Coalescing Filter

Parker's P3LF, a lightweight coalescing filter, is designed to remove liquid aerosols, water, oil and sub-micron particulate matter from your pneumatic system. These filters will provide oil-free air for several demanding applications.

The P3LF is specifically designed for the removal of solid particles, water and oil aerosols down to 0.01 micron.

P3L Lite Coalescing Filter

Adsorber Filter

P3L Lite Adsorber Filter

0677	Thread	Drain Type
P3LFA12APPN	1/4"	Manual
Tech Sheet 68752		

Lubricator

The P3LL is a lightweight lubricator that injects a mist of oil into the flowing air stream to automatically provide the correct amount of internal lubrication for air tools and other pneumatic devices.

This type of lubricator can be precisely adjusted to every low oil flow rate because only a portion of the oil drops seen in the sight dome travels downstream. Proportional oil is delivered over a wide range of air flows and a precision needle valve assures repeatable oil delivery. A slight adjustment can provide a desired mist rate.

This unit is ideal for low and high flow applications that demand uniform lubrication in a robust package. ISO/ASTM VG32 oil is suggested for lubrication and will allow the product to perform at peak performance. Do not use oils with additives, compounded oils containing solvents, graphite, detergents or synthetic oils.

Filter/Regulator + Lubricator

PCL's FRL range includes combination units with 1/4" and 1/2" inlet ports. Adding a PCL Air Treatment unit into an air line efficiently filters to 10 microns. Products feature polycarbonate bowls, allowing the user to easily monitor the element's condition and the collected liquid's level. The bowl is surrounded with protective metal as a safety measure to protect the user in case of excessive pressures, temperatures, or aggressive chemicals.

Features

- Selectable manual/semi-automatic drain
- Polycarbonate bowl
- Locking device
- 10 micron filter
- Complete with wall bracket and pressure gauge

PRESSURE BOOSTERS

Air Pressure Booster

The air-to-air pressure multiplier, or booster, is an automatic device that compresses air to give an outlet pressure that is double the inlet pressure. It is normally used to locally intensify the input pressure of one or more actuators. As it is entirely pneumatic it can be used when electric devices are not recommended. The booster can be supplied with or without a pressure regulator.

It is fitted with check valves that maintain the outlet pressure even when the supply of compressed air is switched off. This means it is necessary to interrupt the supply and relieve the circuit before intervening on the device in any way. It is advisable to install a tank after the booster to prevent fluctuations in outlet pressure.

Technical Data

		Booster Ø40	Booster Ø40 with regulator	Booster Ø63	Booster Ø63 with regulator
Bore		Ø 40		Ø 63	
Fluid		Filtered unlubricated compressed air. Lubrication, if used, must be continuous.			
Threaded port		G1/8		G3/8	
Inlet pressure	MPa	0.2-1			
	bar	2-10			
	psi	29-145			
Outlet pressure	MPa	Maximum 2	Maximum 1.6 (regulated)	Maximum 2	Maximum 1.6 (regulated)
	bar	Maximum 20	Maximum 16 (regulated)	Maximum 20	Maximum 16 (regulated)
	psi	Maximum 290	Maximum 232 (regulated)	Maximum 290	Maximum 232 (regulated)

SUCTION CUPS – SINGLE BELLOWS

Features & Strengths

- Compensating for a difference in level
- Various materials for a wide range of applications

Advantages

- Particularly good for use on curved surfaces and for separating thin sheets of material in stacks.
- The bellows cup is very good at compensating for a degree of difference in level and curvature of the work piece.

Examples of Use

- Cardboards
- Packaging materials
- Thin film sheets
- Veneer sheets
- Plastic sheets

SUCTION CUPS – SINGLE BELLOWS

Features & Strengths

- Compensating for a difference in level
- Various materials for a wide range of applications

Advantages

- Particularly good for use on curved surfaces and for separating thin sheets of material in stacks.
- The bellows cup is very good at compensating for a degree of difference in level and curvature of the work piece.

Examples of Use

- Cardboards
- Veneer sheets
- Packaging materials
- Plastic sheets
- Thin film sheets

SUCTION CUPS – DIRECT MOUNT BELLOWS

Features & Strengths

- Compensating for a difference in level
- Various materials for a wide range of applications

Advantages

- Particularly good for use on curved surfaces and for separating thin sheets of material in stacks.
- The bellows cup is very good at compensating for a degree of difference in level and curvature of the work piece.
- Fitted directly onto a piece of pipe, making installation very simple and reducing cup cost

Examples of Use

- Cardboards
- Veneer sheets
- Packaging materials
- Plastic sheets
- Thin film sheets

SUCTION CUPS – DOUBLE BELLOWS

Features & Strengths

- Wide cover for increased degree of height compensation
- Excellent for curved products and separating thin sheets in stocks

Advantages

- Particularly good for use on curved surfaces and for separating thin sheets of materials in stacks with long bellows
- Can cope with an increased degree of height compensation and is particularly good for handling fragile objects

Examples of Use

- Convex surface
- Plywood
- Plastic bag
- Carton box
- Metal sheets
- Cement sack

SUCTION CUPS – DUAL LIP STRUCTURE

BL5040 Series

Features & Strengths

- Excellent for irregular curved surfaces and rough surfaces and has a dual lip structure to increase safety

Advantages

- Particularly good for use on curved surfaces and for separating thin sheets of materials in stacks with long bellows
- Can cope with an increased degree of heights compensation and is particularly good for handling fragile objects

Examples of Use

- Round food types (such as apples & oranges)
- Convex surface

40mm Inner x 50mm Outer, Cup Only

9205	Material	Colour	Temperature	Hardness
BL5040-N	Nitrile	Black	-20°C-110°C	60

SUCTION CUPS - OVAL UNIVERSAL

Features & Strengths

- Great performance for handling long objects with flat and curved surfaces

Advantages

- Good lifting forces can be achieved with even the small sizes
- Conductive silicone material provides excellent handling of PCB boards or electronic components
- Easily mountable without having to detach a fitting from the machine (saving in maintenance time)

Examples of Use

- Semiconductor chips
- PCB boards
- Electronic components
- Solar cells
- Small glass cases

Tech Sheet 71779

Dimensions

With M5M Fitting

With M5F Fitting

SUCTION CUPS - OVAL UNIVERSAL

Features & Strengths

- Great performance for handling long objects with flat and curved surfaces

Advantages

- Good lifting forces can be achieved with even the small sizes
- Conductive silicone material provides excellent handling of PCB boards or electronic components
- Easily mountable without having to detach a fitting from the machine (saving in maintenance time)

Examples of Use

- Semiconductor chips
- PCB boards
- Electronic components
- Solar cells
- Small glass cases

VOU Series

6 x 20mm, Cup Only

SUCTION CUPS - UNIVERSAL

Features & Strengths

- Excellent performance for flat stable and slightly curved surfaces with direct fitting
- Suitable for concave surface

Examples of Use

- Good lifting forces can be achieved with this cup; is best suited to flat stable surfaces, but can cope with a small degree of curvature
- Very small cups are available down to just 1.5mm diameter

VU Series

Dimensions

Cup only

1.5mm to suit Level Compensator, Cup Only

SUCTION CUPS - FLAT & CURVE

Features & Strengths

- Specifically designed for flat and curved surface
- Available to handle multiple objects with the same suction cup

Examples of Use

- Automobile windscreens, roof and door, metal sheet, shaped metal panel, TV cathode ray tube

VFC Series

SUCTION CUPS - DEEP

Features & Strengths

- This cup is best suited to curved or irregular surfaces
- Excellent performance for round corners and edge

Suitable for Handling

- Automotive roof and doors
- Sheet metals, plastics and veneers
- Shaped sheet metal
- Pre-mounted fitting

SUCTION CUPS, SPECIAL FLAT/BELLOWS

1900 Series

Specially designed for opening plastic bags. Suitable for handling thin and delicate objects, such as plastic films or paper. The thin and adaptable lip together with the internal plugs avoid damages to the film during the suction phase.

Material: Silicone

Working Temperature:
-40°C to +200°C

Round bellows suction cup made of polyurethane, suitable for movement of pieces of various size and shape and where level compensation is necessary, such as when withdrawing from loaders. The big advantage of this suction cup, is that the material it's made of, polyurethane, lasts longer than other materials, has optimum wear resistance, good flexibility and optimum tensile strength. Suitable for moving porous objects or ones with an irregular surface, such as cardboard. Polyurethane suction cups are mark resistant.

Material: PU

Working Temperature:
+10°C to +50°C

The long bellows suction cup is especially suited for the movement of bags, thanks to its very thin lip and internal notchings, which allow it to ensure secure gripping even with heavy bags that are difficult to lift.

Material: Silicone

Working Temperature:
-40°C to +200°C

SUCTION CUPS, FOAM RUBBER

1900 Series

Foam rubber round suction cup is made from a special mixture called "NR", which has a density that allows for gripping even on very rough and irregular surfaces, and allows its elasticity to be maintained even after several working cycles. Especially suited for moving loads with coarse or very rough surfaces such as: sawn, bush-hammered or flamed marble, textured, non-slip or ribbed/corrugated sheets, brick, items made of rough concrete, garden walkway tiles, etc., and in general in all cases where traditional suction cups cannot be used. Recommended for handling loads with lifting force parallel to the surface and for the movement of loads with oiled surfaces.

Material: Foam Rubber (NR)

Working Temperature:
-20°C to +80°C

VTN Foam Rubber Round Suction Cup

Green Pumps

- VMECA vacuum cartridge technology integrated
- High polished clean surface (= for food, pharma industry)
- Vacuum filter self-cleaning system

Features & Strengths

- Highly operational reliability despite fluctuating or low compressed-air pressure
- Integrated vacuum filter with high dirt capacity and auto-cleaning system
- High polished clean surface for food, pharma and chemical industry
- Easy to install in limited space due to compact size
- Quick response time

GS Range

9205	Max. Vacuum level (- kPa)	Supply Air Pressure (bar)	Max. Vacuum Flow(Nl/m)	Air Consumption (Nl/m)	Noise level (dBA)	Min. hose inner Ø (within 2m)

- VMECA vacuum cartridge technology integrated
- High polished clean surface (= for food, pharma industry)
- Vacuum filter self-cleaning system

Features & Strengths

- Dual vacuum cartridge structure
- Highly operational reliability despite fluctuating or low compressed-air pressure
- Integrated vacuum filter with high dirt capacity and auto-cleaning system
- High polished clean surface for food, pharma and chemical industry
- Easy to install in limited space due to compact size
- Quick response time

GH Range

VSM Pumps

- VMECA vacuum cartridge technology integrated
- Various mounting options for easy installation
- Extremely low noise level

Features & Strengths

- Efficient individual and independent point-of-use vacuum
- Highly operational reliability despite fluctuating or low compressed-air pressure
- Extremely quick response
- Available for multiple connection ports
- Extremely low noise level with VMECA twofold silencer

VSM Range

9205	Vacuum Connection	Type	Max. Vacuum level (- kPa)	Supply Air Pressure (bar)	Max. Vacuum Flow(Nl/m)	Air Consumption (Nl/m)	Noise level (dBA)	Min. hose inner Ø (within 2m)

Magic Pumps

- VMECA vacuum cartridge technology integrated
- Flexibly rotatable vacuum pump
- Easy to distribute vacuum connections with integrated distribution body module

Features & Strengths

- Highly operational reliability despite fluctuating or low compressed-air pressure
- Integrated pleated filter with high dirt capacity and auto-cleaning system
- Flexible structure available to select various port options and port position/direction
- Easy to assemble and disassemble without any tools
- Quick response time
- Patented design

Turtle Pumps

- VMECA vacuum cartridge technology integrated
- Vacuum filter in one body with auto filter cleaning system

Features & Strengths

- Highly operational reliability despite fluctuating or low compressed-air pressure
- Integrated pleated filter with high dirt capacity and auto-cleaning system
- Optional air-saving kit available to minimise energy consumption
- Quick response time
- Patented design

IN-LINE VACUUM FILTER

These filters provide a cost effective in-line vacuum filtration method. The 6mm push fit version is useful for individual lines particularly with the Oneline pump and multiple stack pumps. The 3/8" version can be screwed directly into the mini type vacuum pump as well as any other port using a 3/8" BSP connection. When used with the mini pumps and midi multiple pumps, it provides a very compact set up.

Features & Strengths

- Simply pushing the tube into the LV-filter
- No other operation is required
- Excellent filtering - minimum particle : 20 micron
- Easy to check and replace filter element

Body Material: Polycarbonate (PC)

PLASTIC PUSH-IN FITTINGS BSP & Metric Threads x Metric Tube

Features:

- Convenient One Touch fittings provide instant connections
- Elliptical release ring facilitates pneumatic installation in confined spaces
- Light manual pressure on the elliptical release ring is all that is required to instantly disconnect each tube; no special tools required
- Nickel-plated brass threaded body ensures anti-corrosion and anti-contamination
- All taper threaded fittings are pre-coated with PTFE sealant and require no additional sealing

Working Temperature:
0°C to +60°C

Maximum Working Pressure:
10 bar (150 psi)

Construction:

Resin Body:	PBT
Metal Body:	Nickel-plated brass
Packing:	Nitrile
Back Ring:	POM
O-Ring:	Nitrile
Collar:	Nickel-plated zinc
Sleeve:	POM
Locking Claw:	Stainless steel
Media:	Air and vacuum
Threads:	BSPP, BSPT, metric
OD:	Metric

PLASTIC PUSH-IN FITTINGS

One Touch Emergency Fittings Kits

Convenient, compact boxes containing a selection of popular FT Pro One Touch plastic push-in fittings along with handy tube cutter.

Available in three sizes: 6mm, 8mm and 10mm. Can be used with nylon 6, 11, 12, and polyurethane (ester and ether).

 **Working Temperature:**
Brass & Acetal:
0°C to +60°C*

 **Maximum Working Pressure:**
10 bar (150 psi)*

Negative Pressure:
-750mm Hg (10 Torr)*

Media:
Air and vacuum only.

PLASTIC PUSH-IN FITTINGS NPT & UNF Threads x Metric & Imperial Tube

Features:

- Convenient One Touch fittings provide instant connections
- Elliptical release ring facilitates pneumatic installation in confined spaces
- Light manual pressure on the elliptical release ring is all that is required to instantly disconnect each tube; no special tools required
- Nickel-plated brass threaded body ensures anti-corrosion and anti-contamination
- All taper threaded fittings are pre-coated with PTFE sealant and require no additional sealing

 **Working Temperature:**
-10°C to +60°C

 **Maximum Working Pressure**
10 bar (150 psi)

Construction:

Resin Body:	PBT
Metal Body:	Nickel-plated brass
Packing:	Nitrile
Back Ring:	POM
O-Ring:	Nitrile
Collar:	Nickel-plated zinc
Sleeve:	POM
Locking Claw:	Stainless steel
Media:	Air and vacuum
Threads:	NPT, UNF
OD:	Metric and imperial tube sizes

ONE TOUCH NPT PLASTIC PUSH-IN FITTINGS, IMPERIAL

Working Temperature:
0°C to +60°C

Maximum Working Pressure:
10 bar (150 psi)

Media:
Air and vacuum only.

Negative Pressure:
-750mm Hg (10 Torr)

PLASTIC PUSH-IN FITTINGS

One Touch+ 16 Bar Rated

Features:

- One of the highest pressure rated polymer push-in fittings available on the market
- Convenient One Touch+ fittings provide instant connections
- Elliptical release ring facilitates pneumatic installation in confined spaces
- Light manual pressure on the elliptical release ring is all that is required to instantly disconnect each tube; no special tools required
- Nickel-plated brass ensures anti-corrosion and anti-contamination
- All taper threaded fittings are pre-coated with PTFE sealant and require no additional sealing

Working Temperature:
-10°C to +60°C

Working Pressure
-0.8 bar 16 bar

*Dependent upon tubing specification.

Construction:

Resin Body: Technopolymer resin

Metal Body: Nickel-plated brass

Packing: Nitrile

Back O-Ring: POM

O-Ring: Nitrile

Collar: Nickel-plated zinc

Collet: Technopolymer resin

Collet Ring: Nickel-plated brass

Sleeve: POM

PLASTIC PUSH-IN FITTINGS

One Touch+ Emergency Fittings Kits, 16 Bar Rated

Convenient, compact boxes containing a selection of popular FT Pro One Touch+ plastic push-in fittings along with handy tube cutter.

Available in three sizes: 6mm, 8mm and 10mm. Can be used with nylon 6, 11, 12, and polyurethane (ester and ether).

Working Temperature:
0°C to +60°C

Maximum Working Pressure:
16 bar (220 psi)

Negative Pressure:
-750mm Hg (10 Torr)

Media:
Air and vacuum only.

Plastic, 16 bar Rated

MICRO PUSH-IN FITTINGS

One Touch

Features:

- Convenient One Touch micro fittings provide instant connections
- Elliptical release ring
- 40% less volume and 20% smaller OD compared with standard One Touch fittings, making them ideal for use in confined spaces
- Light manual pressure on the elliptical release ring is all that is required to instantly disconnect each tube; no special tools required
- Nickel plated brass ensures anti-corrosion and anti-contamination
- Available in metric, parallel and taper BSP threads, imperial NPT and UNF threads
- All taper threaded fittings are pre-coated with PTFE sealant and require no additional sealing

Working Temperature:
-10°C to +60°C

Maximum Working Pressure
-0.8 bar to 10 bar

*Dependent upon tubing specification.

Construction:

Resin Body:	PBT
Metal Body:	Nickel-plated brass
Packing:	Nitrile
Back Ring:	POM
O-Ring:	Nitrile
Collar:	Nickel-plated zinc
Collet:	PBT
Collet Ring:	Nickel plated brass
Sleeve:	POM

MICRO ONE TOUCH METRIC PLASTIC PUSH-IN FITTINGS

Working Temperature:
0°C to +60°C

Maximum Working Pressure: 40% less volume and a 20% smaller OD than the standard One Touch design..
10 bar (150 psi)

Micro One Touch fittings are specially designed for pneumatic systems and are used in confined spaces, saving you time and money on installations.

LF 3000® PUSH-IN FITTINGS

Pre-coated Threads:

All taper threaded LF 3000 male fittings are supplied with a pre-coated thread for immediate installation.

Identification:

The part numbers have been chosen by a method of mnemonics. Each LF 3000 fitting is identified by

- Its series
- The diameter of passage through the fitting
- The thread code or second tube diameter

Seals:

All LF 3000 fittings with BSPP and M5 threads are supplied complete with an integral O-ring seal or a pre-assembled nylon sealing washer. This permits instant assembly of the fitting without preparation of the thread, and provides a fixed assembled height to the fitting

Working Temperature:
-20°C to +80°C

Maximum Working Pressure:
20 bar

Vacuum Capability:

Vacuum of 755mm Hg (99% vacuum).

Suitable Fluids:

Compressed air, LF 3000 can also be used for conveying various types of liquids (water, cutting oil, etc) for industrial applications. The working pressure, from 0.6-10 bar and temperatures from 0-60°C, are dependent upon the fluid conveyed and the type of O-ring used. Silicone free.

LF 3000 Multi Connectors

The Legris multi connector is designed for simultaneous connection and disconnection of 2, 4, 7 and 12 tubes. Its LF 3000 technology and performance makes it easy to use:- instant connection and disconnection, without tools, - full flow, without restriction. In order to facilitate the installation, each tube outlet is numbered. A location pin avoids assembly errors and a cap helps to guide the tubes and to protect connections. To cover all users needs, this range can also be used for bulkhead connections.

DIN Rail Connections

These components are similar in principle to the electrical connectors found in control panels and are used to rationalise cabling and to assist trouble shooting. Used alongside electrical connectors, Legris DIN rail connectors provide similar facilities for pneumatics circuits, and are mounted on the same rail profile which allows electric and pneumatics to run side by side. All tube connections are Legris push-in fittings for plastic tubing

LEAK-FREE, PUSH-IN FITTINGS NPT THREADS X IMPERIAL TUBE

Introducing LIQUIfit™ a range of leak-free, push-in fittings in a bio-based compact body.

LIQUIfit™ offers:

- The most compact profile on the market
- EPDM patented sealing technology
- Full flo
- No pumping effect
- No need for locking clip or tube insert
- Optimum performance suitable for food and water contact
- 100% bio-based body and base

Working Temperature:

1/4"	+2°C to +38°C +65°C +93°C
3/8"	+2°C to +38°C +65°C +93°C
1/2"	+2°C to +38°C +65°C +93°C

Maximum Working Pressure:

16 bar
10 bar
6 bar
13 bar
7 bar
4 bar
11 bar
7 bar
4 bar

Suitable for use with chemicals and other potentially aggressive liquids. Please contact our technical department for full details.

FLOW CONTROL REGULATORS POLYMER VERSION

Miniature

Compact

Identification:

The part numbers have been chosen by a method of mnemonics. Each item is identified by

- Its series
- The diameter of passage through the fitting
- The thread code or second tube diameter

Working Temperature:
0°C to +70°C

Working Pressure:
1 to 10 bar

Working Fluids:
Compressed air

Compact

QS, STANDARD SERIES PUSH-IN FITTINGS

 **Ambient Temperature:**
-10°C to +80°C

 **Temperature Dependent Operating Pressure:**
- 0.95 to 6 bar at 80°C
- 0.95 to 14 bar at 20°C

- Simple and reliable connection and release
- Wide range of variants: large selection for maximum flexibility in standard applications

- PBT housing, POM release ring, NBR tube seal
- Operating media: compressed air, vacuum, (water as per manufacturer's declaration)

FLOW REGULATORS & FUNCTION FITTINGS

For the full range and more information, please contact one of our sales team.

FLOW REGULATORS

Features

Product Description

One-way Flow Control Valves, Elbow Outlet

Ambient Temperature:
-10°C to +60°C

- Sturdy metal design
- Can be swivelled around the screw-in axis after mounting
- Push-in connector

Working Pressure:
0.2 to 10 bar

- Polymer design
- Can be rotated 360° around the screw-in axis after mounting/not permitted for continuous rotation
- Push-in connector

- Polymer design

FESTO

Differential Pressure Regulator

- Constant differential pressure between input and output
- Cuts energy usage on cylinder return stroke approx 20%
- Connecting thread M5, R1/8, R1/4, R3/8, R1/2
- Push-in connector for tubing OD 4, 6, 8, 10, 12mm
- Rotatable 360 degrees

55000 SERIES, 20 BAR RATED

Working Temperature:
-20°C to +80°C

Maximum Working Pressure:
20 bar

BSPT in conformity with ISO 7.1, BS 21, DIN 2999.

BSPP in conformity with ISO 228 Class A.

Metric in conformity with ISO R/262.

Fittings with "Short" tapered thread allow assembly with tapered as well as parallel threads (BSPT, NPT and BSPP) and have reduced overall height.2

Straight Male Adaptors

This is a Taper Thread designed so that it's suitable for BSPT, BSPP, NPTF and Metric.

PUSH-IN FITTINGS KITS

A convenient range of Metal Work push-in fittings in a kit. Comprising of seventeen removable compartments. These are contained in a hand carry case measuring 57mm deep x 340mm long x 265mm wide, made from tough polypropylene, with a clear view plastic hinged lid, sliding locks and carry handle. There are four pneumatic push-in fittings kits available: 4mm, 6mm 8mm and a 6/8mm combination.

FLOW MICRO-REGULATORS

MFR Compact 'O' Threaded Brass Ring

Technical Features

- The job of flow micro-regulators is to regulate speed in the pneumatic cylinders. The configuration of both type C (to be mounted on the cylinder inlet) and type V (to be mounted on the valve port) is such as to ensure full flow on feed and regulated flow on charge. Type B (bidirectional) can be used to regulate the flow both on feed and discharge. Flow micro-regulators are divided into 4 series:
- MRF Compact 'O': Can be adjusted using a screwdriver; the regulation pin is lubricated with a particular anti-vibration grease; it has reduced dimensions and fine adjustment in the first turns; adjustment can be prevented by assembling a disposable cap (supplied separately) that can be removed using a tool.
- MRF Compact 'N': Can be adjusted using the knob and/or screwdriver; adjustment can be prevented by tightening the ring nut; it has the same regulation curve as those in series 'O'.

Main Features

- Reduced dimensions
- Excellent regulation
- Regulation with a screwdriver and disposable anti-tampering cap (Compact 'O')
- Regulation with either a screwdriver and/or a knob, can be fixed with a ring nut (Compact 'N')
- Available in all sizes (from M5 to 1/2") with a brass or a technopolymer ring
- Can be mounted with an automatic screwdriver
- Comes with a ring that can rotate even with the MRF mounted in position

-  **Working Temperature Range:**
 -10°C to +70°C (Brass Ring)
 -10°C to +50°C (Technopolymer Ring)

-  **Maximum Working Pressure:**
 10 bar

BLOCK FITTINGS

Blocking Fitting

Block valves function on the cylinder inlet to allow a flow of air only in the presence of a pneumatic pilot. This item is mainly used as a safety valve. When pressure drops in the pneumatic pilot, all cylinder movement is halted.

FUNCTIONAL FITTINGS

Line on Line is an exclusive range of products for mounting on pneumatic circuits. In these specially designed components it is possible to perform all pneumatic functions at any point of the circuit.

Line on Line is ultra-modular; the components can be connected in parallel, in series or combined parallel/series.

All Line on Line products are available for pipe-pipe connection in internal push-in fittings, or for thread-pipe connection with a brass nickel-plated aluminium internal push-in fitting.

The body is made of technopolymer, giving a product that is extremely lightweight and compact. One side of the body is marked with an indelible pneumatic symbol to facilitate identification and indicate the direction of flow.

Technical Specifications

- Maximum operating pressure: 10 bar
- Temperature range: -20°C to +60°C
- Maximum flow rate on regulation at 6.3 bar: 155 NI/min (4mm), 450 NI/min (6mm), 850 NI/min (8mm)
- Adjustment: manual or using a screwdriver
- Internal system: tapered needle
- Recommended pipe: Rilson PA 11, nylon 6, polyamide 12, polypropylene
- Lubricated or non-lubricated filtered air

Collet Covers

Colour Coding and Additional Security

The slip-on collet covers shown in this photograph prevent accidental removal or tampering with tubing. Tubing can be inserted with the collet cover already attached to the fittings or the cover can be slid into position afterwards. The cover is easily removed as and when required and comes in a variety of colours for colour-coding.

Colours available - suffix indicates colour

i.e. E = Black S = Grey
R = Red B = Blue
Y = Yellow G = Green

Please indicate, by suffix the colour required or black will be supplied.

ALL METAL PUSH-IN FITTINGS

One Touch

Features:

- Convenient One Touch fittings provide instant connections
- Light manual pressure on the collet ring is all that is required to instantly disconnect each tube; no special tool is required
- Nickel-plated brass ensures anti-corrosion and anti-contamination

 **Working Temperature:**
-10°C to +60°C

 **Working Pressure**
-0.8 bar to 8 bar*

*Dependent upon tubing specification.

Construction:

Resin Body: Nickel-plated brass

Packing: Nitrile

Back O-Ring: POM

O-Ring: Nitrile

Collet Ring: Nickel-plated brass

ALL METAL PUSH-IN FITTINGS

One Touch Emergency Fittings Kits

Convenient, compact boxes containing a selection of popular FT Pro One Touch metal push-in fittings along with handy tube cutter.

Available in three sizes: 6mm, 8mm and 10mm. Can be used with nylon 6, 11, 12, and polyurethane (ester and ether).

 **Working Temperature:**
-10°C to +60°C

 **Working Pressure:**
0.8 to 8 bar*

Media:
Air and vacuum only

ONE TOUCH ALL METAL PUSH-IN FITTINGS

Working Temperature:
-10°C to +60°C
(dependent upon
Nitinol specification)

Working Pressure:
0.8 to 8 bar (dependent
upon Nitrin specification)

Tube connection and disconnection can be repeated several times and is performed with one hand, without the use of tools. Nickel plated brass bodies ensures anti-corrosion and anti-contamination.

Material: Body and Collet: Nickel plated brass
O-Ring: Nitrile
Threads: BSPT, BSPP and metric
Tube to Connect: PU, PE, nylon 6-11-12
Fluid: Compressed air

LF 3600® PUSH-IN FITTINGS

All metal new LF 3600 (except sealing components) is compatible with many liquids and gases of average aggressiveness and is ideal for environments that require mechanical strength-incorporating high phosphorus chemical nickel plating that conforms to FDA standard (FOOD AND DRUG ADMINISTRATION).

 **Working Temperature:**
-20°C to +120°C

 **Maximum Working Pressure for Compressed Air:**
20 bar

NOTE: Ideal for food applications.
These fittings represents only part of this new range, for full details please speak to our technical department.

CENTRALISED LUBRICATION SYSTEM FITTINGS

This range of fittings has been designed for uses involving both rotation or linear movements which require lubrication.

Designed using Legris push-in technology, this range is produced with specific applications in mind, hence its:

- Emphasis on safety – the tube cannot be disconnected without using a spanner
- Nitrile seals on nut assemblies
- Sealing of tube by 2 O-rings in addition to the gripping teeth

Working Temperature: -40°C to +120°C
Working Pressure: Up to 60 bar

The characteristics provide a perfect component for such applications as:

- Lubrication circuits on industrial machinery: Wood industry, textile, paper, cement industry
- Lubrication on industrial equipment and vehicles (trucks)
- Lubrication on public works vehicles (mobile cranes) and agricultural equipment

Suitable Fluids: Lubricating oils, liquid or viscous greases, oil sprays

Material:
Body: Brass
Seals: Nitrile rubber

50000 SERIES BRASS PUSH-IN FITTINGS

Working Temperature:
-20°C to +80°C

Maximum Working Pressure:
20 bar
Vacuum: -0.99 bar

Material:
Body and Collet: Robust nickel plated
brass body and Acetalic resin collet

O-Ring: Nitrile
Media: Compressed air

Fittings with "Universal Short" thread are suitable for both taper as well as parallel threads like NPT, NPTF, BSPP and BSPT

89000 SERIES IMPERIAL TUBE FITTINGS

Working Temperature:
-20°c to +80°C

Working Pressure:
-0.99 bar to 20 bar

Fittings with “Short” tapered thread allow assembly with tapered as well as parallel threads (BSPT, NPT and BSPP) and have a reduced overall height. The clamping washer made in stainless steel ensures the perfect grip on the tube with all kinds of material without damage to the surface.

The connection between the tube and the fitting ensure a tight seal even in severe conditions such as impact and vibration. The design of the geometric seal ensures the perfect fit for vacuum applications Suitable to be used with PA6, PA11, PA12, Polyethylene, Polyurethane (minimum hardness of 98 shore).

Material:
Body: Brass nickel plated
Collet: Brass nickel plated
Capsule: Brass nickel plated
Clamping Washer: Stainless steel 301
Media: Compressed air, vacuum, water

PNEUFIT® PUSH-IN FITTINGS, METRIC

- Very compact units featuring retained collets and positive tube anchorage
- Silicone free O-ring seals
- Non-PTFE based thread sealant on all BSP taper threads
- Easy tube insertion for rapid assembly
- Positive tube anchorage
- For simple and quick assembly of pneumatic circuits
- Wide range of types available
- Reliable and corrosion resistant

Fluid: Compressed air

Body: Nickel plated brass

Washer (Banjo): PA

Collet: Nickel plated brass

Thread Sealant: Non-PTFE

O-Ring: VMQ free NBR

Tube Sizes:

Warning: The push-in tube fittings in this section must not be used in vehicle air braking and ancillary systems

Tube Types: Positive tube anchorage

Warning: PA 11 or 12, PUR and other plasticised or unplasticised tubing which conforms to the tolerances specified in BS 5409, Part 1, 1976, light and normal dut , DIN 73378, DIN 74234, NFE 49-100

Working Temperature:
-20°C to +80°C

Maximum Working Pressure:
Vacuum – 18 bar unless otherwise stated
(dependant upon tubing specification)

NON-RETURN VALVES & FITTINGS

Non-return Valves

- Allow free flow in one direction only
- Simple reliable design
- Low weight
- Low cracking pressure
- High operating pressure

Medium:

Compressed air, filtered, lubricated and non-lubricated, vacuum

Body:

Anodised aluminium

Collet:

Nickel plated brass

Spring:

Stainless steel

Seals:

Nitrile rubber

Valve and Insert:

Aluminium

Mounting:

Line mounted, push-in connection

Tubing Types:

Nylon 11 or 12. Polyurethane, and other plasticised or unplasticised tubing which conforms to the tolerances specified in BS 5409, part 1, 1976, light and normal duty, DIN 73378, DIN 74234, NFE 49100

Working Pressure:

-0.9 to 16 bar (dependent upon operating specification of tubing)

Working Temperature:
-20°C to +80°C

Blocking, Pressure Reducing & Pneumatic Sensor Fittings

- Very compact units
- Safer pneumatic systems
- Easy tube insertion for rapid assembly of pneumatic circuits
- BSP threads

Working Temperature:
0°C to +70°C

Operating Pressures:

Blocking Fitting:

Supply pressure: 1-10 bar

Pressure Reducing Fitting:

Primary pressure: 1-16 bar max.

Secondary pressure: 1-8 bar max.

Pressure Sensor Fitting:

Cylinder pressure (Pc): 10 bar max.

Sensor supply pressure: 3-10 bar

Tubing Types:

Nylon 11 or 12, polyurethane and other plasticised or unplasticised tubing which conforms to the tolerances specified in BS 5409, Part 1, 1976, light and normal duty, DIN 73378, DIN 74234, NFE 49-100

FOOD GRADE FITTINGS

Series F Push-in Fittings, Safe for Use in the Food Industry

Brass parts are chemically treated with phosphorus nickel-plating according to the NSF®/ANSI 51 standard of the food programme. The seals are made of FDA-approved FKM/FPM. Fittings contain no technopolymer, solving the problem of incompatibility with detergents and other chemicals.

The fittings can be used up to +150°C, making them suitable for high temperature applications other industries. The threads are cylindrical and under-head o-rings provide a pneumatic seal. This avoids the need for sealants (e.g. Tezon®) which could release solid fragments during screwing and unscrewing that would contaminate the environment or the fluid. Our fittings can be screwed and unscrewed any number of times and still remain clean and pneumatically sealed.

This choice of materials and design makes these fittings suitable for use in the chemical, pharmaceutical, medical and electronics industry.

1. Body: chemically nickel plated brass to NSF®/ANSI 51 standards
2. Gripper: chemically nickel plated brass to NSF®/ANSI 51 standards
3. Fitting seal: FKM/FPM
4. Port seal: FKM/FPM

Temperature Range:
-20°C to +150°C (-4°F to 302°F)

Pressure:
-0.99 to 16 bar (-0.099 to 1.6 MPa)

Technical Features

- Threaded ports: M5, G1/8", G1/4", G3/8", G1/2"
- Pipe diameter: 4, 6, 8 and 10mm
- Recommended pipe: Rilsan PA 11, nylon 6, polyamide 12, polypropylene
- Under-head O-ring can be screwed and unscrewed any number of times; no fragments of Tezon® or sealant will contaminate the fluid
- Corrosion proof: chemical nickel-plating + FKM/FPM, compatible with numerous substances
- No plastic parts, so no risk of incompatibility

NICKEL PLATED BRASS & TECHNOPOLYMER

Push-in fittings by Metal Work are the best elements for connecting pipes and actuators.

Quick and easy to use, the Metal Work push-in fitting can be re-used thousands of times without affecting the pneumatic and mechanical seal in any way. It comes in various configurations and guarantees a virtually unlimited, highly flexible use. The clamping spring with its special shape grips the pipe without scratching or deforming it, which facilitates release.

In the fittings, the release bushing has patented screwdriver slots to facilitate release in applications not accessible to the fingers.

Technical Data

Threaded coupling	M3 - M5 - M7 - 1/8" - 1/4" - 3/8" - 1/2"
Diameter	Ø 3mm - Ø 3.17mm - Ø 4mm - Ø 5mm - Ø 6mm - Ø 8mm - Ø 10mm - Ø 12mm - Ø 14mm
Temperature range for brass fittings	-20 °C to +80 °C -4 °F to 176 °F
Temperature range for technopolymer fittings	-20 °C to +60 °C -4 °F to 140 °F
Pressure range for brass fittings	-0.99 bar ... 16 bar / -0.099 MPa ... 1.6 MPa
Pressure range for technopolymer fittings	-0.99 bar ... 12 bar / -0.099 MPa ... 1.2 MPa
Recommended pipe	Rilsan PA 11 - Nylon 6 - Polyamide 12 - Polypropylene
Fluid	Vacuum - Compressed air

Components

1. Ring or release bushing: technopolymer
2. Locking bushing: brass or technopolymer
3. Body: brass or technopolymer
4. Clamping spring: stainless steel
(for pipes Ø 3 and Ø 3.17 and R31 Ø 5 and R32 Ø 5: brass gripper)
5. Spring supporting ring: technopolymer
6. Seal: NBR

SERIES 8000 SUPER-RAPID PUSH-IN FITTINGS

Series 8000 has a patented additional seal that provides a double tight seal on the tube, ensuring a highly reliable connection and avoiding any possible leakage. Connection and disconnection of the tube can be repeated several times without the use of proper tools and without compromising the performance of the fitting or the sealing on the tube

Material:
Body and Gripper: Nickel plated brass
Seals: Nitrile

 **Working Pressure:**
 -0.9 to 16 bar

SERIES H8000 DUAL SEAL SUPER-RAPID FITTINGS

Series H8000 fittings are designed to be used in particularly dirty and dusty environments. The patented system, with double tightening on the tube, guarantees a highly reliable connection and avoids any risk of leakage.

Features:

- Protection against dust and debris
- Silicone free
- Suitable for vacuum and metal tubes

Material:

Body and Gripper: Nickel plated brass
Seals: Viton

Working Pressure:

-0.9 to +60 bar

STAINLESS STEEL PUSH-IN FITTINGS One Touch

Features:

- Convenient One Touch fittings provide instant connections
- Light manual pressure on the collet ring is all that is required to instantly disconnect each tube, no special tool is required
- Full stainless steel construction prevents corrosion and increases compatibility with more aggressive medias and environments

Temperature Range:
-20°C to +200°C

Working Pressure
10 bar*

*Dependent upon tubing specification.

Construction:

Body & Collet:	316 stainless steel
O-Ring:	Viton (FDA certified)
Tube to Connect:	PU, nylon, PTFE
Media:	Compressed air, steam, water, other compatible liquids

ONE TOUCH ALL STAINLESS STEEL PUSH-IN FITTINGS

stainless steel **FT PRO**

 **Working Temperature:**
-20°C to +200°C

 **Maximum Working Pressure:**
10 bar
Negative Pressure:
750mm Hg (10Torr)

Material:
Body and Collet: 316 stainless steel
O-Ring: Viton

Tube to Connect: PU, Nylon and PTFE
Media: Compressed air, steam water and other compatible liquids

AIGNEP

This series is fully made of stainless steel AISI 316L and developed to be used with aggressive fluids and food applications. Also ideal for use in salty environments and in machines that need frequent washing with aggressive detergents. Certified NSF 169 and conformed to NSF 61 & NSF 372 standards. All parallel threads have a Food FKM seal as standard.

Series 9000 C-Truck

Brass fittings

Automation

The safe and practical solution for pneumatic braking systems

Series 9000 C-Truck fittings have been designed to connect tubes in the pneumatic braking systems on industrial and commercial vehicles ensuring reliability and ease of assembling. The use of a proper disconnection tool enables disconnection of the tube without having to remove the fitting. All fittings have a protective cap that keeps humidity and dirt away from the collet. A reinforced insert enables the dimensions of the tube to remain constant, thus ensuring a tight and safe connection even with high changes in temperature. Indeed, Series 9000 C-Truck fittings can be used at extreme temperatures (from -50°C to $+100^{\circ}\text{C}$). They are assembled according to a precise angle and supplied with locking nut and a self sealing O-ring. The O-ring on the thread is set in a special groove of the threaded part, ensuring there is no damage during assembly. The brass body guarantees a high resistance to corrosion, whilst the O-ring and protective cap are made from oil resistant rubber. All fittings are supplied pre-assembled and ready to use.

General Data

Materials: see table of materials

Thread: Metric NPT

Media: Compressed air

Max working pressure: 16 bar

Note: pressure depends on tube characteristics

Temperature: $-50^{\circ}\text{C} \div +100^{\circ}\text{C}$

Tube: Material Polyamide

Tube diameters (D/d): 4/2, 6/4, 8/6, 10/7, 10/8, 12/9, 15/11, 15/12, 16/12, 16/13 and 18/14

 Certification

Camozzi
Air that moves the world

AIR BRAKE PUSH-IN FITTINGS C-TRUCK 9000 SERIES

Table of Materials

Parts	Materials
1 = Body	Brass
2 = Insert	Technopolymer (Brass only for Ø10/7, 15/11, 16/12, 16/13 and 18/14)
3 = S-rapid	O-Ring NBR
4 = Collet	Brass
5 = Protective seal	NBR
6 = O-Ring for thread	NBR
7 = Locking ring	Steel

Fittings Assembly in the System

To guarantee the tightening of the fitting in the system, make sure that the thread chamfer conforms to the standard ISO 965 or GOST 10549-80.

The fittings which have an O-Ring seal on the thread, but no locking nut, have to be screwed into the system with the torque forces as shown in the table below.

For the assembly of fittings with locking nut, it is necessary to do the following:

1. Loosen the locking nut
2. Screw the fitting into the system until the O-Ring comes into contact with the system surface
3. Position the fitting according to the suitable angle, moving the body up to 360°
4. Keep the body still
5. Screw the locking nut with torque forces as shown in the table

Thread	Torque force (Nm)
M10 x 1	11 - 15
M12 x 1.5	15 - 19
M14 x 1.5	19 - 23
M16 x 1.5	24 - 30

Crystal Blue

FT Pro tubing is the engineered solution for pneumatic applications requiring excellence as standard.

Metric Polyurethane Ester Tube

Ester-based polyurethane tubing has outstanding characteristics compared with other pneumatic tubing. This tube is extremely flexible and offers excellent bend capabilities, making it ideal for pneumatic control or robotic systems. It is also resistant to many chemicals, gases and oils, as well as having excellent abrasion resistance.

✓ **Ideal for use with push-in fittings, compression fittings, quick-fit fittings and hose tail fittings.**

✗ **Not suitable for use with water or in high humidity environments.**

Metric Polyurethane Ether Tube

Working Temperature
-40°C to +70°C

Ether based tube has a greater durability to water and high humidity environments.

PUET air line tubing is made from 95A shore durometer, ether-based polyurethane and is an excellent choice for compressed air systems.

- Kink and abrasion resistant.
- Resistant to chemicals, water, fuel and oil.
- Outstanding flexibility and memory.
- Safety factor of 3 to 1
- Vacuum rating 28" Hg.

Polyurethane Coil Type PUC

Coil hose polyurethane self-storing hose was developed to eliminate the two most common limitations of nylon self storing hoses; kinking and abrasion resistance. Lightweight yet extremely durable, polyurethane coil hose is ideal for use in tough work areas or highly mobile applications. This extremely flexible material which resists kinking and is

impervious to abrasions and oils, is ideally suited for production line air tools; instrumentation; robotics; and many more industrial applications. The superior elasticity characteristics and very small bend radius make it ideal for use in confined spaces.

Supplied without fittings, but ideal for use with push-in, hose tail or quick-fit fittings.

Working Temperature
-20°C to +60°C

'Flexi-Braid' Tubing

"Flexi-Braid" inner-braided polyurethane hose offers an excellent alternative to much bulkier rubber and plastic hoses. Extremely lightweight and tough, it is ideal for either outdoor contractor use or indoor industrial use. "Flexi-Braid" retains its flexibility even in cold environments. Unlike other hoses that are made up of a separate core, braiding and cover, "Flexi-Braid" is extracted complete as a braided hose.

This integral piece construction eliminates the possibility of having the various layers separate due to constant expansion and contraction during pulsating operations, such as with staple or nail guns.

Flexi-Braid Advantages:

- Extremely flexible with a lively rubber like feel making it easier to rewind and handle.
- Broad temperature range (-20°C to +80°C) and retains its flexibility even in sub-zero temperatures.
- Highly resistant to lubricating oils and greases that can damage PVC.
- UV stabilised for larger out door service.
- Extremely tough, it is the most abrasion resistant tube available.
- High flexural strength, it withstands the rigors of repeated flexing and tight bends..

POLYURETHANE ANTI-SPATTER TUBE & HOSE

Polyurethane Anti-spatter Tube

This PVC/Polyurethane, alloy tubing has been developed by taking 98A durometer polyurethane as the inner tube and jacketing it with a specially formulated flame retardant cover.

The jacket protects the tubing from incidental contact with weld spatter.

Features:

- UL-94 (V-0) Fire Resistance.
- High abrasion resistance.
- Non-Marking Cover.
- Good flexibility over a wide temperature range.
- Excellent fitting retention at elevated temperatures.

Temperature Range:
-40°C to +70°C

Applications:

- Transfer of Air & Water.
- Induction welding tubing lines.
- Transfer of deionised water.
- Robotic & Pneumatic Air Lines.
- Automotive assembly lines.

Advanced Polyethylene Tubing

- Suitable for a wide variety of uses in point of use water purification systems, industrial water treatment and drink dispense systems.
- Made from a high grade of polyethylene, the advanced PE tubing ensures the best balance between flexibility and pressure/temperature resistance.
- Resistant to a wide range of aggressive chemical agents.
- Available in nine colours.
- Black tubing is UV stabilized, making it resistant to direct ultraviolet sunlight and ideal for outdoor applications.
- Silicone free.

Working Temperature:
+34°F (1°C) to +203°F (95°C)

TUBING

Polyether Polyurethane Tubing

The high flexibility of Legris flexible polyurethane tubing allows compact cabling where a small bend radius is required.

Legris flexible polyurethane tubing has a shore hardness 52°C and conforms to NFE 49.101 standard.

Polyether polyurethane tubing, for excellent resistance to humidity and bacteriological aggressions.
Polyester polyurethane available on request.

Polyurethane Twin Tubing

- Twin tubing maintains the smooth surface of both tubes when separated and keeps the characteristics of their dimensions.
- Swift and easy assembly.
- Compactness of circuitry.
- Differentiation of circuits, via two colours.

Anti-spark Tubing

- Anti-spark tubing is suitable for installations submitted to aggressive environments and provides resistance to spark projections. It is designed with a PVC sheath and semi-rigid nylon tubing and conforms to UL94V-0 standard.
- A special mark on the tube indicates the length to be stripped back to reach the shoulder of the fitting.

Translucent Silicone Tubing

Translucent silicone tube is non-toxic and biologically inert. It is FDA, BGA, WRC and NWC approved for drug and medical use, and meets European Pharmacopoeia class VI. Outstanding temperature resistance from -60°C to +200°C, it can withstand repeated autoclaving. Excellent chemical resistance (contact technical department for advice).

Not suitable for high pressure applications.

Working Temperature:
-60°C to +200°C

PTFE Tubing (Polytetrafluoroethylene)

The unique properties of PTFE are excellent. Enjoying a non-stick/low friction release property and a very wide temperature range, it is virtually inert to all known chemicals and solvents. It exhibits extremely good electrical insulation properties and good weatherability. All these characteristics combined make PTFE the ideal material for innumerable applications.

Please note: no recommended burst pressures/working pressures due to hose being unreinforced.

POLYURETHANE TUBING

FESTO

Features

- Extremely flexible polyurethane tubing
- High resistance to stress cracks
- Suitable for use with energy chains
- Food safe - FDA Compliant
- Plastic tubing PUN-H-F
- Polyurethane
- High resistance to microbes and hydrolysis
- Clean room-compatible combination with fitting NPKA
- Operating medium: compressed air, vacuum and water

For food safety certificates, see www.festo.com/certificates/PUN_H_F

Product Description

REACH ✓

Metric Flexible Nylon Tubing, Type NT (to BS5409)

Working Temperature
-10°C to +80°C

Tube is not suitable for use with water or in high humidity environments.

U.V. stable.

Silicone free.

Abrasion resistant.

Manufactured from quality grade nylon granules.

Other colours and lengths available on request

The properties of this tube make it ideal for use in pneumatic control systems. (Ideally suited for use with push-in fittings).

Imperial Flexible Nylon Tubing, (to BS5409)

Working Temperature
-10°C to +80°C

Tube is not suitable for use with water or in high humidity environments.

Specifications

Standard Coil Length:
30 Metres

(other colours and lengths available on request).

Manufactured from top quality crystal clear “virgin” nylon compound. This hose is ideal for factory airlines, fluid systems and many industrial applications.

The hose is resistant to a wide range of chemicals (please consult our Business Development Team for further details).

U.V. stable.

Silicone free.

Abrasion resistant.

Nylon Tubing **FT PRO**

Metric Flexible Nylon Tubing, (to BS5409, DIN 73378 & ISO 7628)

Working Temperature
-40°C to +80°C

Manufactured from extremely high grade nylon granules, this hose gives almost total resistance to abrasion and many more chemicals including dilute acid and alkaline.

The properties of this tube make it ideal for use in pneumatic

control systems, fuel lines, lubrication and also within the food, beverage and brewing industry (ideally suited for use with push-in fittings).

Working pressure will differ at higher temperatures.

Tech Sheet 1386

- ✓ High resistance to moisture absorption.
- ✓ Suitable for use in air brake systems.
- ✓ Suitable for fuel and lubrication systems. 4 to 1 safety factor.
- ✓ Very stable in moisture type atmospheres.

Nylon 12 Coil Hose with Tails

Working Temperature
 -40°C to +80°C

Applications:

- Fuel lines.
- Oil lines.
- Petrol tank breather lines.
- Pneumatic lines.
- Bleed lines.
- Brake controls.

Low moisture absorption.

Excellent resistance to a wide range of chemicals.

Safety factor of 3 to 1.

NYLON TUBING

Semi-rigid Nylon Multitube Close Tolerance

Legris semi-rigid nylon multitube is suited to pneumatic circuits submitted to external aggression.

Its PVC sheath is resistant to abrasion, fire, caustic fluids, oils, alcohol etc.

The special design sheath and spiral assembly ensure a small bend radius for compact and flexible cabling.

For fast identification of circuits, tubes are numbered from 1 to 12 and 6 colours are available.

Note: Also available in 25 metre and 50 metre coils.

LLDPE & SYNIFLEX TUBE

Tubing LLDPE

Maximum Working Temperature:
180°F / 80°C (temperature and pressure variations apply*)

Strong but flexible, LLDPE tubing is suitable for use with super Speedfit push in fittings and virtually all standard tubing connectors.

The John Guest PE range of plastic tubing is produced in linear low density polyethylene for cold and intermittent hot water applications.

NOTE:

LLDPE IS NOT RECOMMENDED FOR HIGH PRESSURE COMPRESSED AIR SYSTEMS 10 bar+, MINERAL OILS, GASES AND FUELS.

- Other colours available white, green, yellow, orange and violet.
Minimum order 500m. POA.

Tubing

Application: Synflex 1300 is a unique composite-wall tubing designed for pneumatic instrument control systems. Its fully bonded polyethylene/aluminium construction combines the advantages of both metal and plastic tubing.

Chemical Resistance: The outer, high density polyethylene layer is impervious to most chemical-containing atmospheres and enables Synflex 1300 to out perform practically all types of unprotected metal tubing.

SECTION 7

7.01 Industrial Ball Valves

- Lever Handle
- Wing Handle
- Full Bore
- Mini
- High Pressure
- Drain
- Bibcock
- Standard In-line
- Direct Mount

922-937

7.02 WRAS & Gas Ball Valves

- Lever Handle
- Wing Handle
- Full Bore
- Mini
- Compression Ended
- Super Filter
- Dual Sealing
- Lockable
- Direct Mount

938-945

7.03 Stainless Steel & Carbon Steel Ball Valves

- Lever Handle
- Wing Handle
- Full Bore
- Mini
- ISO Pad Mount
- Fire Safe
- Hygenic
- Flanged
- Direct Mount

946-956

7.04 Gate Valves

- Heavy-duty
- Flanged
- PN10, PN16, PN20
- ANSI150
- Metal Seat
- Resilient Seat
- EPDM Seat
- Class 800
- Socket Weld

957-959

7.05 Check Valves

- Spring
- Swing
- PN16, PN20
- ANSI150
- Metal Seat
- Rubber Seat
- Flanged
- Double Union
- Strainers

960-966

7.06 Hygienic, Wafer & Lugged Butterfly Valves

- Hygenic
- Wafer Pattern
- Lugged Pattern
- Weld End
- Clamp End
- RJT

967-971

7.07 Y Strainers

- Brass
- Stainless Steel
- Cast Iron
- Flanged PN16
- Flanged ANSI150

972-974

7.08 Globe Valves

- Bronze
- Stainless Steel
- Cast Iron
- Carbon
- Ductile Iron
- Carbon Steel
- Flanged PN16
- Flanged PN40
- Flanged ANSI150

975-977

7.09 Balancing Valves, Air Vents & Steam Traps

- Fixed/Variable Orific
- Flanged PN16
- Test Points
- Auto Air Vent
- Air Eliminators
- 3 Way Boiler Vent Valves

978-979

Valves & Actuation

7.10 Pressure Reducing Valves

- Brass Pressure Reducing Valves
- Type 143
- Type 243

Uttag

980

7.11 Instrumentation Manifolds

- Manifold Valves
- Pipe to Pipe
- 2/3 Valve
- Remote Mount

PANAM

981

7.12 Needle Valves

- Brass
- 3,000/6,000/10,000 psi Rated
- Mini

ET PRO GENE BRE PANAM

982-983

7.13 Pressure Relief Valves

- Series 6000
- Type 1776
- Combined Pressure & Temperature
- Compact Relief Valves
- Safety Relief Valves

ET PRO NABIC SEETRU

984-992

7.14 Actuation

- Ball Valves/Wafer Pattern/Lugged & Tapped Butterfly Valves fitted with a Pneumatic Actuator or a Electric Actuator
- Full Bore
- Flanged
- 3 Way
- Fire Safe
- Hygienic
- Actuated Knife Gate Valves

ET PRO HAITIMA ICP

993-1014

7.15 Actuators & Accessories

- Pneumatic/Electric Actuators
- Position Indicator
- Mounting Brackets
- Electric Actuator Kits
- Pilot Accessories

ET PRO HAITIMA rotork

1015-1023

7.16 General Purpose Solenoid Valves

- Automatic Drain Valves
- Coils
- Plugs
- Timers
- Pre-wired Moulded Solenoid LED DIN Plug Connectors
- ZS Series
- Electrical Socket Connectors

ET PRO FESTO TECHMATIC

1024-1047

7.17 Angle Seat Valves

- Angle Seat Valves
- Pinch Valves
- Piston Valves
- Banjo Solenoid Valves
- Pressure Switches
- V.I.P. Axial Flow Valves

ET PRO FESTO OMQL

1048-1055

7.18 Valves Accessories

- Control Valves
- Filters
- Water Valves
- Drain Cock & Bleeder Valves
- Drain Ball Valves & Pump Connectors
- Float Valves
- Spring Auto
- Self Close Pour Tap Valves

ET PRO GENE BRE Uttag

1056-1060

BALL VALVES

- Full bore
- Long thread
- Flat steel handle
- Seal material PTFE

Working Temperature
-15°C to +120°C

Maximum Working Pressure:
25 bar

Lockable Ball Valves

- Legris lockable ball valves have been developed in order to prevent potentially dangerous consequences by unintended operation. Lockable in different positions, this range meets international safety requirements, such as ISO 4414. Lockable ball valves feature a plate fixed to the valve body and a plate attached to the valve stem. When the plates are pad-locked together, the valve handle cannot be moved.

 Maximum Working Pressure:
40 bar

LEVER HANDLE BALL VALVES

FULL FLOW VALVES

WRAS Brass ball valves fully approved by WRAS for clean water solutions.

The quality of the full flow brass ball valves is approved in the UK under the Water Regulations Advisory Scheme (WRAS) for water fittings. Suitable for domestic water services, heating, air-conditioning plants and compressed air systems for isolation shut-off. Blue wing handle valves are stocked as standard with green, red and black available on request.

WRAS, Lever Handles, Brass Nickel Plated

Working Temperature:
-10°C to +120°C

Maximum Working Pressure: 25 bar

Female x Female, BSPP

Red and green levers are available on request

BALL VALVES

Super Filter Ball Valves, Brass

Advantages:

- Large flo
 - Low head loss
 - Eliminates need for separate in-line filter
 - Reduces installation time
 - Easy access for filter cleanin
 - Can be installed in any position
- 500 micron filter (35 mesh)
Conforms to Directive 97/23/EC.

Working Temperature:
-20°C to +100°C

Stainless Steel Valves

A quality range of stainless steel ball valves with a reliable reputation across the manufacturing industry. The selection of valves are available from the manufacturer including fire safe and specialised material options of Titanium, Monel, Hastelloy, Inconel 625, SMO 254 and Duplex.

Approvals:

- ISO 9001 approved manufacturer
- 3A approved
- Pressure equipment directive module 2 certification
- TÜV certification
- ASME material certification
- CE certification

Applications:

- Hydraulic
- Pneumatic
- Steam
- Oxygen (if degreased)
- Vacuum
- Thermal fluids
- Chemical
- Oil/gas
- Food processing
- Dry/liquid chlorine
- Testing

For full compatibility for your application, please contact our Technical department.

316 Stainless Steel Ball Valves

° Working Temperature:
-20°C to +200°C

Maximum Working
Pressure:
63 bar

Features:

- Investment casting
- Blowout proof stem
- Locking lever

BUTTERFLY VALVES

Water & Sewer Butterfly Valves

Features:

- To suit various flange sizes
- Lugged and tapped pattern valve design

Working Temperature:

- 20°C to +120°C (2014LW)
- 0°C to +80°C (2014LB and 2014LD)
- 30°C to +180°C (2014LH)
- 20°C to +200°C (2014LI and 2014LV)

Maximum Working Pressure:

16 bar

Tech Sheet 6067

Features:

- Add-on price for kit and switch box
- Aluminium IP67 enclosure
- Beacon indicator
- 2 x SPDT 250V DC/AC V3 micro switches
- 2 x M20 cable entries
- Stainless steel bracket

Can be used with any ISO top valve. The valve stem will require some machining at an additional cost. Contact sales for more information.

6,000 psi Rated Imperial Needle Valves

The 'IB' series of needle valves are specially designed and manufactured for use in corrosive and hazardous environments. These valves are for use in process control, instrumentation and flow control applications.

Feature Benefits

One piece body construction for strength and safety.

Non rotating Vee tip design, which forms a bearing joint with the stem eliminating

any rotation between the plug and seat on closure ensuring long life.

Testing: All valves are 100% factory tested and complete traceability is available upon request.

Material: Body, panel nut, washer and gland nut A479-316

Stem: A479-316 / 17-4PH

Packing: PTFE

Grub Screw: Steel plated

Handle: Stainless steel

Vee Tip: A 564-630

10,000 psi Rated Imperial Needle Valves

The 'HP' series of needle valves are specially designed and manufactured for use in corrosive and hazardous environments. These valves are for use in process control, instrumentation and flow control applications.

Feature Benefits

One piece body construction for strength and safety.

Non rotating Vee tip design, which forms a bearing joint with the stem eliminating any rotation between the plug and seat on closure ensuring long life.

Testing: Each valve is hydrostatically tested in accordance with MSS-SP-99. This procedure includes testing of the body cavity. A Hydrostatic test is

performed with pure water or other liquids of similar or lower viscosity at 1.5 times and seat leakage test at 1.1 times of the maximum working pressure.

Each valve is also tested with nitrogen gas at 1000psi for seat, seal and shell leakage. Other tests like vibration, temperature and helium are available upon request.

Material: Body, stem, packing washer, lock nut and gland retainer A479-316/A-105

Gland Packing:
Glass Filled PTFE

Packing: PTFE

Handle: Stainless steel

Dust Cap: Plastic

Vee Tip: A 564-630

The Engineers Choice

FT Pro products have been meticulously selected based on their superior quality, dependability, and durability. Our products are engineered by engineers for engineers and produced by leading fluid power manufacturers, ensuring they meet even the most rigorous application demands.

We understand that all application requirements are unique, and that's why we only offer products that we know will provide the most effective solution.

At FT Pro, we work closely with our customers to ensure that we provide tailored solutions that meet their exact requirements. Whether you need products for hydraulic systems, pneumatic systems, or any other fluid power application, FT Pro has the product to support you and help you find the right outcome.

Pressure Relief Valves

With the introduction of the European Pressure Equipment Directive, which recommends relevant design and quality assurance in appropriate certification.

This range of pressure relief valves are manufactured and tested in accordance with the regulations which meet applicable specifications both nationally and internationally. Compliance with the component test report, by the identification the manufacturer provides a guarantee for the specified setting values. Test certificates come as standard.

Note: This product is CE marked, to comply with legislation.

PRESSURE RELIEF VALVES

Compact Relief Valve DN6

Relief valves discharge non-toxic and non-flammable gases into the atmosphere in order to protect pressure tanks against overpressure.

Please note: Only relief valves that have been set and sealed with lead (plumbed) by us can be delivered with the component symbols, it is thus absolutely necessary to indicate the setting pressure in bar. As functional test, relief valves may be aerated by the way of pulling the haul-off bolt. Repairs may only be carried out by the manufacturer.

Technical Data

- Connection thread: G1/4, G3/8
- Setting range: 4,5 to 24 bar (5 steps)
- Opening pressure difference: <10%
- Closing pressure difference: <10%
- Material: Brass
- Seal: Viton

Important: The supply connection to the relief valve should not be <DN6, the pressure drop in the supply connection not >3%.

Working Temperature:
-10°C to +150°C

Maximum Working Pressure:
24 bar (PN24)

Male, Thread, BSPP

Exhaust Capacity Air

The exhaust capacities indicated in the table are the minimum values reached when air pressure is raised by 10% above the set pressure.

Set Pressure Bar	Exhaust Flow Capacity (normal condition)	
	m³/h	l/m
6	60	1000
10	110	1833
11	125	2083
14	155	2583

Intermediate values can be interpolated.

More variations available. Special set pressures, body materials & large threads.

Type 1776

All type 1776 valves are pre-set and sealed to prevent tampering.

Pre-set pressure relief valves are precision manufactured to open at the pre-set pressure and discharge fluid until pressure drops to acceptable levels to protect against equipment damage or personal injury.

- Equal certification* of ASME BPVC Section XIII and UKCA/CE for PE(S)R 2016 and PED 2014/68/EU
- Automatically vents at selected pressure
- Automatically resets when pressure returns to 'normal'
- Brass body with stainless steel internal components

Please note:

Equal certification applies from 30 PSI upwards. Pressure ranges from 5 to 20 PSI will offer no accreditations that meet UK/European standards

PRESSURE RELIEF VALVES

Atmospheric Pressure Relief Valves, 6mm-15mm

Seetru Atmospheric Discharge Pressure Relief valves are compact, highly efficient and incorporate the exclusive 'Tutchtite' seal technology to give repeatable bubble tight sealing performance.

Suitable for air and gases including refrigerant.

Type approved and/or manufactured in conformance with national and international standards which include BS6759 Part 2 and 3, ISO 4126 and TUV (Germany) in accordance with AD Merkblatt A2. Compliant with the requirements of the European Equipment Directive 97/23/EC and CE marked flow rates calculated

SAFETY VALVES

NABIC®

High Lift Safety Valves (Fig 500)

Applications: the Fig 500 high lift safety valve has been designed primarily for use on unvented hot water heating systems, where a high capacity, emergency steam relief capability is required. High capacity and resilient PTFE seating also make the Fig 500 ideal for steam, air and inert gas applications. A PTFE to Viton seating design is also available where greater seal tightness is required.

Construction: the Fig 500 is constructed in gunmetal with diaphragm protected working parts and PTFE to metal seating. All wetted parts are manufactured from dezincification resistant materials, approved by the Water Research Centre for use on potable water. Standard inlet and outlet connections have female threads to BS 21, with the outlet connection one size larger than the inlet. Sizes from DN20 upwards are available with flanged inlet connections; other thread forms are also available.

Please Note: due to pressure setting and certification of this product, normal delivery will be up to 3 working days (manufacturers stock permitting), although a quicker service may be available if required. **Please contact our sales team.**

Features:

- Resilient PTFE seating designs
- High degree of seating tightness
- Suitable for hot water, steam and air
- High discharge capacity
- Diaphragm protected working parts
- Safe manual testing
- Easy inspection and cleaning
- Pressure setting locked and sealed
- Designed and tested to BS 6759
- Capacities certified by TOC

 **Working Temperature:**
-20°C to +195°C

 **Maximum Working Pressure:**
12.5 bar

Tech Sheet 1398

We have listed all the popular sizes and pressure ratings, however other variations are available.

Individual test certificates to be requested at the time of order

Safety Relief Valves (Fig 542)

Applications: the Fig 542 safety valve is an extremely versatile valve, suitable for use on hot water, steam or air. Although designed primarily for the protection of hot water boilers, its wide range of applications make it ideal as a general purpose safety valve.

Construction: the Fig 542 is of gunmetal construction with diaphragm protected working parts and PTFE to metal seating. All wetted parts manufactured from dezincification resistant materials, approved by the Water Research Centre for use on potable water. Inlet and outlet connections are of equal size, with female threads to BS 21. Sizes from DN32 upwards are also available with flanged inlet connections.

Please Note: due to pressure setting and certification of this product, normal delivery will be up to 3 working days (manufacturers stock permitting), although a quicker service may be available if required. **Please contact our sales team.**

Features:

- Resilient PTFE seating designs
- High degree of seat tightness
- Suitable for hot water, steam or air
- Diaphragm protected working parts
- Safe manual testing
- Easy inspection and cleaning
- Pressure setting locked and sealed
- Designed and tested to BS 6759
- Capacities certified by TOC

Working Temperature:
-20°C to +195°C

Maximum Working Pressure:
10.5 bar

PRESSURE RELIEF VALVES

NABIC®

Pressure Relief Valves (Fig 500L)

Applications: Nabic pressure relief valves are intended for use where pressure tightness is required on the discharge side of the valve. They are ideal for pump relief, bypass relief, outside installations, and inflammable fluid

Construction: the valves are of gunmetal construction with top-guided copper alloy parts, chrome vanadium spring and PTFE to metal seating. O-Ring seals ensure pressure tightness at cover and cap joints. Available options are stainless steel springs, high pressure versions and Viton seat design.

Please Note: due to pressure setting and certification of this product, normal delivery will be up to 3 working days (manufacturers stock permitting), although a quicker service may be available if required. **Please contact our sales team.**

Features:

- Resilient PTFE seating design
- High degree of seating tightness
- Suitable for liquids and gases
- Top-guided working parts
- Pressure tight on discharge side
- Designed and tested to BS 6759
- Flange inlets available

Working Temperature:
-20°C to +195°C

Maximum Working Pressure:
12.5 bar

PRESSURE RELIEF VALVES

NABIC®

Pressure Relief Valves (Fig 542L)

Applications: NABIC liquid relief valves are intended for use where pressure tightness is required on the discharge side of the valve. They are ideal for use on pump relief and bypass relief applications, also on outside installations and where tamper-proof units are required.

Available options: stainless steel springs, high pressure versions and Viton seat design.

Construction: the valves are of gunmetal construction with top-guided copper alloy parts. Fitted with chrome vanadium spring as standard, they also incorporate the proven NABIC PTFE to metal seating design. O-Ring seals ensure pressure tightness at cover and cap joints.

Please Note: due to pressure setting and certification of this product, normal delivery will be up to 3 working days (manufacturers stock permitting), although a quicker service may be available if required. **Please contact our sales team.**

Features:

- High degree of seat tightness
- Certified discharge table
- Designed and tested to BS 6759

 **Working Temperature:**
-20°C to +195°C

 **Maximum Working Pressure:**
12.5 bar

PRESSURE RELIEF VALVES

Combined Pressure & Temperature Relief Valves (Fig 500T)

Features:

- Dome top
- Relief pressure can be set between 1 and 12.5 bar for 3/4" to 1" and between 0.4 and 12.5 bar for 1.1/4" upwards
- Suitable for hot water and potable water
- A viton seat option is also available on request

 **Working Temperature:**
-20°C to +95°C

 **Maximum Working Pressure:**
12.5 bar

NABIC®

Safety Relief Valves (Fig 542F)

Features:

- Easing lever
- Relief pressure can be set between 0.3 and 10.5 bar
- Suitable for hot water, saturated steam, compressed air and inert gasses, CO2 (to +20°C), ethylene glycol and potable water
- A viton seat option is also available on request

 **Working Temperature:**
-20°C to +195°C

 **Maximum Working Pressure:**
10.5 bar

Tech Sheet 20442

Please Note: due to pressure setting and certification of this product, normal delivery will be up to 3 working days (manufacturers stock permitting), although a quicker service may be available if required.

Please contact our sales team.

We have listed all the popular sizes and pressure ratings, however other variations are available.

Individual test certificates to be requested at the time of order

Brass Nickel Plated Ball Valves Fitted with a Pneumatic Actuator

Features:

- Sized based on 10 bar pilot air and wet non-abrasive duty at +90°C

 **Working Temperature:**
 -20°C to +170°C (valve)
 -20°C to +90°C (actuator)

 **Maximum Working Pressure:**
 40 bar

HAITIMA ACTUATION

Features:

- Fire Safe approved and anti-static device (valve only)
- ATEX II 2GD c T5 certification
- Sized based on 10 bar pilot air and wet non-abrasive duty at +90°C

 **Working Temperature:**
 -20°C to +220°C (valve)
 -20°C to +90°C (actuator)

For saturated steam up to 12 bar - use an actuated valve with a TSM

Fire Safe Stainless Steel Ball Valves Fitted with a Pneumatic Actuator

Features:

- Fire Safe approved and anti-static device (valve only)
- ATEX II 2GD c T5 certificatio
- Sized based on 10 bar pilot air and wet non-abrasive duty at +90°C

 **Working Temperature:**
 -20°C to +200°C (valve)
 -20°C to +90°C (actuator)

Suitable for up to 12 bar saturated steam with a TSM

ACTUATED KNIFE GATE VALVES

Features:

- ATEX II 3GD T3 certification
- Provides high flow rates with low pressure drop
- Other sizes or flange dimensions are available on request

Type A Unidirectional Knife Gate Valves Fitted with a Pneumatic Cylinder

- Suitable for liquids that contain a maximum of 5% suspended solids

Pressure Equipment Directive:
DIR 97/23/EC (PED) Art. 4.3, Cat. 1

Working Temperature:
0°C to +90°C

Type AB Bidirectional Knife Gate Valves Fitted with a Pneumatic Cylinder

- Suitable for liquids that contain a maximum of 4% suspended solids

Pressure Equipment Directive:
DIR 97/23/EC (PED) Art. 4.3, Cat. 1

Working Temperature:
0°C to +90°C

Brass Nickel Plated Ball Valves Fitted with a J2-10 Electric Actuator

Features:

- L10: 24V DC/V AC 50/60Hz
H10: 110-240V DC/V AC 50/60Hz
- Failsafe and/or modulating configurations cannot be used with the J2-10 electric actuator
- Sized based on 10 bar wet non-abrasive duty at +70°C

° Working Temperature:

- 20°C to +170°C (valve)
- 20°C to +70°C (actuator)

Maximum Working Pressure:

40 bar

Brass Nickel Plated Ball Valves Fitted with a J2-10 Electric Actuator

Features:

- L10: 24V DC/V AC 50/60Hz
H10: 110-240V DC/V AC 50/60Hz
- Failsafe and/or modulating configurations cannot be used with the J2-10 electric actuator
- Sized based on 10 bar wet non-abrasive duty at +70°C

° Working Temperature:

- 20°C to +130°C (valve)
- 20°C to +70°C (actuator)

Maximum Working Pressure:

40 bar

Brass Nickel Plated Ball Valves Fitted with a J4CS Electric Actuator

Features:

- Multi voltage 24-240V DC/V AC 50/60Hz
- Multicoloured LED light for continuous status feedback for the user
- Electronic torque limiter with auto gearbox relaxing
- Failsafe and/or modulating configurations can be used with the J4CS electric actuator
- Sized based on 10 bar wet non-abrasive duty at +70°C

Working Temperature:

- 20°C to +130°C (valve)
- 20°C to +70°C (actuator)

Fire Safe Ball Valves Fitted with a J4CS Electric Actuator

Features:

- Fire Safe approved and anti-static device (valve only)
- Multi voltage 24-240V DC/V AC 50/60Hz
- Multicoloured LED light for continuous status feedback for the user
- Electronic torque limiter with auto gearbox relaxing
- Failsafe and/or modulating configurations can be used with the J4CS electric actuator
- Sized based on 10 bar wet non-abrasive duty at +70°C

Working Temperature:
 -20°C to +220°C (valve)
 -20°C to +70°C (actuator)

Suitable for up to 12 bar saturated steam with a TSM

Tech Sheet 6483

Wafer Pattern Butterfly Valves Fitted with a J4CS Electric Actuator

Features:

- To suit flanges PN6/10/16, ANSI150 and BS 10" D/E
- Multi voltage 24-240 VDC/VAC 50/60Hz
- Multicoloured LED light for continuous status feedback for the user
- Electronic torque limiter with auto gearbox relaxing
- Failsafe and/or modulating configurations can be used with the J4CS electric actuator
- Sized based on 10 bar wet non-abrasive duty at +70°C

Working Temperature:
 -20°C to +120°C (WA and WC)
 0°C to +80°C (WB)
 -20°C to +70°C (actuator)
 Excluding ice and steam

Maximum Working Pressure:
 16 bar

Pneumatic Actuators

Features:

- 0-90° rotation angle to pilot ball, butterfly and plug valve
- Hard anodized aluminium body
- ATEX II 2GD c T5 certificatio
- Conforms to ISO 5211, DIN 3337 and VDI/VDE 3845
- Epoxy coated end caps
- NAMUR pneumatic connection for solenoid valve installation

Working Temperature:
-20°C to +90°C

Maximum Working Pressure:
8 bar

AIR TORQUE ACTUATION

Pneumatic Actuators

Features:

- 0-90° rotation angle to pilot ball, butterfly and plug valve
- Alodur hard anodized aluminium body
- ATEX 2014/34/EU certificatio
- SIL3 rated
- DNV certificatio
- IP67 rating with IP68 at manufacturers request
- Universal and anti-blowout patented drive shaft
- Conforms to ISO 5211, DIN 3337 and VDI/VDE 3845
- NAMUR pneumatic connection for solenoid valve installation

Working Temperature:
-40°C to +80°C

Maximum Working Pressure:
8 bar

PRISMA ACTUATION

Pneumatic Actuators

Features:

- 0-90° rotation angle to pilot ball, butterfly and plug valve
- Rilsan and epoxy coated aluminium body
- ATEX II 2G Ex h IIB T6 Gb / II 2D Ex h IIIC T80°C Db certificatio
- Suitable for use in a SIL safety loop
- Conforms to ISO 5211, DIN 3337 and VDI/VDE 3845
- NAMUR pneumatic connection for solenoid valve installation

Working Temperature:
-32°C to +90°C

Maximum Working Pressure:
8 bar

Position Indicator

Features:

- PA plastic material
- 2 position indicators suitable for all quarter turn actuator sizes
- Suitable for use in ATEX zones

SASF Position Indicator

0990	Manufacturer's Code
4046082	SASF-S2-B-F-A34

Tech Sheet 6271

J+J ACTUATION

Electric Actuators

Features:

- IP67 fully weatherproof polyamide PA6 housing
- Multicoloured LED light for continuous status feedback for the user
- Auto voltage sensing 24-240 VDC/VAC 50/60Hz. A 12 VDC/VAC 50/60Hz option is also available on request (J4CB)
- The J4CS series has brushless motor technology with each unit now having a 3 year warranty from shipment date or up to 60,000 working cycles, whichever comes first
- Electronic torque limiter with auto gearbox relaxing
- Thermostatic 3.5W anti-condensation heater
- Local dome style visual position indicator
- Handwheel operated selectable manual override
- Two volt free end of travel position confirmation switch
- All external electrical connections via DIN plugs. Large Plug EN175301-803 Form A, small plug DIN 43650/C
- External wiring diagram showing 2 and 3 wire
- Multi-flange mounting to ISO 5211 and DIN 333
- Duty rating 75%

Options:

- Failsafe battery 'spring' return backup kit
- DPS modulating digital positioner system kit
- Interface system kit allowing communication with the actuator, read parameters and change the actuator configuration
- Bluetooth technology
- Modbus technology

Working Temperature:
-20°C to +70°C

Tech Sheet 6255

Option of a F07 x 17mm with a kit for the J4CS20 and J4CS35

Electric Actuators

Features:

- IP65 polyamide PA6 housing
- Main shaft made from stainless steel
- Polyamide gears
- Available in high voltage 110-240V DC/V AC 50/60Hz or low voltage 24V DC/V AC 50/60Hz
- Thermostatic 3.5W anti-condensation heater
- Local visual position indicator
- Selectable manual override
- Two volt free end of travel position confirmation switch
- All external electrical connections via DIN plugs large plug EN175301-803 form A, small plug DIN 43650/C
- External wiring diagram showing 2 and 3 wire
- Mounting to ISO 5211 and DIN 3337 female star drive
- Duty rating 75%

Working Temperature:
-20°C to +70°C

J2L10	10	12	19 sec	F03/F05	24V 0.39A 9.36W	14mm

Tech Sheet 6256

Please note: **Failsafe and/or modulating configurations cannot be used with the J2-10 electric actuator.**

Electric Actuator Kits

Features:

- Battery 'spring' return kit for the J4CS electric actuators
- Can be set to fail open or closed (please specify)
- Can be retro-fitted to existing J4CS actuators. Also comes complete with installation instructions
- Rechargeable NiCd battery
- Both the BSR and DPS kit can be installed together to provide failsafe and modulating functionality

Supplied in display box.

BSR Battery Backup Plug-in

0956	To Suit Models
J4CSBSR1	20 to 85
J4CSBSR2	140 to 300
Tech Sheet 6257	

Features:

- Digital positioning system for the J4CS electric actuators
- 0-20mA, 4-20mA, 0-10V or 1-10V input/output options available
- Can be retro-fitted to existing J4CS actuators. Also comes complete with installation instructions
- Can be set to fail open or fail close on loss of control signal. A fail freeze option is also available but it requires the interface system kit fitted to the J4CS electric actuator
- Both the DPS and BSR kit can be installed together to provide failsafe and modulating functionality

Supplied in display box.

DPS Digital Positioning System

0956	To Suit Models
J4CSDPS1	20 to 85
J4CSDPS2	140 to 300
Tech Sheet 6258	

Mounting Brackets

- Designed for use with the FIP TKD and VKD ball valve series
- Standard holes drilled according to ISO 5211 specification
- Drive adapter to suit DIN 3337

FIP EasyFit Kit

0956	Size	ISO Plate 5211	Square Size mm

- Designed for use with the Georg Fischer 546 ball valve series
- Standard holes drilled according to ISO 5211 specification
- Drive adapter to suit DIN 3337

GF 546 Kit

0956	Size	ISO Plate 5211	Square Size mm
ACTMKEASYGF-12	D20/DN15/1/2"	F03/F05	11
ACTMKEASYGF-1	D32-D25/DN25-DN20/3/4"-1"	F03/F05	11
ACTMKEASYGF-112	D50-D40/DN40-DN32/1.1/4"-1.1/2"	F03/F05	11
ACTMKEASYGF-2	D63/DN50/2"	F03/F05	11

Pilot Accessories

Features:

- For use with compressed air
- Internally piloted
- Anodised aluminium alloy body
- Suitable for single and double acting pneumatic actuators
- 5 port 2 position
- Manual override
- NAMUR and VDI/VDE 3845 standard interface for direct mounting to pneumatic actuators
- 1/4" BSPP inlet and exhaust ports
- Insulation class F
- LED DIN plug
- For safe area use only
- Flow rate 30kg/mm² (Cv=1.68)
- Voltage tolerance ± 10%
- Response time 0.05 seconds
- Terminal DIN 43650B
- IP65 rated
- Maximum frequency is 5 cycles per second

Working Temperature:
-5°C to +60°C

Maximum Working Pressure:
8 bar

NAMUR 5/2 Solenoid Valve Single Coil

0929	Voltage
HUKNAM24VDC	24V DC
HUKNAM24VAC	24V AC
HUKNAM110VAC	110V AC
HUKNAM230VAC	230V AC

Tech Sheet 6244

FESTO ACTUATION

Pilot Accessories

Features:

- 5 port 2 position
- Can be changed between 3/2 and 5/2 by exchanging the sealing plate
- NAMUR and VDI/VDE 3845 standard interface for direct mounting to pneumatic actuators
