- Non-detenting/detenting manual override
- IP65 rating with a DIN connector fitted
- Solenoid coil and DIN plug to be ordered separately
- For the flameproof option the interface and flameproof solenoid coil need to be ordered

VSNC NAMUR 5/2 Solenoid Valve Single Coil

0990	Manufacturer's Code	Size
577257	VSNC-FC-M52-MD-G14-F8	1/4"

Tech Sheet 6271

Features:

- Electrical connection according to DIN EN 175301-803 Form A
- Any mounting position
- IP65 rating
- 100% duty rating

Solenoid Coil

0990	Manufacturer's Code	Voltage
8029144	VACN-N-A1-1	24V DC
8029134	VACN-N-A1-16B	110V AC
8029135	VACN-N-A1-3A	230V AC

Tech Sheet 6272

Features:

- ATEX II 3G Ex nA IIC T4 Gc / II 3D Ex tc IIC T105°C Dc certification

ATEX Solenoid Coil with DIN Plug

0990	Manufacturer's Code	Voltage
8029136	VACN-N-A1-1-EX2-N	24V DC
8029137	VACN-N-A1-16B-EX2-N	110V AC
8029138	VACN-N-A1-3A-EX2-N	230V AC

Tech Sheet 6273

Features:

- Electrical connection according to DIN EN 175301-803 Form A
- Reinforced PA housing
- IP65 rating

DIN Plug

0990	Manufacturer's Code
34583	MSSD-C

Tech Sheet 6275

Features:

- ATEX II 2G Ex ia IIC T4 Ga / II 2D Ex tb IIC T130°C Db certification

ATEX Solenoid Coil with DIN Plug

0990	Manufacturer's Code	Voltage
8029139	VACN-N-A1-1-EX4-A	24V DC

Tech Sheet 6274

Working Temperature:
-20°C to +60°C

Maximum Working Pressure:
10 bar

Solenoid Interface for Flameproof Coil Option

0990	Manufacturer's Code	Voltage
571061	VSCS-B-M32-MD-WA-1C1	24V DC

Tech Sheet 71760

Features:

- ATEX II 2G Ex db IIC T5 Gb / II 2D Ex tb IIC T100°C Db certification

Flameproof Solenoid Coil

0990	Manufacturer's Code	Voltage
535615	MGXDH-3/2-1.2-24DC-EX	24V DC

Tech Sheet 6277

PNEUMATIC ACTUATOR ACCESSORIES

Pilot Accessories

The interface design is conform to the NAMUR standard and to the VDI/VDE 3845 recommendations of the actuator industry. It allows a compact design of the actuator/valve unit. In case of a 3/2 function, the air of the actuator spring chamber also flows through the pilot valve (re-breather function). This prevents corrosion of the actuator springs.

Working Temperature:
-10°C to +50°C

Maximum Working Pressure:
10 bar

Normally Closed, Nitrile Seal, BSPP

Solenoid Valves

The general purpose brass 2/2 solenoid valves again shows FT Pro's commitment to providing innovative and added value solutions to their customers.

Valve Timer

Pilot Operated 2/2
Solenoid Valve

Pilot Operated 2/2:

- Normally open
- Normally closed
- DIN connectors
- Valve timers
- DC and AC coils
- Available in sizes 3/8" to 2" BSPP
- Media: oil, air and water

Direct Acting 2/2
Solenoid Valve

Direct Acting 2/2:

- Normally closed
- DIN connectors
- DC and AC coils
- Available in sizes 1/8" to 3/8" BSPP
- Available in 0-10 bar and 0 to 35 bar
- High pressure option
- Media: oil, air and water

General Purpose 2/2 N/C, Pilot Operated

SOLENOID VALVES, 25 SERIES

ZS Series 2/2 Solenoid Valve

- Suitable for use on air, gas, hot water and oil applications
- Normally closed
- Comes complete with solenoid coil and plug
- Direct acting - no minimum pressure
- Rated IP 65

Brass Body NBR Seals, BSPP

SOLENOID VALVES

stainless steel

Stainless Steel 2/2 N/C, Direct Operated/ Pilot Operated Solenoid Valves

Materials in contact with fluids

Body: Stainless steel AISI 316

Sealing: FPM

Internal Components: Stainless steel

Seat: Stainless steel AISI 316

Core Tube: Stainless steel

Shading Coil: Copper

Supplied with DIN plugs

1/8"-1/4"

3/8"-1"

SOLENOID VALVES

VZWF 2/2 Way Normally Closed Solenoid Valves

Features:

- Available in brass or stainless steel body
- BSPP threads
- NBR seals
- Stainless steel tube and internals
- Suitable for applications such as water, inert gases, compressed air systems and neutral liquids.
Also suitable for vacuum with Pabs > 100 mbar
- 22 centistokes maximum viscosity
- IP65 rating

- ° Working Temperature:
-10°C to +80°C
- ° Ambient Temperature:
-10°C to +35°C
- Maximum Working Pressure:
10 bar: 1/4" to 1/2"
6 bar: 3/4" upwards

VZWM 2/2 Way Normally Closed Solenoid Valves

Features:

- Available in brass or stainless steel body
- BSPP threads
- NBR seals
- Steel tube and internals
- Suitable for applications such as water, inert gases, compressed air systems and neutral liquids
- 22 centistokes maximum viscosity
- IP65 rating with a DIN connector fitte
- For a complete diaphragm opening, a minimum pressure of 0.5 bar is required for sizes 1/4" to 1" and 0.7 bar for sizes 1.1/4" upwards

- ° Working Temperature:
-10°C to +60°C
- ° Ambient Temperature:
-10°C to +60°C
- Maximum Working Pressure:
10 bar (gases)
6 bar (liquids)

SOLENOID VALVES

stainless
steel

Parker's 2 way and 3 way, normally closed and normally open, solenoid valves are used in a wide variety of applications, with or without pressure differential. Ideal for air, liquids and gases, these valves are available with a brass or stainless steel body with a range of sealing materials offering vast chemical compatibilities.

Applications:

- Compressors
- Water dispensing and purification
- Cooling systems
- Sterilisers
- Analysers and diagnostic equipment
- Medical and dental devices
- Welding equipment
- Lubrication equipment
- Beverage dispensing and vending machines
- Oil burners
- Humidification and misting equipment
- Mobile equipment
- Textile and dry cleaning machines
- Irrigation

SOLENOID VALVES

Parker's 2 way, normally closed and normally open, solenoid valves are used in a wide variety of applications, with or without pressure differential. Ideal for air, liquids and gases, these valves are available with a brass or stainless steel body with a range of sealing materials offering vast chemical compatibilities.

Applications:

- Compressors
- Water dispensing and purification
- Cooling systems
- Sterilisers
- Analysers and diagnostic equipment
- Medical and dental devices
- Welding equipment
- Lubrication equipment
- Beverage dispensing and vending machines
- Oil burners
- Humidification and misting equipment
- Mobile equipment
- Textile and dry cleaning machines
- Irrigation

2/2 Way Solenoid Valves, Brass, Hot Water & Liquids

° Working Temperature: -10°C to +140°C (3/8" to 1")
-10°C to +50°C (1.1/4" to 2")

Maximum Working Pressure: 10 bar

Normally Closed, EPDM Seal, BSPP

Many experts in the fluid power industry frequently utilise pre-wired DIN connectors to meet their hydraulic, pneumatic, and process valve needs. These connectors were once referred to as DIN 43650 but are now industry standard EN175301-803.

- Thoroughly tested and ready for installation.
- Eliminates assembly errors.
- No manual cutting or wiring is required
- Reduction in labour costs
- Proven product efficiency and reliability.
- Improved IP ratings.
- Protection against ingress and environmental elements.

By opting for pre-assembled connectors, engineers can be assured of time and cost savings. Equipment and machinery can be safeguarded from contamination and environmental hazards. Additionally, the application will benefit from a noticeable improvement in IP ratings, which can elevate your rating from IP65 to IP67. Pre-moulded connectors provide a smart and efficient solution to any application.

The moulded insulated cable is crafted with premium-grade PVC to guarantee optimal performance and safety for all your connectors. Our utmost priority is to offer an unparalleled product that meets and exceeds your expectations.

Incorporating pre-assembled DIN connectors is a proven solution for engineers to significantly increase efficiency and reduce costs.

Tech Sheet 10163

Connector DIN43650/A

- Housing colour: Black, grey
- Type of contact: Screw with conductor protection
- Contact spacing: 18mm
- Number of poles: 2 poles + $\frac{1}{3}$ + $\frac{1}{3}$
- Cable diameter 6-8mm for PG9, 8-10mm for PG11.
- Max conductor section: 1.5mm²
- Fixing screw: M3 x 30
- The $\text{Ø}30 \times 20$ profile or $\text{Ø}30 \times 25$ is made of thermoplastic rubber in black.
- Protection class IP67 is also available (external thread as gland size, cable dia. 4,5-8mm)
- $\text{Ø}30 \times 20$ unit pieces $\text{Ø}30 \times 25$ fixing screw and standard gasket

Standard

9072	Description
G1NU2000	PG9 / PG11 Black 2 Poles + Earth

Connector DIN43650/A

- Housing colour: Transparent
- Type of contact: Screw with conductor protection
- Contact spacing: 18mm
- Number of poles: 2 poles + $\frac{1}{3}$
- Cable diameter 6-8mm for PG9, 8-10mm for PG11.
- Max conductor section: 1.5mm²
- Fixing screw: M3 x 30
- The $\text{Ø}30 \times 20$ profile or $\text{Ø}30 \times 25$ is made of thermoplastic rubber in black.
- Protection class IP67 is also available (external thread as gland size, cable dia. 4,5-8mm)
- Working voltages available : 12V, 24V, 48V, 110V and 250V

LED & Protection Circuit

9072	Description
G1TU2VL1	PG9 / PG11 24V 2 Poles + Earth
G1TU2VL2	PG9 / PG11 115V 2 Poles + Earth
G1TU2VL3	PG9 / PG11 230V 2 Poles + Earth

Connector DIN43650/A with cable

- Housing colour: Black
- Type of contact: Soldered
- Contact spacing: 18mm
- Number of poles: 2 poles + 2 $\frac{1}{3}$
- Earth position: h6/h12 (ground connection)
- Item available also with 3P+G
- Type of cable: Section 0,50mm and 0,75mm
- Cable length: 1 or 2 metres (other length upon request)
- Max conductor section: IP 65 with moulded cable
- Fixing screw: M3 x 25
- Profile gasket: NBR (other types upon request)
- Cable diameter 6-8mm for PG9, 8-10mm for PG11.

The gasket is integrated on the head of the connector and made of Sipolprene TPC-ET

Moulded Cable

9072	Description
CG1NO2000C022	2 Metres 2 Poles + Double Earth

Connector DIN43650/A

- Housing colour: Black
- Type of contact: Soldered, 18mm
- Number of poles: 2 poles + 2 $\frac{||}{|}$
- Earth position: h6/h12 (ground connection)
- Type of cable: Section 0,50mm and 0,75mm
- Item available also with 3P+G
- Cable length: 1 or 2 metres (other length upon request)
- Max conductor section: 1.5 mm²
- Protection class: IP 65 with moulded cable
- Fixing screw: M3 x 25
- Øprofile gasket: NBR (other types upon request)

The gasket is integrated on the head of the connector and made of Sipolprene TPC-ET

In case of connectors with LED+VDR, working voltages available are 12V, 24V, 48V, 110V and 250V
In case of connectors with LED+diode, working voltages available 10/50V and 70/250V

Moulded Cable, LED & Protection Circuit

9072	Description
CG1N02VL1C022	2 Metre 24V 2 Poles + Double Earth
CG1N02VL2C022	2 Metre 115V 2 Poles + Double Earth
CG1N02VL3C022	2 Metre 230V 2 Poles + Double Earth

Connector DIN43650/B-Industrial

- Housing colour: Black, grey
- Type of contact: Screw with conductor protection
- Contact spacing: 11mm
- Number of poles: 2 poles + $\frac{||}{|}$
- Cable diameter 6-8mm (PG9)
- Max conductor section: 1.5mm²
- Fixing screw: M3 x 30
- The base (Øprofile or Øat) is made of thermoplastic rubber in black.
- Protection class: IP 65 assembled
- Protection class IP67 is also available (external thread as gland size, cable dia. 4,5-8mm)

Standard

9072	Description
M1NS2000	PG9 Black 2 Poles + Earth

Connector DIN43650/B-Industrial

- Housing colour: Transparent
- Type of contact: Screw with conductor protection
- Contact spacing: 11mm
- Number of poles: 2 poles + $\frac{||}{|}$
- Cable entry: PG9
- Max conductor section: 1.5mm²
- Fixing screw: M3x30
- The base (Øprofile or Øat) is made of thermoplastic rubber in black.
- Protection class IP67 is also available (external thread as gland size, cable dia. 4,5-8mm)

LED & Protection Circuit

9072	Description
M1TS2VL1	PG9 24V 2 Poles + Earth
M1TS2VL2	PG9 115V 2 Poles + Earth
M1TS2VL3	PG9 230V 2 Poles + Earth

Connector DIN43650/B-Industrial Moulded Cabled

- Housing colour: Black
- Type of contact: Soldered
- Contact spacing: 11mm
- Number of poles: 2 poles + $\frac{||}{|}$
- Item supplied with 2P+2G (double ground H6/H12)
- Type of cable: Section 0,50mm and 0,75mm
- Cable length: 1 or 2 metres (other length upon request)
- Max conductor section: 1.5mm²
- Protection class: IP 65 with moulded cables
- Fixing screw: M3 x 25
- Øprofile gasket: The gasket is integrated on the head of the connector and made of Sipolprene TPC-ET

Connector DIN43650/B-Industrial Moulded Cabled

9072	Description
CM1N02000A022	2 Metre 2 Poles + Earth at Cable End
CM1N02000B022	2 Metre 2 Poles + Earth Opposite Cable End

Connector DIN43650/B-Industrial

- Housing colour: Black
- Type of contact: Soldered
- Contact spacing: 11mm
- Number of poles: 2 poles + \perp
- Item supplied with 2P+2G (double ground H6/H12)
- Type of cable: Section 0,50mm and 0,75mm
- Cable length: 1 or 2 metres (other length upon request)
- Max conductor section: 1.5mm²
- Protection class: IP 65 with moulded cables
- Fixing screw: M3 x 25
- Øprofile gasket: The gasket is integrated on the head of the connector and made of Sipolprene TPC-ET
- In case of connectors with LED+VDR, working voltages available are 12V, 24V, 48V, 110V and 250V
- In case of connectors with LED+diode, working voltages available 10/50V and 70/250V

Moulded Cabled, LED & Protection Circuit

9072	Description
CM1N02VL1A022	2 Metre 24V Poles + Earth at Cable End
CM1N02VL2A022	2 Metre 115V Poles + Earth at Cable End
CM1N02VL3A022	2 Metre 230V Poles + Earth at Cable End
CM1N02VL1B022	2 Metre 24V Poles + Earth Opposite End
CM1N02VL2B022	2 Metre 115V Poles + Earth Opposite End
CM1N02VL3B022	2 Metre 230V Poles + Earth Opposite End

Connector DIN43650/B-ISO6952

- Housing colour: Black, grey
- Type of contact: Screw with conductor protection
- Contact spacing: 10mm
- Number of poles: 2 poles + \perp
- Cable diameter 6-8mm (PG9)
- Max conductor section: 1.5mm²
- Fixing screw: M3 x 30
- The Øbase profile or Øat is made of thermoplastic rubber in black.
- Protection class: IP 65 assembled
- Protection class IP67 is also available (external thread as gland size, cable dia. 4,5-8mm)

Item available also with cable

Standard

9072	Description
M2NS2000	PG9 Black 2 Poles + Earth

Connector DIN43650/B-ISO6952

- Housing colour: Transparent
- Type of contact: Screw with conductor protection
- Contact spacing: 10mm
- Number of poles: 2 poles + \perp
- Cable entry: PG9
- Max conductor section: 1.5mm²
- Fixing screw: M3 x 30
- The Øbase profile or Øat is made of thermoplastic rubber in black.
- Protection class: IP 65 assembled
- Protection class IP67 is also available (external thread as gland size, cable dia. 4,5-8mm)

Item available also with cable

LED & Protection Circuit

M2TS2VL1	PG9 24V 2 Poles + Earth
M2TS2VL2	PG9 115V 2 Poles + Earth
M2TS2VL3	PG9 230V 2 Poles + Earth

Connector DIN43650/C

- Housing colour: Black, grey
- Type of contact: Screw with conductor protection
- Contact spacing: 9.4mm \perp
- Number of poles: 3 poles + \perp
- Cable entry: PG7 2P+G
- Cable diameter 4-6mm (PG7).
- Max conductor section: 0.75mm²
- Fixing screw: M3 x 27
- Øprofile base or Øat is made of thermoplastic rubber in black.
- Protection class: IP 65 assembled
- Protection class IP67 is also available (external thread as gland size, cable dia. 3,5-6mm)
- Item available also with spacing 8mm
- Item available also with circuitry

Item available also with cable

ENGINEERING YOUR SUCCESS.

Angle Seat Valves with Stainless Steel Body

Pilot Operated 2/2 Solenoid Valve

Direct Acting 2/2 Solenoid Valve

Valve Timer

Features:

- Maintenance free actuator
- Long life piston rings
- Easy installation
- 360° positional actuator head
- Leak free after five million cycles
- Compact design
- Fast response
- Water hammer-free
- Cost effective against other materials

Applications:

- Food and beverage plants
- Textile factories
- Pharmaceuticals manufacture
- Laundries
- Water and sewage plants
- Petrochemical plants
- Automotive sites

Operation:

- Normally open
- Normally closed

Working Temperature:

Medium:
-10°C to +180°C

Environmental:

PA nylon -10°C to +60°C
Stainless steel -10°C to +80°C

Working Pressure
3 to 16 bar*

Construction:

Body:	316 stainless Steel
Actuator:	PA nylon or 316 stainless Steel

° Working Temperature:

Media: -10°C to +180°C

Environmental Temperature

PA Nylon -10°C to +60°C
Stainless steel -10°C to +80°C

Working Pressure:

3 to 16 bar

- Compact design, available in both normally open and normally closed options.
- Normally Closed - Closes with the flow.
- Normally Open - Closes against the flow.
- Pilot operated.
- High flow.
- 360° Actuator housing rotation.
- Single acting spring return.
- Suitable for use with water, oil, air, aggressive media and steam.

FESTO

Pinch Valves

Features:

- 316 stainless steel body
- Normally open
- Pneumatically actuated
- BSPP or clamp end connections
- EPDM or silicone shut-off element material available
- Quick to install and easy to maintain
- Suitable for use with granulates, liquids containing solid particles, highly viscous, contaminated and abrasive media

° Working Temperature:
-5°C to +60°C

Maximum Working Pressure:
6 bar

ANGLE SEAT VALVES

FESTO

VZXF Normally Closed Angle Seat Valves

Features:

- Available in gunmetal or 316 stainless steel valve and actuator
- BSPP threads
- Normally closed
- PTFE seat
- Water hammer free flow under seat
- Suitable for domestic water services, inert gases, oil, hydraulic fluid, neutral liquids and compressed air systems dependent on the valve body

° Working Temperature:
Media: -10°C to +80°C (gunmetal)
Media: -40°C to +200°C (stainless steel)
Environment: -10°C to +60°C

VZXA Normally Closed Angle Seat Valves

Features:

- BSPP threads
- Normally closed
- PTFE seat
- ATEX II 2G Ex h IIC T3 Gb / II 2D Ex h IIIC T200°C Db certification
- SIL2 rated
- IP67 rated
- Water hammer free flow under seat
- Suitable for domestic water services, inert gases, oil, hydraulic fluid, neutral liquids, compressed air systems and hazardous areas

- Accessories such as a stroke reducing kit and a position indicator with or without sensors are also available on request

ANGLE SEAT VALVES

stainless
steel

Stainless Steel

Construction:

- Stainless steel actuator housing for exceptional durability in steam and aggressive applications
- 304 stainless steel actuator and 316L stainless steel body

Benefits

- Compact design, high flow rate
- Visual position indicator
- Dampened closing anti-water hammer design (fluid under seat)
- Mountable in any position
- Tight shut-off and long service life
- Valves meet Pressure Equipment Directive 97/23/EC
- Conforms to 94/9/CE directive specific to non-electrical equipment for use within potentially explosive environments, zones 1/21 and 2/22

Applications:

- Food and beverage processing
- Water technology and treatment
- Textile industry
- Cooling systems on injection moulding machines
- Pharmaceutical/cosmetics industry
- Chemical process technology
- Refrigeration and cooling/heat exchangers
- Sterilisers and steam supply
- Water applications including mining, cement/concrete systems, pulp and paper
- General industrial applications of aggressive fluid
- Industrial laundry equipment
- Industrial air dryers

Working Temperature:
-10°C to +180°C

OMAL ACTUATION

Applications:

Nitrile:

Compatible with air, gas, oils, water etc.

Viton:

High compatibility with the majority of fluids, not advised for steam.

° Working Temperature:

Nitrile:

-20°C to +80°C

Viton:

-20°C to +150°C

Note:

The compact design of a VIP valve with its reduced size and weight allows it to be used in applications where traditional actuated valve packages cannot be utilised. The VIP valve has no external moving parts, which ensures their operation is quick and efficient, without the safety issues of the traditional actuated valve packages.

The VIP valve with the approved gas threaded connections (UN1-ISO 7/1-DIN 2999) coupled with a NAMUR mounting plate makes this valve suitable for every possible plant application.

The valve can be mounted in any position. Full technical specifications available on request

FT PRO VALVES

Spring Auto, Self Close Pour Tap

Polypropylene

- Maximum working pressure is 10 bar (150 psi) operating range
- Black polypropylene with EPDM seals as standard
- Stainless steel 302 spring is in separate chamber to flow
- TPE thread gasket included
- Push button end to open flow, take hand away to allow self-closure
- Guide markings on tap
- Suitable for use with static or portable tanks to prevent unnecessary fluid loss
- Can be used with appropriate chemicals to prevent dangerous spills

Applications

Adopted by many local water authorities to use on emergency supply tankers, avoiding unnecessary waste.

WHY CHOOSE AIRCOM?

EXPANDABILITY ACCORDING TO REQUIREMENTS
The system grows with the plant.

ELIMINATE WASTED AIR AND LEAKS
Our components in aluminium, technopolymer and HIP guarantee superior, above-average performance.

EASY, RAPID INSTALLATION
Reduction in labor costs and ease of intervention.

MODULAR DESIGN
Flexibility of use and greater adaptability to the specific usage requirements.

OPTIMUM, CONSTANT PERFORMANCE
Constant energy savings over time.

OUR SERVICES

AIRCOM services support our Partners throughout the plant's entire life cycle: from the initial consultancy to support during design.

TECHNICAL TRAINING
We offer advanced training and periodic update courses for our Partners' technical personnel (designers, installers, dealers).

RATIONALISING ENERGY CONSUMPTION
Thanks to the wide choice of components and the flexibility of the systems, as well as to computer simulations, our piping systems help reduce energy costs to the lowest levels possible, in a consistent manner over time: the system pays for itself.

SUPPORT FOR DESIGNERS
We support our Partners at every step, from the more basic plants to the highly complex systems, assisting in totally new designs as well as in revamping and additions to existing structures.

ADVANCED SOFTWARE
We have developed proprietary software to provide support in plant sizing and on site design. Thanks to this software, our Partners can offer the end user a complete, efficient and personalized service.

TECHNOPOLYMER SYSTEM

LIGHTWEIGHT, BUT POWERFUL

The Quick Line technopolymer product range comes in the following diameters:

16, 20, 25, 32, 40, 50 and 63 mm

A careful study and design of dimensions and materials enable us to achieve a light and functional, all-technopolymer product in a wide range of sizes, allowing you to create your aluminium tubing systems without any problems.

SHORT INSTALLATION TIME

The quick and easy assembly of our piping systems is the result of an innovative technology, with an instant connection of the fitting components to the aluminium pipe.

AIR QUALITY AND MAINTENANCE

Owing to full technopolymer construction, air quality keeps constant features from compressor outlet up to all end user points. Minimum roughness of internal pipe surfaces allows optimal air flow. The high quality and high resistance features of our fittings will significantly reduce maintenance costs.

MODULARITY AND RESISTANCE

Our modular and lightweight technopolymer systems are an optimal solution to reduce installation time.

Owing to careful study of components and of materials, our fittings feature noticeable resistance to corrosion, mechanical shocks and thermal variations.

Quick Line technopolymer is the most advanced evolution in the field of systems for compressed air and pressurised fluids distribution.

TECHNOPOLYMER SYSTEM FITTINGS

Technopolymer fittings are specifically designed for use with Aluminium tube up to Ø 63mm.

ALUMINIUM SYSTEM

LIGHTWEIGHT, BUT POWERFUL

The Quick Line aluminium product range comes in the following diameters:

20, 25, 32, 40, 50, 63, 80, and 110 mm

A careful study and design of dimensions and materials enable us to achieve a lightweight but powerful, all-aluminium product in a wide range of sizes. With the Ø 110 mm size you will have a powerful flow rate potential, allowing you to create compressor rooms without any problems.

SHORT INSTALLATION TIME

The quick and easy assembly of our piping systems is the result of an innovative technology, with an instant connection of the fitting components to the aluminium pipe.

AIR QUALITY AND MAINTENANCE

Owing to full aluminium construction, air quality keeps constant features from compressor outlet up to all end user points. Minimum roughness of internal pipe surfaces allows optimal air flow. The high quality and high resistance features of our fittings will significantly reduce maintenance costs.

MODULARITY AND RESISTANCE

Our modular and lightweight aluminium systems are an optimal solution to reduce installation time.

Owing to careful study of components and of materials, our fittings feature noticeable resistance to corrosion, mechanical shocks and thermal variations.

Quick Line aluminium is the most advanced evolution in the field of systems for compressed air and pressurised fluids distribution.

FITTINGS, ALUMINIUM SYSTEM

Swap your Aluminium fittings for echnopolymer fittings for sizes up to Ø 63mm to reduce installation costs. For specific application guidance please speak to our echnical team.

6" (168.3MM) TUBING & FITTINGS SYSTEM

A full range of ready-to-use, pre-grooved 168.3 mm - 6" aluminium products.

In large industrial sites, main compressed air distribution networks need a flow rate of 3,000 ³ per hour.

Compatibility and Specification

Deliverable Fluids:

- Compressed air
- Inert gases
- Vacuum
- Other (please contact sales office for more information)

Vacuum Level:

99% (about 10 mbar) approximately

Working Temperature: -30°C to +80°C

Maximum Working Pressure: 12 bar

aircom
AIR AND SYSTEM

MULTILAYER BENDABLE PIPE

Bendable, resistant & specific for compressed air

Due to its unique structure, Aircom's multilayer pipe for compressed air delivers excellent physical and chemical features, typical of PE-RT.

The structure of the multilayer pipe incorporates an aluminium layer, providing resistance to high pressures and high operating temperatures.

The lightness of the material enables easy shaping of piping sections, making installation trouble-free even in problem areas.

AIRCOM'S MULTILAYER PIPE ADVANTAGES

- ✓ Specifically for compressed air piping.
- ✓ Easy creation of shaped piping sections.
- ✓ Easy to fit around obstacles, corners, pillars, etc.
- ✓ Easy installation owing to its bendability.
- ✓ Linear thermal expansion factor similar to aluminium pipe.
- ✓ Corrosion resistant.
- ✓ Outstanding durability.

LAYERS AND MATERIALS

- A PE-RT (inner layer, colourless)
- B Adhesive layer
- C Aluminium layer, overlapped and ultrasonic welded
- D Adhesive layer
- E PE-RT (outer layer, blue)

AIR PIPE LINE "INFINITY" SERIES

Complete selection of fittings and aluminum pipes for air networks.

Patented drop fitting solution and more special features

Fastest assembly operations with ready-to-use and reusable fittings for all sizes

10 year warranty.

ALUMINIUM RING MAIN SYSTEM

Working Temperature:
-20°C to +80°C

Maximum Working Pressure:
16 bar

Material:
Adaptors: Brass, Nickel Plated
(Ø 50-63 Aluminium), Nitrile Seals
Silicone free

Application:
Compressed air, Vacuum,
Inert gas (NITROGEN-ARGON)

Compliance:
2014/68/EU(PED), REACH EC N°1907/2006,
ROHS 2011/65/EU, ASME B31.1, B31.3

Aluminium Tubing

Tubing may take up to 3 working days to be delivered, dependant on weight and delivery address location. Addition carriage charges may apply. For full details please contact sales.

RINGMAIN PIPE KITS (CARM)

Simple, easy to install, basic air pipe systems at competitive pricing

Introducing **John Guest Compressed Air Ring Main (CARM) Kits** - the ultimate solution for compressed air piping systems installation. These kits come in three configurations, catering to 15 and 22 mm, and contain all the essential components for hassle-free assembly. No specialized knowledge or expensive equipment is needed, making it the go-to option for small ring-main installations.

Versatile kits for any project:

- Workshops
- Garages
- Domestic applications
- Extension onto existing pipe systems

1 Bay Kit, 15mm Pipe & Fittings

- 1 x bay kit of John Guest 15mm O.D pipe and fittings
- 4 x 3m lengths of 15mm nylon pipe.
- 8 x pipe clips.
- 2 x elbows.
- 1 x flex with 1/2" bsp male stem adaptor.
- 1 x straight connector.
- 1 brass wingback wall bracket with 1 x PCL 19 series coupling

1400

CARMKIT-1

2 Bay Kit, 15mm Pipe & Fittings

- 2 x bay kit of John Guest 15mm OD pipe and fittings
- 6 x 3 metre lengths nylon pipe.
- 12 x clips.
- 4 x elbows.
- 1 x flex 15 with 1/2" bsp male stem adaptor.
- 2 x brass wingback wall brackets.
- 1 x straight connector.
- 1 x tee and 2 PCL 19 series couplings.

1400

CARMKIT-2

3 Bay Kit, 22mm Pipe & Fittings

- 3 x bay kit of John Guest 22mm OD pipe and fittings
- 7 x 3 metre lengths nylon pipe.
- 14 x pipe clips.
- 4 x elbows.
- 1 x flex 22 with 1/2" bsp, male stem adaptor.
- 3 x brass wingback wall brackets.
- 2 x straight connector.
- 2 x tee.
- 3 x PCL 19 series couplings and 3 x 3/4 x 1/2 reducing bush.
- 1 x PTFE Tape

1400

CARMKIT-3

Easy to use Push-fit connectors for air line ring mains

The John Guest range of push-fit fittings and pipe provide the ideal connection from compressor receiver to air line service components through to complete ring main and take off points.

Using the John Guest push-fit system, a compressed air ring main can be installed quickly and easily, with potential time savings of at least 50% when compared to other installation methods.

No need to prepare threaded pipe or solvent, all the connections can be made with a simple push-fit action. The system is then immediately ready for use.

Complex assembly can be performed much more rapidly than with traditional methods and because fittings are easy to disconnect, systems can be altered or extended with much reduced production down time.

To make a connection, the tube is simply pushed in by hand, with the unique collet locking system then holding the tube firmly in place without deforming it or restricting flow.

**The fittings are produced in either tough engineering plastics material or in brass with Sizes 12mm to 28mm. They are intended for use with John Guest's nylon pipe, but can also be used with copper or aluminum alternatives.*

Working Temperature:

-20°C to +70°C

Working Pressure:

10 bar @ 23°C

Making a connection

Standard Fittings

Cut the pipe square

We recommend using the JG Pipe Cutter.

Push up to pipe stop

Pull to check secure

Test the system before use.

To disconnect

Ensure the system is depressurised. Push the collet towards the fitting and remove the pipe. The fitting can be reused.

28mm Fittings

28mm fittings also have a collet with stainless steel teeth and an 'O' ring.

After inserting the pipe, a screw cap is turned approx 1/4 turn. This locks the collet in place and reduces lateral and sideways movement of the pipe.

To disconnect

Turn the screw cap 1/4 turn, push in the collet and remove the pipe. The fitting and pipe can be reused.

Flexi-joint

When long runs of nylon tube are used, it is recommended a flexi-joint is installed. With temperature change, the tube can expand and contract along the length. This will lead to an unsightly distortion to the run of tube.

FAST-TRACK RING MAIN SYSTEM

Water Trap Tee

The Fast-Track Water Trap Tee solves the on-going problem of moisture in a Ring Main system and provides the easy alternative to the need to install "Swan Necks". The ingenious inside arrangement of the fitting allows air to flow, with minimum head loss, from the main to take-off point without allowing water to follow. The moisture is retained in the line to be drawn off at some suitable location.

Water Trap Tee Installation:

It is of vital importance for the correct function of the Water Trap Tee that the air ring main within which the Tee is installed is near horizontal and that the outlet port faces vertically downwards. Markings to indicate correct orientation have been moulded onto the body to assist installation.

Collet Covers

Collet Covers prevent accidental removal or tampering with piping. The pipe can be inserted with the Collet Cover already attached to the fitting or the cover can slide into position afterwards.

We recommend covers be fitted when pipework is hidden inside walls, ceilings etc.

Collet Covers can be removed to allow the pipe to be disconnected as and when required.

Applications:

- Drinkable water systems
- Irrigation systems
- Fertilizing irrigation systems
- Wine, beer, beverages and other all-environmental fluids
- Industrial equipment for acid bases and salts
- Swimming pools with fresh or sea water
- Ship Installations

Materials:

- Body and nut: polypropylene
- O-ring: nitrile
- Clenching ring: polyacetal resin
- Metal reinforcements: stainless steel

Maximum Working Temperature:
+80°C

Maximum Working Pressure:
16 bar, atmospheric at 20°C up to 63mm bore
10 bar, atmospheric at 20°C from 75mm bore

NOTE: Materials fully conform to the international specification relating to Hygiene and Sanitary Requirements for the Transport of Potable Water and Alimentary Fluids.

ABS Tubing

Note: 6 metre length tube is available on a 3 to 5 working day delivery service. Specified delivery dates and times can not be guaranteed. Carriage is charged as an extra based on weight and delivery service required. Please speak to our sales department for further details. Delivery of 2.9 metre lengths may take up to 48 hours.

UPVC METRIC PIPE SYSTEM

UPVC (Unplasticised Polyvinyl Chloride) is a **low maintenance material** selected for use across various industries due to its **high tensile strength** and durability. The outstanding feature of this product is its **excellent chemical resistance** which makes it suitable for a wide range of acids, alkalis and chemicals.

Working Temperature:
 All pressures quoted are based on a working temperature of 20°C
PVC-U Systems should never be used for temperatures in excess of 60°C

Maximum Working Pressure:
 16 bar Plain Fittings
 12 bar Threaded Fittings
 (Sizes 200mm/225mm with reduced safety factor)

20°C	30°C	40°C	50°C	60°C
16.0 bar	12.8 bar	9.2 bar	6.2 bar	3.5 bar

M-Press Fittings Ltd

Stainless Steel 316L & Copper Press Fit Piping System

M-Press provides solutions to meet the demands of various industry applications, with capabilities of up to 168mm

**Choose M-Press for
industry-leading
Press Fit solutions**

Stainless Steel 316L Press Fit Piping System

M-Press's stainless steel ring main system is the perfect solution for all ring main installation requirements.

The M-Press Press Fit system is an all-inclusive and quality-assured system designed to streamline on-site compliances for installers. It removes the need for traditional site hot-work permits, making the installation process hassle-free and efficient. The profile system is equipped with advanced pressing technology that ensures a confident installation process, saving installers considerable time and effort, which ultimately leads to increased productivity and cost savings.

M-Press's Stainless Steel system has been engineered for use in a diverse range of industry applications, providing installers with a versatile solution. This and all other system features ensure that the installation process is always of the highest quality, making the installer's job hassle-free and efficient.

Features:

- ISO 9001 certified
- ISO 14001 certified
- High molybdenum content offering excellent corrosion resistance
- Universally compatible with all profile systems
- Reliable and durable press system
- Leak-free performance
- Excellent hygienic characteristics

Advantages:

- Removes the need for traditional site hot-work permits
- Ease of installation
- Increased productivity
- Wide choice of products and seal types
- Clean and hassle-free handling
- Lightweight system

The M-Press system is manufactured to meet the highest standards and materials:

- ✓ **M-Press fittings material no:**
1.4404 according to EN 10088 /316L
- ✓ **Pressure fittings material no:**
1.4408 according to EN 10283 /316L
- ✓ **Pipes material no:**
1.4404 according to EN 10312 (ECO 316L).

**M-Press can offer solutions for all
industry application demands up to 168mm**

EPDM Seals

Material	Stainless Steel 316L
Formed Fittings:	1.4404 according to EN 10088 /316L
Threaded Fittings:	1.4408 according to EN 10283 /316L
Pipe:	1.4404 according to EN 10312 (ECO 316L)
Seal Type:	EPDM
Description:	Ethylene Propylene Diene Mnomer

° Temperature: -30°C to +120°C

Pressure: PN16 16 bar

Applications

- Potable water services
- Hydronic heating
- Compressed air
- BCWS (Boosted cold water services)
- Chilled water applications
- Purified water
- Fire suppression systems
- Inert gases

Application Services

- Drinking water
- HWS and commercial/domestic heating
- Compressed air (<25mg/M³ compressor oil concentration)
- Risers and plant rooms
- Cooling water (chilled water) with glycol <50% concentration
- Grey water
- Low pressure steam condensate
- Fire sprinkler/suppression systems
- Helium, Neon, Argon

HNBR Gas Approved Seals

Material	Stainless Steel 316L
Formed Fittings:	1.4404 according to EN 10088 /316L
Threaded Fittings:	1.4408 according to EN 10283 /316L
Pipe:	1.4404 according to EN 10312 (ECO 316L)
Seal Type:	HNBR
Description:	Hydrogenated Nitrile Butadiene Rubber

° Temperature: -20°C to +70°C

Pressure: PN5 5 bar

Applications

- Industrial offshore applications
- Low pressure hydraulic systems
- Hot water supply
- Flammable gases (DVGW G260, 262)
- Inert gases

Application Services

- Commercial / industrial methane gas
- Low pressure hydraulic oil
- Commercial / industrial LPG and natural gases
- Helium, Argon, Neon

FKM Seals

Material	Stainless Steel 316L
Formed Fittings:	1.4404 according to EN 10088 /316L
Threaded Fittings:	1.4408 according to EN 10283 /316L
Pipe:	1.4404 according to EN 10312 (ECO 316L)
Seal Type:	FKM
Description:	Viton Fluoroelastomer

° Temperature: -30°C to +180°C
(+230°C for short periods)

Pressure: PN16 16 bar

Applications

- Domestic and commercial solar thermal heating
- Domestic and commercial heating
- Commercial steam condensate
- Industrial compressed air
- Acidic transportation
- Hydraulic applications
- Oil and fuels

Application Services

- High temperature heating and hot water systems
- Commercial warehouse/large area heating systems
- Low pressure steam condensate
- Industrial compressed air systems (>25mg/M³ compressor oil concentration)
- Some acid solutions
- Hydraulic oils
- Heavy oil and fuel transportation (erosene, paraffin, Diesel)
- Please enquire for exact suitability

DVGW

Copper Press Fit Piping System

The M-Press copper ring main system is the leading solution for all copper installation requirements.

Its innovative design and superior quality guarantee a hassle-free installation process and long-lasting performance.

M-Press's copper system is a versatile and reliable solution for a wide range of industrial and domestic applications.

Its innovative design and high-quality construction guarantee a seamless installation process with minimal downtime and complications for the installer.

The system features a range of advanced components and features, including durable copper pipe, precision engineered fittings, and advanced sealing technologies, to ensure maximum performance and reliability in even the most demanding environments.

Whether working on a large industrial project or installing a domestic heating system, M-Press's Copper Press Fit system is the preferred solution for your needs.

Features:

- ISO 9001 certified
- ISO 14001 certified
- Universally compatible with all profile systems
- Reliable and durable press system
- Leak-free performance

Advantages:

- Ease of installation
- Increased productivity
- Removes the need for traditional site hot-work permits
- Wide choice of products and seal types
- Clean and hassle-free handling
- Lightweight system

The M-Press system is manufactured to meet the highest standards and materials:

- ✓ **Fittings:** CW024A according to EN 1254
- ✓ **Threaded fittings:** CC499K according to EN 1282

Trust M-Press to provide a reliable and efficient solution for your ring main installation

EPDM Seals

Material	Copper
Formed Fittings:	CW024A according to EN1254
Threaded Fittings:	CC499K according to EN1282
Pipe:	EN1057
Seal Type:	EPDM
Description:	Ethylene Propylene Diene Mnomer

Temperature:
-30°C to +120°C

Pressure:
PN16 16 bar

Applications

- Potable water services
- Hydronic heating
- Compressed air
- BCWS (Boosted cold water services)
- Chilled water applications
- Purified water
- Inert gases

Application Services

- Drinking water
- HWS and commercial/domestic heating
- Compressed air (<25mg/M³ compressor oil concentration)
- Risers and plant rooms
- Cooling water (chilled water) with glycol <50% concentration
- Grey water
- Low pressure steam condensate
- Helium, Neon, Argon

HNBR Gas Approved Seals

DVGW DVGW G260 & G262

Material	Copper
Formed Fittings:	CW024A according to EN1254
Threaded Fittings:	CC499K according to EN1282
Pipe:	EN1057
Seal Type:	HNBR
Description:	Hydrogenated Nitrile Butadiene Rubber

Temperature:
-20°C to +70°C

Pressure:
PN5 5 bar

Applications

- Offshore applications
- Low pressure hydraulic systems
- Hot water supply
- Flammable gases (DVGW G260, 262)
- Inert gases

Application Services

- Methane gas transportation
- Low pressure hydraulic system
- Domestic and commercial heating systems
- Natural gas and LPG
- Helium, Neon, Argon

FKM Seals

Material	Copper
Formed Fittings:	CW024A according to EN1254
Threaded Fittings:	CC499K according to EN1282
Pipe:	EN1057
Seal Type:	FKM
Description:	Viton Fluoroelastomer

Temperature:
-30°C to +180°C
(+230°C for short periods)

Pressure:
PN16 16 bar

Applications

- Domestic and commercial solar thermal heating
- Domestic and commercial heating
- Commercial steam condensate
- Industrial compressed air
- Acidic transportation
- Hydraulic applications
- Oil and fuels

Application Services

- High temperature heating and hot water systems
- Commercial warehouse/ Large area heating systems
- Low pressure steam condensate
- Industrial compressed air systems (>25mg/M³ compressor oil concentration)
- Some acid solutions
- Hydraulic oils
- Heavy oil and fuel transportation
 (Kerosene, Paraffin, Diesel)
- Please enquire for exact suitability

NIROSAN® STAINLESS STEEL PRESS FIT PIPING SYSTEM

stainless steel

SANHA

NiroSan® press system fittings and NiroSa® system pipes in stainless steel with tool compatibility, leak path feature and 'push and stay' function.

Stainless steel systems from SANHA® can be used universally. The various NiroSan® pipes and NiroSan® press system fittings can be combined with each other, making them particularly user friendly.

Features

- Pressable with V, M and SA profile
- Suitable for a very broad range of applications
- Long service life of fittings and EPDM sealing ring
- Inseparable, pressure-formed connection
- WRAS tested and certified
- All fittings and tube are manufactured from 316 L grade stainless steel

Working Temperature:
-30°C to +120°C

Maximum Working Pressures:
Water: 22mm: 40 bar, 28-35mm: 25 bar, 42-54mm: 16 bar
Flammable Gases: 5 bar
Non-flammable/oxic Gases: 16 bar

Press fittings suitable for both gas and industrial oil applications are available on request

SECTION 9

Hose Tails, Adaptors, Fittings & Manifolds

9.01	Hose Tails	1137-1154
9.02	Quick Fit Fittings	1155-1164
9.03	Adaptors	1165-1194
9.04	Flanges & Gaskets	1195
9.05	Compression Fittings & Copper Tube	1196-1215
9.06	Plumbing Compression Fittings	1216-1219
9.07	Manifolds	1220-1224

SECTION 9

9.01 Hose Tails

- Nickel Plated Brass & Brass Hose Tails
- Push-on Hose Adaptors
- Polypropylene Hose Tails Adaptors
- Nylon Hose Tails
- PVDF Hose Tails
- Plastic Hose Tails
- Emergency Hose Connector Set
- Oxy-acetylene Fittings

1137-1154

9.02 Quick Fit Fittings

- Miniature Fittings M3-M6
- Brass Quick-fit Fitting
- Flow Regulators
- Finger-tight Fittings
- Polypropylene Quick-Fit Fittings
- PVDF Quick-Fit Fittings

1155-1164

9.03 Adaptors

- Brass Adaptors
- Nickel Plated Brass Adaptors
- Polypropylene Hose Adaptors
- Nylon Adaptors
- PVDF Adaptors
- 3000lb Forged Pipe Fittings, ANSI B16.11
- 150lb 316 Stainless Steel Pipe Fittings
- 3000lb 316 Stainless Steel Pipe Fittings
- Tubing
- BS TYPE, 316L Hygienic Pipe Fittings
- Hygienic Clamp Fittings
- RJT Couplings

1165-1194

9.04 Flanges & Gaskets

- 3000lb 316 Stainless Steel Pipe Fittings

1195

Hose Tails, Adaptors, Fittings & Manifolds

9.05 Compression Fittings & Copper Tube

- Brass Compression Fittings
- Enots Compression Fittings
- Nickel Plated Compression Fittings
- Copper Tubing
- Bundy Tubing
- PVC Covered Copper Tube
- Polyethylene Pipe Insulation

1196-1215

9.06 Plumbing Compression Fittings

- Brass Plumbing Compression Fittings
- Solder Ring
- End Feed Fittings

1216-1219

9.07 Manifolds

- Distribution Manifolds
- Aluminium Manifolds
- Brass Manifolds
- Minifolds

1220-1224

NICKEL PLATED BRASS & BRASS HOSE TAILS

This technical data is applicable to the full range of hose tail fittings and airline fittings including tees, elbows, reducers and silencers etc.

Threads:

Tapered in conformity with ISO 7.1, BS 21, DIN 2999. Parallel in conformity with ISO 228 class A. Metric in conformity with ISO R/262.

Media:

Compressed air, water, oils and fluids for hydraulics and pneumatic fields.

N.B. Safe pressures and temperatures depend entirely on the tubes being used, for this reason the values must be determined in accordance with the tube features.

HOSE TAILS

Straight Hose Tails, Aluminium

- These lightweight hose tails are manufactured to a high strength specification with a lower cost in comparison to its brass alternative.
- Tapered in conformity with ISO 7.1, BS 21, DIN 2999.
- Has the appearance of brass.
- Lightweight.
- General use for compressed air, pneumatics, oils and fluids.

NYLON HOSE TAILS

Tefen hose fittings are the perfect choice to connect all types of flexible rubber and plastic tubes in domestic, industrial and all other general applications.

Nylon 6-6

° Temperature:
-20 to 110°C

Working Pressure:
Up to 14 bar (200 psi) at 20°C

Fittings Dimensions: refer to tube ID or OD,
with respect to the common application

Main advantages:

- Strong and durable
- High impact resistant
- Food Certified

PVDF HOSE TAILS

Fittings made of PVDF function better than nylon when exposed to a wide range of temperatures and high corrosive chemicals.

This enables them to be used in industries such as chemical processing due to their excellent chemical resistance properties.

Working Temperature:
-20°C to +120°C

Maximum Working Pressure:
14 bar at 20°C

PLASTIC HOSE TAILS

OUR SUPERIOR DESIGN AND MANUFACTURING PROCESS ENSURES HIGHLY ACCURATE CONNECTOR DIMENSIONS FOR A PERFECT SEAL.

NORMA® Plastic Hose Connectors

- High performance products specified by the world's leading manufacturers for all their hose, tube and pipe applications
- Quality assured engineering and manufacture to ISO 9002, QS 9000 and ISO 14001

HOSE TAILS

Emergency Hose Connector Set

Ideal for service engineers, or for workshops in case of a hose failure, this handy kit includes genuine PCL Hose Tails, Union Nuts, Coned Tailpieces and Reducing Bushes - all stored in a solid compact pocket case.

Kit contents:

- 4 x HC5194
- 3 x HC5656, HC1206, HC1217
- 2 x HC2479, HC5276, HC5275, HC1226, HC6897, HC1225
- 1 x HC6560, HC6895, HC6896

BRASS QUICK-FIT FITTINGS

The working pressures and working temperatures depend on which type of tube is used; for this reason, the values must be determined in accordance with the tubes, cables or the fixed fittings, the values are:

Working Temperature:
-18°C to +70°C

Maximum Working Pressure:
15 bar (220 psi)

Male Studs

PVDF QUICK-FIT FITTINGS

Fittings made of PVDF function better than nylon when exposed to a wide range of temperatures and high corrosive chemicals.

This enables them to be used in industries such as chemical processing due to their excellent chemical resistance properties.

Working Temperature:
-20°C to +120°C

Maximum Working Pressure:
14 bar at 20°C

PVDF ADAPTORS

Fittings made of PVDF function better than nylon when exposed to a wide range of temperatures and high corrosive chemicals.

This enables them to be used in industries such as chemical processing due to their excellent chemical resistance properties.

Working Temperature: -20°C to +120°C

Maximum Working Pressure: 14 bar at 20°C

150lb 316 STAINLESS STEEL PIPE FITTINGS

stainless
steel

This technical data is applicable to the full range of 316 Stainless Steel Adaptors only.

Threads: Tapered in conformity with ISO 7.1, BS 21, DIN 2999. Parallel in conformity with BS 2779, ISO 228.

Dimensions: All components are manufactured to the requirements of ASTM A-351.

The dimensions are in accordance with ANSI B16.3.

Working Temperature:
-20°C to +260°C

Working Pressure:
20 bar

Tech Sheet 1803

For Stainless Steel 304 & 316 see section 10 page 1225

Many of our products are produced in stainless steel (304 or 316) so if that is your focus and to simplify product selection, we have all our products regardless of type or application grouped in **section 10** (coded yellow) of our catalogue.

Food safety starts with rigorous hygiene and nickel-containing stainless steels are the superior, reliable standard at every link of the food and industry supply chain. Though it may not be inherently antimicrobial, stainless steel, particularly 304 or 316 stainless steels, are one of the best materials to use in a food and beverage processing environment.

Industries

- Food
- Brewing
- Transport
- Pharmaceuticals
- Chemicals

Stainless steel is commonly used in the food industry because of its non-toxicity and ease of cleaning. This material does not react chemically with other substances and can be cleaned with high temperatures. In the process of disinfection, we can also use most of the available detergents. Stainless steel is not absorbent and after rinsing its surface with water, you can freely use it for food processing. This material is extremely durable and does not require regular and expensive maintenance. Although stainless steel can be slightly more expensive than other raw materials, it is an excellent compromise between the interests of the consumer and manufacturer.

TUBING

316 Stainless Steel Tube

3 metre lengths next day.

6 metre lengths may take up to 3 working days to be delivered, dependant on weight and delivery address location. Additional carriage charges may apply.

For full details please contact our Business Development Team.

Minimum of 10 lengths is advised up to 8mm to prevent damage in transit.

RJT Fittings

Most process lines have to be frequently dismantled for cleaning and all ranges of our hygienic fittings are suitable for this purpose.

Clamp unions provide a crevice free connection with a rapid break down and assembly, with no tools required.

RJT unions are probably the most widely used for frequent break down and cleaning.

IDF unions provide an alternative security and limit unauthorised access.

Sizes to suit OD tube.

ENOTS COMPRESSION FITTINGS, METRIC

- Wide range of types and sizes
- Suitable for use under extreme conditions of temperature and pressure
- Rugged and durable
- Ideal for most general industrial applications

Tube Nut, Sleeve and Body
Manufactured from Bar:
 Brass to BS 2874: 1986 (CZ 121)
Body Manufactured from Stamping:
 Brass to BS 2872: 1969 (CZ 122)
 Banjo bolts have a bright nickel plated finish

Tube Types:
 Nylon 11 or 12 and other plasticised or unplasticised tubing which conforms to the tolerances specified in BS5409: Part 1 1976. Copper, annealed and half-hard to BS2871: Part 2. Double wall brazed steel.

ACCESSORIES

Polyethylene Pipe Insulation

Thermal Conductivity DIN 52613:
0.035W(m.K) at 0°C.

Working Temperature:
-50°C to +100°C

Fire Rating BS479 Part 5:1979:
Class P (not easily ignitable).

High quality CFC easy-fit closed cell pipe insulation. Particularly effective for the thermal insulation of domestic heating and plumbing pipe work for energy conservation and frost protection. Easy to install, none fibrous and creates no dust during installation and is resistant to oils and greases

9mm Wall Insulation (Semi Split), 2 Metre Lengths

SOLDER RING

Manufactured from copper and copper alloy. Designed for jointing copper tubes to BS EN 1057 in hot and cold water services, in small bore and mini bore central heating, low pressure steam heating, and in-vented/un-vented closed circuit heating systems.

- WRAS approved
- Manufactured to BS EN 1254 Part 1

Working Temperature:
-40°C to +110°C

Maximum Working Pressure:
16 bar (-40°C to +30°C)
10 bar (+30°C to +65°C)
6 bar (+65°C to +110°C)

MINIFOLDS

Aluminium 5 & 10 Way Manifolds

Replace complex assemblies of valves and fittings with anodised aluminium Minifolds
Each Minifold comprises of a number of valved outlets on a common header.

Minifold blocks have tapped inlet connections at both ends – connect to one and plug the other or connect Minifolds in series.

 **Working Temperature:**
-20°C to +90°C

 **Maximum Working Pressure:**
Vacuum to 10 bar

1/2" BSPP Inlet x 1/4" BSPP Outlet

0202	No. of Inlets	No. of Outlets
971-05-251	2	5
971-10-251	2	10

975-05-272	2	5
975-10-272	2	10
Tech Sheet 10556		

Specifications

Series 971: Nominal Bore 18mm
1/2" BSP Female or
1/2" NPT Female inlets
1/4" BSP Female or
1/4" NPT Female or 6mm
push-in outlets

Series 975: Nominal Bore 25mm
3/4" BSP Female or
3/4" NPT Female inlets
3/8" BSP Female or
3/8" NPT Female outlets

Materials:

Blocks: Anodised aluminium
Valve Spindles: Thermoplastic
(red for BSP, grey for NPT)
Seals: Nitrile
Push-in Fittings: Plated brass

1/2" NPT Inlet x 1/4" NPT Outlet

Stainless Steel 4, 6 & 10 Way Manifolds

 **Working Temperature:**
60 bar @ 40°C
40 bar @ 100°C
25 bar @ 150°C

Replace complex assemblies of valves and fitting with stainless steel manifolds.
Each Minifold comprises of a number of ball valves on a common header.

Minifold blocks have tapped inlet connections at both ends – connect to one and plug the other or connect Minifold in series.

Specifications

Series 910: Nominal Bore 18mm
1/2" or 3/4" BSP Taper or NPT inlets
1/4" or 1/2" BSP Taper or NPT outlet
Supplied with two mounting brackets

Materials:

Blocks: 316 Stainless steel
Valve Body/Ball: 316 Stainless steel
Valve Handle: 304 Stainless steel
(Red for BSP, black for NPT)
Valve Seals: PTFE

METRIC STAINLESS STEEL COMPRESSION FITTINGS

stainless
steel

FT PRO®

Stainless steel compression fittings.

The perfect solution for multiple applications and connections. Can be connected to several rigid metallic tubes in complete safety (stainless steel, brass, aluminium and copper) and can also be connected to plastic tubes (polyurethane, polyamide and Teflon).

Main Advantages:

- No ple range fittings, suitable for all corrosive fluids and environments
- Made completely of AISI 316L stainless steel
- Good mechanical strength
- Sealing is guaranteed on different types of tube
- No sealing elements (elastomeric)
- 4-12mm diameters

Applications:

- Farming
- Chemical, petrochemical and pharmaceutical
- Medical and science
- Inkjet and printing
- Pneumatic and fluid automation
- Food and beverages
- Inert gases
- Heavy-duty pneumatic automation and tools
- Automotive

Technical details of ISO 8434-1 24° Fittings

Cone sealing couplings with 24° Cone and O-ring - FPM

Stainless Steel 1.4571 Working Temperature: -60°C to +400°C (DIN 17 440, AD W 10)

Seal Working Temperature: -20°C to +200°C (FPM/Viton)

There are several advantages to using DKO couplings:

- They are simple to assemble with low torque requirements.
- There is a wide variety of couplings to choose from.
- They are also easy to combine with each other.
- Additionally, DKO couplings have a super low leakage rate thanks to the O-ring sealing.

Silver Plated Stainless Steel Nuts (AGP)

There is a high risk for cold welding (gripping) at the threads without silver-coating.

Together with ABF-grease easy assembly due to reduction in tightening torque by up to 70%.

Reduced torsion load to the coupling body.

Applications: Marine industry.

Light-duty

0294	Thread	OD mm

INTRODUCING TWIN FERRULE TUBE COMPRESSION FITTINGS

stainless steel

Panam Instrumentation tube fittings provide a zero leak proof seal which will withstand high pressure, impulse, vibration and temperature. These features offer high safety and maintenance free smooth working. Each component is precision machined to the most accurate tolerance; maintain TQM practices throughout manufacturing process.

The fittings are manufactured in accordance with ISO9001 quality standards and CE marking requirements with complete traceability records available upon request.

Available in 316 SS, Brass, CS, Monel materials in a variety of end connections. Straight fittings are machined from bar stock and shaped bodies are machined from forgings.

The fittings are used on instrumentation process control systems, analysers and environmental equipment in oil and gas, Petro-chemical, Power generation, Pulp and Paper industry and many more.

Functions

- Compression nut Threads are silver plated which prevents galling.
- Back Ferrule locks together the fittings and tube forms a primary Seal which absorbs the pressure pulses and vibration.
- Front Ferrule Forms a secondary seal which connects tube and fitting and guarantees a bubble tight Zero Leak Sealing.
- Rugged body construction, high precision machined surface and standardised tolerances provides maximum trouble free service life in severe working conditions.

The above illustrates sealing action of a Tube Fitting assembly which takes place after the assembly is fully tightened

Assembly Instructions

SIZE M6 thru M25 (6mm-25mm)

1-1/4 Turns from Finger Tight

SIZE M3 thru M4 (3mm-4mm)

Only 3/4 Turn from Finger Tight is necessary to seal and will result in additional remakes of the fitting

- 1 Insert the tubing in to the Tube Fitting until it comes up to the tube stop.
- 2 Ensure that the nut is finger tight and tighten the nut 1-1/4 turns as shown in figure.
- 3 For 1/8" and 3/16 Fittings only 3/4 turns as shown in Fig-3.

Identification of Twin Ferrule Fittings

Metric Tube End with Stepped Shoulder on Nut and Fitting

The Metric size of the Fittings have extra stepped shoulder on the body and nut to distinguish them from imperial size.

All Dimensions are in mm unless otherwise stated. Dimensions are for reference only, subject to change.

Alloy 600	ASTM B166 ASME SB166	ASTM B564 ASME SB564	ASTM-B-163
Alloy C-276	ASTM B574	ASTM SB564	ASTM-B-622 / ASTM-B-626
Carbon Steel	ASTM A108		SAE J524b / SAE J525b / ASTM-A-179
PTFE	ASTM D1710	ASTM D3293	

A includes straight configuration B includes all elbows, crosses and tees

Stress Values based on ASME B31.3 Code for Process Piping

Material	Allowable Stress Value		Design Factor	Ultimate Tensile Strength	
	Psig	bar		Psig	bar
316SS	20000	1378	3.75:1	75000	5170
Brass	10000	689	4:1	40000	2760
Steel	20000	1378	3:1	60000	4140

Pipe End Pressure Ratings

Calculations based on ASME B31.3 code for Process Piping

NPT/ISO Pipe Size Inches	316 SS and Carbon Steel				Brass			
	Male		Female		Male		Female	
	Psig	bar	Psig	bar	Psig	bar	Psig	bar
1/16	11000	760	6700	460	5500	380	3300	230
1/8	10000	690	6500	440	5000	340	3200	220
1/4	8000	550	6600	450	4000	270	3300	220
3/8	7800	540	5300	360	3900	270	2600	180
1/2	7700	530	4900	330	3800	260	2400	160
3/4	7300	500	4600	320	3600	250	2300	160
1	5300	370	4400	300	2600	180	2200	150
1.1/4	6000	410	5000	350	3000	200	2500	170
1.1/2	5000	340	4600	310	2500	170	2300	150
2	3900	270	3900	270	1900	130	1900	130

To determine working pressure ratings in accordance with ASME B31.1 Power Piping For 316 stainless steel, multiply psig by 0.94; for carbon steel multiply psig by 0.75; Brass ratings remain the same. To determine working pressure kPa multiply psig by 6.89

SAE Pressure Ratings

Pressure Ratings are from SAE J1926/3

SAE/MS Thread Size	316 SS and Carbon Steel			
	(Nonpositionable)		(Positionable)	
	Psig	bar	Psig	bar

10,000 PSI RATED, 316 STAINLESS STEEL ADAPTORS

stainless
steel

These fittings within the industry are known as 10K fittings which have a 10,000 psi working pressure rating. All BSPP fittings are 60° coned for connection to hoses.

Maximum Working Pressure:
10,000 psi (690 bar)

Male x Male Straight Adaptors

10,000 PSI RATED, 316 STAINLESS STEEL ADAPTORS

stainless
steel

These fittings within the industry are known as 10K fittings which have a 10,000 psi working pressure rating. All BSPF fittings are 60° coned for connection to hoses.

Maximum Working Pressure:
10,000 psi (690 bar)

Male x Female Straight Adaptors

316 Stainless Steel Tube

3 metre lengths next day.

6 metre lengths may take up to 3 working days to be delivered, dependant on weight and delivery address location. Additional carriage charges may apply.

For full details please contact our Business Development Team.

Minimum of 10 lengths is advised up to 8mm to prevent damage in transit.

6,000 psi Rated Imperial Needle Valves

The 'IB' series of needle valves are specially designed and manufactured for use in corrosive and hazardous environments. These valves are for use in process control, instrumentation and flow control applications.

Feature Benefits

One piece body construction for strength and safety. Non rotating Vee tip design, which forms a bearing joint with the stem eliminating

any rotation between the plug and seat on closure ensuring long life. **Testing:** All valves are 100% factory tested and complete traceability is available upon request. **Material:** Body, panel nut, washer and gland nut A479-316 **Stem:** A479-316 / 17-4PH **Packing:** PTFE **Grub Screw:** Steel plated **Handle:** Stainless steel **Vee Tip:** A 564-630

Working Temperature:
-29°C to +121°C

Maximum Working Pressure:
413 bar (6,000 psi)

10,000 psi Rated Imperial Needle Valves

The 'HP' series of needle valves are specially designed and manufactured for use in corrosive and hazardous environments. These valves are for use in process control, instrumentation and flow control applications.

Feature Benefits

One piece body construction for strength and safety. Non rotating Vee tip design, which forms a bearing joint with the stem eliminating any rotation between the plug and seat on closure ensuring long life. **Testing:** Each valve is hydrostatically tested in accordance with MSS-SP-99. This procedure includes testing of the body cavity. A Hydrostatic test is

performed with pure water or other liquids of similar or lower viscosity at 1.5 times and seat leakage test at 1.1 times of the maximum working pressure. Each valve is also tested with nitrogen gas at 1000psi for seat, seal and shell leakage. Other tests like vibration, temperature and helium are available upon request. **Material:** Body, stem, packing washer, lock nut and gland retainer A479-316/A-105 **Gland Packing:** Glass Filled PTFE **Packing:** PTFE **Handle:** Stainless steel **Dust Cap:** Plastic **Vee Tip:** A 564-630

Working Temperature:
-50°C to +93°C

Maximum Working Pressure:
700 bar (10,000 psi)

CLAW COUPLINGS

LÜDECKE

Claw Couplings DIN 3489, Stainless Steel

 **Working Temperature:**
-30°C to +200°C

 **Maximum Working Pressure:** 16 bar

Universal system for aggressive fluids in chemical or petrochemical industry, as well as food or drinking water applications.
Use original DIN 3489 Seal GPOR (EPDM) food or drinking water applications.

Material: Stainless steel 1.4401/1.4404
Seal: FKM
Media: Chemical substances
Claw Distance: 42 mm

150lb 316 STAINLESS STEEL PIPE FITTINGS

stainless steel

This technical data is applicable to the full range of 316 Stainless Steel Adaptors only.
Threads: Tapered in conformity with ISO 7.1, BS 21, DIN 2999. Parallel in conformity with BS 2779, ISO 228.
Dimensions: All components are manufactured to the requirements of ASTM A-351.
 The dimensions are in accordance with ANSI B16.3.

Working Temperature:
-20°C to +260°C

Working Pressure:
20 bar

316 Stainless Steel Tube

Seamless schedule 40 ASTM A312/AMSE SA312-A530.
Conforms to NACE standard MR-01-75,
Din50049-3.1.B.

N.B. Delivery may take up to
48 hours.

- ASTM A182 316/L stainless steel
- Dimensions to ANSI B16.11/BS3799
- Sizes 1/4" to 2"
- NPT threaded to ANSI B2.1
- BSPT threaded to ISO 7/1

- Pressure/temperature ratings according to BS 3799
- Pressure rating performance will vary depending on temperature.

 **Working Temperature:**
-100°C to +525°C

 **Maximum Working Pressure:**
207 bar

3000lb 316 STAINLESS STEEL PIPE FITTINGS

- ASTM A182 316/L stainless steel
- Dimensions to ANSI B16.11/BS3799
- Sizes 1/4" to 2"
- NPT threaded to ANSI B2.1
- BSPT threaded to ISO 7/1
- Pressure/temperature ratings according to BS 3799
- Pressure rating performance will vary depending on temperature.

Working Temperature:
-100°C to +525°C

Maximum Working Pressure:
207 bar

RJT Fittings

Most process lines have to be frequently dismantled for cleaning and all ranges of our hygienic fittings are suitable for this purpose.

Clamp unions provide a crevice free connection with a rapid break down and assembly, with no tools required.

RJT unions are probably the most widely used for frequent break down and cleaning.

IDF unions provide an alternative security and limit unauthorised access.

Sizes to suit OD tube.

ONE TOUCH ALL STAINLESS STEEL PUSH-IN FITTINGS

Working Temperature:
-20°C to +200°C

Maximum Working Pressure:
10 bar
Negative Pressure:
750mm Hg (10Torr)

Material:
Body and Collet: 316 stainless steel
O-Ring: Viton

Tube to Connect: PU, Nylon and PTFE
Media: Compressed air, steam water and other compatible liquids

316 STAINLESS STEEL PUSH-IN FITTINGS

stainless
steel

AIGNEP

° Working Temperature:
-15°C to +190°C

Maximum Working
Pressure:
-0.99 bar to 20 bar

This series is fully made of stainless steel AISI 316L and developed to be used with aggressive fluids and food applications. Also ideal for use in salty environments and in machines that need frequent washing with aggressive detergents. Certified NSF 169 and conformed to NSF 61 & NSF 372 standards. All parallel threads have a Food FKM seal as standard

High Pressure Hydraulic Adaptors

Over 25 years of proven high performance with a comprehensive history of product approvals and 3rd party accreditations.

- Superior quality range of Hydraulic Adaptors
- High grade materials manufactured to extremely high tolerance
- 1/8"-3/4" up to 680 bar
- 1"-2" up to 500 bar

High quality Hydraulic Adaptors for high pressure applications completing the integrity of any hose assembly.

For the Engineers

FT Pro products are designed using advanced engineering techniques and the latest manufacturing technology to ensure that your applications benefit from the highest level of quality and performance.

Our products are engineered to be reliable and long-lasting, ensuring that your equipment operates smoothly and reliably throughout its lifespan. With FT Pro products, you can be confident that your applications will run efficiently and productive, no matter how demanding the conditions.

Trust FT Pro Product for the engineers from the engineers.

MASTERS OF MALLEABLE IRON

Malleable iron fittings are the most commonly used fittings in the world, renowned for its durability and mechanical strength.

The fittings are used in a variety of systems including compressed air, water supply, central heating, sprinkler systems and air conditioning, as well as gas and steam systems. They are also used to convey non-aggressive liquids and gases.

Malleable iron fittings provide ring main solutions across various industries including construction, agriculture, mining, automotive and industrial.

All fittings are specially coated to provide an anti-corrosive property as standard.

+GF+

Pages 1356-1369

K-LINE CONNECT

Pages 1349-1355

CRANE

Pages 1370-1376

Available in a black finish (usually for oil and gas applications) and a galvanise finish (usually for water, air and steam installations).

All galvanise fittings are hot-dip zinc coated prior to machining to provide an electrochemical protection and increases resistance to corrosion.

The most extensive choice of **MALLEABLE IRON** to suit any application & any budget

The choice of fittings is very much dependent on the application, the engineer's preference and budget. With over 100 different brands, large stocks and speedy delivery, there's no need to look any further.

* For full technical specification, please contact the manufacturer.

** Includes brackets, elbows, tees, flanges, plates and rings.

** Maximum temperature +120°C at maximum working pressure of 20 bar.

Banded Range

- BSPT Male, BSPT Female – EN10226-2
- British Kitemark
- Available in black or galvanise finish
- Choice of two heavy-duty brands: Crane or K-Line Connect

Tapered Pipe Thread to EN10226-2 Standard

- 55° thread angle • Taper angle 1° 47'

Medium & Heavy-duty Barrel Nipples from FT Pro

- From 1/8" to 4" thread
- Lengths up to 300mm

Beaded Range

- Male Taper, Female Parallel – EN10226-1
- Available in black or galvanise finish
- Choice of two heavy-duty brands: GF and EE
- Heavy-duty ranges manufactured in accordance with EN 10142

Parallel Pipe Thread to EN10226-1 Standard

- 55° thread angle

BS EN 10241 from K-Line Connect

- From 1/8" to 4" thread
- Lengths up to 300mm

MALLEABLE IRON FITTINGS

Maximum Working Pressure:

25 bar @ -20°C to +120°C
20 bar @ +300°C

Threads: Threads are in accordance to ISO7-1. All male threads are BSPT and female threads are BSPP.

Materials: Whiteheart malleable EN-GJMW-400-5 cast iron, grade W40-05 according to ISO5922/DIN-1692, and tested in accordance to EN 10242

Media: Suitable for the flow of water, steam, gas or other non aggressive media.

Surface Finishing:

Black: With an anti-corrosive varnish to protect against rust after installation prior to plant conditioning.

Galvanised: According to EN 10242, zinc coating weight relative to surface exceeds 500 g/m² (average layer thickness 70 micron).

RIDGID

For **Ridgid Wrenches**
see page **1742**

MALLEABLE IRON FITTINGS

K-LINE CONNECT

**Maximum Working Pressure:**

25 bar @ -20°C to +120°C
20 bar @ +300°C

**Threads:**

British standard taper, BSPT to ISO7-1 and EN10226-2.

Materials:

Suitable for fire protection, automatic sprinkler systems NFPA 13/24 and fittings for above ground

Fittings tested in accordance to BS EN10241:2000, BS EN1562 and dimensions to BS EN10242.

Media:

Suitable for the flow of water, steam, gas or other non aggressive media.

Surface Finishing:

Two types are available:

Black:

With an anti-corrosive varnish to protect against rust after installation prior to plant conditioning.

Galvanised:

Hot-dip zinc coated to give additional resistance to corrosion, meeting the requirements of ASTM A153

K-LINE CONNECT

Malleable iron fittings suitable for use with drinking water

WRAS APPROVED PRODUCT

K-Line Connect kitemarked fittings are deemed to satisfy the requirements of the United Kingdom Water Regulations (Byelaws).

MALLEABLE IRON FITTINGS

Threads:

Threads are British Standard taper to IS07 and BS21. All male threads are BSPT and female threads are BSPP to EN 10226-1 and EN ISO 228-1

Materials:

Whiteheart malleable cast iron EN-GJMW-400-5 to EN 1562

Media:

Suitable for the flow of water, steam, gas or other non aggressive media.

Surface Finishing:

Two types are available:

Black:

With an anti-corrosive varnish to protect against rust after installation prior to plant conditioning.

Galvanised:

Hot-dip zinc coated to give additional resistance to corrosion

Maximum Working Pressure:

25 bar @ -20°C to +120°C

20 bar @ -50°C (intermittent) to +300°C

MALLEABLE IRON FITTINGS

CRANE
Material:

Crane malleable iron is of the Blackheart type ideally suited to pipe fitting and manufacture and conforms to BSEN1562 Designation EN-GJMB-300-6, ASTM A197 and ISO 5922.

Galvanised Finish:

Hot dip zinc coated (galvanised) prior to machining. Coating conforms to BSEN ISO1461 1998 and ASTM 153.

Thread:

Taper threads to BS21 (ISO 7)

Media:

Suitable for transfer or flow of water, steam, gas and other non aggressive media.

- BSI Kitemark approved
- PN25

Dual Certified Tubes EN10255 and 10217-1

Universal Steel Mill based in UAE is a major producer of steel tubes across the world. As a major supplier to the world market Universal strives to ensure the products it produces meet the stringent standards of today's markets. To that end they have produced a dual certified tube that can be supplied into the HVAC, Mechanical and Fire Protection industries within the UK.

Verification - all tubes can be supplied with MTC (mill test certificates), certifying that the tubes comply to the relevant standard.

Tubes are available from an extensive stock range:

- Standard full lengths or half randoms
- Threaded and plain ended
- Medium or heavy weight
- Galvanised finishes

Technical Specification

- Leak Tightness Test
- Online NDT machines
- Hydro static pressure testing to 50 bar

Chemical Testing

- Complete chemical laboratory at the mill
- Elco meters
- Hydrometers

Galvanising

- Hot dipped galvanising/zinc coating to EN10240 quality A.1
- Quality checked hourly with Elco meters to ensure a 55-70 micron thickness across tube length

Material

- Fully killed steel
- Tensile tested
- Internal weld seam shall not have a height exceeding 60% of the wall thickness

6.4 metre lengths are available on 2-5 working day delivery service. Specified delivery dates and times cannot be guaranteed. Additional carriage charges may apply, based on weight and location. Please speak to our Business Development Team for full details.

FLEXIBLE RUBBER BELLOWS

Moulded Rubber Bellows are designed to compensate for misalignment, neutralise movement and reduce noise through vibration in pipelines. They effectively dampen the transmission of sound and vibration and can be used in many applications with various medias including water, oils, chemicals and gases when the correct body material is specified.

Other body materials available on request:

- Butyl
- Nitrile
- Hypalon

Working Temperature:
-30°C to +110°C

Maximum Working Pressure: 16 bar

Other flange drillings are also available on request.

Hank Dressed Hemp

To be used with suitable Jointing Paste.

1092	Weight
2046-1687	1/2lb

55 Thread Sealing Cord

Particularly suitable for metal and plastic threaded fittings.

Potable water: WRC listed for use with potable water up to 85°C.

Meets BS 6920.KTW recommendation for hot and cold water.

Gas and water: Carries the German DVGW approval (No.DV-5142 AUO 166), together with DIN 30660.

- Tested in accordance with EN751-2 Class Arp.
- Replaces hemp/tapes and pastes
- Disassembly can be achieved easily with normal tools

Tech Sheet 543

Using standard tube and pipeclamp fittings, imagination is your only limitation to what can be built. From industry to retail from safety to play all can use the pipeclamp system.

Manufactured to BS EN 1562 1997
Galvanised to BS EN 1461 1999

Applications:

- Safety railings
- Storage bays
- Handrails
- Support framework
- Racking
- Compounds
- Cycle racks
- Hanging rails
- Access and invalid ramps
- Door access and entry guarding

Additional carriage charges may apply, based on weight and location. Please speak to our Business Development Team for full details.

THE SWIVEL RANGE

The swivel range is constructed using female and male parts. 173F is common to all combinations. Lugs on fittings sizes 1 to 5 have the same dimensions, and sizes can be mixed if required, ie: 173F-1 with 173M-4. In addition to being used with 173F to make the combination, all 'M' fittings can also be used to secure various types of infill in place.

WARNING: An entire structure should not be built just using swivel fittings.

Manufactured to BS EN 1562 1997
Galvanised to BS EN 1461 1999

1485-1486

- Storz Din Suction Couplings

12.10 Trench Pump & Tanker Couplings

1487-1490

- Trench Pump Hose Couplings - Lug Type
- Tanker Couplings & Adaptors

12.11 IBC Motar and Instantaneous Fire Couplings

1491-1496

- IBC Off Load System
- Mortar Hose Couplings & Plugs
- Flanges
- Fire Hose & Instantaneous Fire Hose Couplings
- Standpipes, Manhole & Drain Keys

12.12 Combination Nipples

1497

- Combination Steel Nipples & Hose Joiners
- Hexagon Nuts & Tails

12.13 Modular Coolant Systems

1498-1502

- Modular Coolant Hose System

12.14 Lever Lock Water Couplings

1503-1510

- Lever Lock Water Pump Couplings

BRAIDED PVC HOSE

Reinforced PVC Braided Hose, Type RPVC & HDPVC (to BS6066)

Manufactured from top quality crystal clear 'virgin' PVC compound, and ideal for factory airlines, fluid systems and many industrial applications. Reinforced with a high tensile quality polyester yarn, it offers high working pressures and extreme flexibility.

The hose is resistant to a wide range of chemicals (please consult our Business Development Team for further details).

Reinforced PVC Braided Hose, Type RPVC & HDPVC (to BS6066)

Characteristics:

- Excellent abrasion resistance
- High resistance to alkalis and acids
- Silicone free
- Cadmium free
- Low toxicity
- Excellent transparency
- Manufactured to comply with BS6066 and ISO5774
- Produced from FDA approved materials
- Durable, anti-cold proof, non-inflated
- Highly flexible, lightweight and easy to handle
- No fissure phenomenon by ultraviolet rays and direct rays of the sun
- Little expansion or contraction

Applications:

- Water supply and draining
- Transfer of various fluids and powder
- Supplying water, gas, oil, etc. in agriculture and industry
- Compressed air
- Other special purposes

FOOD GRADE BRAIDED PVC HOSE BS6066 & ISO5774

Food Certified Reinforced PVC Braided Hose

This flexible, smooth, corrosion resistant, non-aging, and non-oxidising food grade vinyl plastic tubing is produced from raw materials meeting the FDA approved material requirement.

This braided PVC hose offers the same basic performance as clear PVC hose with more strength and flexibility making it ideal for tight installations where hose flattening and kinking may occur.

Hose is fully tested, certified and carries the food safe logos.

Applications:

- Food stuffs
- Beers
- Cool fluids
- Oils and gases
- Dry powders and granules

Available Lengths:

30 and 100 metres

Sizes from: 1/4" to 2"

Characteristics:

- Excellent abrasion resistance
- Good flexibility
- High resistance to alkalis/acids
- Silicone free
- Cadmium free
- Non toxic
- Excellent transparency
- Manufactured to comply with BS6066 and ISO5774
- Produced with FDA approved materials
- Durable, non-inflated
- High-flexibility, lightweight and easy to handle
- Non fissure phenomenon by ultraviolet rays and direct rays of the sun
- Little expansion or contraction
- Phthalate free

Hose compliant with European regulation (EU) No. 10/2011

° Working Temperature:
-20°C to +65°C

Hi-Vis Air & Water RPVC Hose

The Hi-Vis properties of this hose are fully compliant with Health & Safety (Chromaticity Luminance) BS EN ISO 5774 and EN471:2003. A must for all professional facilities and applications.

Features:

- 20 bar rated
- -20°C to +80°C
- Suitable for potable drinking water
- Self-extinguishing
- High visibility
- Flexible PVC
- UV stable
- Multi-use
- White inner, yellow fluorescent outer
- Material softness BSS50/BSS65

Applications:

- Industrial
- Food
- Wash down
- Garage forecourt
- Workshops
- Vending
- Window cleaning/ high rise
- Festivals and outdoor public events

The components used in production of this hose are compliant with EC and FDA requirements

Applicable Standards BS EN ISO 5774 (plastic hoses, textile-reinforced types for compressed air applications.) Tested in accordance with EN471 : 2003 : Section 5.1,5.1.1 and Table 2 for both chromaticity and luminance.

Clear Un-reinforced PVC Hose, Type CPVC

° Temperature Range:
-15°C to +60°C

Standard Coil Length: 30 Metres

Manufactured from top quality crystal clear "virgin" PVC compound, this hose is ideal for conveying fluids, gases, powders and granules at low pressure. Full chemical resistance information is available from our Business Development Team.

All the hoses are made from NSF and DA approved material, suitable for food and drink.

All materials used have FDA and BGA, UK S.I. No.1523 and EEC Directive 78/142/EEC Approval for use in food contact applications.

Please note: No recommended burst pressures/working pressures due to hose being un-reinforced.

Superior Rubber Alloy Air Hose & Assemblies

The **superior** rubber alloy hose is the result of years of research and development to find the optimum compound used to manufacture a hose with the total feel and capabilities of a rubber hose but without the associated disadvantages.

Hose can be ordered in various lengths.
Please contact Sales with your application requirements.

- **Braided reinforcement:** high tensile polyester braid
- **Highly flexible:** excellent bend radius with anti-kink capabilities
- **Durable:** excellent abrasion resistance, plus oil and fuel resistant outer cover
- **Silicone free**
- **Safe:** highly visible green stripe for safety against becoming a trip hazard
- **Ideal for outside:** excellent ozone resistance, making it a number one choice for outdoor applications
- **Smooth bore:** consistent internal and external dimensions, with a smooth bore for optimum flow

 **Working Temperature:**
-20°C to +60°C

 **Maximum Working Pressure:**
20 bar

Rubber Alloy Hose Assemblies

The new superior rubber alloy hose comes from years of research and development to find the optimum compound used to manufacture a hose with the total feel and capabilities of a rubber hose but without the associated negative aspects.

- High tensile polyester braid for reinforcement
- Excellent bend radius with anti kink capabilities
- Excellent abrasion resistance
- Oil resistant outer cover
- Fuel resistant outer cover

- Silicone free
- Highly visible green stripe for safety against becoming a trip hazard
- Excellent ozone resistance, making it a number one choice for outdoor applications
- Consistent on both internal and external dimensions, with a smooth bore for optimum flow

Each end fitting is brass BSPP female with a 60° sealing cone fixed to the hose via a brass ferrule, giving a full mechanical seal.

Working Temperature:
-20°C to +60°C

Maximum Working Pressure:
20 bar

Superior Safety Compressed Air Hose Assemblies

DCH hose is manufactured with a special formula which will outperform PVC and rubber in all application requirements.

- Greater temperature range for all weather and environment applications
- Improved abrasion compared to both PVC and rubber
- Tensile strength 10% better than rubber up to 150kg
- Coupling retention tried and tested up to 200kg
- Excellent flexibility, even in sub zero temperatures
- Full hose traceability

All assemblies are supplied complete with FT Pro safety clasp couplings, rubber sealing ring and anti-vibration nuts.

 **Working Temperature:**
-30°C to +60°C

 **Maximum Working Pressure:**
20 bar
3:1 ratio

Safety Valves

The HoseGuard® is a simple, but efficient protection of a broken compressed-air hose. The air supply is shut off immediately by the HoseGuard®, should the volume of air exceed a set value. This "value" is preset by the manufacturer and is of course, set in a way that allows normal air consumption when using air tools. The HoseGuard® is made so that it ensures a constant bleeding through a tiny nozzle, making the hoseguard return to zero position, once the broken hose has been repaired. The HoseGuard® remains closed until the connection to the mains pipe has been disconnected.

Protection of personnel, machinery and equipment EU 983 and ISO 4414 standard conformity

Compressed Air Hoses

Black smooth abrasion resistant rubber cover with black oil mist resistant rubber tube.

Single braid of synthetic cord reinforcement conforming to BS5118/1 (300psi W.P.) and to the physical requirements of BS ISO 2398 Type 3 Class A 1995.

Maximum Working Pressure:
20 bar

Essential for Engineers

FT Pro understands how critical it is having the right components for fluid power applications. That's why we offer an extensive range of products that are meticulously chosen to suit the unique requirements of all industries.

Our experienced team carefully evaluates each product to ensure that it meets our stringent quality standards and can withstand the requirements of daily use in demanding industrial environments.

Our product ranges continuously evolve to keep up with technological advancements and industry changes. We strive to exceed our customers expectations by offering the range of components for your needs. Whether you're looking for compressed air hoses, hydraulic hoses, couplings, valves, or other fluid power components, we have the products you need when you need them.

At **FT Pro**, our customers can quickly source the essential products they need for their projects and be confident that they are of the highest quality.

We take pride in offering exceptional customer service and technical support to ensure our customers receive the best possible experience when selecting our products.

LAYFLAT HOSE

Layflat Delivery Hos

Applications: Conveyance and discharge of water etc. Particularly suitable for irrigation and water supply applications. However, can also be used in general industries, civil and construction engineering.

Pressures: Values given are based on the short term burst pressure of the hose at 20°C based on a 3:1 safety factor.

This product is only suitable for open ended discharge applications. Pressure ratings are based on discharge pressure from the pump unit.

Note: Any increase in temperature above 20°C will result in a decline in working pressure values.

Chemical Resistance: Resistant to the oils and greases as above. These hoses are not suitable for use with benzene, petrol, spirits, xylo, toluol or solvents containing aromatics. For more detailed information please contact technical sales.

Temperature Range:
-15°C to +55°C

LAYFLAT HOSE

High Pressure Layflat Delivery Hose

Application:

Conveyance and discharge of fluids under pressure. Particularly suitable for irrigation and water supply applications in general industries, civil and construction engineering, agricultural and ship building.

Pressures:

Values given are based on the short term burst pressure of the hose at +20°C based on a 3:1 safety factor.

This product is only suitable for open-ended discharge applications. Pressure ratings are based on discharge pressure from the pump unit.

Note:

Any increase in temperature above +20°C will result in a decline in working pressure values.

Chemical Resistance:

Resistant to oils and greases. These hoses are not suitable for use with benzene, petrol, spirits, xylol, or solvents containing aromatics. For more detailed information please contact Technical Sales.

Benefits:

Layflat hoses provide high performance whilst being lightweight compared with the same size of spiral PVC delivery hoses and rubber discharge hoses. Additionally they are easier to store, handle and transport.

Cut down lengths are available upon request.

YELLOW PVC LAYFLAT ASSEMBLIES

Yellow PVC Layfla is manufactured with a smooth and seamless inner surface and smooth PVC cover. A very high adhesion between inner and outer layers assembled with Band-It clamps male/female lever lock couplings.

This product is only suitable for open ended discharge applications. Pressure ratings are based on discharge pressure from the pump unit.

 **Maximum Working Pressure:** 6 bar
Bursting Pressure: 18 bar

SUCTION HOSE

Medium-duty Suction Hose

Cold Bend: -45°C

Vacuum: 680mm Hg = 90% at +20°C

Approximately 15% lighter than heavy-duty suction hose.

Applications: General pumping and suction applications in agricultural and construction industries.

Conveyance of water, sludge, slurry, chemicals and other waste matter.

Pressures: Values given are based on the short term burst pressure of the hose at +20°C based on a 3:1 safety factor.

Working Temperature:
-5°C to +65°C

Note: Any increase in temperature above +20°C will result in a decline in working pressure values.

Chemical Resistance:
Resistant to most oxidising and reducing agents and diluted acids and alkalis.

For more detailed information please contact Technical Sales.

SUCTION HOSE

Superflexible Medium-duty Suction Hos

Superflexible medium-duty suction hose is a robust general purpose hose. It has excellent weathering and crush resistance and is extremely easy to handle due to its extra flexibility. It has a white helix spiral encased in a superflexible green PVC.

Industries: Suitable for general pumping and suction applications within the agricultural, construction and water treatment industries.

Applications: Conveyance of water, sludge, slurry, and other waste matter. Can also be used to convey small particles like animal feed and plastic pellets.

Working Temperature:
-5°C to +60°C

Vacuum: 680mm Hg = 90% at +20°C

Pressure: Values given are based on the short term burst pressure of the hose at +20°C based on a 3:1 safety factor.

Chemical Resistance: Resistant to most oxidising and reducing agents and diluted acids and alkalis

For more details please contact Technical Sales.

Note: Any increase in temperature above +20°C will result in a decline in working pressure values.

SUCTION HOSE

Heavy-duty Suction Hose

Smooth inside and outside non-restricting tube. The ridged PVC spiral resists crushing impact. High abrasion resistance makes it ideal to transfer powder.

Industries: Suitable for construction, civil engineering, agriculture and ships.

Applications: Suction discharge for sand, gravel, cement and iron fittings, suction and press-transfer of various grains.

Pressure: Values given are based on the short term burst pressure of the hose at +20°C based on a 3:1 safety factor.

Chemical Resistance: Resistant to most oxidising and reducing agents and diluted acids and alkalis. For more details please contact Technical Sales.

Note: Any increase in temperature above +20°C will result in a decline in working pressure values.

OIL RESISTANT SUCTION HOSE

Oil resistant medium-duty suction hose is a robust general purpose oil hose. It has a smooth bore for minimum flow resistance. Excellent weathering and crush resistance. It has a white helix spiral encased in an oil resistant blue pvc.

Applications: Designed for the use of transporting fuel/oils, and is suitable for many industrial areas.

Vacuum: 680mm Hg = 90% at +20°C

Pressure: Values given are based on the short term burst pressure of the hose at +20°C based on a 3:1 safety factor.

Chemical Resistance: Suitable for low aromatic content including oil, diesel, paraffin, hydraulic oils, mineral based oils, lubricating oils and greases.

° Working Temperature:
-15°C to +60°C

For more details please contact our Technical Sales.

Note: Any increase in temperature above +20°C will result in a decline in working pressure values.

10 BAR WATER SUCTION HOSE

Hose Assemblies & Hose

- Hose assemblies are manufactured with black SBR tubes and ozone-resistant SBR covers.
- The reinforcement is manufactured from high tensile textile cords embedded with steel helix wires for vacuum resistance.
- All assemblies are fitted with male/female lever lock couplings.
- Assemblies are available with any combination of fittings including flange, cam and groove.

Please contact our Business Development Team for a quote.
Material and test certification can be supplied.

 Working Temperature:
-30°C to +70°C

 Maximum Working Pressure:
150 psi

WATER DELIVERY HOSE

Cold Bend: -45°C

Vacuum: 570mm Hg = 75% at +20°C

Applications: Delivery and light suction of water, slurry, chemicals, some granules, sewage and other waste matter. Particularly suitable for the horticultural and marine industries.

Pressures: Values given are based on the short term burst pressure of the hose at +20°C based on a 3:1 safety factor.

Working Temperature:
-15°C to +65°C

Chemical Resistance: Resistant to most oxidising and reducing agents and diluted acids and alkalis.

For more detailed information please contact Technical Sales.

Note: Any increase in temperature above +20°C will result in a decline in working pressure values.

WIRE REINFORCED SUCTION HOSE

Wire Reinforced Suction Hose

Clear PVC reinforced with a tensile steel helix

Applications: Suitable for the suction and discharge of water, slurry, chemicals, sewage, granules and other waste materials; can also be used for suction and discharge of foodstuffs.

Pressures: Values given are based on the short term burst pressure of the hose at 20°C based on a 3:1 safety factor.

Note: Any increase in temperature above 20°C will result in a decline in working pressure values.

Working Temperature:
-5°C to +65°C

Chemical Resistance: Resistant to most oxidising and reducing agents and diluted acids and alkalis.

For more detailed information please contact technical sales.

Approvals: Hose complies fully to EU No.10/201 on plastic materials and articles intended to come into contact with food.

Cold bend: -45°C

Vacuum: 711mm Hg = 94% at 20°C

Manufactured from a high quality PVC compound this un-reinforced hose is an excellent hose solution with great flexibility, ideal for conveying fluids, gases, granules and powders at low pressure.

- Excellent abrasion resistance
- Durable
- Resistant to a wide range of chemicals
- Flexible
- Excellent UV resistance

Marine Fuel Hose

Type A1 Specification: ISO 7840 A1.

Type A2 Specification: ISO 7840 A2.

Application: Fuel hose for marine craft.

Tube: Black, fuel resistant NBR rubber.

Type A1 Reinforcement: Synthetic textile.

Working Temperature:
-35°C to +100°C

Type A2 Reinforcement: Synthetic textile fabric, twin steel wire helix.

Cover: Black, abrasion, ozone, weather, heat and oil resistant neoprene rubber.

Safety Factor: 3-1.

XLPE CHEMICAL SUCTION & DELIVERY HOSE

DESCRIPTION:

Chemical suction and delivery hose with XLPE tube for tank trucks and storage tanks. Suitable for handling a wide range of chemical products.

INNER TUBE:

XLPE clear, smooth and resistant to a wide range of chemicals, with black rubber backing.

REINFORCEMENT:

High tensile textile cord, steel wire helix, anti-static wire.

COVER:

Green, smooth with cloth impression. Abrasion, weather and ozone resistant.

Working Temperature: -30°C to +90°C **Maximum Working Pressure:** 16 bar

Non-toxic Suction Discharge Hose

Cold Bend: -45°C

Vacuum: 570mm Hg = 75% at 20°C

Raw materials used have FDA approval for use with foodstuffs.

Applications: Suction and discharge applications of liquids and solids.

Pressures: Values given are based on the short term burst pressure of the hose at 20°C based on a 3:1 safety factor.

Note: Any increase in temperature above 20°C will result in a decline in working pressure values.

Chemical Resistance: Resistant to most oxidising and reducing agents and diluted acids and alkalis.

For more detailed information please contact technical sales.

 **Working Temperature:**
-15°C to +65°C

Multipurpose Hose

This blue multipurpose fuel and oil hose is manufactured with a smooth NBR/PVC cover and a smooth NBR/SBR liner, and is reinforced with high tensile polyester yarn.

Key Features:

- Good resistance to abrasion, weather and oil
- Resistant to petroleum products and certain solvents

Application:

- Low pressure applications, for air, oil and water

Working Temperature:
-20°C to +70°C

Working Pressure:
20 bar

Construction:

- Inner tube: oil resistant NBR
- Reinforcement: polyester yarn
- Cover: smooth blue, oil and weather resistant NBR/PVC blended
- Safety factor 3-1

ANTI-STATIC HOSE

Air & Water

Durable all rubber constructed hose, fully complying with the requirement of BS 2050 specification for 20 bar working pressure.

- Suitable for all compressed air application
- Suitable for use where anti-static properties are preferred e.g. refineries, offshore oil and gas applications

Electrical Resistance Ω :
Min 3×10^3 per m - max 10^6

Construction:
Lining: Electrically conductive SBR rubber.
Cover: Smooth black SBR rubber.

 **Working Temperature:**
-20°C to +80°C

 **Maximum Working Pressure:** 20 bar

INDUSTRIAL PUR DUCTING

This high performance ducting range is produced in Europe and is made from premium-grade ester polyurethane compound, reinforced with a copper-coated spring steel helix.

Applications:

Transport hose for abrasive solids including: dust, powder & fibres, etc. Also suitable for extracting gaseous media such as oil vapours and welding fume.

- Excellent abrasion resistance
- Wire spiral reinforcement can be earthed
- Super flexible, low weight
- Small bend radius
- Good resistance to oil, petrol and chemicals
- High tensile strength and tear resistance

Advanced Features:

- Anti-static wall – electrical and surface resistance, $<10^9 \Omega$
- Flame retardant
- Microbe resistant

Working Temperature:

-40°C to +90°C

Intermittent to:

+125°C

Smooth Bore PU Ducting

Colour: Clear with grey spiral
Working Temperature: -20°C to +80°C

- Construction:**
- Ester based PU
 - Shock resistant PVC spiral, crushing, chemical agents, abrasion and weather resistant, corrugated outside
 - Smooth bore for optimal flow

- Applications:**
- Suction and transportation of abrasive media such as polystyrene pellets, granules, fibres, industrial ventilation and airflow systems. Also dust, gases, liquids and powders.
- Food grade according to (EU) No 10/2011

Medium-duty Smooth Bore PVC Ducting

- Highly flexible plasticised PVC.
- Shock resistant PVC spiral.
- Abrasion, crushing, chemical agents and weather resistant corrugated outside.

- Industrial ventilation and airflow systems, suction of dust, air, gases, powders, liquids etc.

Working Temperature: -10°C to +60°C

ABRASION-RESISTANT, ANTI-STATIC INDUSTRIAL PUR DUCTING

PROTAPE PUR 301 AS

Made from premium-grade ester Pre-PUR polyurethane, reinforced with a copper-coated spring steel wire helix.

Wall Thickness: 0.4mm approx.

Applications: Suction and transport hose for abrasive materials, e.g. dust, chippings, powder, granules, fibres, etc

Also suitable for fume extraction, e.g. oil mist, welding fumes and chemical vapours.

- Permanently anti-static wall, $10^9\Omega$
- Super lightweight, highly flexibl
- Flame retardant to DIN 4102-B1 and UL94-HB
- Microbe resistant
- Supplied poly-sleeved in compressed form
- Excellent abrasion resistance
- High tensile strength and tear resistance
- Optimised flow (observe direction of flow arro
- Small bend radius
- Good resistance to oil, petrol and chemicals
- Wire spiral reinforcement can be earthed

Use clamp type 212/212EC (refer to page 1447).

Working Temperature:
-40°C to +90°C
Intermittent to:
+125°C approx

ANTISTATIC PUR MEDIUM & HEAVY DUTY DUCTING

PROTAPE®

Wall Thickness: 0.9mm approx.

Applications: Flexible hose/ducting for high throughput of abrasive powder, bulk material, granulate and for gases, extraction unit, dedusting system, filter system, oil mist extraction, compressor, side channel blower, vacuum pump, pressure pump.

Municipal vehicle: sweeper, sweeping machine, lawn mower, slope mower, leaf blower/ eaf collector.

- Medium/heavy-duty
- Highly abrasion resistant
- Increased pressure and vacuum resistance
- Microbe resistant
- Good resistance to oil, gasoline and chemicals
- Very good low temperature flexibility
- Permanently antistatic wall: in accordance with ISO 8031 electrical and surface resistance approx. $10^9\Omega$
- Conforms to RoHS guideline

Working Temperature:
-40°C to +90°C

AIRDUC PUR 355 AS

Made from premium-grade ester Pre-PUR polyurethane, reinforced with a heavy-duty spring steel wire helix.

Wall Thickness: 1.5mm approx.

Applications: Suction and transport hose for highly abrasive materials using high flow rates, e.g. powder, granules, chippings, etc.

Also suitable for fumes or gaseous media.

- Permanently anti-static wall, $<10^9\Omega$
- Excellent abrasion resistance
- Flame retardant to DIN 4102-B1 and UL94-V2
- Microbe resistant
- Wire spiral reinforcement can be earthed
- High tensile strength and tear resistance
- Smooth bore, optimised flow (observe direction of flow arrow)
- Good resistance to oil, petrol and chemicals
- Heavyweight, increased pressure and vacuum

Use clamp type 212/212EC, 216 (refer to page 1447).

Working Temperature:
-40°C to +90°C
Intermittent to: +125°C

AIRDUC® PUR 356 AS

Applications:

- Super/heavy-duty
- Extremely abrasion-resistant with reinforcement underneath wire and narrow hose pitch
- Good resistance to oil, gasoline and chemicals
- Very good low temperature flexibility
- Permanently antistatic wall: according to ISO 8031 electrical and surface resistance.
- According to DIN 26057 Type 4
- In accordance with ATEX 2014/34/EU (1999/92/EC) and German TRGS 727: pneumatic transport of flammable dusts and bulk materials (Zone 20, 21, 22 inside), aspiration of combustible dusts (Zone 22 inside),
- In accordance with ATEX 2014/34/EU (1999/92/EC) and German TRGS 727: for conveying for flammable liquids (inside zone 0, 1, 2), for conveying for non-flammable liquids, for use in zone 1 and 2 (gases), for use in zone 0 (gases)
- Conforms to RoHS guideline

Working Temperature:
-40°C to +90°C

Wall Thickness:
• 2 to 2.5 mm approx.

FOOD GRADE PUR DUCTING

PROTAPE PUR 330 FOOD

Made from premium food grade ether Pre-PUR polyurethane, reinforced with a spring steel wire helix.

Wall Thickness: 0.6mm approx.

Applications: Suction and transport hose for abrasive materials including food products e.g. powders, granulates etc.

Also suitable for gaseous media and liquids.

- Food grade wall (refer to Tech Sheet for food approvals information)
- Lightweight, high abrasion resistance
- High tensile strength and tear resistance
- Optimised flow (observe direction of flow arrow)
- Small bend radius
- Good resistance to microbes and hydrolysis
- Good resistance to oil, petrol and chemicals
- Wire spiral reinforcement can be earthed

Use clamp type 212/212EC (refer to page 1447)

Working Temperature:
-40°C to +90°C
Intermittent to: +125°C

FOOD GRADE HOSE & DUCTING

BARDUC PVC 381 FOOD

Made from high-grade PVC with smooth exterior and bore, and spring steel wire reinforcement embedded into wall. For use when very high pressure, vacuum or compression resistance is required.

Applications: conveying powders, chips and pellets, also gaseous and liquid media, e.g. industrial, agricultural and food.

- Phthalates free
- Wire spiral reinforcement can be earthed
- Smooth bore and exterior
- High axial strength
- Good resistance to chemicals, acids and alkalis
- Food grade wall – refer to Tech Sheet for Food Approvals information

Use clamp type 211 (please enquire).

° Working Temperature:
-20°C to +70°C
Intermittent to: +80°C

AIRDUC PUR 355 FOOD

Made from premium-grade ether Pre-PUR polyurethane, reinforced with a spring steel wire helix.

Wall thickness: 1.5mm approx.

Applications: heavy-duty suction and transport hose for highly abrasive materials including food products such as high flowrates, particularly in food and pharmaceutical sectors, e.g. powders, granulates, grains, seeds, fibres etc.

- Also suitable for liquid media, as well as fume extraction
- Heavy-duty, reinforced food grade wall (refer to Tech Sheet for food approvals information)
- Flame retardant to UL94-V2
- Good resistance to microbe and hydrolysis
- Wire spiral reinforcement can be earthed
- Good resistance to oil, petrol and chemicals
- High tensile strength and tear resistance
- **Do not bore or pipe in low** (observe direction of flow arrow)
- Small bend radius
- Excellent overall performance flexibility

Use clamp type 212/212EC/216 (refer to page 1447).

HIGH PERFORMANCE ANTI-STATIC SUCTION & DELIVERY HOSES

NORPLAST PUR 385 AS

Made from premium-grade anti-static Pre-PUR polyurethane reinforced with a tough flexible PVC helix.

Applications: multipurpose suction and delivery hose. For abrasive materials, e.g. dust, powders, granules, fibres and pellets.

Suitable for plastics industries, abrasive recovery, blown insulation, woodworking, etc.

- Gas and liquid tight
- Permanently anti-static wall, $10^9\Omega$
- Phthalates free
- Highly flexible, smooth bore
- Excellent abrasion resistance
- High tensile strength and tear resistance
- Small bend radius
- Good resistance to chemicals
- Flame retardant to DIN 4102-B1

Use clamp type 208/211 (please enquire).

Working Temperature:
-20°C to +70°C
Intermittent to:
+80°C

NORPLAST® PVC 384 SCIROPPO® AS

Applications:

- For foodstuff liquids and grain shaped mediums, like granulates and wooden pellets
- PVC inner/outer layer
- Slightly corrugated construction cover
- Rigid PVC spiral
- With copper stranded wire
- Smooth interior

Working Temperature:
-15°C to +60°C

Tech Sheet 71702

Other size and length options are available for all hoses shown here - please enquire.

Permanently Anti-static

In the past, hoses with an anti-static wall were generally manufactured using an additive that migrated out over time, so that the material's anti-static performance was gradually lost. Thanks to a unique, innovative material developed by **NORRES**, we are able to offer hoses and ductings which are genuinely **permanently anti-static**. These are indicated by **AS** as a suffix in our product name.

HIGH TEMPERATURE NEOPRENE & SILICONE DUCTING

A premium quality neoprene-coated fabric ducting with cord reinforcement and spring steel helix.

Applications: for air movement and fume extraction where extremes of temperature are involved, e.g. plastic granulate dryers and printing machinery.

- High/low temperature range
- Lightweight and highly flexible
- Leak proof and kink proof

Use clamp type 208/211 (please enquire).

 **Working Temperature:**
-35°C to +135°C

Intermittent to: +150°C

NEO 1

INDUSTRIAL VACUUM HOSES & ACCESSORIES

SUPERFLEX PVC 372

Lightweight suction and blast hose made from high-grade, yarn-reinforced PVC with PVC-coated spring steel wire helix.

Applications: Industrial/domestic vacuum cleaners, air movement, drier and weld fume extraction. Suitable for dust, powders, gases and liquids.

- Good resistance to chemicals, alkalis and acids
- Wire helix can be earthed
- Highly flexible

Use clamp type 208 (please enquire).

Working Temperature:
0°C to +85°C

Lightweight, Yarn-reinforced PVC, Suction & Blower Hose, 15 Metres

Tech Sheet 10418

EVA 373 AS, BLACK

High quality, durable black suction hose made from anti-static EVA.

Applications: Industrial/domestic vacuum cleaners and blowing machines for cavity wall insulation.

- Good resistance to alkalis and acids
- Floatable
- Crush-proof
- Permanently anti-static wall, 10^{11} $\Omega</math>$

Use clamp type 208 (please enquire).

Working Temperature:
-45°C to +65°C

Anti-static Black EVA, Crush-proof Suction Hose, 30 Metres

EVA 373

Applications:

- Flexible hose/ducting for gases and for dust, powder, fibre
- Industrial vacuum cleaners, vacuum cleaners
- Swimming pool cleaning
- Scrubber, floor cleaning machine
- Light weight
- Highly flexible
- Crush resistant
- Floatable
- Good resistance to alkalis and acids
- Conforms to RoHS guideline

Working Temperature:
-45°C to +65°C

Crush-proof EVA Vacuum Cleaner Hose, Grey, 30 Metres

HOSE REELS

Reduced wear and damage
Increased efficiency
Ease of handling and storage
Safety first - avoids slips and trips
Compact units for applications with restricted space
Build a Reel - bespoke reels built to your specification

Features:

- Plastic, metal and stainless steel hose reels
- To suit low, medium and high pressure applications, from 12 bar to 270 bar
- All high pressure hose reels are assembled by BFPFA trained technicians
- Hose assemblies made to order
- Floor, wall or ceiling mounting options
- Plastic and metal hose reels come complete with anti-locking mechanism

Air & Water Hi-Vis Hose, Hose Reels

- Hi-Vis reinforced PVC hose
- Tough impact resistant polypropylene construction
- 180° swivel
- Self-layering hose guide for perfectly even hose rewinding
- Speed-controlled return spring
- Auto-locking mechanism allows easy use of hose at any length
- Carry handle
- Lightweight

Mountable Steel Air Hose Reel

- Heavy ribbed steel plate to ensure strong support
- Spring located in the middle to ensure stability
- Four direction non-sag rollers to reduce hose wear abrasion
- Adjustable guide arm for multi position mounting
- Special swivel joint for easy maintenance and repair
- Ball bearing swivel joint structure, largely reducing friction

Mountable Stainless Steel Hose Reels

- All stainless steel 304 spring rewind hose reels are designed for harsh, corrosive environments or where hygiene is of primary importance
- Ideally suited for wash down applications in food processing, also for marine and offshore application
- All stainless steel swivel assemblies with PTFE washer and viton O-ring for high pressure and high temperature
- Spring fully enclosed and lubricated
- Guide arm adjustable for handling up to 6 positions
- Multi-position ratchet lock keeps hose at desired length

Stainless Steel Hose Reels

Heavy Duty Stainless Steel Retractable Hose Reel c/w 15 Mtrs Food Quality Hose

- Heavy gauge 304 stainless steel.
- Designed for harsh corrosive environments.
- Ideal for use in food processing, chemical, offshore and marine applications.

CRWM-SS Series Stainless Steel Manual Rewind Hose Reel Range

- 304 grade st/steel
- Ideally suited for food industry, chemical processing, offshore and marine applications.
- Hose lengths: 20m - 40m.
- Hose Sizes: 1/2" - 1".
- Pressures: up to 700psi.

CCRHA-SS Series Stainless Steel Spring Rewind Hose Reel Range

- 304 grade st/steel
- Ideally suited for food industry washdown, offshore & marine applications.
- Hose lengths: 20m - 30m.
- Hose Sizes: 1/2" - 1".
- Pressures: up to 2500psi

HOSE REELS

Reelworks Hose Reels

This compact, spring rewind hose reel is constructed in durable impact-resistant polypropylene. Supplied complete with 15m super flexible hybrid polymer hose, 1.5m inlet hose and integral pivoting wall bracket. The compact size makes this reel ideal for use in smaller workshops where space is limited.

Features:

- Supplied with 15m flexible, premium hybrid polymer hose
- Hose has no memory and lays flat when in use
- Integral pivoting wall bracket, swivels through 180°
- Latching of hose at any length
- Latching system can be set to free run if required

Maximum Working Temperature: +60°C

Automatic Spring Rewind Hose Reels, suitable for Air & Water

0122	ID	Length Metres	Max Pressure Bar
C2753	1/2"	15	20
C2752	3/8"	15	20

Tech Sheet 68740

This multifunctional, hi-vis, safety, spring rewind air hose reel has an automatic rewind system which prevents the hose from bunching when retracting the hose back; the system layers the hose back onto the reel from side to side, neat and tidy every time. The reel is supplied complete with a hybrid polymer hose which lays flat when in use with no recoil effect, and stays flexible even in extremely cold conditions. Manufactured from high impact UV-stabilised polypropylene which makes this reel tough, lightweight, and corrosion free. Two-year limited warranty.

Features:

- Automatic guide system – no bunching of hose. Layers hose from side to side, neat and tidy every time
- Slow retraction system – prevents hose from speeding back to the reel if the hose is let go – safe operation
- Low tension spring
- Latching of hose at any length

Hi-Vis, Automatic Spring Rewind Hose Reels, suitable for Air

0122	ID	Length Metres	Max Pressure Bar
C2783	1/2"	15	20
C2782	3/8"	15	20

Tech Sheet 68739

The compact spring rewind reel operates with a normal retraction system but should the operator lose grip on the hose, then the system senses the over-speed reaction and slows the hose to a safe speed by means of a centrifugal brake.

Features:

- Constructed in high impact UV stabilised polypropylene
- Powder coated, integral wall/ceiling bracket
- Latching of cable at any length or free run option
- Fully automatic spring rewind
- Low effort easy to use rewind tension
- Lightweight design
- Supplied with fitted hos
- Virtually maintenance free
- 12 month manufacturer's warranty

A Brand New Concept in Hose Reel Technology

FEATURES & BENEFITS OF THE CONCEPT:

- Eliminates the use of a fixed guide arm in wall/ceiling mount position
- Easy to install with no need for post installation adjustments
- Unique, automatic, 90° vertical rotational span
- Covers various mounting positions
- Balanced clock spring produces enough torque to displace the weight of the guide arm
- Allowing the guide arm to move vertically up and down in a smooth, effortless and fully automatic manner
- The roller guide and arm/s will always be directly facing the user, giving total control on payout and retrieval
- Allows the units to be mounted at an increased height
- Removes the possibility of harm to the operator, passing personnel or damage to machinery compared to low-level units
- Roller guide arm returns to its rest position after use
- Sets the reel ready for the next operator

STANDARD FEATURES:

- Constructed in heavy gauge powder coated steel
- Finished in a durable, white powder coated gloss finish
- Latching of hose at any length
- Fully automatic hose rewind for neat, tidy storage
- Extended roller guide aperture to ease hose stacking
- Externally mounted swivel assemblies
- Viton seals and nylon backup rings as standard
- Low, medium and high pressure applications
- Double supported 1", solid steel axle
- Pathfinde[®] self-adjusting roller guide arm
- All working parts fully accessible for servicing
- Floor, wall or ceiling mounting options
- Suitable for air, water, oil, diesel and grease delivery
- 2-year manufacturer's warranty
- Swivels 180° through the X axis and 90° through the Y axis
- Supplied as a bare reel, hose to suit application at extra cost

HOSE REELS

E-Zy Reels

Features:

- Lightweight and durable, just 12.5kg
- Constructed in high-impact UV-stabilised polypropylene
- Supplied with correct type of hose for specific application
- Fully assembled, includes 3 connecting hose
- Suitable for air or water depending on model

Redashe

Retracta Standard Hose Reels

Redashe Retracta spring rewind hose reels offer performance, reliability and versatility for all popular hose applications. Constructed in high impact UV stabilised polypropylene for all-purpose corrosion free, durability. Retracta reels can be installed indoors or out. They are particularly suited to washdown applications in food processing as an alternative to conventional stainless steel reels. Suitable for wall, floor, bench or overhead installations.

Features:

- Superior positive latching mechanism allows the reel to be mounted in any position, with latching of the hose at any length
- Tough, corrosion free polypropylene construction
- Lightweight-average just 12kg, easy to install
- Fully automatic hose rewind for neat and tidy storage
- Low rewind tension allows for easy hose "pull out"
- Virtually maintenance free
- Completely serviceable-all parts readily available
- 5 year warranty (conditions apply)
- Safe storage system that keeps hoses off the floor

Excluding Hose

Note: Available for many other applications, with or without hose.

E-Zy Reel 208 Series Manual Rewind Hose Reels

Features:

- Excellent design, constructed from tubular and formed steel, which delivers superior strength and durability
- Corrosion resistant powder coated finish, black as standard
- Full flow, brass swivel assembly, ensures maximum product delivery
- Suitable for all floor or workbench mounting, ideal for mobile vehicle applications and pressure washers
- Spring loaded locking pin prevents the hose from de-reeling
- Only 9.5kg (bare reel)

 **Maximum Working Pressure for Reel:**
206 bar (3000 psi)

SAFE AND REALLY EASY...

NEDERMAN REELS.

DISCOVER THE BENEFITS OF KEEPING AIR, WATER, ELECTRICAL POWER, LUBRICANTS OR VACUUM CLOSE AT HAND WITH NEDERMAN'S PROVEN RANGE OF SELF-RETRACTING REELS.

WHY REELS?

- ✓ Reduce wear and damage
- ✓ Ease handling and storage
- ✓ Ensure a clean environment
- ✓ Increase efficiency
- ✓ Safer first – avoids “slips and trips”

FEATURES:

- Ball bearings for easy operation
- High quality seals
- Optimised to retract evenly
- Factory pre-tensioned
- Easy to mount – wall or ceiling
- Manufactured to meet ISO 9001 and ISO 14001
- Stainless and EX approved options

COMPREHENSIVE RANGE - OPEN, CLOSED, STAINLESS AND EX

SELF-RETRACTING HOSE REELS

Nederman

Hose Reel, Series H20 & H30

- Safe and functional cable reels for industrial use, professional tradesmen or do-it-yourself workshops
- Snap-on wall bracket
- Unique safety latch
- Drum with ball bearings on both sides
- Degree of protection code, IP55
- Rubber power cable
- Cable easily replaced
- Hose Type A

Hose Reel, Series 881

- The vacuum hose reel facilitates the handling of long and heavy vacuum hoses, and provides tidy and safe storage when they are not in use. Keeps hoses out of the way of forklifts and mobile workshop equipment. Separate suspension brackets make mounting of the reel simple and safe
- Antistatic reel and vacuum hose
- Supplied with automatic damper
- Integrated micro-switch
- Delivered without connection hose
- Maximum suction: 45kPa (psi)
- Hose Type L

Hose Reel, Series 886 Ex Approved

- Series 886 Ex is a hose reel with large hose capacity for heavy-duty industrial use. It is constructed for environments where high hygiene and corrosion resistance is required. All components are made of stainless steel and conductive composite material. Approved for use in zones 1, 2 and 22 in accordance with ATEX 94/9/EC, equipment group II, category 2G D
- Connection hoses are 1 metre long
- Hose Type M

 **Maximum Working Pressure:**
2.0MPa (20 bar)

FHROMS19	19
FHROMS25	25
Tech Sheet 60138	

Automatic Swivel, Reel Only

0463	To Suit Hose ID mm
FHROAS19	19
FHROAS25	25
Tech Sheet 60138	

Manufactured to comply with the stringent requirements set out under BS EN 671-1, the hose reels are extremely durable and offer superb performance to the operative.

The side plates are protected with a polyester powder coating that complies with the 240 hour salt spray test requirements specified by ISO 9227

ALL REELS COME COMPLETE WITH WALL MOUNTING BRACKETS

Fire Hose Reel Assembly

Manual Fixed, with Hose

0463	ID mm	Length Metres
FHRAMF19	19	30
FHRAMF25	25	30

FHRAAS25	25	30
Tech Sheet 60138		

Accessories

Standards: EN 694.

Cover: Red, ozone and UV resistant, elastomeric rubber/PVC blended.

Reinforcement: textile braids.

Liner: seamless rubber/PVC.

Working Temperature:
-20°C to +60°C

Maximum Working Pressure: 12 bar

Fire Hose

0463	ID mm	Length Metres
FH01930	19	30
FH02530	25	30

Tube: NR/SBR/BR, Black smooth, antistatic abrasion resistant.

Cover: SBR, black, smooth, anti-static cloth impression.

Suitable for blasting sand and other media such as quartz sand, steel shot, corundum, glass, etc. The hose has added security against electrical shocks by electrically-conductive lining.

Working Temperature:
-35°C to +80°C
(ambient temperature)

MODULAR COOLANT HOSE SYSTEMS

Compatibility:

Suitable for use with acetone, alcohol, ethyl, greases, oils, commercial dish detergents, gasoline, lacquer solvents and sodium hydroxide. Not for use with chlorine, acids, ammonium hydroxide, bases (strong), hypochlorite ion solutions or sodium hypochlorite.

Material: Polyoxymethylene (POM).

Recommended Maximum Line Pressure: 20-30 psi.

Recommended Maximum Flow Rate: 1,800 litres per hour.

Interchangeable with: Loc-Line.

Maximum Operating Temperature: +76°C

Repeated exposure to this temperature will cause fatigue.

Features:

- Unique ball and socket design, fully hand-adjustable in both position and length
- Will not kink or fatigue; bending does not decrease the inside diameter
- Will not damage machine tool cutters if contact occurs, unlike metal hoses
- Electrically non-conductive; ideal for EDM flushing
- No internal positioning rod that can break or restrict fluid flow
- Stays in position; repeated positioning is easy
- Creep due to machine vibration is eliminated

Recommended Maximum Line Pressure:
30 psi

Recommended Maximum Flow Rate:
2,150 litres per hour.

Interchangeable with: Loc-Line.

Maximum Operating Temperature:
+76°C

Repeated exposure to this temperature will cause fatigue.

MODULAR COOLANT HOSE SYSTEMS

Compatibility:

Suitable for use with acetone, alcohol, ethyl, greases, oils, commercial dish detergents, gasoline, lacquer solvents and sodium hydroxide.
 Not for use with chlorine, acids, ammonium hydroxide, bases (strong), hypochlorite ion solutions or sodium hypochlorite.

Material: Polyoxymethylene (POM).

Recommended Maximum Line Pressure:
30 psi

Recommended Maximum Flow Rate:
2,150 litres per hour.

Interchangeable with: Loc-Line.

Maximum Operating Temperature:
+76°C

Repeated exposure to this temperature will cause fatigue.

LEVER LOCK WATER PUMP COUPLINGS

FT Pro couplings provide a quick and easy way to join many lengths of hose together. They are commonly used for the pumping and transfer of water in the construction, road maintenance and general irrigation industries. They can also be used for loading and unloading road tankers.

Interchangeable with: BAUER

Maximum Working Temperature:
+80°C

Maximum Working Pressure:
2" to 3.1/2" 20 bar
4" to 8" 12 bar

CLAMPS & HOSE CLIPS

Jubilee® Light Range Clips

With a narrower band than the original Jubilee® clip, this lightweight clip is designed to offer an excellent seal at slightly lower torques.

The Jubilee® Light Range is manufactured to DIN 3017 and, like the original Jubilee® clip, they are continuously threaded to enable extra flexibility when adjusting to the required size.

This clip is most suited to applications where space or weight is restricted and is often used in car and light commercial vehicle applications.

Jubilee® Stainless Steel High Torque Hose Clips

Jubilee® High Torque clips are made of all 304 or 316 stainless steel, with a two-part housing and cut-through and keeping the band straight at the point of engagement and fully engaging the screw thread, giving a superior tightening torque.

Although not suitable for use on soft hoses, where the high forces and the perforated band may cut into the hose; they are ideal where a high clamping force is required, and with a flexible band material, they can achieve a high level of friction even against smooth surfaces.

CLAMPS & HOSE CLIPS

Jubilee® Superclamps

Jubilee® Superclamps are manufactured in mild steel zinc plated, all 304 stainless and all 316 stainless steel and the later are predominantly suitable for applications where high corrosion resistance is required. These powerful clamps are ideal for marine and offshore oil and gas applications, as well as the food and chemical industries.

These clamps can also be used in place of SAE J1508 type TB or T-Bolt style clamps.

Superclamps are particularly suitable for delivery and suction hoses requiring a very tight seal and agricultural applications, waste water extraction, mining, quarrying or in other sectors where a heavy-duty clamp is required.

Mikalor Hose Clamps & Clips

Mikalor is a leading European manufacturer of hose clamps and clips based in Barcelona, Spain. Famous for the market-leading Supra clamp, Mikalor manufactures an extensive range of DIN 3017 clamps which are IATF 16949 approved for automotive use, DIN 3016 P-clips as well as a growing range of constant tension clamps, spring clips, O-clips etc.

Mikalor was the first company to design and produce heavy-duty hose clamp, and since then the **Super clamp** has gone from strength to strength.

The high strength 8.8 grade steel nut and T-bolt mean that Super can be tightened up hard using many different kinds of tools, while the bevelled edges protect the hose from harm.

The Super clamp is in its element in agricultural applications, waste water extraction, mining, quarrying or in other sectors where a rugged yet competitively priced heavy-duty clamp is required.

Material:

Band and bridge: Stainless Steel X6Cr17 AISI-430

Screw: Qst 34-3 Steel (DIN 1.0213) 8.8 Grade Steel

Finish: Stainless Steel

Tech Sheet 1739

Due to its revolutionary swivelling bridge, the **Supra Clamp** can be mounted in the most awkward applications without having to remove the hose. It can be opened and fastened again when in place without dislodging any other parts of the clamp, making assembly much easier.

The high-strength bolt, designed and manufactured by Mikalor specifically for this clamp, together with the captive nut and spacer system allow you to clamp the most demanding of hose assemblies. This is the clamp of choice for professionals in the industrial hose, automotive and agricultural machinery sectors as well as in all industrial applications where an outstanding and above all reliable heavy-duty clamp is required.

Material:

Band and bridge: Stainless Steel X6Cr17 AISI-430

Screw: Qst 34-3 Steel (DIN 1.0213) 8.8 Grade Steel

Supra Constant Tension Heavy-duty Clamp

The hose clamp that adapts itself to variations of pressure and temperature.

The Supra CT clamp incorporates a bespoke bolt and a series of conical washers to the already outstanding Supra clamp. This specialized version of the Supra clamp is used in applications subject to vibration and/or great variations in temperature which can cause the spring washer system, the Supra CT maintains constant pressure around the hose despite variations in temperature or vibration.

This clamp is generally fitted in combustion engines in construction machinery, trucks, tractors, buses, marine engines, military vehicles and diesel-powered generators. The bevelled edges protect the hose from damage.

Supra 2-Bolt Range

The **SUPRA 2-bolt** heavy-duty clamp is an ideal solution for applications where increased performance and improved distribution of radial forces around the circumference of the band are required.

To ensure maximum clamping force, our bolts are manufactured in-house by **Mikalor** with an exclusively designed the outer hexagonal head, which guarantees the highest clamping force on the market.

The bevelled band edges avoid damage to the hose, making Supra safe and reliable to use.

This 2-bolt version of the Supra clamp is recommended for applications with an outer diameter (OD) over 270mm for use in sectors such as oil and gas, marine, agriculture, foodstuffs, hydraulics and chemicals, amongst others.

The Mikalor ASFA Worm-drive Clip Range

The **Mikalor DIN 3017 ASFA worm-drive clip range** is manufactured in material qualities ranging from W1 (zinc-plated mild steel) up to W5 (AISI 316 stainless steel) and in band widths ranging from 7mm up to 16mm. The range includes ASFA-CT constant tension clips with a spring insert and a also a black version with a Delta-Seal surface treatment. For extreme applications ASFA is also available in titanium with a PTFE surface treatment. The entire ASFA range is manufactured according to IATF 16949 and is fully compliant with the requirements of the automotive sector.

ASFA LW3 Worm-drive Clip (Black Finish)

This clamp is manufactured in AISI 430 with an additional matt-black surface treatment which increases its corrosion resistance. Thanks to the surface treatment, this clamp can be mounted discreetly in any application, making it a favourite in automotive or motorcycle applications.

Screw: AISI 430 stainless steel

Band and Housing: Stainless steel X6Cr-17 (DIN 1.4016) (AISI-430)

Finish: Black

HOSE CLIPS

ASFA SW3 Constant Tension Worm-drive Clips

12mm band width **Constant Tension worm-drive clips** are designed to be used primarily in the automotive sector. The main advantage of this clip over the standard Mikalor worm drive is to be found in the spring-loaded insert, fitted on a semi-circular support to the inside of the band.

The use of this spring-loaded insert guarantees constant pressure around the hose and the optimum performance of the clamp in case of variations in temperature, pressure or vibration. For this reason, constant tension worm-drive clips are used mainly with tubes or hoses carrying hot air or on engine refrigeration systems, as clamps used in these applications are subject to expansion and contraction due to frequent changes in temperature. ASFA CT worm-drive clips are manufactured entirely from stainless steel, thereby ensuring good corrosion resistance.

W3 S-Band Constant Tension Worm-drive Clips

Material: AISI-430 Stainless Steel
Spring-loaded insert: AISI-410 Stainless Steel
Finish: Stainless Steel

Tech Sheet 20096

ASFA High-Torque (16 mm) Hose Clamp

Mikalor High-Torque Clamps were designed to guarantee maximum performance in the most demanding applications. Thanks to the use of an M8 screw and the choice of 16mm bandwidth, torque values can be applied which are far higher than those used with the standard ASFA range, thereby ensuring perfect performance in high-pressure applications.

The High-Torque clamp is particularly popular in industrial and automotive applications due to its outstanding performance. The perfectly rounded bevelled band edges avoid the clamp cutting into or damaging the hose.

Material:
Band and Housing: Stainless Steel X6Cr17 (AISI 430)
Screw: Stainless Steel (AISI 304 CU)
Finish: Stainless Steel

CLAMPS & HOSE CLIPS

A World Leader in the design & supply of sealing, connecting & clamping solutions.

High performance products specified by the world's leading manufacturers for all their hose, tube and pipe applications.

- Specially designed for the perfect seal
- Quality Assured engineering and manufacture to ISO 9002, QS 9000 and ISO 14001.
- Over 3 million parts produced EVERY day allows us to give the customer exceptional value.

HOSE CLAMPS

MIKALOR

Mikalor O Clips

The use of one ear clips is an economical solution for many simple hose assemblies carrying air or fluids. They are ideal for use with simple hose assemblies which do not require high clamping force. The practical design of ear clips means that they are easy, fast and safe to mount. They are also tamper-proof once mounted. The edges are rounded to avoid damage to the hose.

Tech Sheet 1744		

The use of two ear clips is an economical solution for leaktight, simple hose assemblies on hoses transporting air, gas or other fluids

The two ears give the clip extra grip and help to maintain constant pressure around the hose. The edges are rounded to avoid damage to the hose and the assembly of this clamp is fast, safe and easy. The clamping range is greater than the one ear clip, meaning that the two-ear clip can be used on larger bore hoses. The practical design of two ear clips means that they clamp firmly onto the assembly and are tamper proof once mounted.

Mikalor O Clips with Stainless Steel Inner Ring

The fact that these clamps are used on very small-bore hoses means that the material of the tube or hose can sometimes be very flexible, making it more difficult to ensure a leaktight assembly due to the possible deformation of the hose. In these cases, the inner-ring is key in helping to guarantee leaktightness as well as protecting the hose from being pinched during assembly.

O CLIPS

1 Ear Stepless® Clamps, Stainless Steel 1.4301/UNS S30400

Narrow band - Concentrates transmission of clamping force, less weight.

Stepless over 360° - Uniform compression or uniform surface pressure.

Clamp ear - Compensates for component tolerances, adjustable surface pressure

Dimple - Increases clamping force, spring-effect compensates for changes in diameter due to thermal expansion

Burr-free strip edges - Reduced risk of damage to parts being clamped

CLAMPS & HOSE CLIPS

Jubilee® P Clips

Jubilee® P Clips are suitable for retaining pipes, cables and hoses. Jubilee® P Clips are manufactured from a flexible steel or stainless steel one-piece band with an ethylene-propylene-diene monomer (EPDM) rubber liner.

Working Temperature:
-50°C to +150°C

stainless steel

316 Stainless Steel (W5) EPDM Liner, M6.

- The band features a stepped design allowing the clip to sit flush with the rubber line. The single-piece construction means there are no joins, which makes the clip very strong.
- The upper hole has an elongated design allowing easy fitting of the clip.

Quality assurance: DIN3016
Corrosion resistance: 72-hour NSS test
Material: mild steel zinc-plated

Tech Sheet 60241

- The rubber liner is manufactured in a corresponding profile to be secure in its position on the clip and ensures a tight fit as well as vibration damping and sound insulation. EPDM rubber offers several advantages over alternatives, such as a wide operating temperature range, resistance to UV (ultraviolet) weathering and resistance to creep.

- BSI clips are rubber lined universal clips for mounting pipes to the wall or ceiling

Working Temperature:
-40°C to +120°C

Advantages:

- Fitted with two bolts with anti-loss ring
- Bolt with slot and cross head
- Reinforcement grooves ensure that BSI clips maintain their shape
- Noise suppression up to 17dB(A)
- Electrolytically zinc plated

BSK-I clips are designed for plastic pipes with special TPE (thermoplastic elastomer) lining.

The BSK-I clip has easily removable plastic spacers between the two clip halves and can be transformed into a clenching clip without the need for tools.

Advantages:

- Special TPE lining with excellent low friction properties
- Transformable from sliding to clamping with easily removable spacer
- Fast assembly thanks to the patented click-spring locking system
- Noise reduction: 20 dB(A) with spacer, 18 dB(A) without spacer
- UV resistant
- Electronically zinc plated

 **Working Temperature:**
-20°C to +100°C

BSK-I Clip Range

- BSI-HDI clips are rubber lined, hot dip galvanized universal clips for mounting pipes to the wall or ceiling

 **Working Temperature:**
-40°C to +120°C

Advantages:

- The clip has one or more strengthening ribs to achieve a strong working load
- Loose fitting possible
- Noise suppression up to 17dB(A)

- Easily finishes off the ends of all types of Flamco Rail
- Quick and easy to push into position

RD1 Mounting Rail End Cap

0713	To Suit
50501	50010

Product Features:

- Easy mounting by pushing and turning the unit in the rail 45° clockwise
- No-return stop
- Reduced installation time
- Electrolytically zinc plated
- No loose parts such as studs, washers and nuts

QUICK RELEASE BAND STRAPS & BANDING

Jubilee® Quick Release Band Straps

Jubilee® quick release straps are used in a wide range of applications where a closed installation requires the clamp to be opened fully for positioning.

Examples include sign fixing, cable retention, repairs and heating, ventilation and air conditioning.

All Purpose Band

Band-It All Purpose Band offers versatility within varying temperatures and applications. All Purpose Band is ideal for bending and forming around virtually any section or shape. Resistant to physical abrasion, UV light and corrosive environments for many applications where plastic cable ties are simply inadequate or even dangerous.

- 316 stainless steel or galvanised carbon steel
- Pre-punched holes make fastening quick and easy
- Easy to form around any section
- Flame retardant low smoke PPA 571 coating
- Thick coating; kind to hands and cables
- Halogen free
- Simple fastening with nuts, bolts or screws
- Three widths available
- Standard black coating; other colours are available on request

Ferrules for Low Pressure Hoses

- Red hot steel, zinc-plated and yellow chromated
- Easy, fast and safe hose crimping with hand-operated assembly machines: SPR 333 (use LPH-12.5 to LPH-23) and SPR 500 (use LPH-25 to LPH-41)
- No danger of hurt, closed and unremovable connection
- For crimping various hoses and fittings for different fluids

Maximum Working Pressure: 16 Bar

PIPE REPAIR COUPLINGS

A World Leader in the design & supply of sealing, connecting & clamping solutions.

High Specification Stainless Steel Coupling for Repairing Leaks to Pressure Pipe

- Nitrile Sealing Sleeve
- Double Lip Seal Design
- Upto 16 bar Pressure Rating
- Suitable for Metal and Most Plastic Pipes

Pipe Repair Couplings

- Easy assembly and disassembly
- Re-useable
- Patented double-lip seal
- Standard steel strip insert
- Suitable for both high pressure and vacuum applications

Tech Sheet 60557

Multi-use epoxy resin repair mortar for concrete or stone. Unequalled hardness and epoxy bonding power. Epoxy Repair Mortar allows fast setting (3-6 hours), granite-hard permanent repairs to be made to badly cracked and worn concrete or stone floors. For use where conventional mortar or other fillers will loosen or fail. Anglo Epoxy Repair Mortar is virtually indestructible and ideal for repairs to factory floors, driveways, worn and broken steps, garage floors, sills, grouting in bolts and railings etc.

MAINTENANCE PAINTS

Floor Coating

- For use on concrete, metal and wood.
- Single pack, pedestrian grade floor coating
- Great gloss appearance.
- High film build in one coat
- Touch dry after 6 hours.
- Resistant to oil, lubricants and petrol.
- Easy to apply with brush and roller.
- 8m² per litre (two coats recommended).
- Easy to clean with a neutral cleaner.

Important: Not suitable for car traffic or for car park areas

MAINTENANCE PAINTS

Hard Hat® Topcoats

For use on engines, heat cannons, steam pipes, boilers, radiators, vents, barbecues and stoves. 750°C maximum temperature for short periods.

Heat-resistant, 500ml

0209	Colour
RUS-7778	Black Satin Gloss
RUS-7715	Aluminium
Tech Sheet 60579	

Adheres to metal, wood, concrete, tile floors and parquet. Very quick drying (5 to 10 minutes).

For use on floors, steps, thresholds, etc. Makes every surface non-skid in a second.

Anti-slip, 500ml

0209	Colour
RUS-2410	Transparent
RUS-2444	Safety Yellow
RUS-2479	Black

TIP: for maximum efficiency of fluorescent colours, spray over matt white and finish with Hard Hat® clear coat.

RUS-2222	Blue
RUS-2255	Orange
RUS-2264	Red
RUS-2242	Yellow
Tech Sheet 60578	

Hard Hat® Metallics

Metallic sprays combine a bright metallic appearance with the durable protection of a standard topcoat.

- Gloss or sparkling metallic appearance
- To restore the metallic appearance
- For use on bare metal, galvanized, zinc primers or anti-rust primers

Durable Protection, 500ml

0209	Colour
RUS-2111	Sparkling Aluminium
RUS-2115	Silver Aluminium
Tech Sheet 60577	

- Greater abrasion resistance
- Better anti-corrosion properties than other metallics
- Excellent UV resistance (does not discolour)
- Resists acids, chemicals and alkalis

Stainless Steel Coating, 500ml

0209	
RUS-2116	
Tech Sheet 60577	

Marking Aerosols

- For marking difficult substrate
- Best hiding power, weather-resistant and watertight
- For use on metal, concrete, asphalt, gravel, soil, grass, wood, etc
- Works even on slightly wet surfaces
- Upside down spraying system
- Up to 70m marking (3cm width)

Hard Hat® High Performance, 500ml

0209	Colour	RAL Code
RUS-2358	Red Orange	-
Tech Sheet 60580		

- For use with line applicators
- Adjustable line width 5 to 10cm
- Light traffic possible after just 4 hours
- Adheres to asphalt, concrete, grass, metal and wood, etc
- Up to 120m marking (5cm width).

Hard Hat® Line Marking, 500ml

0209	Colour
RUS-2391	White
Tech Sheet 60581	

LEAKSEAL™

LEAKSEAL™ is an easy-to-use, rubberised protective coating designed to fill and seal leaks and cracks. It provides a watertight, flexible seal.

- Seals leaks and cracks
- Watertight semi-smooth finish
- Can be top-coated with latex or oil-based paints
- For use on metal, aluminium, PVC, concrete, masonry, asphalt roofing materials, etc

Flexible Rubber Coating

0209	Colour	Volume Millilitres

PROFESSIONAL LUBRICANTS

WD-40 Lubricant

- Cleans – WD-40's ultra-high surface attraction enables it to get under dirt, grime and grease to clean and dissolve adhesive
- Displaces moisture – WD-40 covers surfaces and microscopic irregularities to eliminate moisture and dry out electrical systems

100ml Can

9036

44201

- Penetrates – WD-40's super penetrating action loosens stuck, frozen or rusted metal parts
- Lubricates – WD-40 contains no silicone or other additives that attract dust and dirt which means it clings to moving parts preventing them from jamming

450ml Can with Smart Straw

9036

44037

- Protects – WD-40 deposits corrosion resistant ingredients to shield metal surfaces against moisture and rust

CLEANING & SPECIALIST PRODUCTS

7063 Cleaner & Degreaser

General parts cleaner which leaves no residue – ideal for use prior to adhesive bonding and sealing applications. Compatible with metal, glasses rubber, most plastics and painted surfaces.

- Clean products prior to using Loctite adhesives/sealants

0753	Volume Millilitres
LOC-195814	400
Tech Sheet 67949	

7840 Cleaner & Degreaser

A concentrated, biodegradable cleaner/degreaser that contains no hazardous solvents and dilutes with water to meet a wide range of industrial cleaning applications.

- Typical applications for this product include engines, motors, castings, valves, bearings, tanks, machinery, exterior siding, windows, carpets, concrete floors, asphalt, vehicles etc
- Substances it can remove include grease, lubricants, cutting oils, fuel oils, tar, road salt, light carbon, food stains, wax, animal fat, mildew and soot
- This product has a pine odour but is also available fragrance-free

0753	Volume Millilitres
LOC-235330	750
Tech Sheet 67950	

7850 Fast Orange Hand Cleaner with Pumice

Natural hand cleaner made from Citrus rinds. Contains no synthetic solvents, mineral oils or petroleum distillate. Contains fine pumice for deep cleansing

- Contains Jojoba oil, lanolin and aloe to moisturise the skin
- pH balanced
- Easy pump dispenser
- Biodegradable

0753	Volume
LOC-234228	400ml
LOC-234258	3 Litres
Tech Sheet 67951	

8040 Freeze & Release

- This product is a special mineral oil formulation to free rusted, corroded and seized parts
- The shock-freezing effect will cool parts instantly down to -43°C and cause microscopic cracks in the layer of rust
- This allows the lubricating ingredients to wick directly into the rust by capillary action
- Released parts remain lubricated and protected from corrosion

Lubricant

0753	Volume Millilitres

Tech Sheet 20636	

Ambersolv Citrus Based Foaming Cleaner

Formulated from a blend of high-grade citrus oils and surfactants. An ideal alternative to traditional solvents and highly alkaline cleaners. Suitable for use in industrial, aerospace and general industrial applications.

Biodegradable, water-based formulation.

Non-flammable.

0229	Volume
6160005000	400ml
6330061005	5 Litre
Tech Sheet 20637	

Amberklene FE10

General degreasing of machinery including chains, gears, cogs, drives, motors, bearings, and more. Particularly suitable for removing grease from bearing housings and gear teeth and copper paste from threaded fasteners.

Also used for stain removal on textiles.

Fast Drying Solvent

0229	Volume Millilitres
6130002500	400
Tech Sheet 20638	

Amberklene ME20

For tough and old grease deposits which require a longer contact time. Use on pumps, gearboxes, drives exposed to the elements or with longer service intervals.

Heavy-duty Solvent

0229	Volume Millilitres
6130002600	400
Tech Sheet 20639	

Amberklene L030

Use for general degreasing on bearings, drive, motors, gears and chains but without the traditional odour associated with solvent degreasers.

Low Odour Solvent

0229	Volume
6130002700	400ml
6230003705	5 Litre
Tech Sheet 20640	

BA40 Solvent

For removal of uncured sealants and adhesives, particularly during aircraft maintenance. Extremely fast evaporating solvent degreaser.

Water Soluble Solvent

0229	Volume Millilitres
6130002800	400
Tech Sheet 20641	

Ambertron Contact Cleaner

For use on critical electronic components where only the purest contact cleaners can be used. Removes light oils and contamination safely on PCB's, relays, all electrical contacts, switches and more.

0229	Volume Millilitres
6130001500	400
Tech Sheet 10528	

Lec-Klene

For use on electronic and aviation components requiring a powerful yet ultra-safe solvent degreaser. Powerful solvent degreaser that removes oil, grease, grime, wax and tar.

Use in confined or enclosed spaces, and areas where high flash point is required.

High Flash Point Solvent

0229	Volume Millilitres
6130002900	400
Tech Sheet 20642	

Ambersolv SB1

Dissolves grease and grime from bearings, removes old lubricant from drives, slides, and guide rails.

Effective on a wide range of soiling such as oil, grease, tar, bitumen, silicones, rubber-based adhesives, oil-based paints, inks and dyes.

Citrus Based Solvent Cleaner

0229	Volume
6190003000	400ml
6330062005	5 Litre
Tech Sheet 20644	

CLEANING

Brake Cleaner

Brake Cleaner is a strong non-chlorinated solvent blend to quickly and safely remove brake fluid, grease, oil and other contaminants from brake and clutch parts.

0229	Volume Millilitres
617003000	500
Tech Sheet 20645	

GS5 Gasket Stripper

Removes in-place gaskets from engines, gearboxes, drive and chain enclosures. Use to remove thread locking compounds, silicone sealant, and mastics.

0229	Volume Millilitres
63700M7028	400
Tech Sheet 20646	

Fast Clean 200 & 201

Advanced degreasing solvent that is both exceptionally fast drying and very powerful.

Super Fast Degreaser

0229	Volume Millilitres
63700M7019	400
Tech Sheet 20648	

EPP Hard Surface Cleaner

An environmentally preferred product that can be used on all floors as a cleaner to remove grease, grime, bitumen and other soiling types.

Removes a wide variety of soiling including: grease, oil, wax, and polish.

0229	Volume Litres
6330007005	5
Tech Sheet 20649	

N F Precision Cleaner

An advanced solvent contact cleaner that is non-flammable and ideal for servicing lifts and critical electronics that cannot be switched off.

Excellent materials compatibility. Specifically formulated for cleaning delicate electronics.

Non-flammabl

0229	Volume Millilitres
6130001560	400
Tech Sheet 20651	

IPA

Ideal for cleaning optical devices, switches and PCB's. Use where a safe solvent is required on delicate electronics. Excellent material compatibility, safe to use on plastics and rubber.

Isopropyl Alcohol Electronic Cleaning Solvent

0229	Volume Millilitres
6130012000	400
Tech Sheet 20652	

CCL100

A versatile product for use on electrical contacts and switchgear.

Cleans, lubricates and prevents corrosion all in one application.

Contact Cleaner & Lubricant

0229	Volume Millilitres
63700M7018	400
Tech Sheet 20653	

EPP Degreaser

Use to degrease components when a regular solvent cleaner cannot be used. Use on gearboxes, hydraulic systems, open gears, chains and pumps to remove a variety of heavy soiling types.

An environmentally preferred product that is a non-flammable water based degreaser.

- 750ml are trigger bottles
- 5 Litre are bulk tubs

Biodegradable Cleaner Degreaser

0229	Volume
6060001570	750ml
6330001005	5 Litre
Tech Sheet 20654	

Universal Screen Cleaner

Removes grime and finger marks from control VDU s, online status screens and all monitors. Ideal for cleaning thermal imaging camera screens. Can be used on most screen types including LCD, TFT and Plasma.

0229	Volume Millilitres
6130004050	400
Tech Sheet 20655	

CLEANING

Anti-static Spray

Use on plastic surfaces prone to static charge prior to maintenance or as part of a static control program.

0229	Volume Millilitres
6130004020	400
Tech Sheet 20656	

Invertible Air Duster

Non-flammable dry air blast for removing loose dry contamination from electronics. 360° Spray system for all angle use.

0229	Volume Millilitres
6130004000	200
Tech Sheet 20657	

Ambersil Wipes

Super high absorbency hand wipes over-layered with an effective polymer web to give all the cleaning power of pumice without the scratching.

Contains anti-pathogen agents highly effective against common bacteria and viruses such as Weil's Disease, MRSA, Salmonella, Listeria and E. Coli. Passes BS 12054 (hand sanitising) and BS 1276 (surface sanitising).

High Absorbency Cleaning Wipes

0229	Quantity
6330272100	100
Tech Sheet 20658	

Glass Cleaner

Use on all glazed and ceramic surfaces to remove light soiling and marks.

0229	Volume Millilitres
6160004000	400
Tech Sheet 20660	

Multi-surface Polish

Developed to cut through and remove industrial soiling which is more tenacious than domestic or office soiling

0229	Volume Millilitres
6190010000	400
Tech Sheet 20661	

Air Duster

A liquefied propellant which provides a powerful blast for the easy removal of dust and loose contamination from precision equipment such as cameras and printed circuit boards to general cleaning in areas where the use of a liquid cleaner may be undesirable.

Non-flammable

0229	Volume Millilitres
6130012100	400
Tech Sheet 20662	

Label Remover

Removes all types of self-adhesive labels from equipment. Fast and effective removal of self-adhesive paper labels, reducing scraping.

0229	Volume Millilitres
6190012000	200
Tech Sheet 20663	

For **Cleaning Stations**
see page **1764**

LUBRICATION

40+

A true multi-purpose treatment: it can be used as a penetrant, a lubricant, an anti-corrosion coating to prevent flash rusting on steel, and as a moisture displacer in high humidity environments.

- 400ml are aerosols
- 5 Litre are bulk tubs

Multi-purpose, Industrial Protective Lubricant

0229	Volume
6130007000	400ml
6230005100	5 Litre
Tech Sheet 20664	

AGL1

Use to displace moisture and protect electrical contacts from corrosion.

Provides precision lubrication by its thin, high dielectric strength, lubricating film

Greaseless Lubricant

0229	Volume Millilitres
6130009000	400
Tech Sheet 20665	

Amberglide

Use where temperatures regularly reach a sustained 120°C to 160°C such as photocopier fuser units and moving parts near heat sourced e.g. conveyors, sideways and chutes. Particularly suitable to rapidly oscillating packaging equipment arms.

Cleans, lubricates and waterproofs.

PTFE Lubricant

0229	Volume Millilitres
6130013000	400
Tech Sheet 20666	

AMS4

Use on high voltage and 3-phase connector casing and joints to seal against moisture ingress, assist assembly/disassembly and prevent cracking of rubber seals.

Insulates high voltage parts against leaking or arcing, Waterproofs electronics in damp or humid conditions.

Multi-purpose Silicone Grease

0229	Volume Millilitres
6130008500	400
Tech Sheet 20667	

Chainspray & FLT Chain Spray

Use on all types of chain and drives including conveyors, door mechanisms, quarry plant, drying ovens doors, and forklift trucks. Ideal for fast moving or exposed chains.

Offers maximum adhesion to chain links with excellent penetration.

Separate version specifically developed for Fork Lift Trucks (500ml).

Chain & Drive Lubricant

0229	Volume Millilitres
6150001100	400
6170030010	500
Tech Sheet 20668	

Gear & Wire Rope

Ideal for open gears in dusty environments (e.g. quarries) where the dry film will not attract dust. Use all wire ropes subjected to tension and/or movement.

Forms a dry non-peeling film that overcomes the limitations of grease lubrication and pressure cushions.

Heavy-duty Lubricant

0229	Volume Millilitres
6150007000	400
Tech Sheet 20669	

Rust Flash

For use on all seized fasteners, particularly those corroded or rusted. Ideal for bolts on equipment located outside and subjected to adverse conditions.

Rust is shock-cooled, cracking it and allowing penetrating oils to work. Very fast acting for rapid job turnaround.

Rust Loosener with Freeze Shock Effect

0229	Volume Millilitres
6150003601	500
Tech Sheet 20670	

Penetrating Oil

Use as a highly effective release agent for seized fasteners, particularly bolts and grub screws.

Frees seized components rapidly.

Penetrant for Seized Parts

0229	Volume Millilitres
6150003600	400
Tech Sheet 20671	

Dry Film Anti-stick

Use on guide rails on production lines to prevent jams; ideal for use as a non-tainting lubricant on packing and cardboard folding machines.

Forms a dry non-staining film, exhibits excellent friction retardant properties.

Dry PTFE Lubricant

0229	Volume Millilitres
6140003500	400
Tech Sheet 20672	

LUBRICATION

Ambersil

Copper Anti-seize

Use on threaded fasteners to prevent seizing during prolonged maintenance intervals, in hostile/high humidity environments and areas subjected to high torque and/or temperatures.

Reduces friction and wear, good corrosion protection even in highly corrosive environments, Operational temperature range: -30°C to +1100°C.

- 400ml are aerosols
- 500gm are containers

High Temperature Anti-seize

0229	Volume
6190014010	400ml
6150001030	500g
Tech Sheet 20673	

Silicone Lubricant

Use for plastic-to-plastic lubrication, extra slip on chutes or slides, and on push fit pipes. Can also be used as a general mould release agent or as a cutting aid on paper/textile blades. Use on printing lines to reduce ink adhesion.

General Purpose

0229	Volume Millilitres
6190015000	500
Tech Sheet 20674	

Ambergrease EXL

Use on critical and high load bearings and sliding surfaces. Suitable for use in applications where a longer service interval is required.

Exceptional load carrying capacity: 4-ball weld load >800Kg, Mean Hertz Load 125kg, Timken OK load: 25Kg, Highly visible red, NLGI type 2 grease, Lithium-Calcium Complex thickener.

Extended Life, High Performance Bearing Grease

0229	Volume Millilitres
6150001010	400
Tech Sheet 20675	

Silicone Anti-stick

High concentration silicone lubricant for more demanding applications with higher loads or increased speeds e.g. robotic picking lines, conveyors, pallet guide rails and close tolerance fitting of large bore pipes.

Ideal for use where high standards of purity are essential, helps prevent line jams, inhibits adhesive build up on blades and sealers.

Concentrated Silicone Lubricant

0229	Volume Millilitres
6140001500	400
Tech Sheet 20676	

Dry Moly

Use in higher load applications where PTFE lubricants would fail, but a dry film is still required. Use as a running-in treatment on rolling and sliding bearings.

Use as a lubricant for guides and joints; on wheel bearings on kiln carts; or lubrication of open gears.

Operational temperature range: -150°C to +400°C.

Molybdenum Disulphide Lubricant

0229	Volume Millilitres
6150002000	400
Tech Sheet 20677	

Multi-lube

Versatile lubricant for use in mechanical handling maintenance, cleans, lubricates and protects against corrosion.

Multi-purpose Lubricant

0229	Volume Millilitres
6170030020	500
Tech Sheet 20678	

White Spray Grease

Ideal for use on automotive door hinges. Use on runners, guide tracks, and other moving parts, NLGI grade 2 grease in an aerosol

Multi-purpose White Grease

0229	Volume Millilitres
6170030040	500
Tech Sheet 20679	

Tufcut

Tufcut is a range of specialist metal cutting lubricants based on a mixture of lubricants, extreme pressure additives and anti-oxidants. The range has been formulated to offer instant, ready-to-use metal machining products that provide exceptional performance in demanding applications. All the products are suitable for use on a wide range of metals, including stainless and high carbon steels where "right first time" results are required

Metal Cutting Lubricant

0229	Volume
6150006000	350ml Liquid
6150005500	400ml Spray
6150006500	300ml Foam
6150006100	500g Compound
Tech Sheet 10365	

ANTI-CORROSION

Corrosion Inhibitor

Use on ferrous metal as a long-term protective coating for stored equipment. Film will not harden or crack, forms a 'self repairing' waxy film. Will not stain or mark components.

Waxy Anti-corrosion Treatment

0229	Volume Millilitres
6190011600	400

Tech Sheet 20680

Cold Galvanise Spray

Provides Cathodic protection to steel. Ideal for pipes, housings, and structural metal exposed to the weather. Sacrificial coating protects metalwork and steels from corrosion.

Zinc-Rich Protective Coating

0229	Volume Millilitres
6190011001	400

Tech Sheet 20681

Bright Cold Galvanise

Bright, Cold Galvanise weathers naturally, mimicking the natural hot-dip galvanise finish. Barrier coating protects metalwork and steels from corrosion.

Repair Coating for Hot-Dip Steel

0229	Volume Millilitres
6190011501	400

Tech Sheet 20682

Galva Shine

Offers an exact colour match to aesthetic architectural hybrid zinc galvanised metal supports. Resists weathering, retaining a super bright finish

Aesthetic Protective Coating

0229	Volume Millilitres
6190011510	400

Tech Sheet 20683

Inox 200

Use on glass pearl blasted stainless steel as a touch-up and anti-corrosion paint. Heat resistant up to 300°C.

Protective Coating for Stainless Steel

0229	Volume Millilitres
6190011513	400

Tech Sheet 20684

Alu Hi Temp

Use on furnace doors, boiler casings, drying ovens, foundry manipulators, and equipment subjected to continuous high temperatures. Continuous protection up to 600°C.

High Temperature Corrosion Protection

0229	Volume Millilitres
6190011511	400

Tech Sheet 20685

Zinc Primer

Zinc phosphate primer promotes adhesion of top-coat paint to 'difficult' substrates. Dry to touch in 30 minutes, dry to paint in 1 hour (recommended 24 hours for best results).

Multi-purpose Metal Primer

0229	Volume Millilitres
6190011512	400

Tech Sheet 20686

Battery Terminal Protector

Protects battery terminals on forklift trucks, generators, and UPS from wear and corrosion and seals out damp from battery connections.

Highly visible dye gives early warning of acid leakage by changing from yellow to red.

Anti-corrosion Terminal Treatment

0229	Volume Millilitres
6170030050	500

Tech Sheet 20687

Acrylic Conformal Coating

Apply to PCB's and electronics to protect against arcing, dust, moisture and contamination.

Colourless conformal coating, insulates and seals out moisture and dust, flexible lacquer will not crack or chip.

0229	Volume Millilitres
6130004030	400

Tech Sheet 20688

SV 100

Apply to electric motors as an insulation and protective coating to the windings. Insulates all types of electrical systems against high humidity.

Anti-tracking Insulating Film

0229	Volume Millilitres
63700M7036	400

Tech Sheet 20689

INSPECTION/DETECTION

Ambersil

Leak Detector

Spray on gaseous pipes and joints to identify leaks. Ideal for preventative maintenance checks, new installation checks, and on all HVAC systems.

Water-based formulation, no oils, silicones or harmful solvents; no 'run off' hazard, non-flammable and completely odourless.

- 400ml aerosols
- 5 Litre bulk tubs

Water Based

0229	Volume
6190019000	400ml

Tech Sheet 20690

Flaw Detectors, Cleaner, Penetrant & Developer

Use as a highly accurate check for weld quality. Ideal for use on military vehicle repair, boiler maintenance, and storage tank fabrication.

Fast acting visual results.

Highly effective system that can be used anywhere, simply, and without complicated test equipment.

Can be applied direct to the component to be tested without the need for dismantling the equipment.

Dye Penetrant Non-destructive Testing System

0229	Volume Millilitres	Description
6190005600	400	Part 1 - Cleaner
6190006510	400	Part 2 - Penetrant
6190007510	400	Part 3 - Developer

Tech Sheet 20692

WELDING

Ambersil

Spatter Release

Traditional non-flammable, solvent based spatter release formulation.

Prevents spatter adhesion on welding equipment, work pieces, surfaces, jigs and surrounding areas.

Flammable Weld Anti-spatter

0229	Volume Millilitres
6190004150	400

Tech Sheet 20693

Bioweld

A water-based spatter release agent which gives exceptional results without the use of harmful solvents, silicones or mineral oils.

Allows post welding operations, painting, plating, galvanising etc to be undertaken without interference. Contains a rust inhibiting agent.

Water Based Anti-spatter

0229	Volume Millilitres
6190004600	400

Tech Sheet 20694

Easy Weld

Easy Weld provides a quick, easy way to prevent adherence of spatter to metal surfaces, and eliminates the need for chiselling, grinding or wire brushing after welding.

A workshop spatter release based on biodegradable oil.

Biodegradable Spatter Release

0229	Volume Millilitres
6190004650	400

Tech Sheet 20695

PORTWEST

For Respiratory Protection
see page 1755

PREVENTION. NOT DETECTION.™

Available from Ambersil

LOCKED IN FOR SAFETY

INTEGRATED DESIGN BENEFITS:

- Secure spray straw locks in place
- Non-slip grip
- Traditional spray in the “down” position
- Precision application in the “up” position
- Useful catch curb - prevents oily can

Ambersil have upgraded their Food Processing range under the new “Perma-Lock®” design. Perma-Lock® is a unique, non-detachable spray system with dual position spray. There are no detachable pieces that can fall off, leading to contamination of goods and exposing food manufactures and processors to costly recalls.

Perma-Lock® reduces the need for expensive x-ray or metal detection equipment: preventing loss is better than detecting loss.

FOOD GRADE CLEANING & LUBRICATION

Silicone FG

Use where reduced friction is required, particularly on plastic-to-plastic components. Use on guide rails in finished product lines or as a guide rail and labelling equipment anti-stick treatment to dramatically reduce label and adhesive build-up.

NSF H1 registered (N°138000) for use in the food and beverage industry. Eliminates squeaking, binding and sticking.

NSF H1 Registered Silicone Lubricant

0229	Volume Millilitres
6150009350	400
Tech Sheet 20706	

Chain Lube FG

Ideal for conveyor chains, chain drives, pulleys, rollers, transfer belts, hoists and overhead door drives. Can be used above the food line.

NSF H1 registered (N°137998).

Excellent penetration and lubrication properties, can be used as a general, heavy-duty, PTFE lubricant.

NSF H1 Chain Lubricant with PTFE

0229	Volume Millilitres
6150009330	400
Tech Sheet 20705	

Penetrating Oil FG

For use in the food and drink industry on seized fasteners seized by heat, corrosion, over-tightening, and contamination.

NSF H1 registered (N° 140260) for use in the food industry.

Assists quick disassembly of mechanical components, fittings, and close tolerance fasteners.

NSF H1 Registered Penetrant for Seized Parts

0229	Volume Millilitres
6150009470	400
Tech Sheet 20715	

Ambergrease FG1

Ideal for all types of bearings and sliding rails/surfaces in low temperature areas (e.g. chiller/freezer), moist or wet environments, and where a longer re-lubrication interval is required.

NSF H1 registered (N°138264).

White, NLGI type 2, aluminium complex grease.

Operational temperature range: -50°C to +165°C.

Performance Grease for Food Processing Equipment

0229	Volume Grams
6150009370	400
Tech Sheet 20708	

Food Grease FG

Use on plain bearings, hinges, and moving parts. Particularly useful for limited access areas where regular grease penetration may be difficult.

NSF H1 registered (N° 140258) for use in the food industry, NLGI type 2 white grease, aluminium complex thickened.

Operational temperature range: -20°C to +140°C.

NSF Registered Spray Grease

0229	Volume Millilitres
6150009500	400
Tech Sheet 20711	

Assembly Paste FG

For lubrication of bushes, sliding surfaces and small open gears. Prevents damage at start-up and protects during running-in. Protects against seizing of threaded components.

Effective from -30°C to +150°C as a lubricant and to +1100°C as an anti-seize.

Please note: Images used are to indicate type of container for products.

NSF H1 Assembly Paste & Anti-seize Compound

0229	Volume Millilitres
6150009400	400
Tech Sheet 20717	

Dry PTFE Lube FG

Use for the lubrication of chutes, slides, and pins. Where silicone cannot be used.

NSF H1 (No. 139899) registered for use in the food industry. Particularly suitable in low load, low speed applications.

Operational temperature range: -150°C to +26°C.

NSF H1 Registered Dry Lubricant

0229	Volume Millilitres
6150009520	400
Tech Sheet 20713	

Belt Dressing FG

Apply to all types of belts to increase grip, reduce squeak and prolong life. Use on conveyor drive transfer belts, conveyor belts, and belts subjected to wet environments.

Belt Dressing FG is NSF H1 registered (N° 140257).

Protects belts from deterioration through oxidation and heat.

Adhesive Belt Lubricant

0229	Volume Millilitres
6150009480	400
Tech Sheet 20714	

Machine Oil FG

For use in the food industry on metal-to-metal moving parts such as hinges, gimbal-mounts, safety latches, and threaded parts.

NSF H1 registered (N°137999 and 140249).

Creates a highly effective lubricating and anti-corrosion film. Can be used as an anti-corrosion coating for metal parts in high-humidity conditions.

NSF H1 General Purpose Lubricant

0229	Volume Millilitres
6150009340	400
Tech Sheet 20707	

FOOD GRADE CLEANING & LUBRICATION

Amberclens FG

Developed for general cleaning in the food industry. Use to remove grime or soiling from equipment post-maintenance.

NSF A1 registered (N° 137995).

Stable, non-dripping foam. Foaming action helps break down soiling for effective cleaning.

NSF A1 Foam Cleaner

0229	Volume Millilitres
6150009300	500
Tech Sheet 20696	

Amberklene FG

Developed for general degreasing in the food industry. Use to remove grease and heavy oils from bearings, conveyor drives, and chains and hydraulic oil seepage. Removes wax-based anti-corrosion (transportation) coatings and metal cutting lubricant.

NSF A8 and C1 registered (N° 137996 and 140261) meets guidelines for use in the food industry.

High flash point of 40°C for application safety. Penetrates quickly and removes dirt and moisture. Does not leave residue.

NSF A8 & C1 Biodegradable Cleaner/Degreaser

0229	Volume Millilitres
6150009310	500
Tech Sheet 20698	

Stainless Steel Cleaner FG

For use on all types of stainless steel and shiny surfaces to remove light dirt, finger prints and water marks

NSF A7 and C1 registered (N°138212) for use in food industry.

Cleans and inhibits re-staining of stainless steel in one application.

NSF A7 & C1 Stainless Steel Cleaner

0229	Volume Millilitres
6150009360	500
Tech Sheet 20700	

Degreaser FG

Use to degrease components when a regular solvent cleaner cannot be used.

NSF A1 registered (N°137997).

Effective in both cold and warm water, use on gearboxes, hydraulic systems, open gears, chains and pumps to remove a variety of heavy soiling types.

NSF A1 Water Based Degreaser

0229	Volume Millilitres
6150009320	750
Tech Sheet 20697	

Industrial Degreaser FG

Use where a fast drying time and high solvency power is required. Dissolves grease and grime from bearings, removes old lubricant from drives, slides, and guide rails.

NSF A8 and K1 registered (N° 140255 and 140250) for use in food industry.

Use for degreasing and over-hauling electric motors. Can also be used to remove adhesives.

NSF A8 & K1 Registered Heavy-duty Degreaser

0229	Volume Millilitres
6150009420	500
Tech Sheet 20701	

Contact Cleaner FG

Specifically designed for electrical maintenance in the food industry, particularly production line electronics, automated systems and optical readers.

NSF K2 registered (N° 139627) for use in the food industry.

Use to remove grime and contamination from PCB's and contacts.

NSF Registered Electrical Contact Cleaner

0229	Volume Millilitres
6150009510	400
Tech Sheet 20699	

Label & Adhesive Remover FG

Use to remove labels from shipping containers, packing boxes and bulk storage (intermediate) drums.

NSF K3 registered (N° 140259) for use in the food industry.

Removes adhesives and paper labels in 3 minutes.

Improves packaging line efficiency by reducing jamming caused by label and adhesive build-up.

NSF K3 Registered Label & Adhesive Remover

0229	Volume Millilitres
6150009450	200
Tech Sheet 20704	

Ambergrease FG2

Use on bearings subjected to high temperatures such as oven conveyors, oven fan bearings, bakery lines, drying ovens and in food container moulding operations.

NSF H1 registered (N°138265).

Translucent white NLGI type 2 silicone grease.

Operational temperature range: -20°C to +220°C.

NFS H1 High Temperature Bearing Grease

0229	Volume Grams

Tech Sheet 20709	

FOOD GRADE CLEANING & LUBRICATION

Ambersil

Ambergrease FG3

For use on all types of bearing in food, drinks, and consumables processing. Ideal for end-of-line conveyor lubrication, conveyor drive motors, and packing areas. NSF H1 registered (N° 140248) for use in the food industry. Provides stable, long-term lubrication. Operational temperature range: -20°C to +140°C.

NSF H1 Multi-purpose Bearing Grease

0229	Volume Grams
6150009490	400
Tech Sheet 20710	

Assembly Grease FG

Use in the same manner as a Copper Anti-Seize (as a general anti-seize) but also aids with the running in of bearings whilst grease is worked. Particularly effective as an anti-seize on oven fans. Can be used as a high temperature ejector pin lube for moulding white plastic food cartons. NSF H1 registered (N°138266 and 139900). Resists water wash-out, extending re-lubrication intervals when used as a service lubricant. Operational temperature range: -30°C to +1100°C.

NSF H1 Assembly Lubricant & Anti-seize Compound

0229	Volume Grams
6150009390	500
Tech Sheet 20712	

Moisture Remover FG

For use on equipment to displace moisture, particularly after wash-down or because of water ingress. Ideal for use on electronics. NSF H2 registered (No.142299) for use in the food and beverage industry. Provides precision lubrication by its thin, high dielectric strength, lubricating film, can be used as a multi-purpose lubricant.

NSF H2 Registered Dewatering Fluid

0229	Volume Millilitres
6150009530	500
Tech Sheet 20716	

MOULDING RANGE

Ambersil

HD-Sil Release

Exhibits excellent anti stick and slip properties. Particularly effective in mould release and injection moulding operations. Ideal for use where a clean, colourless lubrication is required. Operational up to +200°C. Easily removed with solvent cleaners.

Heavy-duty Silicone Release Agent

0229	Volume Millilitres
31631-AD	500
Tech Sheet 20718	

No-Sil Release

Provides a wet, heavy-duty film for the release of plastic and rubber parts. For use in injection moulding, vacuum forming and many other moulding and forming processes. Operational up to +170°C.

Heavy-duty Non-silicone Release Agent

0229	Volume Millilitres
31971-AA	500
Tech Sheet 20719	

Mould Solv

Ideal for removing general mould residues and release coatings. Highly effective low odour, degreasing agent that also removes anti-corrosion, storage coatings. Efficiently cleans plastic, ferrous and non ferrous coatings.

Cleaner for Moulds & Tools

0229	Volume Millilitres
31970-AA	500
Tech Sheet 20720	

Tool Guard

A light green, viscous, protective coating for use on mould tools. Remove moisture and provides long term protection to surfaces. Easy identification with total coverage assured. Will not penetrate or creep into mould tool. Resists the effects of high humidity and acid finger marking. Excellent corrosion protection.

Highly Visible Corrosion Inhibitor

0229	Volume Millilitres
31972-AA	500
Tech Sheet 20721	

Mould Protective

Non-silicone corrosion inhibitor for injection moulding tools and dies. Repels and displaces moisture, leaving a durable, non-greasy, protective film.

Mould Corrosion Inhibitor

0229	Volume Millilitres
6120005000	400
Tech Sheet 20722	

Clear Mould Protective

Use on mould tools as a long-term protective coating for storage. Repels and displaces moisture, leaving a durable, clear, protective film.

Transparent Corrosion Inhibitor

0229	Volume Millilitres
6120005500	400
Tech Sheet 20723	

PAINT & SURFACE PREPARATION

Acrylic Paints

Ambersil Acrylic Paint is a high quality paint designed for use in a wide variety of industrial, automotive and home and garden applications. It is also recommended as a protecting paint for repairs on all kinds of lacquered surfaces, or where a colour matched anti-corrosion finish is required.

When combined with Ambersil Cold Galvanize as a base coat, superior and long lasting anti-corrosion protection is achieved even when the surface is damaged.

- Fast drying
- Good hardening and resistance to wear
- Excellent flexibility
- High UV resistance once dry
- Good adhesion to metal, wood, glass, paintable plastics, concrete and stone
- Excellent coverage and opacity

THREAD STICKS & THREADLOCKERS

Threadlocker Sticks

- Effective on all types of metal threaded fasteners. Recommended where disassembly is required. Machine tools and presses, pumps and compressors, mounting bolts and gear boxes.
- For use on threads up to M50
- Functional strength 6 hours
- Long term temperature resistance +150°C

248, Medium Strength

0753	Volume Grams
LOC-248	19
Tech Sheet 67925	

- Effective on all types of metal threaded fasteners. Recommended for use where regular removal for maintenance is not required. Suspension bolts, motor transmission and pump mounts, bearing cap bolts and studs.
- For use on threads up to M50
- Functional strength 24 hours
- Long term temperature resistance +150°C

268, High Strength

0753	Volume Grams
LOC-268	19
Tech Sheet 67926	

Thread Sealant Stick

- Recommended for all coarse metal pipe threads where disassembly is required. Ideal for use in a broad range of industries including chemical, processing, waste water treatment and automotive.
- For use on threads up to 3"
- Substrate to be sealed: Metal
- Instant low pressure seal
- Low disassembly strength
- Long term temperature resistance +150°C

561, Instant Bonding

0753	Volume Grams
LOC-561	19
Tech Sheet 67927	

Anti-Seize Sticks

- Copper based anti-seize for screws, nuts, pipes, heat exchangers etc.
- Solid lubricating agent containing copper and graphite
- N.L.G.I. Class 1

Working Temperature:
-30°C to +930°C

8065, C5-A Copper, High Temperature

0753	Volume Grams
LOC-8065	20
Tech Sheet 67928	

243 Threadlocker

Particularly suitable on all metal threaded fasteners. Prevents loosening on vibrating parts such as pumps, motor mounting bolts, gear boxes or presses. Recommended for use where disassembly with hand tools is required for servicing and where parts are contaminated with oil.

- Resists vibration
- Single part – clean and easy to apply
- Can be used on all sizes of fasteners – reduces inventory costs
- Seals threads allows through-hole tapping

Medium Strength

0753	Volume Millilitres
LOC-135279	10
LOC-135278	50
Tech Sheet 67929	

270 Threadlocker

Particularly suitable for use on all metal fasteners (including stainless steels and those with protective coatings such as Zinc) where regular removal for maintenance is not required. Recommended for permanently locking studs on engine blocks and pump housings.

- Resists vibration
- Single part – clean and easy to apply
- Can be used on all sizes of fasteners – reduces inventory costs
- Seals threads allows through-hole tapping

High Strength

0753	Volume Millilitres
LOC-267380	10
LOC-232515	50
Tech Sheet 67930	

276 Threadlocker High Strength Fast Fixture

- High strength, even on passive metals
- European gas approval (EN 751-1)
- Excellent chemical and thermal resistance of cured product
- Reliable cure even at low temperatures

0753	Volume Millilitres
LOC-1266117	50
Tech Sheet 67931	

577 Thread Sealant

Particularly suitable for all coarse metal threads. Suitable for past applications at low temperatures e.g. outdoor plant maintenance. Carries the German DVGW Approval (No.96.04e 125). Tested in accordance to EN 751-1. Meets BS 6956 type B for sealing gas fittings

- Replaces hemp/tapes and pastes
- Liquids ensure complete contact between threads provides 100% seal
- Liquids will not creep, shrink or block systems (including filters) by shredding
- Disassembly can be achieved easily with normal tools

General Purpose

0753	Volume Millilitres
LOC-229342	50
Tech Sheet 68057	

542 Thread Sealant

Particularly suitable for fine threaded fittings as used in hydraulic and pneumatic installations and small fittings in general. Carries the German DVGW approval (No.96.02E 125). Tested in accordance to EN 751-1. Meets BS 6956 type A for sealing gas fittings

- Replaces hemp/tapes and pastes
- Liquids ensure complete contact between threads provides 100% seal
- Liquids will not creep, shrink or block systems (including filters) by shredding
- Disassembly can be achieved easily with normal tools

Hydraulic & Pneumatic

0753	Volume Millilitres
LOC-135483	10
LOC-267431	50
LOC-267432	250
Tech Sheet 67932	

2701 High Strength Oil Resistance

- For the high strength locking and sealing of studs, nails and bolts
- Vibration proof
- Ideal for use on inactive substrates and/or where maximum resistance to hot oil is required

0753	Volume Millilitres
LOC-234853	50
Tech Sheet 67933	

SEALANT, RETAINER, SUPER GLUE & TAPE

LOCTITE[®]

572 Low Strength Slow Cure Pipe Seal

- This product is designed for the locking and sealing of metal pipes and fitting
- The product cures when confined in the absence of air between close fitting metal surfaces and prevents loosening and leakage from shock and vibration
- The thixotropic nature reduces the migration of liquid product after application to the substrate

0753	Volume Millilitres
LOC-229360	50
Tech Sheet 67941	

574 Flange Sealant

- Seals close fitting joints between rigid metal faces and flange
- The product cures when confined in the absence of air between close fitting metal surface
- Provides resistance to low pressures immediately after assembly of flange
- Typically used as a form-in-place gasket on rigid flanged connections e.g. gearbox and engine casings, etc.
- The thixotropic nature reduces the migration of liquid product after application to the substrate

0753	Volume Millilitres
LOC-267437	50
LOC-234573	250
Tech Sheet 67942	

518 Flexible Fast Cure

- This product is a single component, medium strength, anaerobic sealant which cures when in the absence of air between close fitting metal surface
- Typical applications include sealing close fitting joints between rigid metal faces and flange
- Provides resistance to low pressures immediately after assembly of flange
- Typically used as a form-in-place gasket on ridged flanged connections, e.g. gearbox and engine casings, etc.
- The thixotropic natures reduces the migration of liquid product after application to the substrate

0753	Volume Millilitres
LOC-229875	50
Tech Sheet 67943	

5400 Health & Safety Pipe Sealant

- No hazard symbols, no risk phrases
- White material safety data sheet
- No need for COSHH assessment
- WRAS Approved

0753	Volume Millilitres
LOC-1545634	50
LOC-1546964	250
Tech Sheet 67944	

603 Retainer

Particularly suitable for retaining close fitting cylindrical parts (up to 0.1mm gap), and for use on cylindrical fitting parts where thorough degreasing is not possible. Tested and approved for use on bearings.

- High and moderate strength products – can carry high loads and eliminate fretting
- Fill all voids – prevent corrosion
- Reduce the need for close tolerances
- 100% contact – load and stress is distributed evenly over the joint

For Retaining Cylindrical Parts

0753	Volume Millilitres
LOC-229873	10
LOC-135280	50
Tech Sheet 67945	

638 Retainer

Particularly suitable where dynamic axial and radial loads are present. Recommended for retaining shafts, gears, pulleys and similar cylindrical parts.

- High and moderate strength products – can carry high loads and eliminate fretting
- Fill all voids – prevent corrosion
- 100% contact – load and stress is distributed evenly over the joint

For Retaining Cylindrical Parts

0753	Volume Millilitres
LOC-234795	50
Tech Sheet 67946	

641 Bearing Fit Retainer

Particularly suitable for retaining parts such as bearings, and when later dismantling will be needed.

- High and moderate strength products – can carry high loads and eliminate fretting
- Fill all voids – prevent corrosion
- Reduce the need for close tolerances
- 100% contact – load and stress is distributed evenly over the joint

Power Tape

Power Tape is no ordinary multi-purpose cloth tape. Manufactured to include advanced tape technology, three power layers are combined to form an outstanding, heavy-duty, fabric-reinforced power tape.

Power Tape is 100% weatherproof* and uses a unique super strong adhesive that sticks firmly to most surfaces offering up to 50% stronger adhesion than standard cloth tapes.

Power Tape is suitable for both interior and exterior use, and has hundreds of uses around the home, garden, garage and workplace.

*Not suitable for total immersion in water.

Not intended for permanent repairs.

ADHESIVES

LOCTITE[®]

435 Instant Adhesive

- A rubber-toughened adhesive with increased flexibility and peel strength, along with enhanced resistance to shock
- The product provides rapid bonding on a wide range of materials including metals, plastic and elastomers, as well as porous and absorbent materials like wood, paper, leather and fabric

Clear Toughened

0753	Volume Grams
LOC-871787	20
Tech Sheet 10367	

401 Adhesive

Particularly suitable for bonding rubber and plastics.

- Fixtures in seconds
- Clear bond line – good cosmetic appearance
- Versatile – dissimilar materials can be bonded
- High strength – often giving a bond stronger than the materials being bonded
- Small parts bonding

Instant Bonding

0753	Volume Grams
LOC-135428	20
Tech Sheet 67934	

454 Instant Adhesive

- Designed for the assembly of difficult-to-bond materials which require uniform stress distribution and strong tension and/or shear strength
- The product provides rapid bonding of a wide range of materials including metals, plastics and elastomers
- This product is particularly suited for bonding porous or absorbent materials such as wood, paper, leather and fabric
- The gel consistency prevents adhesive flow, even on vertical surfaces

Gel

0753	Volume Grams
LOC-195678	20
Tech Sheet 67935	

406 Adhesive

Particularly suitable for difficult-to-bond rubber or plastics, e.g. polyethylene, polypropylene, PTFE, or thermoplastic rubbers such as Santoprene.

- Fixtures in seconds
- Clear bond line – good cosmetic appearance
- Versatile – dissimilar materials can be bonded
- High strength – often giving a bond stronger than the materials being bonded
- Small parts bonding

Terason MS939

A gun-grade, one-component adhesive/sealant based on silane modified polymers, which cures by reaction with moisture to an elastic product. It can be used for elastic bonding of metals and plastics, elastic, interior and/or exterior seam and joint sealing.

- Pasty and thixotropic
- 1-part, low modulus, flexible
- UV resistant, sag-resistant
- Non-corrosive and free of solvents
- Isocyanates, silicones and PVC

new product

Blow Guns

Features:

The FT Pro ASG-1 safety air blow gun has been developed to comply with all aspects of the OSHA standard for compressed air used for cleaning.

This standard reads: 'Today, the most common way to comply to this standard is to fit a tamper-proof regulator set at 29 PSI ahead of the blow gun. However, this is costly and can only be used when also using a safety nozzle'.

The FT Pro ASG-1 safety air gun provides an extremely cost effective solution; it is designed with Venturi holes in the nozzle which increase air volume and allow air to escape if the nozzle is dead-ended. This specially designed feature ensures less than 30 PSI passes through the nozzle, complying with the standard set by OSHA.

In addition, all the internal components are brass, ensuring a rust-free operation. Blow gun repairs are not necessary as O-rings are self-lubricating, preventing valve leakage.

 **Working Temperature:**
-32°F to +275°F

 **Maximum Working Pressure**
150 PSI

Automotive Tools

To ensure the optimum operation of your cooling system it is important to secure that the coolant is not polluted with abrasive particles and foreign materials.

With the **Jet Flusher** you can flush the whole system without use of solvents and harsh chemicals. It uses a combination of water and compressed air, which increases the water pressure without damaging the surface.

The **Jet Flusher** is equipped with individual adjustment for both air and water flow, which easily can be set for the required output.

- Effective flushing of cooling systems - without solvent or harsh chemicals
- Individual adjustment for both air and water flow
- Combines water and compressed air for increased efficiency
- Multi-functional - possible to change the nozzle

Features:

- Effective flushing - without use of harsh chemicals
- Multi-functional - replaceable nozzle
- Individual regulations of both air and water flow
- Great mobility

 **Maximum Working Pressure:**
6-10 bar 87-145 PSI,
min 200 L/min

Jet Flusher

new product

The **Jet Washer** is a powerful washing gun which allows you to wash effectively without damaging the surface with high pressure.

The combination of compressed air and water gives ideal conditions for washing, where more power, than a regular water supply can provide, is needed.

The **Jet Washer** is designed to allow operators to come close without getting wet. There is no splash back.

- Effective cleaning without damage and splash back
- Multi-functional - possible to change the nozzle to the Jet Flusher nozzle
- Adjustable air and water flow
- Great mobility - built-in swivel
- Perfect for cleaning hard to reach places

Features:

- Effective cleaning
- No splash back
- Multi-functional - possible to change the nozzle
- Adjustable air and water flow

BLOW GUNS

ERGO Blow Guns

Design-engineered in the UK, with comfort and style in mind, this range has the PCL DNA running right through it, from handle to tip. A sturdy product made from durable plastic that looks and feels good in your hand, it replaces the current 'best' range of blowguns, building on the high quality and performance for which PCL is renowned.

Blow Gun with Standard Nozzle

7002	Airflow	Sound	Conformity
BG7001	11.8 cfm/334 L/min	94 dBA	N/A

Designed to reduce the risk associated with noise exposure.

Low Noise Blow Gun

7002	Airflow	Sound	Conformity
BG7006	9.8 cfm/277 L/min	80 dBA	EU/2003/10/CE

Ideal when increased airflow is required.

TURBO Blow Gun

7002	Airflow	Sound	Conformity
BG7008	18.4 cfm/521 L/min	114 dBA	OSHA 1910.95 OSHASTD 1-13.1

Ideal when a larger dispersal of air is required.

Aircurtain Blow Gun

7002	Airflow	Sound	Conformity
BG7005	8.8 cfm/249 L/min	94 dBA	OSHA 1910.95 OSHASTD 1-13.1

Features

- Newly designed air release valve built into the body, enabling trigger/air flow to be feathered
- Re-enforced webbing – Robust design gives strength and confidence
- Easy to store with multiple hanging points
- 1/4" BSPP female brass inlet for increased durability

Extended Conical Nozzle allows the operator to reach small areas.

Blow Gun with Extended Nozzle

7002	Airflow	Sound	Conformity
BG7002	11.8 cfm/334 L/min	94 dBA	N/A

Safety valve restricts airflow to the recommended 2 bar eliminating user error.

2 bar Regulated Safety Blow Gun with Standard Nozzle

7002	Airflow	Sound	Conformity
BG8001	8.9 cfm/252 L/min	90 dBA	EU/2003/10/CE

Safety valve restricts airflow to the recommended 2 bar eliminating user error.

2 bar Regulated Safety Blow Gun with Extended Nozzle

7002	Airflow	Sound	Conformity
BG8002	8.9 cfm/252 L/min	90 dBA	EU/2003/10/CE

Ergo Extreme Blow Guns

Design-engineered in the UK, with comfort and style in mind.

Features

- Newly designed air release valve built into the body, enabling trigger/air flow to be feathered
- Re-enforced webbing – Robust design gives strength and confidence
- Easy to store with multiple hanging points
- 1/4" BSPP female brass inlet for increased durability
- Additional cushioning with a flexible, rubber grip on the handle, which also offers increased strength

Blow Gun with Standard Nozzle

7002	Airflow	Sound	Conformity
BG7501	11.8 cfm/334 L/min	94 dBA	N/A

Extended conical nozzle allows the operator to reach small areas.

Blow Gun with Extended Nozzle

7002	Airflow	Sound	Conformity
BG7502	11.8 cfm/334 L/min	94 dBA	N/A

Designed to reduce the risk associated with noise exposure.

Low Noise Blow Gun

7002	Airflow	Sound	Conformity
BG7506	9.8 cfm/521 L/min	80 dBA	EU/2003/10/CE

Safety valve restricts airflow to the recommended 2 bar eliminating user error.

2 bar Regulated Safety Blow Gun with Standard Nozzle

7002	Airflow	Sound	Conformity
BG8501	8.9 cfm/252 L/min	90 dBA	EU/2003/10/CE

Ideal when increased airflow is required.

TURBO Blow Gun

7002	Airflow	Sound	Conformity
BG7508	18.4 cfm/521 L/min	114 dBA	OSHA 1910.95 OSHASTD 1-13.1

Safety valve restricts airflow to the recommended 2 bar, eliminating user error.

2 bar Regulated Safety Blow Gun with Extended Nozzle

7002	Airflow	Sound	Conformity
BG8502	8.9 cfm/252 L/min	90 dBA	EU/2003/10/CE

Ideal when a larger dispersal of air is required.

Aircurtain Blow Gun

7002	Airflow	Sound	Conformity
BG7505	8.8 cfm/249 L/min	94 dBA	OSHA 1910.95 OSHASTD 1-13.1

BLOW GUNS

Metal Blow Gun with Safety Nozzle

This robust blowgun with 1/4" BSPP air inlet is manufactured from high quality die-cast alloy for a long, trouble-free life.

7002	Description
BG106	1/4" BSPP Inlet

Palm Blow Gun

The robust palm blowgun with 1/4" BSPP air inlet is manufactured from high quality die-cast alloy and is supplied with a safety nozzle and conical nozzle.

Features

- 1/4" Female connection
- Max W.P: 10 bar
- Airflow: 247 L/min (8.9 cfm)

7002	Description
BG605	Blow Gun with Safety & Conical Nozzle

Palm Blow Gun 9" Extension Nozzle

BGN466 extension nozzle. 9" extension will screw directly into the BG605 blow gun.

7002	Description
BGN466	9" Extension to Suit BG605

Pistol Grip Blow Gun with Safety Nozzle

PCL's 1/4" BSPP pistol grip blowgun is manufactured from high quality die-cast alloy, giving the tool a long trouble-free life. Supplied with a conical and safety nozzle.

7002	Description
BG405	1/4" BSPP Inlet

Plastic Blow Gun

Manufactured from chemical and impact resistant acetal resin, PCL's range of entry level 1/4" BSPP pistol grip plastic blowguns are suitable for use with both air and water.

7002	Description
BG5002	Blow Gun with Standard 100mm Nozzle
BG5007	Blow Gun with 9" Extension Nozzle

Plastic Blow Gun with Safety Nozzle

PCL's entry level 1/4" BSPP pistol grip plastic blowgun is suitable for use with both air and water. It features an innovative safety nozzle design which ensures the airflow cannot be blocked.

7002	Description
BG5004	1/4" BSPP Blow Gun

Water Dispenser

Designed to dispense water in such applications as a radiator or windscreen water bottle filler. The sturdy design incorporates a lever for instant flow and cut-off.

7002	Description
RF104	Water Dispenser

For Hand Protection
see pages 1756-1758

BLOW GUNS & AIR NOZZLES

Fully meets the EU Machine Directive's noise limitation requirements and OSHA's safety regulations.
A = nozzle length.

Silvent Safety Air Guns

Fitted with a Laval nozzle, this gun provides superior cleaning performance and optimal utilization of the compressed air.

1/4" BSPP 007-L Series Air Gun, Stainless Steel Laval Nozzle

0165	A mm
SIL-007-L	94

SIL-007-Z-1000	1000

Tech Sheet 20785

Pro One's specially designed nozzle makes it possible to combine effective blowing power and a low noise level. Pro One's unique design reduces the turbulence that is generated when blowing with compressed air. This means the noise level can often be reduced by over 10 dB (A) when blowing.

Blowing Force: 2.8 N (9.9 oz).

Sound Level: 78 dB (A).

Air Consumption: 14Nm³/h (8.2 scfm).

1/4" BSPP Pro One Model, Stainless Steel Blow Guns

0165	A mm
SIL-PRO-ONE	30

Tech Sheet 67994

BLOW GUNS & AIR NOZZLES

Fully meets the EU Machine Directive's noise limitation requirements and OSHA's safety regulations.
A = nozzle length.

Silvent Safety Air Guns

Fitted with a stainless steel Laval nozzle, this gun creates a highly concentrated air stream that moves at supersonic speed.

1/4" BSPP 500-L Series Air Gun, Stainless Steel Laval Nozzle

0165	A mm
SIL-500-L	94
SIL-500-L-250	250
SIL-500-L-800	800
SIL-500-L-1000	1000
Tech Sheet 10748	

Fitted with a new generation of zinc Laval nozzle, this gun has a mix of divergent slots and holes surrounding the central Laval orifice, providing quiet, powerful and laminar air flow. This safety air gun is especially suitable for sweeping large areas or general purpose cleaning of parts and machines. The fin design of the nozzle prevents direct contact with skin.

Sound Level:
78 dB (A).
Maximum Pressure:
0.7 MPa.

1/4" BSPP 501-L Series Air Gun, Zinc Hole Nozzle

0165	A mm
SIL-501-L	30
Tech Sheet 67992	

An air gun with a flat nozzle for applications where the air system needs to strike a wider surface, providing quick and efficient blow-off.

1/4" BSPP 5920 Series Air Gun, Zinc Flat Nozzle

0165	A mm
SIL-5920	92
Tech Sheet 10764	

An air gun fitted with an aerodynamic aluminium nozzle that offers a blowing force equivalent to five conventional air guns.

3/8" BSPP 2000 Series Aluminium Air Gun, Slotted Nozzle

0165	A mm
SIL-2055-A	49
SIL-2055-A-500	513
SIL-2055-A-1000	1013
Tech Sheet 20786	

Silvent Air Nozzles

Fitted with a stainless steel Laval nozzle. A core stream travelling at supersonic speed, surrounded by a protective sheath of air moving parallel to the central jet, makes optimal use of your compressed air. Around the Laval orifice there are divergent slots that generate a quiet, powerful and laminar air stream. The blowing force is approximately five times that of an ordinary air gun.

Despite the high blowing force, both the noise level and air consumption are low. Frequently used in the glass industry, paper mills, foundries, steel mills, etc.

Sound Level: 92.6 dB (A).
Maximum Pressure:
0.7 MPa.

1/2" BSPP 750 Series Heavy-duty, Air Gun & Nozzle, All Stainless Steel

0165	
SIL-755-L	Tech Sheet 67995

The 511 and 512 slot nozzles generate a directed air jet. The nozzles are well suited to all-purpose blowing, and blowing in confined spaces.

Slot Nozzles, BSPP & Metric

0165	Thread	Length mm
SIL-511	1/8"	55.8

Wonder Gun

Wonder Gun is a robust, made of aluminium tool that helps to maintain cleanliness in workplace. It can be used as traditional blow gun as well as vacuum gun sucking contaminants to the bag (sold separately).

BSPP Inlet

0025	Thread
WG-9	1/4"
Tech Sheet 10766	

Wonder Gun Kit

High powered blow or vacuum gun.

Kit consists of:

- 1 x wonder gun
- 1 x dust collection bag
- 1 x round extension nozzle
- Flat nozzle
- 1 x brush nozzle
- 1 x miniature nozzle
- 1 x 1 metre suction hose

BSPP Inlet

Drag-in pump kit

The drag-in pump kit will remove liquids from lathes, milling machines, sumps, etc, including metal chips, in seconds.

Simply attach the kit to a standard, seated 45 gallon drum and connect to an air supply.

- Easy set-up and operation
- Heavy-duty construction
- No moving parts
- Auto shut off

AIR JETS

Air jets use the Bernoulli effect (all aircraft engines) to produce air motion in their surroundings. A small amount of compressed air is forced through an internal ring nozzle above sonic velocity. A vacuum is produced, pulling large volumes of surrounding or free air through the jet.

Multi-channel Flat Fan Nozzle

Powerful air jet, acting upon areas. Low noise level, low air consumption.

Applications: blowing off and blowing out, cleaning, drying, cooling, conveying with air.

BSPP

0025	Thread	Material
60013056AC	1/4"	Plastic/Pom
60028342AC	1/4"	Aluminium

Tech Sheet 20087

Multi-channel Round Jet Nozzle

The multi-channel round jet nozzles of the 600.326 series generate a powerful, circular air jet. The noise level and air consumption remain low even at higher air pressures. The special geometry at the nozzle outlet prevents air penetration into human skin. These nozzles comply with the OSHA standards.

Applications: targeted blowing out and blowing off with compressed air guns.

Reduction of noise level up to 12db(a).

Plastic/Pom

BR-AM75	1/2"	80

Tech Sheet 2046

Strip air movers produce a curtain of air along the length of the application. The strip air mover uses the same Coanda effect utilised in our other air amplifiers.

No moving parts – compressed air from a local production line source can be utilised. Output volumes almost twenty times higher.

Highly efficient – significant compressed air savings can be achieved with short investment paybacks. Low noise levels. Stainless steel options.

Manufactured in any length from a combination of our standard sizes.

Material: aluminium/zinc-plated steel.

Standard Gap: 0.05-0.10mm.

DBA at 5.5 bar: 80

Shims: not required.

Standard Inlet Thread: 1/4" BSPP.

AIR KNIVES & AMPLIFIERS

Neublade Airstrip

The Neublade from Beckair utilises innovative technology developed to give the highest performance, lowest noise and lowest air consumption compared to any other product.

The powerful, whisper-quiet blade of air is ideal for drying, cleaning, cooling or containing in all kinds of process, food and manufacturing applications.

The key to its performance is our flow straightening technology (patent applied for) which provides an exceptionally laminar sheet of air. The low levels of turbulence also mean extremely low noise (65dB).

- No moving parts – the Neublade is maintenance free
- Ultra low air consumption – significantly lower running costs than standard nozzles and strips
- Ultra-quiet operation (typically 65 dB) for an improved working environment
- Easily mounted onto existing installations
- Choice of air entry for maximum flexibility

The Neublade is manufactured from extruded, anodised aluminium and comes complete with quick fit hose connector. Because of the method of construction, we are able to offer the Neublade in any length up to 2m long. Please call our sales team for further information.

Applications

- Drying: printing, paints, coatings, components, conveyor belts
- Cleaning: components, conveyors, instruments lens, dust removal, waste removal
- Cooling: components
- Air curtain: fume containment, heat containment from ovens and furnaces

How Neublade can reduce your operating costs

Type of Airstrip	Type of Airstrip		Noise Level Db(A) at 1M	Power Required kW SLPM	Running Costs per Year*
	SLPM	SCFM

Ringjet Air Amplifier

Ringjets air amplifiers are bladeless, motorless fans which can be used for cooling, extracting, drying and ventilating in process, food and manufacturing industries.

Using a small volume of compressed air as the power source, Ringjets utilise the 'Coanda' effect to draw larger volumes of ambient air into the device to amplify the air flow by up to 25 times

- No moving parts – Ringjet is maintenance free
- No electricity required – safe to use in wet locations
- Adjustable flow control using air gap and inlet pressure
- Energy efficient – low running cost
- Low cost
- Quiet operation (less than 80 dB (A))
- Also available in stainless steel

Applications

- Cooling: components, mouldings, extrusions, people, components on test
- Extraction: fumes, water, dust, waste material
- Drying: components, printing, material

AIR KNIVES & AMPLIFIERS

Ringjet Air Conveyors

Ringjets air conveyors are bladeless, motorless fans which connect to flexible hose and are ideal for conveying and extracting all kinds of materials in process, food and manufacturing industries. Using a small volume of compressed air as the power source, Ringjets utilise the 'Coanda' effect to draw larger volumes of ambient air into the device to amplify the air by up to 25 times. Ringjet conveyors are capable of moving material over long distances and this can be increased by adding additional conveyors into the line.

- No moving parts – Ringjet is maintenance free
- No electricity required – safe to use with liquids and wet material
- Adjustable flow control using air gap and inlet pressure
- Energy efficient – low running cost
- Ideal for conveying over long distances
- Quiet operation (less than 80 dB (A))

Applications

- Conveying: plastic pellets, waste removal, food products, pills and tablets, small components, dust, liquids, paper trim
- Extraction: fumes, liquids, dust, waste material

Airmiser Nozzles

The Airmiser uses a series of annular nozzles instead of a single hole to create a safer, more efficient, lower noise alternative to open tubes and pipes. A small volume of compressed air is amplified up to 25 times by utilising the 'Coanda' effect to induce a higher flow of ambient air into the air stream.

Because of the risk of serious injury from compressed air entering the bloodstream from single open pipes at high pressure, the multi-nozzle arrangement of the Airmiser is designed to be much safer alternative.

Replacing open jets with Airmisers will give significantly reduced air consumption and lower noise levels and, in most cases, it is a simple operation to install Airmiser nozzles. Airmisers are suitable for use individually or in multiple arrays to create a much greater effect.

- No moving parts – Airmiser is maintenance free
- Low air consumption – significantly lower running costs than open holes and pipes
- Quieter operation (below 80 DB (A) at 1m) for an improved working environment
- Easily mounted onto existing installations

AIR KNIVES & AMPLIFIERS

Pneu-Power Air Conveyors

The Beckair Pneu-Power is a bladeless, motorless fan which connects to flexible hose and gives high vacuum or high flow for conveying and extracting all kinds of materials in process, food and manufacturing industries. Using a small volume of compressed air as the power source, the Pneu-Power utilises the 'Coanda' effect to draw larger volumes of ambient air into the device to amplify the air flow by up to 25 times

The Pneu-Power has very high performance and is capable of moving material over very long distances. The Pneu-Power is extremely robust, being manufactured from cast aluminium and is designed for use in harsh environments. For applications where extraction only is required, the silencer (supplied) diffuses the air and reduces the noise from the device.

- Type A offers higher flows, type B offers higher suction
- No moving parts – Pneu-Power is maintenance free
- No electricity required – safe to use with liquids and wet material
- Adjustable flow control using air valve and inlet pressure
- Energy efficient – low running cost
- Quiet operation (less than 80 dB (A))

Applications

- Conveying tank filling/emptying, hopper loading, powder, granules, swarf removal, dust, liquids
- Extraction fumes, liquids, dust, waste material

Clustajet Ventilators

Clustajet ventilators are a compressed air operated fan which utilise our Ringjet technology to create a robust, maintenance free, high performance ventilator.

Because the Clustajet uses compressed air, no electrical supply is needed making it suitable for safe use in damp or wet locations.

Multiple Ringjets are positioned inside a steel casing to create a space rocket jet effect which gives the unit its high performance. For a given airflow, Clustajets are lighter in weight and smaller than equivalent electric fans.

- No moving parts – Clustajet is maintenance free
- No electricity required – safe to use in damp or wet locations
- Adjustable flow control using the control valve
- Standard Clustajets are manufactured from a strong welded steel casing
- Other options include:
 - Plastic
 - Flexible hose

- ### Applications
- Extraction: welding fumes, solvent vapours, dust
 - Ventilating: confined spaces, tanks, sewers, tunnel
 - Cooling: components, pipework

807CL	1"

Tech Sheet 1168

This mechanical fuel meter has a flow rate of 20-120 L/min, with a resettable 4 digit totaliser, and a non-resettable 8 digit totaliser, which registers up to 9,999,999.9 Litres.

Features:

- Aluminium metering chamber with polybutylene nutating disk.
- 1" inlet/outlet
- Accuracy +/-1%

8 Digit Non-resettable

0122	J1581400
------	----------

Tech Sheet 2141

Features:

- Measures diesel, kerosene and petrol.
- Oval gear design.
- Low pressure drop allows for gravity and pump (in-line) applications.
- Supplied with a wire mesh strainer.

BARREL PUMPS

Piston Oil Pump

- With 1.5m outlet hose, anti-drip 13mm 90° spout, nozzle storage facility.
- Designed to fit awkward access filler points.
- 2" BSPM male thread, pumps on down stroke.

0225	To Suit
J9023SE	20 & 25 Litre Drums

Gear Oil Bucket Pump

- With fully reversible hand rotary pump, clear PVC hose and nozzle.
- 10.5L approx.
- Robust steel base with hard powder coated finish as standard.
- Delivers and retrieves.

0225	Volume Litres
AG000SE	10.5

Syphon Pump

0225	To Suit
J2653	205 Litre Barrels

Manual Syphon Pumps

- Suitable for pumping most liquids: acids, alkalines, antifreeze, de-greaser, distilled water, diesel, biodiesel B100, light oils and solvents.
- Includes delivery hose and suction pipe.

HPS25 fits 5-25L containers, delivery hose 534mm (21"), suction 380mm (15").

HPS205 fits 205L container, thread 2" BSPM, delivers 30 L/min, delivery hose 1295mm (51"), suction 850mm (33.1/2").

Drum Pumps

0225	To Suit
HPS25	5-25 Litre Drum
HPS205	205 Litre Drum

Battery Operated Syphon Pump

- Unique battery operated pump (2 x D size batteries not supplied).
- Suitable with water, diesel, HVO, light oils & mild / non corrosive chemicals.

Flow Rate: 4 - 7 L/min

Suction Tube: 375mm (15").

Discharge Tube: 660mm (26").

Total Length: 675mm (27").

SRG2A.KIT

Description

1" BSP Hand Pump Kit

MANUAL TRANSFER PUMPS

Gear Oil Pump

- Suitable with high viscosity oils, ideal for filling gear boxes. Telescopic suction tube 300 - 500mm.
- Polypropylene pump, mild steel piston and nitrile seals.
- Dispenses approximately 100ml per stroke.
- Has a 1.5m outlet hose with spout.
- Spout can be drained by locating back into pump body.
- Supplied with 2 adaptors as standard. One fits most 25L external Plysu threads (60mm dia). The other fits most 25L Trisure/Valorex thread (56mm dia).

Option: Universal adaptor, locks onto any external thread that is less than 61mm dia.

0225	Description
HPGO	Pump
ADAPT.UNIL	Adaptor

Oil Suction Gun

For getting oil in/out of gearboxes, transfer cases and differentials.

- Suitable for use with non corrosive liquids.
- Capacity 500cc with 300mm PVC hose.
- Deluxe lip seal provides maximum suction.
- Steel barrel in pre-oxidized powder coat finish.
- Fully serviceable.
- No priming required.

0225	Description
OSG	

Liquid Suction/Extraction Units

- Novel device that both sucks and stores extracted liquids.
- Suitable for fuels, water, oils and many other liquids.

Removes: Oil from vehicles, lawn mowers, motorbikes, hydraulic reservoirs without draining, simply insert the suction pipes in the dipstick hole. Water from bunded fuel tank cabinets, fish tanks, bilges and otherwise inaccessible areas. Fuel spillages from bunded tank fill point cabinets.

- Can even suck up surface puddles.
- Prime the handle and watch it work.
- Supplied with suction probes to fit most applications.
- Lightweight and portable. 17 litre version has castors.
- When full, remove top plug to pour out the contents.

A must have for any engineers/site van multipurpose pump.

DOSING PUMPS

MixRite 3.5 Series

Tefen's MixRite line of water driven proportional dosing pumps, are used to ensure precise additive injection directly into the air or liquid line under various flow rates, feed ratios and different ranges of pressure.

Features

- Mixes additive and water precisely
- The dosage can be adjusted easily and quickly
- Repair is simple and inexpensive
- Key internal parts are from the highest quality material available (Hastelloy spring, Viton Rubber seal)

Working Temperature:
4°C to +40°C

Maximum Working Pressure:
8 bar

High Speed Battery Diesel Pump Kits

- Suitable with diesel, HVO or biodiesel up to B30.
- Maximum Flow: 70 L/min. 12V.
- 1" BSPF inlet and outlet flanges.
- PIUSI Direct drive vane pumping unit with bypass valve.
- Switch, 4m long battery cable and crocodile clips.
- Weatherproof for outdoor use.
- Maximum run time: 30 mins.
- Kit includes 7m suction/delivery hose and strainer.
- Choose manual or automatic nozzle kit.

ELECTRICAL TRANSFER PUMPS

Professional Diesel Transfer Pumps

- Suitable with diesel, HVO and biodiesel up to B30.
- Pumping speeds 50, 80 or 100 L/min. 230V.
- Direct drive, self priming, vane pumping units.
- 1" BSPF ports. Switch and 2m long mains cable.
- Integral filter and bypass.
- Weatherproof to IP55 for outdoor use.
- Continuously rated motor with thermal cut out.
- Full range of spares available.

0225	Voltage	LPM
SPT60A	230V	50
SPT80A	230V	80
SPT100A	230V	100

230V Professional Diesel Pump Kits With Automatic Nozzle

- Suitable for use with diesel, HVO or biodiesel up to B30.
- Manual operated on/off switch.
- Pumping speeds choose 45 or 75 L/min option.
- Meter accuracy of +/- 2%. 4 digit resettable register.
- 8 digit non resettable totaliser.
- Weatherproof to IP55 for outdoor use.
- Integral filter and bypass valve.
- 230V continuously rated motor with thermal cut out.
- 4m delivery hose.
- Supplied with automatic nozzle.
- Self priming pump unit.
- Dimensions 300mm H x 350mm W x 500mm D (including nozzle).

45 Litres per Minute: Ideal to fill cars/vans vehicles with small fuel tanks.

75 Litres per Minute: Ideal to fill vehicles with large fuel tanks.

Oil Delivery

- Mobile oil dispensing units suitable for dispensing oil at medium/high viscosity, for mobile installations and fixed systems at medium distances. The drum trolley allows the system to be moved around the workshop to ease servicing and increase efficiency. All items are available separately or in kit form.

Oil Delivery System

Q225	Description
JOS200	Oil Delivery System with Hose Reel
JOS100	Oil Delivery System without Hose Reel
Tech Sheet 60363	

- Pneumatic oil dispenser equipped with level gauge and delivery gun with flexible end.
- Works autonomously without the requirement of continuous connection to air supply.

Maximum Working Pressure:
10 bar

Oil Delivery System

Grease Filler Pumps

Air Operated Grease Pump Kit

0122

Description

J1708001

Optional Drum Trolley

Grease Guns

A unique single hand operated grease gun of superior quality for the professionals.

The short stroke operation delivers 52,000kPa/7,500 psi/520 bar whilst the flexible extension allows you to access nipples that are normally hard to reach.

The gun can be filled by one of three ways: cartridge, bulk or J2 grease pump.

Features:

- Short stroke operation
- Easy one hand operation
- Flexible outlet with Supergrip KY Coupler
- Delivers 0.8gm per shot
- Filler/bleeder nipple 1/4" BSP (M)

Professional Flexi Grease Gun

0122

K32

A high quality lever grease gun for the professionals. This lever gun is engineered for high pressure greasing providing up to 69,000kPa/10,000 psi/690 bar. The lever gun can be filled by one of three ways: cartridge, bulk or J2 grease pump.

Features:

- Rigid outlet with Supergrip KY Coupler
- Delivers 1.5gms per shot
- Filler/bleeder nipple 1/8" BSP (M)
- Fully repairable

Professional Lever Grease Gun

0122

K40

Tech Sheet 10579

For fast and easy loading of grease guns. The pump allows you to buy greasing more economically whilst the fully sealed system keeps out any contaminants.

Features:

- Suitable for 12.5 kegs
- Delivers 54gms per stroke
- Fully sealed system keeps grease clean

J2 Grease Pump

0122

J2

The P3 power-lube is the ultimate economical, high pressure air powered greasing system. To suit 12.5kg grease pails. At the recommended air pressure of 690kPa/100 psi/ 7 bar the 50:1 ratio air motor provides fast and continuous greasing at 34,500kPa/5,000 PSI/345 bar. The grease pressure can be boosted to 69,000kPa/ 10,000 psi/690 bar simply by squeezing the gun trigger several times.

Features:

- Non corroding air motor
- 4m delivery hose
- Handles up to NLG1 No2 greases
- Delivers 460gms of grease per minute
- Suitable for 12.5kg grease kegs

P3 Air Operated Power-Lube

0122

P3

Tech Sheet 10580

The P6 Maxi-Lube is the ultimate in economical high pressure air powered greasing systems. To suit 50kg grease pails. 690kPa/100 psi/7 bar the 50:1 ratio air motor provides fast and continuous greasing at 34,500kPa/5,000 psi/345 bar. The grease pressure can be boosted to 69,000kPa/10,000 psi/690 bar simply by squeezing the gun trigger several times.

Features:

- Non corroding air motor
- 4m delivery hose
- Handles up to NLG1 No2 greases
- Delivers 460gms of grease per minute
- Suitable for 50kg grease kegs

P6 Air Operated Maxi-Lube

0122

P6

Refillable Bearing Lubricator

The refillable automatic bearing lubricators are high quality, mechanical, chemical and thermal resistant. Designed to provide constant lubrication to bearings, bushings, joints, articulated joints or wherever constant greasing is required.

Features:

- Supplied with medium tension springs
- Suitable for all types of grease NLGI 0-1-2-3-4
- Setting dial (1, 3, 6 and 12 months) supply duration

Material Body: Transparent lexan

Working Temperature:
-30°C to +132°C

Maximum Working Pressure: 200 psi

Grease Pumps

GR.H12.L High pressure, direct feed grease pump. Fits directly onto 12.5Kg keg. Rubber edged follower plate. 1.2m high pressure outlet hose. 4 jaw connector. GR.BFILL.L Low pressure high volume grease pump. Pumps grease up to NGLI2, fits 12.5kg kegs. 1.2m outlet hose and quick release female connector.

High Pressure

0225
GR.H12.L

Low Pressure

0225
GR.BFILL.L

For filling grease guns with bulk grease, up to NGLI2. Fits directly onto 12.5kg kegs. Fills grease guns fast. Enables you to buy grease in bulk, saving money.

Grease Gun Filler Pump

0225
GR.GGFILL.L

Mobile Grease Dispensers

50:1 ratio air operated grease pump. 4 wheeled trolley. 4m of 1/4" bore delivery hose. Grease gun complete with straight swivel. GR.AM12.5C fits 12.5kg grease keg. 280mm diameter drum cover. 265mm diameter follower plate. GR.AM50C fits 50kg grease keg. 385mm diameter drum cover. 370mm diameter follower plate.

0225	To Suit
GR.AM12.5C	12.5kg Keg
GR.AM50C	50kg Keg

Grease Control Gun & Accessories

For use with air operated grease pumps. Inlet connection 1/4" BSPF straight swivel. Supplied complete with rigid spout and flexible outlet hos with 4 jaw connection. Option Z swivel. Spare straight swivel available.

Grease Gun

0225
GR.AGUNC

1/4" Z Swivel

0225
GR.ASWIVC

1/4" Straight Swivel

0225
GR.ASWIVS

High Volume Side Lever Grease Gun

Designed for ease of use with min effort that any gun can offer. Delivers 1.1/2 times more grease than most grease guns and generates pressure up to 10,000 psi (690 bar). Machined to precision tolerances (die cast head, 1.2mm barrel). Accepts either 400cc cartridges or 500cc bulk fill. Supplied with rigid spout 4 jaw connector and bulk filling load .

0225
GR.G3HV

High Volume Pistol Grip Grease Gun

Industrial pistol grip/one handed grease gun. Used for greasing in confined spaces/restricted access. Unique variable stroke feature allows increased pressure from short strokes and high volumes from full strokes (7500 psi 517 bar). Machined to precision tolerances (die cast head, 1.2mm barrel). Accepts either 400cc cartridges or 500cc bulk fill.

Supplied with 225mm flexible spout and 4 jaw connecto . Fitted with unique bulk filling load , doubles as an air bleed.

0225
GR.G6HV

Grease Fitting Unblocker

Opens clogged grease fittings/loosens hardened grease joints. Maintains and protects bearings, control arms, joints, king pins etc. Tap with a hammer to force light viscosity oil through the tool into the coupler and finally into the grease joint - breaking up and removing dirt and debris. Built in hand guard for added safety. Flexible hose attachment reaches fittings in difficult areas. Comes with a grease coupler for connection onto the grease fitting and 2 spare piston|seal for replacing as they wear out.

0225
GR.FU

Portable Greasing System

Ideal for heavy plant and site use. Foot operated. Suitable for grease up to and including NLGI 2. Foot operated by pressing on the spring loaded system. Hose is then charged with grease ready for dispensing. A single charge dispenses 30 shots of grease. Super dispensing gun has high pressure and high volume settings. High pressure 0.45gm per shot, high volume 1.25gms per shot. High pressure feature is useful to open blocked grease fittings. Comes with drum cover (dia 216mm) rubber lined follower plate, 1.5m hose and 5kg plastic grease bucket/drum.

Lubrication & Pumping Equipment

Three inch air motor, provides more power to create better flow.

NXT Air Valve, designed to reduce icing in continuous use applications and uses less air than competitive pumps for better efficiency. Easy to repair or replace without tearing down internal pump components for less downtime.

Modular air valve, air inlet and exhaust locations are easy to configure with just four bolts for simple, hassle free installations.

Built-in thermal relief and inlet strainer, built-in thermal relief protects your equipment from thermal expansion without the need to buy and install an additional kit.

Inlet strainer (oil only) is built-in to protect pump from contaminants that can damage your pump.

Connections:

Air line 1/4" BSP

Fluid outlet 1/2" BSP

Inlet 1" BSP

900mm plastic down tube (can be cut down as required).

Workshop Manual Pressure Test Pump

Designed for pressure testing hoses, pipework radiators and boilers etc. Can use with water or oil for testing. Comes with a gauge to monitor the pressure in the line. Fills the line you are testing with fluid from the reservoir. Comes complete with 2m delivery hose.

- 1/2" BSPM connector.
- Brass pump with anodised aluminium piston
- Housed in a 5 litre capacity steel reservoir
- Delivery per stroke: 12cc

Maximum Working Pressure:
209psi (20 bar).

QUICK, CLEAN AND SAFE OIL CHANGES

WHAT ARE THE ADVANTAGES OF THE FEMCO DRAINAGE SYSTEMS?

- The Femco oil drain plug reduces downtime
- You can drain oil at engine temperature, safely
- You can drain oil in an environmentally friendly way, because oil spillages are prevented
- Oil is contained from sump to container
- Eliminates the risk of stripped threads
- Tool-less oil changing; all you need is the drain hose

HOW DOES THE FEMCO OIL DRAIN PLUG WORK?

- 1) Remove the dust cover from the drain plug
- 2) Screw the Femco drain connector with hose onto the drainage system
- 3) The fluids are captured and flow straight to the container

WHICH OIL DRAIN PLUG SUITS MY APPLICATION THE BEST?

Femco produces a lot of oil drain plugs and they are all specialised for different applications.

- The Standard oil drain plug is installed when there is enough space available
- The Compact oil drain plug is used where space is restricted
- The Click Drain is used for a large number of vehicles
- The XL oil drain plug is used to drain a large amount of oil
- The Quick Drain is used for stationary machinery

WHERE CAN I FIND AN OIL DRAIN PLUG IN THE RIGHT SIZE?

Femco has a product range covering over 500 thread types and sizes. We can also make custom thread sizes. Please call us; we can help you to find the right size.

WHAT ARE THE DRAIN PLUGS MADE FROM?

All our oil drain plugs are made from solid brass.

CAN I USE A FEMCO OIL DRAIN PLUG IN COMBINATION WITH AN OIL EXTRACTOR PUMP?

All Femco oil drainage systems can be connected with an oil extractor pump.

CAN I PERFORM AN OIL CHANGE WHILE THE OIL IS STILL HOT?

All Femco oil drain plugs are produced from solid brass and can be used to drain oil at engine temperature.

IS IT POSSIBLE TO DRAIN FLUIDS OTHER THAN OIL?

The Femco oil drain plugs can be used to drain all kinds of fluid such as engine oil, coolant, gearbox oil and hydraulic oil.

WHAT HAPPENS IF I GET WATER IN MY FUEL TANK?

Femco drain plugs are ideal for draining condensation from fuel tanks.

HOW DO I PERFORM AN OIL CHECK?

Femco has produced various sampling nipples to make it easy to check the viscosity of the oil.

HOW CAN I CHANGE THE OIL IN A DIFFICULT-TO-REACH PLACE?

Femco can provide you with angled and extended drain connectors or special adaptors to drain oil even in the tightest spaces.

CAN A FEMCO OIL DRAIN PLUG BE FITTED WITH A MAGNET?

All Femco oil drain plugs can be provided with a magnet, which can be inspected after draining the oil.

WHO DOES FEMCO ALREADY SUPPLY?

Femco already supplies their drainage systems to companies like:

QUICK OIL DRAIN PLUGS

Standard Drain Plugs

The Standard Drain – the original Femco® oil drain plug – was introduced in 1983 to change oil in a quick, clean and environmentally friendly way. The Standard Drain is manufactured out of 100% brass, which makes it easy to change hot oil. Additionally, the oil drain plugs are fitted with a dust cover and a double O-Ring, which protect the plug and ensure a reliable performance.

Application: Engine oil, hydraulic oil, gearbox oil, coolant, lubricating oil

Material: Brass outside and inside, stainless steel spring

Valve: Brass with Viton O-Ring/valve

Dust Cap: Brass, thread size LB: M26 x 1.5/SB: 22 x 1.5

Dust Cap Seal: NBR O-Ring

Body Seal: Viton O-Ring

Working Temperature:
-20°C to +200°C

QUICK OIL DRAIN PLUGS

Compact Drain Plugs

The Compact Drain is the smallest Femco® oil drain plug, and is the perfect choice for oil changes in tight spaces. The Compact plug only extends 12 millimetres from the sump, and is often used in vehicles with a low ground clearance such as cars, buses and motorcycles. You can install the compact plug on any vehicle without worrying about the available space.

Application: Engine oil, hydraulic oil, gearbox oil, coolant, lubricating oil

QUICK OIL DRAIN PLUGS

Click Drain Plugs

The Click Drain enables you to perform quick, clean and environmentally friendly oil changes. The Click Drain is manufactured out of solid brass. This material is heat resistant, ensuring you can safely change hot fluids such as engine oil. You can use the oil drain valve without using any specialist tools. In addition to this, it is easy to take oil samples using the Click Drain. The Click Drain oil drain valve also incorporates a locking system to ensure an effective seal, creating a clean working environment.

Click Drain plugs make oil changes on your vehicles and machines quick and easy. This oil drain system consists of a plug and a clicker. When it is time for an oil change, you simply click the clicker onto the plug to start draining the oil. The Click Drain plug is often used in combination with the Femco® oil extractor pump, and is the ideal solution for small maintenance tasks on fleets of vehicles

Applications: engine oil, hydraulic oil, gearbox oil, coolant, lubricating oil
Material: brass outside and inside, stainless steel spring
Valve: Brass with viton O-Ring/valve
Dust Cap: brass, thread size LB: M26 x 1.5/SB: 22 x 1.5
Dust Cap Seal: NBR O-Ring
Body Seal: Viton O-Ring

Advantages of the Quick Drain oil drain valve:

- Reduction of downtime
- Easy operation
- Clean oil changes
- Change hot oil safely
- No tools required
- Easy way to sample oil

Working Temperature:
 -20°C to +200°C

TANK LEVEL GAUGES

Tank Gauge - Ideal For Domestic Tanks

- Reads the oil level and sends the reading to an indoor receiver
- Suitable with diesel, HVO, kerosene, oil, biodiesel, water, antifreeze and Adblue®
- The plastic tank is up to 100 litres deep, easy to retrofit
- The transmitter needs a 20mm or 32mm hole on top of the tank
- No power required at the gauge, has a long-life lithium battery
- Comes with an electronic receiver that plugs into a 230V socket
- Receiver can be up to 200 metres away from the tank
- Tank level is displayed in ten graduations

0225	Length Metres
APOL1	3

Tank Gauge - Remote Reading

- Simple hydrostatic tank contents gauge
- Suitable with diesel, biodiesel, HVO, oils, water and Adblue®
- UNITOP suits tanks from 0.9 metre to 3.2 metre high
- Probe has 1/2" NPT thread for fitting
- Readout can be sited up to 20 metres away from the tank
- Shows percentage of full tank contents
- Calibrate on site to suit tank
- Pull the plunger and release to show tank contents

0225	Description
UNITOP	Rectangular/Cylinder Tanks

Tank Gauge - Float

- Suitable for diesel, heating oil, lube oils or water, antifreeze and biodiesel up to B100.
- Gauge provides a simple, rough indication of tank contents
- Shows EMPTY 1/4, 1/2, 3/4 or FULL
- Mounts directly into the top of tank
- Accuracy +/- 5%
- Now suitable with HVO.

0225	Thread	Length Metres
FG4E	1.1/2"	1.2
FG6E	1.1/2"	1.8

Tank Gauge - Float

- Only use on oil and fuel drums. The float has a polyethylene construction which allows it to be used with a wide range of liquids including water, coolants etc.
- The indicator is fitted with a display marked from 0 to 210 litres. Reversing the display gives graduations from 0 to 55 gallons.
- Note that this is not a precise measuring device. The gauge is only to give an approximate level of liquid in the drum to know when to arrange a new drum.

WATER GUN

NiTO Ergo Water Gun

Hot-water gun with an elegant design with focus on ergonomics, quality and functionality. The shape ensures a thermal protection of the handle. The trigger is protected against unintentional activation for safety, and can be locked for prolonged use. Infinitely variable flow regulation optimises the water quantity, whatever the task. Made of impact-resistant composite material with a high resistance to chemicals.

Heavy-duty Foam Injection Bottle

- Heavy-duty foam injection bottle connects easily to your existing pressure washer lance or gun.
- Foam bottle sprays foam all over the vehicle creating the "snow bath effect".
- 1/4" BSPP male inlet connection.
- 1 litre bottle.
- 1/4" x 1/4" adaptor removable for ease. Other adaptors can be fitted.
- Variable angle spray pattern nozzle.
- Adjustable detergent displacement.

PRESSURE SPRAY EQUIPMENT

Pressure Sprayers

Mesto is a European market leading manufacturer of professional cleaning equipment and has been providing innovation for the industry since 1919.

Product description:

- Tank: Plastic, with filling scal
- Seals: FPM
- Nozzle: Plastic, adjustable

Applications:

- Construction work
- Cleaning industry
- Professional pest control
- Handicraft

Special features of the product:

- Safety valve

° Maximum Working Temperature:
+30°C

Maximum Working Pressure:
3 bar

UNIVERSAL PLUS, Hand Pump Sprayer

0465	Capacity Litres	Material
3132PG	1.5	Polyethylene
Tech Sheet 60139		

Product description:

- Tank: Plastic with filling scal
- Seals FPM (Viton®)
- Nozzle: Plastic, adjustable
- Plastic jacket wand to protect the non-return valve

Applications:

- Foaming cleaning industry

Special features of the product:

- Safety valve
- Specially coated spring

° Maximum Working Temperature:
+30°C

Maximum Working Pressure:
3 bar

FOAMER, Heavy-duty Hand Pump

0465	Capacity Litres	Material
3132FO	1.5	Polyethylene
Tech Sheet 60140		

Large selection of models for various application are available on request.

BEFORE USE, CHECK CAREFULLY WHETHER THE MATERIAL IS RESISTANT TO THE LIQUID BEING USED.

PRESSURE SPRAY EQUIPMENT

Compression Sprayers

Mesto is a European market leading manufacturer of professional cleaning equipment and has been providing innovation for the industry since 1919.

Device description:

- Tank: Plastic with large pressure reservoir
- Carried at the side
- Seals: FPM (Viton®)
- Nozzle: adjustable plastic nozzle
- Spray wand: Plastic, 48 cm, 360° rotatable
- Hose: 2.0 m, transparent oil resistant

Applications:

- Construction work
- Cleaning industry

 **Maximum Working Temperature:**
+30°C

 **Maximum Working Pressure:**
3 bar

Special features of the product:

- Professional pump
- Integrated dirt filter

FIX PLUS, Professional

0465	Capacity Litres	Material
3237FM	5	Polyethylene
Tech Sheet 60141		

Device description:

- Tank: Plastic, with large pressure reservoir
- Carried at the side
- Seals: FPM (Viton®)
- Nozzle: Plastic flat jet nozzle
- Spray wand: Plastic 48 cm, 360° rotatable
- Hose: 2.0 m
- Ergonomically formed shut-off valve with fine filter

Applications:

- Cleaning industry
- Vehicle cleaning
- Disinfection
- Corrosion protection
- Impregnation

 **Maximum Working Temperature:**
+40°C

 **Maximum Working Pressure:**
3 bar

Special features of the product:

- Professional pump with specially coated piston rod
- Large filling funnel
- With specially coated spring

CLEANER, Heavy-duty

0465	Capacity Litres	Material
3270PP	10	Polyethylene
Tech Sheet 60142		

Device description:

- Tank: Stainless steel
- Carried on the back – padded carrying straps
- Seals: FPM (Viton®)
- Nozzle: Brass flat jet nozzle with fine filter
- Spray wand: Brass 50cm, 360° rotatable
- Hose: Spiral hose 2.5 m with safety interlock

Applications:

- Construction work
- Cleaning industry
- Professional pest control

COMMERCIAL & DOMESTIC VEHICLE CLEANING EQUIPMENT

Vehicle Brushes

The shape design gives more cleaning productivity, as the brush is in constant contact with the surface, when used as either a waterfed or a dip brush.

Hi-Lo Waterfed Brush

0143	Description
VIK-524752	Rubber Edged

Effective all surface water-fed bodywork brush for large areas, up to 3 metres in height.

Bodywork Brushes

0143	Width mm	Description
VIK-475552	250	Rubber Edged
VIK-475752	400	-

Brush for cleaning wheel rims on trucks and buses.

Wheel Brush

0143	Width mm
VIK-545252	230

Hand Waterfed Brushes

0143	Length mm
VIK-525452	350

Vehicle Brush Handles

Handles to suit all vehicle brushes.

Vehicle Brush Handles

0143	Length Metres	Description
VIK-299152	1.5	Waterfed Handle
VIK-297352	1.5-2.75	Telescopic Waterfed Handle
VIK-297552	1.5-2.75	Telescopic Handle

Cleaning Brushes

- Features on/off water control and quick connect attachment.
- Ideal for cleaning vehicles, boats, paintwork and conservatories.

Telescopic Car Cleaning Brush

0088	Length mm
TOOL-719788	1070-1760

PUMPS & PROCESS EQUIPMENT

Air Operated Double Diaphragm Pumps

Typical Applications:

- OEMs
- Printing
- Wastewater
- Plating/surface finishin

Typical Fluids Handled:

- Waterborne materials, some HHC's
- Paints, coatings, inks and dyes
- Car wash chemicals
- Laundry chemicals and detergents
- Chemicals

Features:

- 1/4" (6.35 mm) end-porting
- Low-cost, compact design
- Spring check valves for superior priming in any mounting configuratio
- True-formed PTFE and Santoprene diaphragms for enhanced performance
- Can also be remotely-controlled using an external controller
- Delivery up to 5 gpm (18.93 L/min)

Husky 205, BSPP

0074	Body	Balls	Diaphragms
D11021	Acetal	Acetal	PTFE
D12096	Polypropylene	Polypropylene	Santoprene

Typical Applications:

- Drum transfer for fluids up to 1000 centipoise
- Circulation of low viscosity inks, stains and dyes
- Coolant circulation and evacuation
- Waste fluid removal
- On-demand batch chemical metering
- Low viscosity adhesive supply
- Consistent low pressure air spray or HVLP supply

Typical Fluids Handled:

- Paints
- Lubricants
- Inks
- Stains
- Solvents
- Coatings
- Dyes

Features:

- 3/8" (9.52 mm) end porting
- Fully-groundable acetal model
- Operates on as little as 20 psi (1.4 bar, 0.14 MPa) air pressure
- Delivery up to 7 gpm (26.5 L/min)
- Easy-to-service air valve and ball checks
- Quiet operation – 75 dBA at 50 psi (3.5 bar, 0.35 MPa) and 60 cpm

Husky 307, BSPP

0074	Body	Seats	Balls	Diaphragms
D3A211	Acetal	Acetal	PTFE	PTFE
D3B911	Polypropylene	Polypropylene	PTFE	PTFE
D3B955	Polypropylene	Polypropylene	Hytrel	Hytrel
D3A255	Acetal	Acetal	Hytrel	Hytrel

Typical Applications:

- Machine lube servicing
- Drum evacuation
- Plating and dip tanks
- Water treatment

Typical Fluids Handled:

- Cleaning fluids and detergent
- Chemicals
- Ceramic glazes
- Inks
- Solvents and flammable
- Acids and bases

Features:

- 1/2" (12.7 mm) centre-porting and 3/4 in. (19.05 mm) end-porting
- Quiet running – less than 85 dBA with easy-to-use remote muffler capability for even lower noise levels
- No seals to leak or fail
- High flow rates in a small, portable packag
- Can also be remotely-controlled using an external controller
- Delivery up to 15 gpm (56.88 L/min)

Husky 515, BSPP

0074	Body	Seats	Balls	Diaphragms
D5B911	Polypropylene	Polypropylene	PTFE	PTFE
D5A211	Acetal	Acetal	PTFE	PTFE
D5A277	Acetal	Acetal	Buna	Buna

Tech Sheet 10288

Typical Applications:

- Machine lube servicing
- Cleaning fluids and detergent
- Plating and dip tanks
- Water treatment

Typical Fluids Handled:

- Oil
- Water
- Most solvents

Features:

- 3/4" (19.05 mm) centre and end-porting
- Quiet running – less than 85 dBA with easy-to-use remote muffler capability for even lower noise levels
- High flow rates in a small, portable packag
- No seals to leak or fail
- Can also be remotely-controlled using an external controller
- Delivery up to 16 gpm (60.87 L/min)

Husky 716, BSPP

0074	Body	Seats	Balls	Diaphragms
D5C277	Aluminium	Acetal	Buna-N	Buna-N
D5D311	Stainless	Stainless	PTFE	PTFE

Tech Sheet 10288

Air Operated Double Diaphragm Pumps

Typical Applications:

- Drum fluid transfe
- Unloading fluid
- Bilge pumping
- Chemical evacuation
- Dewatering and sump evacuation
- Tank and sump drainage

Typical Fluids Handled:

- Chemicals
- Contaminated surface water
- Adhesives, varnishes, dispersions, solvents and stains
- Resins, latexes, wood preservative stains, concrete and primers

Features:

- 1" (25.4 mm) ANSI end-porting
- High flow – 50 gpm (189 L/min) in a compact, portable size
- Fluid pressure to 120 psi (8.6 bar, 0.86 MPa)
- E-coated centre section for corrosive environments
- Equipped with an effective and reliable air valve system
- Can also be remotely-controlled using an external controller

Husky 1050, BSPP

0074	Body	Seats	Balls	Diaphragms
647121	Aluminium	Geolast	Geolast	Geolast
647109	Aluminium	Stainless	PTFE	PTFE

Typical Applications:

- Filter press
- Tank stripping
- Bilge pumping
- Sand and ball mill pumping
- Oil transfer and oil skimming
- Chemical plating

Typical Fluids Handled:

- Latex
- Corrosive fluid
- Acids: hydrochloric, ferric, sulfuric, nitric and phosphoric
- Slurries: petroleum, lime, clay, ferrite, salt/brine and pumice
- Sludge: secondary and clarifie
- Pottery slip

Features:

- 1.1/2" (38.1 mm) ANSI end-porting
- High flow – 100 gpm (378 L/min) in a compact, portable size
- Fluid pressure to 120 psi (8.4 bar, 0.84 MPa)
- Lube-free operation
- Patented, high-reliability "closed centre" air valve is "online" serviceable
- Epoxy-coated air section for tough environmental conditions
- Can also be remotely-controlled using an external controller

Husky 1590, BSPP

0074	Body	Seats	Balls	Diaphragms
DBC666	Aluminium	Geolast	Geolast	Geolast
DBD311	Stainless	Stainless	PTFE	PTFE
DB2911	Polypropylene	Polypropylene	PTFE	PTFE

Typical Applications:

- Drum fluid transfe
- Bulk fluid suppl
- Chemical evacuation
- Ground water and sump evacuation
- Waste fluid remova
- Tank and bilge drainage
- Slurry and sludge transfer
- Filter press feed

Typical Fluids Handled:

- Acids, alkalies, solvents, suspensions, dispersions, electroplating baths, paints, varnishes, resins, latex, adhesives, effluent sludge and stabiliser
- Ship cleaning and stripping chemicals

Features:

- 2" (50.8 mm) ANSI end-porting
- Larger ports for more flow – up to 150 gpm (568 L/min)
- Fluid pressure to 120 psi (8.4 bar, 0.84 MPa)
- Lube-free operation
- Patented, high-reliability "closed centre" air valve is "online" serviceable
- Epoxy-coated air section for tough environmental conditions
- Can also be remotely-controlled using an external controller

Husky 2150, BSPP

0074	Body	Seats	Balls	Diaphragms
DFC666	Aluminium	Geolast	Geolast	Geolast
DFC666	Aluminium	Santoprene	Santoprene	Santoprene
DF2911	Polypropylene	Polypropylene	PTFE	PTFE

Typical Applications:

- Chemical transfers
- Filter press-feed
- Dewatering

Typical Fluids Handled:

- Chemicals
- Bulk paint resins
- Ceramic slip

Features:

- 3" (76.2 mm) ANSI centre porting
- Bolted leak-free flanged connections – no clamp bands used
- Easy air valve maintenance
- Large flow paths can handle high viscosities
- Heavy-duty construction
- Fluid flow up to 275 gpm (1040 L/min)

Husky 3275, BSPP

0074	Body	Seats	Balls	Diaphragms
652021	Aluminium	Stainless	PTFE	PTFE

MISTING SYSTEMS - PUMP KITS

Direct Drive Kit

This kit range includes a 1,000 psi Fogco direct drive misting pump with either a flexible nylon, pre-fabricated copper or stainless steel tubing mist line, a filter assembly with water supply connections, plus all of the necessary fittings and components to complete a mist system installation for the listed lengths. These Fogco misting kits include a direct drive 230V mist pump and a standard brass and stainless steel misting nozzle with 24" spacing.

MISTING SYSTEMS - PUMP KITS

Pulley Drive Kit

This kit range includes a 1,000 psi Fogco pulley drive misting pump with either a flexible nylon, copper or stainless steel tubing mist line, a filter assembly with water supply connections, plus all of the necessary fittings and components to complete a mist system installation for the listed lengths. These Fogco misting kits include our pulley drive 230V mist pump and our standard brass and stainless steel misting nozzle with 24" spacing.

MISTING SYSTEMS - PUMP KITS

Direct Drive Pump

The 50Hz direct drive mist pump range are medium duty outdoor rated units, designed to operate at 70 bar for 8 hours per day, seven days a week under normal operating conditions. This range is ideal for light to medium duty mist applications. These pumps provide quality components in a small and convenient platform.

This mist pump range is available in 230V and includes:

- Direct drive pump
- On/off switch
- Inlet solenoid
- Adjustable regulator with bypass thermal relief valve
- Glycerine filled pressure gauge
- Rubber isolation feet
- Filter assembly

Key:

LPM: Litres per minute

HP: Horse power

Pulley Driven Pump

The 50Hz pulley drive mist pumps are industrial duty outdoor rated units, designed to operate at 70 bar for 24/7 use, under normal operating conditions. This range is ideal for industrial and commercial applications that includes UL compliant thermal and short circuit protection, as well as a low water pressure cut-off switch.

This mist pump range is available in 230V and includes:

- Pulley drive pump
- Exhaust fan
- Panel mount switch
- Inlet solenoid
- Adjustable regulator with bypass thermal relief valve
- Hour meter
- Glycerine filled pressure gauge
- Rubber isolation feet
- Filter assembly

MISTING SYSTEMS - FANS

Revolution

The **Revolution** misting fan provides improved evaporative cooling and humidification, compared to traditional misting fans. Its unique design allows a more uniform distribution of the fog and improved absorption of the moisture.

By integrating a focused horizontal air stream into the fog, the water droplets can cover more surface area. This allows the mist system to cool or humidify up to 5 times the amount of air, compared to static line misting systems. This mist fan can cover up to 3,600 sq.ft. or 36,000 cu.ft.

This misting fan is available in 230V and uses 0.8 amps. The unit includes a stainless steel fog ring with 10 nozzle fittings

230V Ceiling Mount Fan

9583	Fan Specification		Weight Kg	Dimensions cm		
	HP	FLA		L	W	H
93820	0.25	0.9	18.1	61.0	61.0	25.4

Revolution II

The **Revolution II** misting fan is a smaller version of the **Revolution** and provides improved evaporative cooling and humidification. Its unique design allows a more uniform distribution of the fog and improved absorption of the moisture.

Similar to the **Revolution**, integrating a focused horizontal air stream into the fog, the water droplets can cover more surface area. This allows the mist system to cool or humidify up to 5 times the amount of air compared to static line misting systems. This mist fan can cover up to 900 sq.ft. or 9,000 cu.ft.

This misting fan provides 250 cfm and is available in 230V and uses 0.12 amps. The unit includes 10ft of 18 gauge insulated power cord, 10ft of flexible high pressure feed line and a rustproof treated and powder coated housing with a 6 nozzle stainless steel fog ring. Custom fog rings are also available.

Ceiling Mount Fan

9583	Fan Specification		Weight Kg	Dimensions cm		
	HP	FLA		L	W	H
94820	0.25	0.12	2.0	30.5	30.5	8.9

Key:

HP : Horse power
FLA : Full load amperage

Direct Delivery to Mainland UK only. All include a 2-3 day delivery charge for Mainland UK.
For Next Day Delivery, please contact our sales office for a quote.

Evolution Mini

The **Evolution Mini** does not include the cannon shaped housing, so it requires a shorter distance for the absorption of the fog compared to the projection that is capable with the standard **Evolution**.

Because of this characteristic, the **Evolution Mini** is well suited for low ceilings and restricted or confined applications. Due to the reduced noise level and low profile design, this fan can be used in an office or warehouse environment

The **Evolution Mini** uses a single misting nozzle but multiple nozzle configurations are also available, if increased moisture is required.

The **Evolution Mini** requires a 6 Watt 12V DC power supply. Once the unit is wall mounted, with the provided bracket, it can be adjusted both horizontally and vertically.

The power supply includes a DIN rail and is designed to be mounted in a cabinet or enclosure.

12V DC Wall Mount Fan

9583	Weight Kg	Dimensions cm		
		L	W	H
93000-12VDC	2.7	24.1	20.3	20.3

MISTING SYSTEMS - AIR INJECTION DRY FOG SYSTEM

The Fogco Air Injection Dry Fog System utilises the proprietary control box, capable of producing over 150 lbs of dry fog per hour. It includes the FOGCOntroller II microprocessor.

The box allows on-site adjustments to the system performance and output. The Drip Free air injection nozzles prevent dripping when the system shuts down and to prevent the water supply from running if there is a loss of air pressure.

The air injection nozzles are capable of producing flow rates from 8 lbs/hr to 16 lbs/hr while providing droplets as small as 1 micron and achieving humidity levels up to 99%. The Fogco Air Injection System requires the availability of compressed air of at least 80 psi and 25 cfm and water pressure of 60 psi to produce the maximum output of 150 lbs/hr.

The system utilises directionally adjustable dry fog nozzles on a magnetic base or hung using an 3/8" mount.

MISTING SYSTEMS - AIR INJECTION DRY FOG SYSTEM

The Fogco line of industrial Slip Lok fittings are rated at 1,500 psi and have been used successfully in industrial applications for over 20 years.

The fittings include a heavy-duty bod , thicker locking ferrule and an over sized viton o-ring. Their unique design allows them to be easily removed, replaced or re-installed anytime after the initial installation. No special tools or crimping procedures are required.

- Standard threads are 10/24 UNC.

MISTING SYSTEMS - ADAPTORS

Standard Mist Nozzle

These misting nozzles are available in brass with stainless steel orifices. The sizes range from 0.008" to 0.020" with flow rates from 0.020 gpm to 0.055 gpm

- Spray patterns vary from 60° to 90°.
- Standard threads are 10/24 UNC.
- All stainless steel and 12/24 UNC are available on request.

Brass

9583	Orifice Size Inches	LPM	Spray Pattern	O-Ring Colour	Weight g	Dimensions cm

93520	0.020	0.208	90°	Green	9.1	2.5	1.0	1.0

Cleanable Anti-drip Nozzle

All cleanable misting nozzles include an anti-drip adaptor. This range is available in brass with a stainless steel orifice or all stainless steel design. The sizes range from 0.006" to 0.020" with flow rate from 0.01 gpm to 0.045 gpm.

- Spray patterns from 45° to 85°.
- Larger orifice sizes and different threads are also available as special order items.
- Standard threads are 10/24 UNC.
- All stainless steel and 12/24 UNC are available on request.

For Knee Protection
...see page 1759

MISTING SYSTEMS - ADAPTORS

The nozzle adaptor range includes extensions, clusters and adaptors to provide more options in the designing and installation of a mist system. Clusters allow 3 or 5 nozzles to be placed in a single nozzle fitting. Extensions allow the fog to be directed in a specific wa , while extending the fog up to 12 inches from the line.

Nozzle Extensions

MISTING SYSTEMS - FILTERS

Filtration is highly recommended for every mist system. Fogco offer a full range of filter cartridges and housing. From their smallest 'hose end' calcium inhibitor filter to the larger 10" filter housing with varying micron cartridges

Fogco's filter range also includes a special phosphate cartridge for the 10" filter housing. This cartridge helps eliminate the adverse effects of calcium and dissolved solids present in the water supply.

For very high flow rates, Fogco offers an increased capacity filtration option that includes a larger housing and a dual stage cartridge. This filter housing include 1" ports for maximum flow.

MISTING SYSTEMS - CONTROLLERS

FOGController

The FOGController is a 2 zone 24V AC microprocessor that accepts input from two separate sensors. The controller has 5 independent programmable relays that can control a series of fans, zone valves, and pumps.

The controller also includes a programmable time delay NC contact that can be used to terminate all output signals from the controller if a defined condition develops with the system.

The humidity settings range from 30% to 99% with a hysteresis range between 1 and 9. The temperature settings range from 70° to 99° with a hysteresis range between 1 and 9. The standard sensor will have an accuracy of +/- 2% from 10% to 70% humidity. It is recommended that the high humidity sensor be used for applications requiring humidity levels above 70%.

- The controller requires a 50 Watt 24V AC transformer as a power supply.

2 Zone Microprocessor

9583	Weight g	Dimensions cm		
		L	W	H
92910	454	15.2	8.9	5.7

FOGController II

The FOGController II is a humidity controller, with an internal humidity sensor that provides automated operation of a fog system. The unit can operate based on its internal sensor or can be fitted with an external sensor for high humidity applications.

The humidity settings range from 10% to 99% with a hysteresis range between 1 and 5. It is recommended to use the external sensor for humidity levels above 50% and our high humidity sensor for humidity levels above 70%.

The FOGController II is a single zone microprocessor and has two output relays with a programmable delay start and stop.

The internal and external sensors are fully calibrated re-flow humidity sensors with digital output that send binary data over RS485 protocol. The sensor will have an accuracy of +/- 2%.

- The controller requires a 50 Watt 24V AC transformer as a power supply.

Tech Sheet 71793

AEROPRO

ENGINEERED FOR PROFESSIONALS

FEATURES & BENEFITS

Design: attractive, lightweight and comfortable composite grip handle.

Quality: designed with superior technology, manufactured with precision and high quality to deliver more power and a longer life.

Robust: heat treated components for increased durability, fully hardened planetary gears and reduced friction for extended tool productivity.

Warranty: 12 months manufacturer's warranty.

www.aeropro-eu.com

PNEUMATIC POWER TOOLS

SAFETY TIPS:

A few tips to increase safety awareness and help avoid accident and injury in the workplace.

(These are not a substitute to the AEROPRO safety/instruction manuals.)

VISUAL INSPECTION PRIOR TO USE

Conduct a visual check of the tool, including hoses and fittings for signs of damage/excess wear or defect parts. Ensure tool is fully oiled.

USE THE CORRECT ACCESSORIES

Always use recommended accessories with **AEROPRO** tools, e.g. never use hand sockets with impact wrenches. Always disconnect air supply prior to changing an accessory.

SAFETY WEAR

Always adhere to workplace safety workwear regulations. In addition when operating equipment always wear goggles and ear plugs as well as gloves, apron, helmet and dust mask when required. When working with materials that may produce harmful airborne particles, use other equipment such as dust extractors to control exposure.

MAINTAIN A SAFE WORKING AREA

Make other people aware of your working area and ensure they are kept at a safe distance. Clear your floor space keeping it free of trip hazards, trailing hoses, etc. Direct exhaust gases away from yourself and others, do not use in explosive atmospheres and always keep away from electrical wiring.

Pneumatic Power Tool Accessories

PNEUMATIC POWER TOOLS

AEROPRO
ENGINEERED FOR PROFESSIONALS

Ratchet Wrenches

- Designed with superior technology and manufactured with precision and high quality to deliver more power and a longer life
- Ball bearing mounted air motor produces enough power for most requirements
- Fully hardened planetary gears reduce friction for extended tool productivity
- Comfortable composite grip handle
- Ball socket retainer provides fast and easy socket replacement
- Heat treated components for increased durability
- Lightweight aluminium body
- Compact head design allows flexibility in tight areas
- Forward/reverse lever located behind the ratchet head for quick change of direction
- Side exhaust
- Recommended air pressure: 90 PSI

Air Impact Wrenches

- Twin hammer mechanism has two identical hammers that deliver an instantaneous balanced blow, reducing vibration and transferring more torque to the drive than any other mechanism on the market
- Provides more power and smooth balanced blows
- Screened filter air inlet keeps dirt and debris from damaging the tool
- Rear exhaust
- Recommended air pressure: 90 PSI

2 in 1 Air Nailer & Stapler

- Strong and lightweight aluminium die-casting gun body
- Multidirectional exhaust port directs air away from the operator and work surface
- Hardened one piece drive blade for professional application
- Teflon O-ring to protect the piston from wearing
- Tool free depth-of-drive adjustment for exact setting of nail head
- Adjustable knob for either sequential or contact firin
- Designed for Ga18 style nails and staples up to 50mm in length
- Includes nailer, wrenches, oil, operating manual and rugged carrying case

HVLP

High volume, low pressure (HVLP) spray guns are designed similar to conventional spray guns, the only difference being that unlike conventional spray guns, which operate under high pressure, HVLP spray guns operate at a much lower pressure.

- Offers a more accurate way of spray painting, with less chance of overspray
- Produces a more thick and consistent quality of paint finish
- Less pollution compared to conventional spray guns
- Consumes less materials down to minimising overspray

LVLP

Low volume, low pressure (LVLP) spray guns are designed to work similar to the HVLP spray guns but to consume less air than the HVLP and used mainly in more intricate spraying on smaller areas. Used in auto painting and spraying of furniture, etc.

- More intricate spraying
- Low volume of air is utilised to finely atomize paint creating a very smooth finish
- Increased prevention of overspray and material wastage

Spray Guns

- Stainless steel needle and nozzle to accommodate a variety of coatings
- Brass air cap and adjustable knob
- Includes adjustable fluid, pattern and air control
- Designed to provide equal atomisation and particle size for all kinds of surface painting
- Lightweight, ergonomic design and easy trigger pivot to reduce operator fatigue

Lite Air Tools

Key Product Benefits:

- Ergonomic design for comfort,
- Lightweight materials
- Ready for immediate use
- Comes complete with cleaning brush and hose tail piece

Key Product Features:

- Tank capacity: 750cc
- Operating pressure: 3 to 4 bar
- Air consumption: 4.2 to 7.1 cfm
- Nozzle size: 1.5mm
- Pattern width: 140 to 180mm
- Body and canister material: aluminium

Lite Suction Spray Gun

7000

AIR TOOLS

Impact Wrenches

Features:

- DYNA-PACT oil bath clutch
- One handed push button forward/reverse with four positive power settings
- Full power in reverse
- Compact and ergonomic with rubber handle
- 425ft-lbs (576Nm) of maximum torque in reverse

Benefits:

- Clutch delivers smooth operation and extreme durability
- Versatile and powerful tool ideal for all general repairs and maintenance applications

1/2" Super Duty

0219

CP734H

Tech Sheet 3071

Features:

- 3/4" impact wrench with ring retainer
- DYNA-PACT oil bath clutch
- Single handed reverse button with four power settings
- Comfortable handle grip

Benefits:

- General maintenance
- Smooth operation with DYNA-PACT clutch
- Comfortable use with low noise and vibration levels
- Good durability

3/4" Super Duty

0219

CP772H

Tech Sheet 60253

Features:

- Steel front cover and aluminium body
- One hand operation forward/reverse by either left or right handed users
- Easily adjustable for either right or left handed operation
- Three setting positions
- Length: 4.4" (112mm)
- Jumbo hammer

Benefits:

- Best power to weight ratio: 306ft-lbs (415Nm)
- Ultra compact
- Easy to use
- Durable

0219

CP7732

Tech Sheet 60252

Durable and Powerful:

- Maximum torque: 1,250Nm in reverse
- Working torque: 102-786Nm
- Includes rechargeable torch

Features:

- 922ft-lbs (1,250Nm) of maximum torque in reverse
- Durable aluminium back housing
- Insulated and comfortable grip with rubber-injected composite housing
- Universal and durable twin hammer mechanism

Benefits:

- Maximise work efficiency with great power
- Most powerful 1/2" impact wrench in the range
- Extremely fast run down for quick work
- Reduced operator fatigue

1/2" Composite

0219

CP7748

Tech Sheet 60251

Features:

- 1" straight impact wrench with 6" extended anvil
- 1,920ft-lbs (2,600Nm) of maximum torque in reverse
- Pinless, closed, reinforced rocking dog impact mechanism
- Dual socket retention, hole and friction ring
- Ergonomic side handle
- Full teasing trigger
- Regulator with integrated forward/reverse, with three position power settings in both directions

Benefits:

- Highly efficient yet economical motor with durable reinforced clutch mechanism
- Durable impact wrench with great power for the toughest jobs on heavy vehicles

1" Heavy-duty

0219

CP7782-6

Tech Sheet 60196

AIR TOOLS

Drills

Features:

- Compact low profile head to get in to confined space
- Reverse valve for easy directional change
- High performance gearing for extended durability

Benefits:

- Compact angle head drill
- Operator control from start up through run down
- Ideal for drilling and screw driving in confined area

3/8" Angle Drill

0219

CP879

Tech Sheet 3074

Features:

- Fast and efficient at 2,900rpm
- Industrial quality Jacob's chuck
- Ergonomic grip

Benefits:

- Productivity and durability
- Maximise operator comfort
- Power suitable for many applications

3/8" Pistol Drill, Heavy-duty

0219

CP9285

Tech Sheet 3076

Ratchet

Features:

- 1/2" ratchet
- Compact head design
- Hardened gears

Benefits:

- Good durability
- Easy grip reverse for simple directional changes

1/2" Ratchet

0219

CP886H

Tech Sheet 60202

Riveters

Features:

- Compact size and composite body
- 3/16" maximum capacity
- Heavy pulling: up to 1,900lbs (865kg)
- Low vibration and low noise level
- Includes: 3/32", 1/8", 5/32" and 3/16" (2.4, 3.2, 4 and 4.8mm) nose pieces

Benefits:

- Broad applications coverage
- Durable, reliable and easy to service
- Maximise operator comfort

3/16" Riveter, Heavy-duty

0219

CP9883

Tech Sheet 3092

Features:

- Air riveter for general maintenance
- Compact size
- 3/16" maximum capacity
- For rivets in aluminium, copper and softer materials
- Heavy pulling: up to 2,200lbs (1,000kg)
- Transparent container with holes for quick release of rivet ends
- Includes nose pieces for rivets: 3/32", 1/8", 5/32" and 3/16" (2.4, 3.2, 4 and 4.8mm)

Benefits:

- Simple construction for easy maintenance
- Great for trailer panels, number plates, and any type of panels maintenance

General Purpose Riveter

0219

CP9882

Tech Sheet 60205

Grinders

Features:

- Keyless adjustable protective guard
- Aluminium alloy housing
- Helical bevel gear design
- 5" (125mm) wheel capacity
- M14 spindle thread
- 0.8hp (600W) governed motor
- Ergonomic side handle

Benefits:

- Suitable for general maintenance applications
- Lightweight but rugged housing
- Durability and performance

5" Angle Grinder

0219

CP9121AR

Tech Sheet 60204

Features:

- 3mm and 1/8" collets included
- Very low noise level – only 71dB(A)
- Good power/size ratio with 60,000rpm high free speed

Benefits:

- Extremely easy to handle, quiet and lightweight
- Ideal for tight access application

Compact Pencil Grinder

0219

CP9104Q

Tech Sheet 3084

Features:

- Powerful 0.8hp (600W) motor
- Adjustable protective guard and aluminium alloy housing
- Spiral bevel gears
- Ergonomic side handle

Benefits:

- Excellent for weld preparation and smoothing, rust removal, deburring and blending of steel, cast iron and aluminium
- Lightweight but rugged housing
- Durability and performance

4" Angle Grinder, Heavy-duty

0219

CP9120CR

Tech Sheet 3089

Features:

- Efficient and powerful 0.32hp (240W) motor
- Low noise level: 80dB(A)
- Easy access speed regulator
- Compact and ergonomic grip
- Rear exhaust
- 1/4" and 6mm collets included

Benefits:

- Maximised operator comfort
- Performance and power
- Increased precision for best operator control
- Ideal for confined access applications

Compact In-line Die Grinder

0219

CP9105QB

Tech Sheet 3086

AIR TOOLS

Sanders

Features:

- PSA sanding pad
- Insulated grip and lock-off throttle to prevent accidental start-ups
- Power regulator for precise control

Benefits:

- Excellent for blending and smoothing filler, feather edging and pre-paint preparation
- Operator comfort

Dual Action Sander

0219
CP870

Tech Sheet 3081

Features:

- Quick change belt replacement
- Adjustable sanding arm
- Handle exhaust and swivel air inlet
- Rubber moulded grip

Benefits:

- Excellent for paint removal, weld sanding, smoothing and rust removal in tight areas
- Operator comfort

Belt Sander

0219
CP9779

Tech Sheet 3083

High Speed Cutter

Features:

- Wheel diameter 2.7/8"
- Adjustable speed regulator
- Safety lever to prevent accidental start up
- Rear exhaust

Benefits:

- Ideal for cutting through composite, sheet metal, bolts, etc.
- Precise and safe control

High Speed Cutter, Standard Duty

0219
CP874

Tech Sheet 3095

Hammer Kit

Features:

- Heavy-duty pistol grip hammer
- Standard .401 round shank
- Internal muffler minimises exhaust sound
- Unique vibration damping
- Teasing trigger for slow start-up

Benefits:

- Maximise operator comfort and control
- Smooth operation
- Low vibrations to maximise productivity

Kit Includes:

- Four chisels
- One posi-lock retainer
- Heavy-duty case

Hammer Kit, Heavy-duty

Swivel Connector

The MultiFlex swivel is an ingenious multidirectional connector. Connect your tool and the hose will stay in the ideal position however much you and the tool move around. The MultiFlex bends and rotates 360° in all directions while the hose stays straight. It takes the effort out of working in those cramped spaces, the hose feels almost weightless and it reduces hose wear.

Features and Benefits

- Improved ergonomics; less strength is needed to move around tool and hose
- Reduced hose wear
- High flow capacity and low pressure drop
- Strong and durable for long lifetime

Working Temperature:
-10°C to +70°C

Maximum Working Pressure:
10 bar

A complete range of balancers, capabilities from 0.4 to 14kg, available stroke up to 2.5m. To eliminate labour, to cut down idle times, to improve work quality, to reduce hose and cable wear and to avoid both damage to people and tools. For either bench or assembly line jobs, applications ranging from small tools to industrial guns and multiple screwdrivers.

Features:

- Stainless steel cable
- Auxiliary safety suspension
- Adjustable stroke-limiting device
- Adjustable capacity
- Polyamide thimble
- Rugged construction, cast aluminium body
- (Models 2-3) safety device against load dropping due to spring breakage (>3kg)
- Cable guide in anti-friction material

QT Connector for airtight connection

- New cars are fitted with TPMS valves, which requires precise air pressure in the tyre and here the QT Connector is the right solution. It is light and simple to connect and is completely airtight even at 9 bar.
- QT Connector has been tested for over 100,000 activations and is still completely airtight and fully functional.
- You can easily and simply connect the QT Connector to the valve with one push. Pull back the locking ring to release it again.

Tyre Inflator with QT Connecto

1307	Gauge Ø mm
151120-134	63

Precise - Air Boy® eXact

The high measuring accuracy - 0.01 bar combined with the airtight QT-Connector makes the Air Boy® eXact the perfect choice for inflating tyres with TPMS valves.

Durable - Air Boy® eXact

The electronics are protected from impact and the strong construction withstands a free fall from even 2 metres on a concrete floor. Thoroughly tested and approved by Force Technology. Significantly better than the stringent DS/EN 12645:2014 standard for inflating guns. IP65 Approved.

Ergonomic - Air Boy® eXact

The display is easy to read with large numbers and backlighting. Optimal in both left and right hand. Easy to hang from your belt with the inbuilt "eye".

Calibrated - Air Boy® eXact

All guns are individually tested and come together with a calibration certificate. The Air Boy® eXact measures tyre pressures in the range of 0.2 to 10 bar with a resolution of 0.01 bar.

Air Boy® eXact Digital Inflating Gun with QT Connector , 1/4"

1307	Gauge
156100-134	Digital

The QT connector is extremely airtight when connected. No air is leaking from the QT connector - even at 9 bar/130 PSI. A tight connection is a must for an accurate pressure reading and with TPMS sensors on all new cars an accurate measurement is more important than ever.

 **Working Temperature:**
-20°C to +60°C

 **Maximum Working Pressure:**
16 bar, 232 PSI

QT Connector

1307	Connection
116002	Internal 1/4"

TYRE INFLATION EQUIPMENT

PCL's handheld tyre inflation products are recognised internationally as the brand to buy, due to their reputation for speed, safety and ease of use and readability.

AIRFORCE MK4 Air Line Gauges (Open End)

A new and improved version of the highly regarded MK3 tyre inflator.

- Open-end: unvalved (air straight through)
- Hold-on: hold onto valve to inflate
- Clip-on: clip slides down to hold on to valve to inflate
- Supplied with a certificate of calibration

Inflation pressures
up to 138 PSI / 9.6 bar

ACCURA MK4 Digital Tyre Inflator

The ACCURA MK4 tyre inflator marries the ruggedness of a metal analogue inflator with the lightness, accuracy and ease of use of a digital gauge.

Features:

- Extremely robust aluminium body with protective rubber bumper
- Permanently backlit in use, auto off after 25 seconds no-use (easy to read in dark workshops or at night)
- Three units of calibration toggle as standard (PSI, bar and kPa)
- The lightest digital inflator on the market
- Higher pressure range for multiple applications
- Individually tested and certified against national approved gauge

Inflation pressures
up to 250 PSI / 17.2 bar / 1723 kPa

7001	Connection	Hose Length
DAC403	Twin Hold-on	0.53m (21")

PROFESSIONAL TOOLS

RIDGID® pipe wrenches are world-renowned for their unsurpassed toughness and serviceability. The original heavy-duty pipe wrench, pictured here, has earned the confidence of pipe professionals for over 80 years because it does the job right the first time, every time.

RIDGID® pipe wrenches are also available in a wide variety of purpose-built configurations, and are available with cast aluminium handles that offer an average 40% weight reduction.

RIDGID Lifetime Warranty.

Pipe Wrenches

- Sturdy, cast-iron housing
- I-beam handle
- Full floating forged hook jaw
- Self cleaning threads with replaceable hook and heel jaws

Heavy-duty Pipe Wrenches

0494	Ø mm	Length mm	Model	Kg
31020	50	350	14	1.6
31025	65	450	18	2.6
31030	80	600	24	4.4
Tech Sheet 60448				

- Jaws and all other parts identical to RIDGID® heavy-duty wrenches
- All the great benefits of the heavy-duty RapidGrip wrench
- Professional strength in lightweight aluminium
- Nearly 40% lighter than comparable cast iron wrenches
- 35% lighter than heavy-duty models
- Ideal for overhead applications
- Offers the same durability and ease-of-use found in all RIDGID® heavy-duty wrenches

Aluminium Pipe Wrenches

0494	Ø mm	Length mm	Model	Kg

Cutting Tool

PC 116 Powered Tubing Cutter

This 4.5" machine saves time and effort thanks to its fast set-up and operating features:

- Quick size adjustment
- Quick-feeding mechanism
- Spark-free
- Cold cutting

High-strength alloy wheels with tool-free replacement. It delivers consistent and accurate cutting in a wide variety of materials, such as:

- Stainless steel
- Steel
- Coated steel
- Aluminium
- Copper

Press Tools

RP 219 is our Next-Gen 19 kN compact press tool.

Providing the user **FULL ACCESS** in the most confined spaces with its Lightweight (<2 kg) and Ultra-Slim Inline Design as well as the **full flexible 350° Head Rotatio** .

RP 219 also provides the user **FULL ACCESS** to super-fast pressing, critical tool information, multiple power sources and a wide range of 19 kN compact press jaws.

The RP 219 also features 'Press-check!', an integrated pressure sensor that monitors and confirms every press cycle and offers the lowest cost-of-ownership.

RP 219 Kits include: Carrying case, 1 x 2.5 Ah Li-Ion battery and 1x 230V fast-charger, 1 x car charging cord

RP 219 Press Tool

0494	Description	Weight (kg)
69073	RP 219 without Press Jaws	5.2
69078	RP 219 with M15-18-22 Press Jaws	9.2
69083	RP 219 with M15-22-28 Press Jaws	9.2

The **RIDGID RP 350** features a brushless motor capable of over 100,000 press cycles and requires no scheduled maintenance. Get access to hard-to-reach locations with endless 360° swivel. The RP 350 has been upgraded from top to bottom with the most advanced LED interface and lighting.

RP 350-B Tool Kits include: 1 x 2.5Ah battery, 1 x fast-charger and Carrying Case

RP 350 Press Tool

69843	RP 351-B Tool Kit + M15-22-28

The **NEW RIDGID® StrutSlayr** is the latest accessory, making the world's most popular press tool even more valuable. StrutSlayr attaches to RIDGID® 32kN press tools to deliver a fab shop quality, burr-free cut in 5 seconds or less. No grinding or sawing sparks - just a clean, consistent SHEAR cut with a pull of a trigger.

Fab Shop Quality: Burr-free cuts eliminate the need for extra filin

Increased Efficiency: Clean, consistent cuts in 5 seconds or less

Shear Cut: no grinding or sawing sparks

Portable: Easy to move around the job site and mounts to RIDGID TRISTANDS

Built-in Measuring Guide: allows the accuracy of cut-on application.

Strut Shear Head

Pipe/Tube Cutting & Preparation

- Specifically designed for use in restricted spaces on small diameter, hard and soft copper, aluminium, brass and plastic tubing
- Rollers include grooves for close-to-flare cut
- Strong, lightweight slide and wheel housing
- Large knurled feed screw knob gives easy control of cutting pressure for clean cuts
- Models 117 and 118 include a self-feeding cutter wheel that automatically cuts after tightening the knob once (AUTOFEED®)
- Model 118 features a special knob for easier tightening of the feed screw
- Model 101-ML is for multi-layer tubing only

PROFESSIONAL TOOLS

Pipe/Tube Cutting & Preparation

X-CEL® Means Speed

Many of our most popular tubing cutters now include several X-CEL® features to make your job quicker and easier:

- X-CEL® Knob – cut tubing more quickly and easily with our larger, more ergonomic designs
- X-CEL® Wheel Pin – change your cutter wheel quickly using our new ball detent design, no tool needed, no lost clips.
- Spare cutter wheels included for maximum uptime

Enclosed Feed Tubing Cutters, X-CEL Features, for Copper Tube

0494	Capacity mm	Description	Model	Kg
66737	6 - 35	Enclosed Feed Cutter	150L	0.44
33055	6 - 60	Ratcheting Enclosed Feed Cutter	205L	0.91

Tech Sheet 60451

Enclosed Feed Tubing Cutters with New X-CEL® Features:

- Telescoping feed screw design keeps the cutter at the same length regardless of tubing diameter - good for tight spaces
- Enclosed feed screw to eliminate clogging and jamming
- Grooved rollers for close-to-flare cut
- Fold-away reamer
- Now includes X-CEL® Knob and X-CEL® Pin for quicker cutting and wheel replacement
- Made from high-strength zinc alloy
- Spare cutter wheel included in the knob
- Cuts hard/soft copper, aluminium, brass and multilayer tubes

Enclosed Feed Tubing Cutters, X-CEL Features, for Stainless Steel Tube

29963	6 - 35	Enclosed Feed Cutter	150L	0.47
31803	6 - 60	Ratcheting Enclosed Feed Cutter	205L	0.91

Tech Sheet 60451

Pipe Bending Equipment

- Combines accuracy with easy operation
- Designed for bending copper, steel and stainless steel ($\leq 1.5\text{mm}$) to a maximum of 180°
- Offset cushion grip handles for comfort when forming 180° bends
- A 90° start angle and unique oil-absorbing shoe minimise bending effort while forming accurate bends in copper and steel tubing

400 Series Instrument Benders

0494	OD mm	Bend Radius mm	Model	Kg
36112	6	16	406M	0.68
36092	8	24	408M	1.18
36127	12	38	412M	2.45

Tech Sheet 60458

- The stainless steel specialist
- High quality bending performance on stainless steel and other hard tubing such as steel and titanium
- Two-stage design allows for in-place bending from 90° to 180° without ever crossing handles
- Lock/unlock with a half-turn rotation of the bending handle
- Extra long 16" (40cm) handles increase leverage, and roll dies in the bending form reduce force needed
- Vice clamp built into bending form for extra stability

600 Series Heavy-duty Instrument Benders

Tech Sheet 20176

On celebrating 120 years of peak protection Portwest has possessed an unrelenting ambition to produce the world's most trusted and requested protective wear. Through the decades, they have continuously proven their dedication to quality, producing world-beating safety garments, foot protection, hand protection and PPE, while pushing the boundaries in protection technologies.

Technologies that make the workplace a safer place.

INDUSTRY INSPIRED DESIGN

For 120 years, Portwest's product designers have been developing a deep understanding of the safety needs of workers across many industries. This understanding has enabled them to create industry-focused safety wear solutions tailored to the specific risks faced by professionals across a multitude of industries, allowing workers to perform at the height of their ability.

HEAD PROTECTION

The rapidly expanding Portwest head protection range aims to benefit wearers by combining the most up-to-date styles with the highest standards in head protection, irrespective of job or location. A wide selection of compatible accessories is also available.

Head Protection

- Specially designed for working at height
- Electrical insulation up to 1000V AC or 1500V DC (EN50365)
- Unvented helmet shell for safe use with electrical applications
- 6-point textile suspension harness for enhanced wearer comfort and safety
- Size adjustable headband via wheel ratchet system
- Chin strap included

- Three times stronger than standard nitrile
- 7mm/0.18mm thickness for exceptional strength
- 240mm length
- Highly durable synthetic nitrile compound
- Retail box which aids presentation for retail sales
- Ideal for auto repair, construction and other sectors
- Acceptable quality limit (AQL) 1.5
- This product is sold in inner boxes
- CE certifie
- CE foodsafe

100 gloves per box.

Materials: Nitrile

KNEE PROTECTION

All Portwest knee pads use premium high density material to provide the user with the best protection possible for their knees no matter what the hazard.

Knee Pads

- Ergonomically designed and tested straps ensure no pinching to the back of the wearers leg
- A strong and durable outer shell makes for a long lasting tough knee pad
- Silicone gel inserts protect joints and ensure great wearer comfort

Super Gel Knee Pads

0352	Colour
KP30BKR	Black

- Tough abrasion resistant PVC shell
- Thick silicone gel adapts to your kneecap
- Ergonomically designed and tested straps ensure no pinching to the back of the wearers leg

Ultimate Gel Knee Pads

0352	Colour
KP40BKR	Black

- Lightweight EVA foam cushioning
- Reduces knee and back strain
- Integral carry handle

Kneeling Pad

0352	Colour
KP05BKR	Black

LUGGAGE

The essential collection of versatile luggage pieces, suitable for travel, work or general everyday use. Robustly constructed with strong materials.

Duffle Bag

- Ideal for carrying tools, equipment or for use as a travel bag
- Two zipped compartments
- Robust base panel
- Adjustable shoulder strap for added comfort
- 65cm x 25cm x 35cm
- 60 litres

0352	Colour	Size Litres
B960BKR	Black	60

Boot Bag

- Generous storage to fit most work boots
- Carry handle for added convenience
- Integrated changing mat
- 35cm x 30 cm x 12 cm
- 12 litres

0352	Colour	Size Litres
B914BKR	Black	12

Rucksacks

- Reflective safety elements and reflective tape for added visibility
- Pull string front provides extra storage
- Two mesh water bottle pockets double as multi-use pockets
- 38cm/15" laptop sleeve
- Padded mesh back panel and a breathable lumbar panel for comfortable ventilated support
- 47cm x 30cm x 19.5 cm
- 25 litres

PW3 Hi-Vis Rucksack

0352	Colour	Size Litres
B955YER	Yellow	25

- Padded double straps for added support
- Reflective tape for increased visibility
- Padded back panel for wearer comfort
- Phone pocket
- 28cm x 21cm x 43 cm
- 25 litres

INDUSTRIAL CLEANING EQUIPMENT

Hand Wet Wipes

The moist wipes require no additional liquids as the low alcohol base anti-bacterial cleaning solutions helps clear all stains and marks leaving the skin cleansed as well as dry thanks to rapid evaporation. Each tub contains 150 perforated sheets.

Degreasing Wipes

0212	Quantity
IPGM	150 Wipes

A powerful alcohol based cleaning solution that quickly gets to work on paint and related stains cleaning fast. Each tub contains 150 perforated sheets.

Paint & Mastic Removing Wipes

0212	Quantity
IPGP	150 Wipes

In today's food preparation areas, hygiene guidelines are tough and the risk of cross contamination through neglecting these requirements puts many people at risk. With the surface wipes, killing off all potentially lethal bacteria from passing from one product to another.

Sani Safe Disinfectant Wipes

0212	Quantity
IPSS4	200 Wipes

These handy wipes are an ideal size to keep handy and give off a pleasant fragrance that also identifies when the product is actively killing off bacteria.

Office Wipe

0212	Quantity
BA035	150 Wipes

Non-woven Dry Wipes

A strong, low lint, solvent resistant, absorbent cloth. Supplied in a handy dispenser box, suitable for all applications.

Super Strong Low Lint Rag Replacement

0212	Quantity
DWTWDP	150 Wipes

An industrial 2 ply centre feed roll.

Wiper Rolls

0212	Length Metres	Quantity
CF14BE	140	6 Rolls

Authorised Distributor and OEM Partner for Gates Hydraulics

Flotec holds the distinctive title of Gates Hydraulics OEM Partner, marking the significant high-quality production of our hydraulic hose assemblies.

Fully tested and warranted Hose Coupling and Swaging machines are available from stock. We further offer self-assembly packages, with free survey and full certified training.

Make your own hose assemblies with Flotec

Flotec are offering you the chance to loan a Gates self-assembly machine for **FREE** – all you must do is buy the hoses and fittings from us to be used with the machine.

Gates self-assembly machinery range covers all your needs from workshops to mobile service operations and on-site field crimping.

Shop Online

Key Benefits:

- Order by 10pm and receive next working day
- Bespoke pricing
- View orders, backorders, balance, and order history
- Upload spread sheets for easy order process
- See a comprehensive range of current stock

Shop online now by visiting floteconline.com
