

DO NOT RE-END

HOSE

- We are members of the Bfpa Approved Hose Assemblies Scheme
- Our company is committed to the highest H&S standards
- Our company would be legally liable if the assembly fails

WE DO NOT RE-END HOSE BECAUSE...

- Re-ended hoses do not meet Industry Standards
- Re-ended hoses increase the risk of injury or even death to machine operators and bystanders
- Re-ended hoses increase the risk of failure of the hose assembly
- Re-ended hoses are not covered by hose manufacturer's warranty
